

Detailed Site Assessment Buyle site Luuq District, Gedo Region, Somalia

Introduction

While an estimated 2.1 million people live in displacement sites in Somalia¹, existing information on exact locations and site level vulnerabilities is sparse, and existing assessments have been ad-hoc and unharmonised, resulting in low comparability and verification.

The Detailed Site Assessment (DSA) was triggered in coordination with the Camp Coordination and Camp Management (CCCM) Cluster in order to provide the humanitarian community with up-to-date information on location of internally displaced persons (IDP) sites, the conditions and capacity of the sites and the humanitarian needs of the residents.

Target locations for assessment were selected based on needs identified by the CCCM Cluster

Assessed IDP sites in Luuq

and accessibility for data collection.

A grid pattern approach² was applied during data collection to ensure that all IDP sites in the target area were identified. In each site, two key informant (KI) interviews were conducted: one with the site manager or community leader and one with a women's representative to ensure the perspectives of different groups were captured³. KI responses were aggregated to give one response per question per site.

This factsheet presents a summary of Buyle Site profile along with the needs and priorities of IDPs residing in the site. As the data is captured through KIs, findings should be considered indicative only.

Date assessed:

Nov - 2017

Location map

Coordinates: Lat. 3.781, Long. 42.564

1. United Nations High Commissioner for Refugees (UNHCR): Protection & Return Monitoring Network (PRMN), September 2017

2.For each target location, the area was divided into 1km² grids. Enumerator teams then visited each grid to verify whether an IDP site was present. By visiting all grids, teams were able to determine the total number of sites in each location.

3. Where KI responses were significantly divergent, these were verified with the respective KIs with a higher reliability accorded to the response provided by the site manager or community leader.

Funded by European Union Humanitarian Aid

Site Information

Settlement type	Spontaneous site
Estimated number of individuals	600
Estimated number of households	100
Site capacity reached	Yes
Responsible management agency	Community leader
Date when most site residents arrived	Jan - 2017
Site owner	Not known

Protection

Number of vulnerable households:		
Female-headed households	50	
Child-headed households	20	
Elderly individuals ⁴	100	
Unaccompanied children	100	
Individuals with a physical disability	30	
Presence of shared community space	No	
Presence of separate space for women/girls	No	
Presence of child friendly space	No	
Public lighting in the site	No	
Type of landownership	N/A	
Risk of eviction in next three months	No	

WASH

Access to potable water	No
Number of latrines in the site:	
Latrines (mixed)	0
Latrines (male)	0
Latrines (female)	0
Access to handwashing facilities	N/A

Shelter and Non-Food Items (NFIs)

Å→ Displacement

Estimated number of households per displacement group:		
IDPs	100	
Host community/ non-displaced	0	
IDP households arrived in the past 3 months	50	
Most common areas of origin:		
First area of origin	Bakool	
Second area of origin	Bay	
Third area of origin	Gedo	

Food Security

Primary source of food	Household production
Food distributions	None
Access to a food market	No

Tealth and Nutrition

Most common health issue(s) reported in the site:		
1. AWD / Cholera		
2. Malaria		
3. N/A		
Access to healthcare services	No	
Average walking time to the nearest health service		
Women give birth in the site		
Access to nutrition services	No	
Average walking time to the nearest nutrition service N/A		
Access to nutrition services: No		

Education

Education services available	No
Average walking time to the nearest school	N/A
Education facilities available to residents in the site⁵:	
1. N/A	
2. N/A	

Most common shelter types in the site⁵:

2. N/A

3. N/A

Electricity available in the site

Access to a NFI market

Average walking time to the nearest NFI market

Perceived safe access to NFI market

3. N/A

Communication

Three most trusted sources of information⁵: 1. Friends, neighbours and family 2. Religious leader 3. Community leader Most commonly spoken language Somali Maay

4. More than 60 years old. 5.Key informants could select multiple responses.
