Settlement and Protection Profiling Round 3

## Introduction

This profile provides a multisector overview of conditions in the Rohingya refugee camps in Cox’s Bazar District, Bangladesh. Data for the findings were collected in 29 camps from 7-27 March 2018 (Round 3a) and 15-20 April 2018 (Round 3b) as part of the Settlement and Protection Profiling exercise funded by UNHCR and implemented by REACH. These profiles specifically look at conditions for those families who have arrived since 25 August 2017. Key indicators provide contextual and operational findings at the household level. The full dataset, with indicators presented by theme is available on the UNHCR website and REACH Resource Centre.

## Coverage Map

## Methodology

Primary data were collected through household surveys of families who have arrived since 25 August 2017, randomly sampled from the RRRC-UNHCR Family Counting dataset. The sampling was designed so findings are statistically representative and can be generalised at the site level with at least a 95% confidence level and a 10% margin of error. Data for the demographics and the People With Specific Needs (PWSN) section are taken from the Family Counting dataset provided by UNHCR and presented to provide household data for evidence-based programming. Additionally, all shelter footprint data, which was used to calculate shelter and camp population density, was provided by OpenStreetMap (OSM).

Settlement and Protection Profiling Round 3

## Key Camp Information

**Camp management:**  
UNHCR / BRAC

**Population:**  
18,743 individuals<sup>1</sup>  
3,760 families<sup>1</sup>

**Shelters:**  
5,056

**Camp area:**  
0.5 km<sup>2</sup>

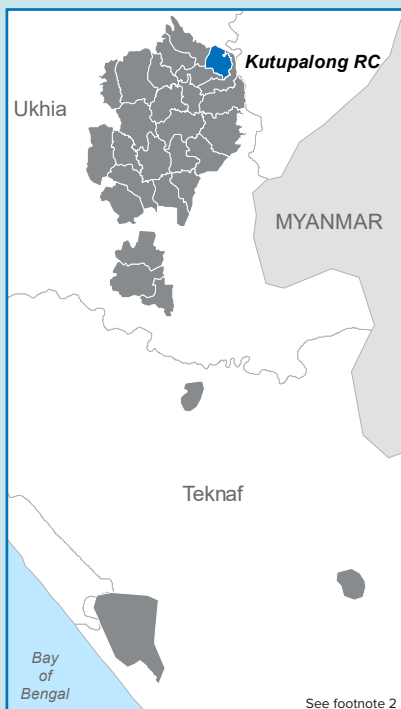

**Population density:**  
69,887 individuals / km<sup>2</sup>

**Average covered area per person:** 3.48 m<sup>2</sup>

**Average camp area per person:** 14.3 m<sup>2</sup>

**Shelter density:**  
10,191 shelters / km<sup>2</sup>

**GPS coordinates:**  
21.18974, 92.15426

## Protection

### Protection, safety and security

#### Top ten most commonly reported protection and safety concerns:<sup>3</sup>

None	41%	Children getting lost	13%
Human trafficking	26%	Site problems	9%
Crime	25%	Harassment	6%
Natural disasters	15%	GBV	3%
Movement restrictions	14%	Lack of documentation	2%

#### Top ten most commonly reported interventions needed:<sup>3</sup>

More police / military	34%	Legal assistance	9%
Nothing	34%	Fencing	6%
Site improvement	21%	Locks	6%
Permission to move freely	18%	Support to PWSN	5%
Warning systems	13%	Documentation	2%

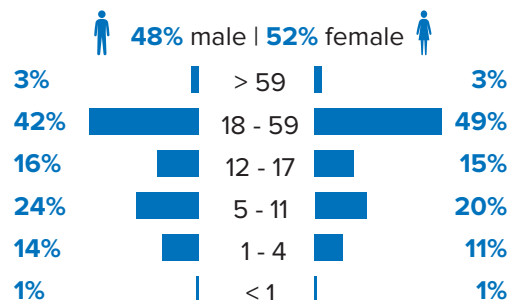

### People with specific needs (PWSN)

#### Proportion of individuals with specific needs:<sup>1,4</sup>

Medical condition	21%	Separated children	2%
Single mother	15%	Elderly with child	1%
Persons with disability	9%	Unaccompanied child	0%
Elderly at risk	3%	Single father	0%
Child-headed family	2%		

## Demographics<sup>1</sup>

### Age and gender breakdown

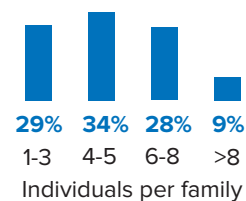

- 51% of individuals are under 18.
- 78% of individuals are women and children.

### Period of arrival

17% of families reported arriving 25 August 2017 or later.

### Family size

#### Number of individuals per family:

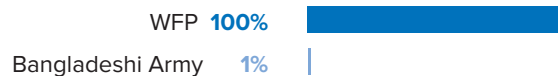

- There is an average of 5 individuals per family.

## Food Security

### Food assistance

- 93% of families reported accessing food assistance in the last month, of these the common reported sources were:<sup>3</sup>

### Consumption-based coping strategies

#### Top three most common consumption-based coping strategies:<sup>3</sup>

### Infant nutrition

- 74% of families reported receiving a supplementary feeding ration for children under 5.
- 6% of families reported receiving a breast-milk substitute (BMS) donation.

1 Data provided by the RRRC-UNHCR Family Counting exercise.

2 The boundaries and names used on this map do not imply official endorsement or acceptance by the United Nations

3 Respondents could select multiple items from a list.

4 Self-reported and not verified through medical records.

## Water, Sanitation and Hygiene

### Water sources

Reported most common sources of water:

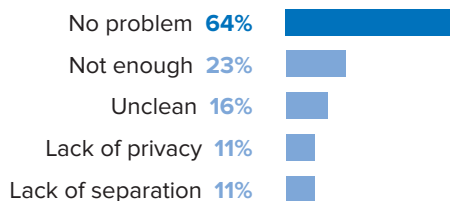

### Water treatment

- 9% of families reported treating water
- 0% of families reported using chlorination tablets

### Latrines

Top five reported issues with latrines:<sup>3</sup>

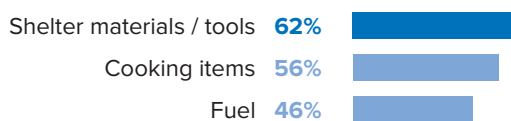

### Hygiene practices

- 59% of families reported having a designated shower or bath.
- 72% of families reported having access to soap.
- 82% of families reported using public latrines.

## Non-Food Items (NFIs)

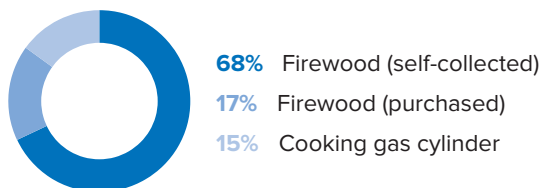

Reported top three most needed NFI items:<sup>3</sup>

- 62% of families received NFI kits since arrival

### Fuel

Reported most common sources of fuel:

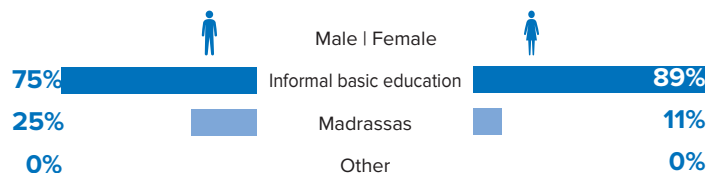

- 89% of families reported cooking inside their shelter

<sup>3</sup> Respondents could select multiple items from a list.

## Education

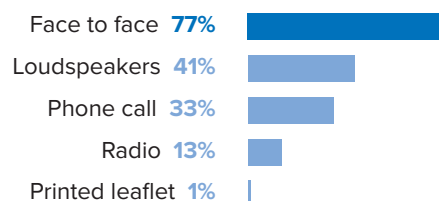

### Providers of education services

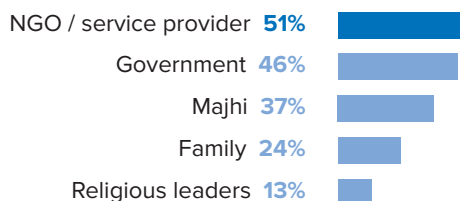

## Information and Communication

### Sources of information

Top five reported preferred means of communication:<sup>3</sup>

Top five reportedly most trusted sources of information:<sup>3</sup>

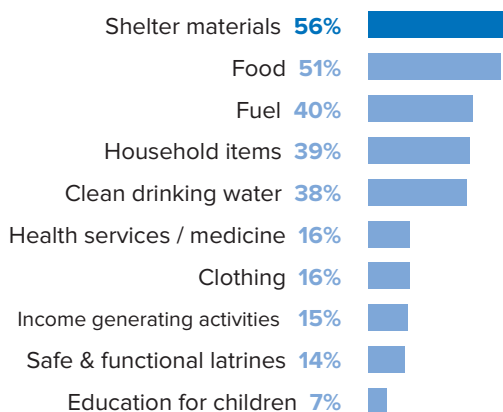

## Shelter

- 22% of families reported living in shelters made of bamboo and plastic sheeting.
- 93% of families reported living in lockable shelters.
- 60% of families reported living in shared shelters.

## Priority Needs

Reported top ten priority needs:<sup>3</sup>

## Protection

### Protection, safety and security

#### Top ten most commonly reported protection and safety concerns:<sup>3</sup>

Natural disasters	27%	Human trafficking	19%
Children getting lost	26%	Crime	18%
Animal attack	25%	Site problems	18%
None	23%	Lack of documentation	14%
Movement restrictions	21%	GBV	5%

#### Top ten most commonly reported interventions needed:<sup>3</sup>

More police / military	36%	Documentation	15%
Warning systems	36%	Nothing	15%
Site improvement	29%	Legal assistance	14%
Permission to move freely	23%	Transparent governance	7%
Locks	20%	Fencing	5%

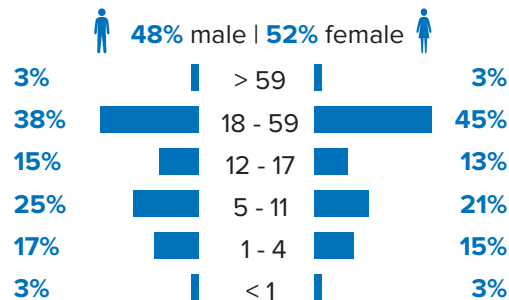

### People with specific needs (PWSN)

#### Proportion of individuals with specific needs:<sup>1,4</sup>

Single mother	16%	Medical condition	3%
Elderly at risk	5%	Elderly with child	2%
Persons with disability	4%	Single father	1%
Child-headed family	3%	Unaccompanied child	1%
Separated children	3%		

## Demographics<sup>1</sup>

### Age and gender breakdown

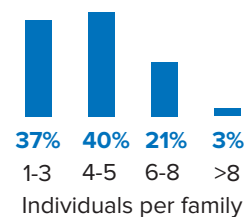

- 56% of individuals are under 18.
- 80% of individuals are women and children.

### Period of arrival

91% of families reported arriving 25 August 2017 or later.

### Family size

#### Number of individuals per family:

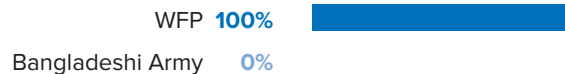

- There is an average of 4.4 individuals per family.

## Food Security

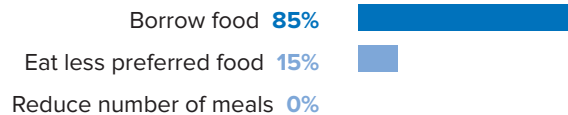

### Food assistance

- 99% of families reported accessing food assistance in the last month, of these the common reported sources were:<sup>3</sup>

### Consumption-based coping strategies

#### Top three most common consumption-based coping strategies:<sup>3</sup>

### Infant nutrition

- 64% of families reported receiving a supplementary feeding ration for children under 5.
- 11% of families reported receiving a breast-milk substitute (BMS) donation.

1 Data provided by the RRRC-UNHCR Family Counting exercise.

2 The boundaries and names used on this map do not imply official endorsement or acceptance by the United Nations

## Protection

### Protection, safety and security

#### Top ten most commonly reported protection and safety concerns:<sup>3</sup>

Natural disasters	59%	Lack of documentation	9%
Animal attack	45%	Movement restrictions	7%
Children getting lost	40%	Crime	5%
Site problems	28%	Human trafficking	5%
None	11%	Harassment	4%

#### Top ten most commonly reported interventions needed:<sup>3</sup>

Warning systems	64%	Permission to move freely	13%
Site improvement	51%	Nothing	10%
Legal assistance	22%	Fencing	7%
More police / military	19%	Transparent governance	7%
Family unification points	15%	Documentation	6%

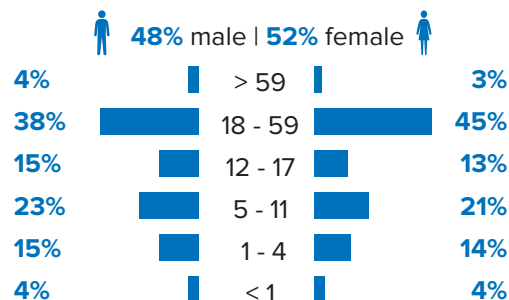

### People with specific needs (PWSN)

#### Proportion of individuals with specific needs:<sup>1,4</sup>

Single mother	15%	Separated children	2%
Elderly at risk	5%	Elderly with child	2%
Medical condition	4%	Single father	1%
Persons with disability	3%	Unaccompanied child	1%
Child-headed family	2%		

## Demographics<sup>1</sup>

### Age and gender breakdown

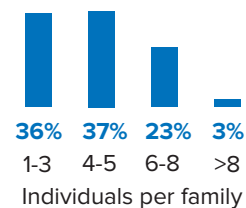

- 55% of individuals are under 18.
- 80% of individuals are women and children.

### Period of arrival

93% of families reported arriving 25 August 2017 or later.

### Family size

#### Number of individuals per family:

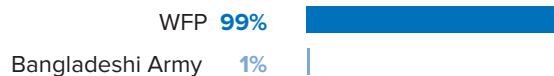

- There is an average of 4.4 individuals per family.

## Food Security

### Food assistance

- 95% of families reported accessing food assistance in the last month, of these the common reported sources were:<sup>3</sup>

### Consumption-based coping strategies

#### Top three most common consumption-based coping strategies:<sup>3</sup>

### Infant nutrition

- 57% of families reported receiving a supplementary feeding ration for children under 5.
- 6% of families reported receiving a breast-milk substitute (BMS) donation.

1 Data provided by the RRRC-UNHCR Family Counting exercise.

2 The boundaries and names used on this map do not imply official endorsement or acceptance by the United Nations

3 Respondents could select multiple items from a list.

4 Self-reported and not verified through medical records.

## THANK YOU

UNHCR's humanitarian response in Bangladesh is made possible with the generous support of major donors who have contributed unrestricted funding to UNHCR's global operations, and thanks to donors who have generously contributed directly to UNHCR Bangladesh operations.

UNHCR would like to acknowledge support received in 2017 and 2018 from the people and governments of: Australia, Bangladesh, Canada, Denmark, Estonia, the European Union, France, Germany, Iceland, Italy, Japan, the Republic of Korea, the Netherlands, Norway, Qatar, the Kingdom of Saudi Arabia, Slovenia, Spain, Sri Lanka, Sweden, Switzerland, Thailand, the United Arab Emirates, the United Kingdom, and the United States of America.

UNHCR is grateful for the additional support received from many individuals, foundations, and companies worldwide, including IKEA Foundation, Kuwait Finance House, Latter-Day Saints Charities, OPEC Fund for International Development, Prosolidar Foundation, Qatar Charity, Rahmatan Lil Alamin Foundation, The Big Heart Foundation, and UPS Corporate.
