Site Overview Key WASH Infrastructure

f of individuals:	7,180	# of latrines:	555
f of households:	1,735	(% functional and safe ²):	(85%)
of shelters:	1,797	# of improved water sources: ³ (% functional):	209 (87%)

of washrooms:

441

Location Map

Water Access

Three most commonly identified types of water points, by functionality:

per shelter:

67%	Handpump / tube well	82%	18%	
30%	Water tank	95%	5%	Functional
3%	Tapstand	100%	0%	Non-functional

Key sectoral standards:	Target	Current Round	Achievement
# of people per functional improved water source	max. 250	40	
% of shelters with at least 1 functional improved water source³ within 200m	100%	100%	
% of functional improved water sources with no latrine within 10m	100%	59%	

Sanitation

Latrine characteristics: **Functionality and safety**

85% Functional (non-full) and safe² 15% Non-functional and / or unsafe

Safe²

Unsafe

Functionality

Safety

Lighting

Key sectoral standards:	Target	Current Round	Achievement
# of people per functional (non-full) and safe latrine ²	max. 20	15	
# of people per functional (non-full) latrine	max. 20	14	
# of people per safe latrine ²	max. 20	14	
% of shelters with at least one functional and safe latrine ² block within 50m	100%	99%	

Targets based on long term WASH Sector Standards / Indicators for the Rohingya response, Sphere Minimum Standards as well as Department of Public Health and Environment (DPHE) Minimum Standards. Minimum standard/indicator reached, 75%-99% minimum standard/indicator reached, 50-74% minimum standard/indicator reached, indicator reached, Less than 50% of minimum standard/indicator reached.

^{1.} REACH enumerators conducted a full sweep of all sites and camps (as per boundaries defined by ISCG) and used an Open Data Kit (ODK) form to log all key infrastructure observed during this sweep, with further REACH endinerators conducted a four sweep or all sites and camps (as per boundaries de details to be logged for WASH infrastructure.
 Safe refers to fully covered latrines (i.e. a latrine with four walls, a roof and a lockable door).
 This includes handpumps / tube wells, tapstands and water tanks.
