

Heliwa IDP Settlements Overview

Mogadishu, Banaadir, Somalia
January 2016

Somalia Displacement Crisis

Humanitarian Aid
and Civil Protection

Background and Methodology

This factsheet presents preliminary findings from an assessment of informal settlements where Internally Displaced Persons (IDPs) reside in Mogadishu. As there are no formal IDP settlements within Somalia, settlements are interspersed with host community members, refugees, economic migrants, etc. This factsheet highlights only the findings from IDP, economic migrant and host community households within the settlements. 18 settlements were assessed between August and December 2015, as part of a joint IDP profiling exercise.

This factsheet presents findings from Heliwa, one of 16 assessed zones of IDP settlements. Areas were selected based on geographic proximity and relevant umbrella structures. The zonal distributions should in no way be seen as formal designations of administrative boundaries. Information is based on a full household enumeration and 43 facilities mapped. Facility mapping was conducted by REACH

through direct observations, facility management interviews and collection of GPS coordinates. Household data was collected with support from IOM, DRC, NRC, UNHCR, Save the Children, HINNA, Elman, DBG, DMA, BRA, UNICEF, UNOCHA, REACH, SSWC, Mercy Corps, Concern and ORDO.

The information presented in the factsheet was collected on behalf of the humanitarian community in order to better understand the needs, vulnerabilities and intentions of IDPs in these communities. Indicators measured were chosen in coordination with relevant clusters, with targets according to minimum humanitarian standards. This factsheet should be read together with factsheets for the other assessed zones and is accompanied by a profiling report produced by JIPS and the Somalia Protection Cluster.

Settlement perimeters in Heliwa
