<b>REACH Kenya</b>  Actor and Se	rvice Mapping in Kakuma Refugee Camps and Kalobeyei Settlements
Items	Description
Project Background	Kenya is now the second biggest refugee-hosting country in Africa after Ethiopia. The majority of the nearly half a million refugees in Kenya reside in either Dadaab (44%) or Kakuma (40%) camps in the Arid and Semi-Arid Lands (ASALs), with the remaining 16% living in Nairobi and other urban areas of Nairobi. Dadaab refugee complex in Garissa county consists of three camps namely Dagahaley, Ifo and Hagadera, while Kakuma refugee camp in Turkana county consists of Kakuma camp 1, 2, 3, 4, and Kalobeyei integrated settlement village 1, 2, and 3.
	Given the protracted situation of both Dadaab and Kakuma refugee camps; many actors have been providing services since their establishment in 1991 and 1992 respectively. A consolidated refugee camps' database with existing information on the actor agencies and services is however lacking, a gap that REACH intends to fill. This information will provide an updated overview of existing actors and services provided as well as identify the overlaps and gaps in service provision so that these can be addressed.
	Since 2017, REACH in partnership with the Norwegian Refugee Council (NRC) supports multi-sectoral and area-based approaches to interventions in the Dadaab refugee camps and cross-border programming related to Somali refugee returns. REACH conducts assessments to monitor displacement profiles, movements and return intentions, and access to services and assistance amongst Dadaab refugees. Additionally, REACH maps existing infrastructure and services in Dadaab refugee complex and supports information management and capacity building of humanitarian partners.
Primary data collection time period	Primary data was collected through Key Informant Interviews (KIIs) from 18th January to 22nd March 2021
Geographic Coverage	Kakuma refugee camp (Kakuma 1, 2, 3 and 4; and Kalobeyei integrated settlement: village 1, 2 and 3) in Turkana county.
Methodology	REACH conducted KIIs with representatives from previously identified actor agencies. REACH field assistants conducted primary data collection using Open Data Kit (ODK) tool on smart phones, primarily recording the name of the camp, actor's name, sector(s) of intervention and actor's office location. A 3W matrix for Kakuma was developed indicating which actor is doing what, where. In addition, a Kakuma actors' location map and 3W maps of Kakuma refugee camp and Kalobeyei integrated settlement were produced. Following the results of this mapping exercise, an online dashboard is being developed to ease of access to this data by all actors.
Participating Partners	IMPACT, NRC
Data Cleaning Process	Data cleaning was done throughout data collection to ensure the final dataset was of highest quality. For a summary of the types of checks done, please refer to our internal Data Cleaning Minimum Standards Checklist available on this link: https://www.reachresourcecentre.info/toolkit/data-collection-processing/
Contacts	somalia@reach-initiative.org
