Settlement and Protection Profiling

Nayapara RC Teknaf, Cox's Bazar, Bangladesh

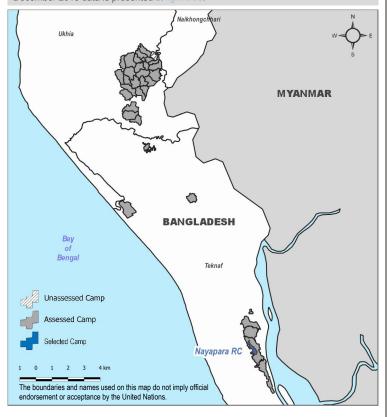

July 2019 and December 2018 comparison

Background and methodology

Since August 2017, an estimated 741,000 Rohingya refugees have fled from Myanmar into Cox's Bazar, Bangladesh, increasing the total number to around 910,000.1 The majority are reliant on overstretched humanitarian assistance, services, and resources including shelter, food, clean water, and sanitation. Information on Rohingya households, particularly in relation to protection and access to services, is in need of regular updating due to the variation in service provision across settlements, challenges presented by the monsoon and cyclone seasons, and the evolving social and contextual dynamics within each settlement. Therefore, REACH, in partnership with UNHCR, continued Round 5 of the Settlement and Protection Profiling (SPP) Assessment in order to support evidencebased monitoring and analysis of cross-cutting protection issues in Rohingya refugee settlements.

The fifth round of SPP was conducted in 33 out of 34 refugee camps and settlements in Cox's Bazar District from 25 June - 5 August, 2019. Surveys were conducted with households selected through simple random sampling of shelter footprints. Translators Without Borders supported with translating the form into Rohingya. Results of this assessment are generalisable to the population of each camp with a 95% confidence level and 10% margin of error. This factsheet presents an analysis of data collected in Nayapara RC, where 113 households were surveyed.

Where relevent, findings are compared to those of SPP Round 4 which took place from 25 November - 17 December, 2018.2 July 2019 data is presented in dark blue, and December 2018 data is presented in

3. For definitions of key terms relating to special needs and disability, refer to UNHCR "Guidance on the Use of Standardized Specific Needs Codes" https://bit.ly/2GnJE0h.

4. For this round of data collection, disability was measured at the household level using the Washington Group Short Set of questions on disability. According to this methodology, 'disability' is determined as anyone in the household having at least 'a lot of difficulty' following six domains: walking, seeing, hearing, cognition, self-care, and communication.

5. Respondents could give up to three answers

Settlement and Protection Profiling Nayapara RC

Three most frequently reported perceived risks faced by individuals in the camp^{6,7}:

| July 20 | 19 | 1 | M | en | | Dec 2018 |
|---------|----------------------------|---------|---|------------|---------------------|-------------|

of households would report if they witnessed an incident of 81% child abuse, neglect, or exploitation8

of households reported being satisfied or very satisfied with the community watch groups in their area of the camp^{8,10,11}

73% of households reported feeling safe in their shelter⁸

- 6. Respondents could give up to three answers
- 7. These results are based on the respondent's subjective perception of risks in the camp, and not the actual number of security incidents.
- 8. Round 5 data only. These indicators were not included in SPP Round 4
- 9. Respondents could give multiple answers.
- 10. This number is a combination of households that reported 'satisfied' and 'very satisfied'.
- 11. This question was asked to a subset of 82 households that reported a community watch group in their area. 12. This question was asked to a subset of 63 households that contained children under 5.
- 13. Findings on specific issues are reported as a percentage among households who report any issues accessing
- 14. In July 2019, this question was asked separately for female and male household members. In December 2018, it was asked once for the household in general.

Shelter and Non-Food Items (NFIs)

% of households reported their main source of fuel:

July 2019 Dec 2018

99% of households reported cooking inside their shelter 97%

88% of households reported living in lockable shelters 96%

Three most frequently reported forms of support needed to address household shelter needs¹⁵:

| July 2019 | | | | Dec 2018 |
|-----------|-------------------|----------|---------------|-------------|
| 57% | Solar light | 0 | Fuel | 78 % |
| 53% | Cooking items | 2 | NFIs | 52 % |
| 43% | Shelter materials | B | Cooking items | 48% |

🕏 Health

26% of individuals reported having an illness serious enough to require medical treatment in the 30 days prior to data collection¹⁶

Three most frequently reported challenges in accessing NGO clinics in the camps¹⁷:

| July 2019 | • | | | Dec 2018 |
|------------|----------------------|---|-----------------------|----------|
| 55% | Crowded | 0 | Treatment unavailable | 74% |
| 46% | Supplies unavailable | 2 | Supplies unavailable | 71% |
| 22% | None | 3 | Expensive treatment | 48% |

households reported being visited by a community health worker in the two weeks prior to data collection¹⁸

- 15. Respondents could give up to three answers.
- 16. Respondents were asked to report information for each individual in their household. The denominator for this indicator is all individuals
- 17. Respondents could give multiple responses.
- 18. Round 5 data only. These indicators were not included in SPP Round 4.
- 19. In July, this question was asked only to households with children under the age of 18. In December 2018, it was asked to all households.
- 20. This number is a combination of households that reported 'satisfied' or 'very satisfied'.

Education

74% of households reported being satisfied or very satisfied 50%

with the education available in the camps 19,20

Three most frequently reported education priorities for children^{16,19}

| 65% | Supplies | O | Better teachers | 47% |
