

South Sudan | Joint Market Monitoring Initiative (JMMI)

1 - 7 February 2025

Market Overview

INTRODUCTION

With the aim of informing cash-based interventions and to better understand market dynamics in South Sudan, the **Joint Market Monitoring Initiative (JMMI)** was initiated by the South Sudan Cash Working Group (CWG) in August 2019. The initiative is guided by the JMMI Technical Working Group, led by REACH, and supported by the CWG members. The initiative is funded by the Foreign, Commonwealth & Development Office (FCDO). Marketplaces across South Sudan are assessed on a monthly basis. In each location, field teams record prices and other market indicators through trader interviews. This factsheet presents an overview of prices for key foods and non-food items (NFIs) in the assessed areas, as well as the costs associated with key elements of the **Multi-Sector Survival Minimum Expenditure Basket (MSSMEB)**.

Market Functionality Score (MFS)

The Market Functionality Score (MFS) is a method of classifying markets based on their level of functionality. The MFS is divided into five dimensions:

- **Accessibility (25%):** physical and social access to markets
- **Availability (30%):** ability of markets to consistently supply core commodities
- **Affordability (15%):** financial access to markets and price volatility
- **Resilience (20%):** vulnerability of supply chains and ease of restocking
- **Infrastructure (10%):** state of markets' physical and financial infrastructure

- 17 Participating agencies⁵
- 40 Assessed locations
- 711 Key informant interviews (KIIs)
- 58 Assessed marketplaces
- 34 Assessed commodities

MARKET FUNCTIONALITY SCORE (MFS), BY LOCATION

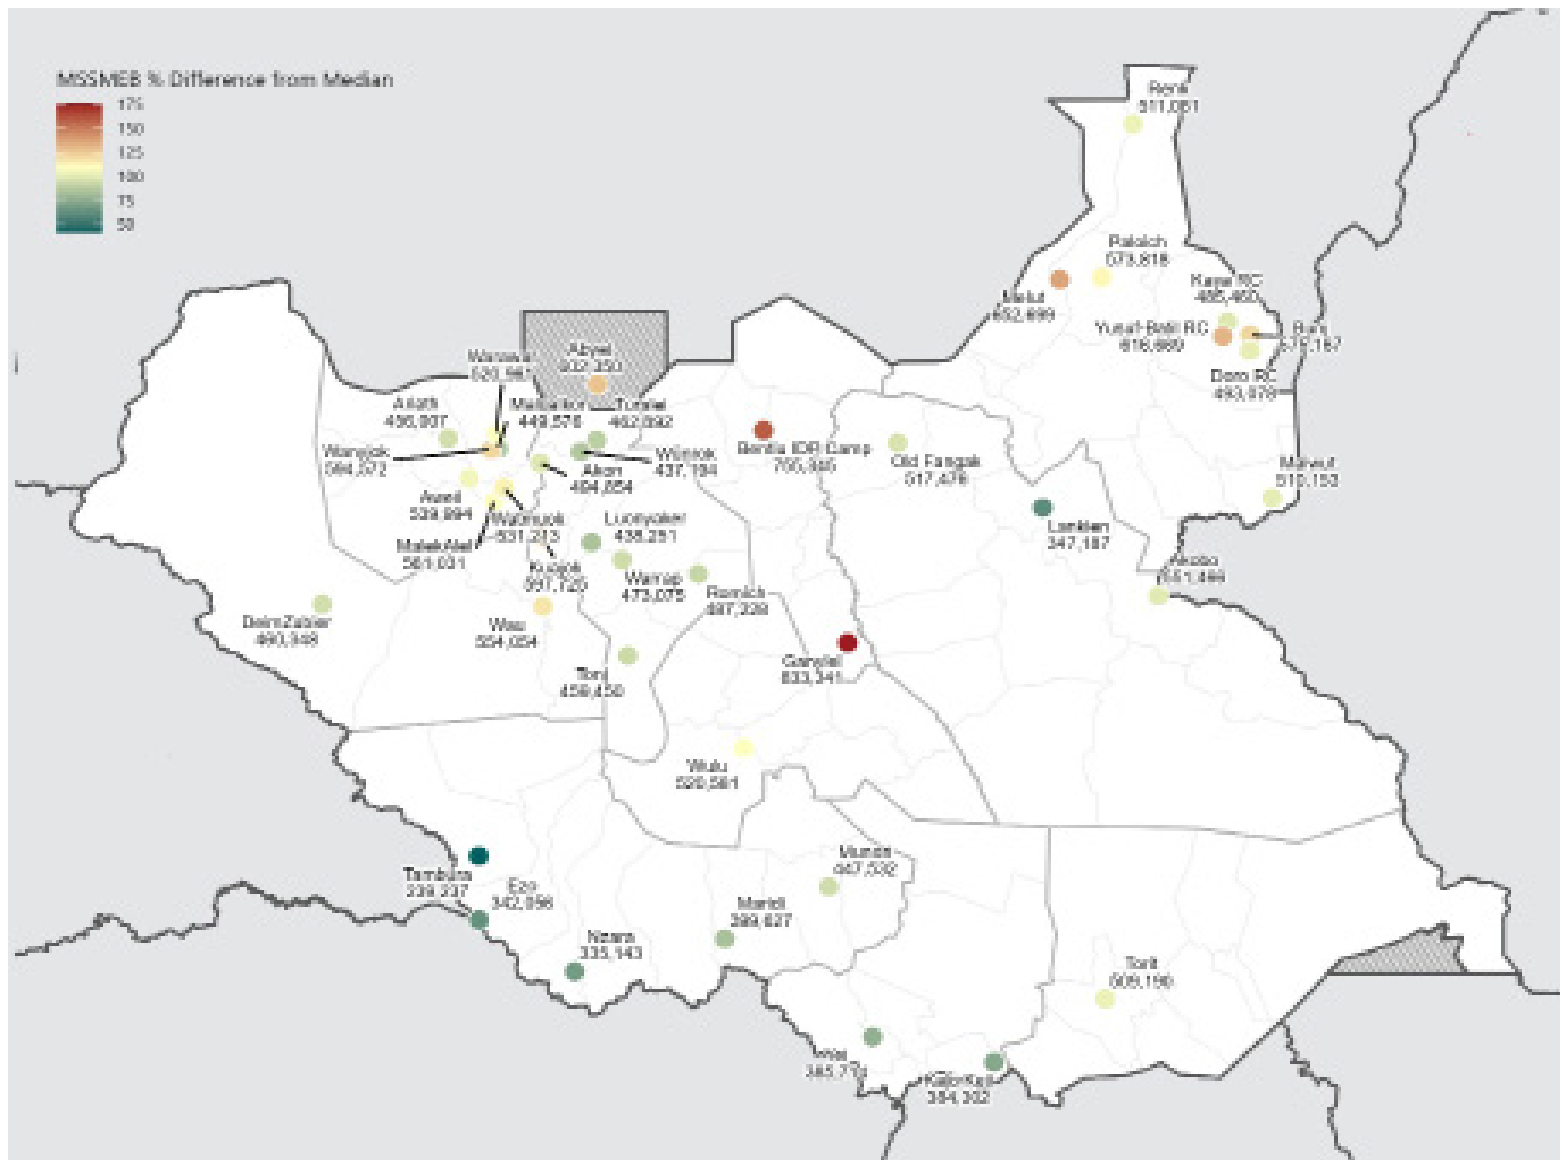

* The Abyei Region and Ilemi are shaded to acknowledge their status as disputed territories.

KEY FINDINGS

- Between January and February 2025, **the median cost of the MSSMEB increased by 4%, while the food basket increased by 11%**. The increase in **MSSMEB** costs is primarily driven by price increase for essential food items such as cooking oil (11%), sorghum grain (5%), and beans (3%).
- The highest **MSSMEB** prices were recorded in **Ganyele**, and **Bentiu IDP camp, Unity state**.
- Since January 2025, **Abyei region** has experienced the highest monthly increase, with the **MSSMEB** rising by **57%** and the **food basket** soaring by **93%**. **Wanyjok** experienced a **42%** increase in the **MSSMEB** and a **50%** rise in the **food basket**, while **MalekAlel** (Aweil South County) saw a **40%** increase in the **MSSMEB** and a **40%** rise in the **food basket**. **Romich** (Tonj East) rose by **35%** in **MSSMEB** and **38%** in the **food basket**. **Ganyele** increased by **35%** in the **MSSMEB** and a **44%** in the **food basket**, and **Maiwut** rose by **30%** in the **MSSMEB** and a **24%** rise in the **food basket**.
- Traders in the assessed locations reported that **roads** from Pibor to Akobo and Tambura to Nagero were closed due to poor road conditions and fear of insecurity along these supply routes.
- The continuous rise in the cost of living in South Sudan could be attributed to several factors, such as the **depreciation of the South Sudanese Pound (SSP)** (mentioned by 29% of surveyed traders) and various restocking challenges, including **poor road conditions** (29%), **border closures** (20%), **movement restrictions** (10%), **high taxation in the marketplaces** (10%) and **bad river route condition** (10%).

MULTI-SECTORAL SURVIVAL MINIMUM EXPENDITURE BASKET COSTS

Cost of MSSMEB¹

MSSMEB Items

Food basket component of the MSSMEB

| | | | |
|---------------|----------|--------|------|
| Cereals | 90 kg | Pulses | 9 kg |
| Vegetable Oil | 6 Liters | Salt | 1 kg |

Other components of the MSSMEB

| | | | |
|------------------|-------|--------------|-------|
| Soap bar (1800g) | 3 pcs | Charcoal | 50 kg |
| Education | 5% | Milling cost | 30 kg |

MULTI-SECTORAL SURVIVAL MINIMUM EXPENDITURE BASKET (MSSMEB)

The Multi-Sectoral Survival Minimum Expenditure Basket (MSSMEB) represents the minimum culturally adjusted group of items required to support a six-person South Sudanese household for one month. The cost of the MSSMEB can be used as a proxy for the financial burdens faced by households in different locations. The MSSMEB's contents were defined by the CWG in consultation with relevant sector leads.

Table 2: Shows all calculated Sector MEBs, total of full SMEB, calculated MPC with 30% buffer and value change percentages from the previous month and reference month (the month the fixed baskets were last calculated).

The Minimum Expenditure Basket (MEB) is defined as an average cost of what a typical household requires to meet basic needs that could be covered entirely or partly through the market. The needs are defined as the critical goods and commodities, utilities and services required by households and recommended by the Sector Groups to ensure survival and minimum living standard.

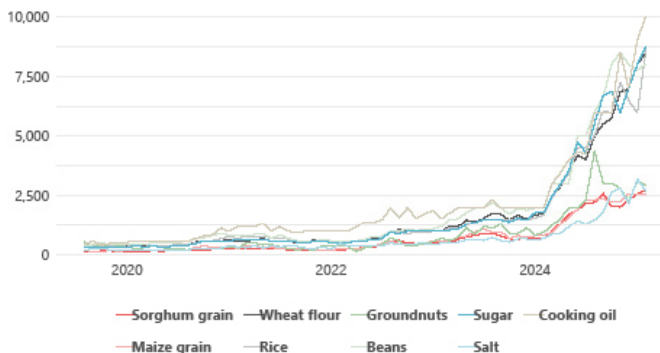

Each sectoral MEB is covered up to a certain percentage: **Food (50%** except priority⁸ counties of Aweil East, Duk, Nyirrol, Pibor and Rubkona where it is **(70%)**, **WASH (20%)**, **Shelter (20%)**, **NFI (20%)**, **Protection/GBV (50%)**, **Health (50%)**, **Energy (30%)**, **Education (30%)**, **Communication (100%)**, **Milling Cost (50%)** and **Transport allowance (20%)**. These are all calculated using the official USD-SSP rate. All calculated Sectoral MEBs are combined to create the full Survival Minimum Expenditure Basket (**SMEB**). The value for the Multipurpose Cash (**MPC**) is the calculated **SMEB** with an additional **30%** buffer for inflation.

PRICES OF MONITORED ITEMS

| Item | Unit | Median price in SSP | Change since Jan 2025 | Change since Feb 2024 | Median price in USD |

NFIs restocking from wholesaler

4 days

Median number of days reported by traders to restock NFIs from out of town

WASH COMPONENT COST OF THE MEB

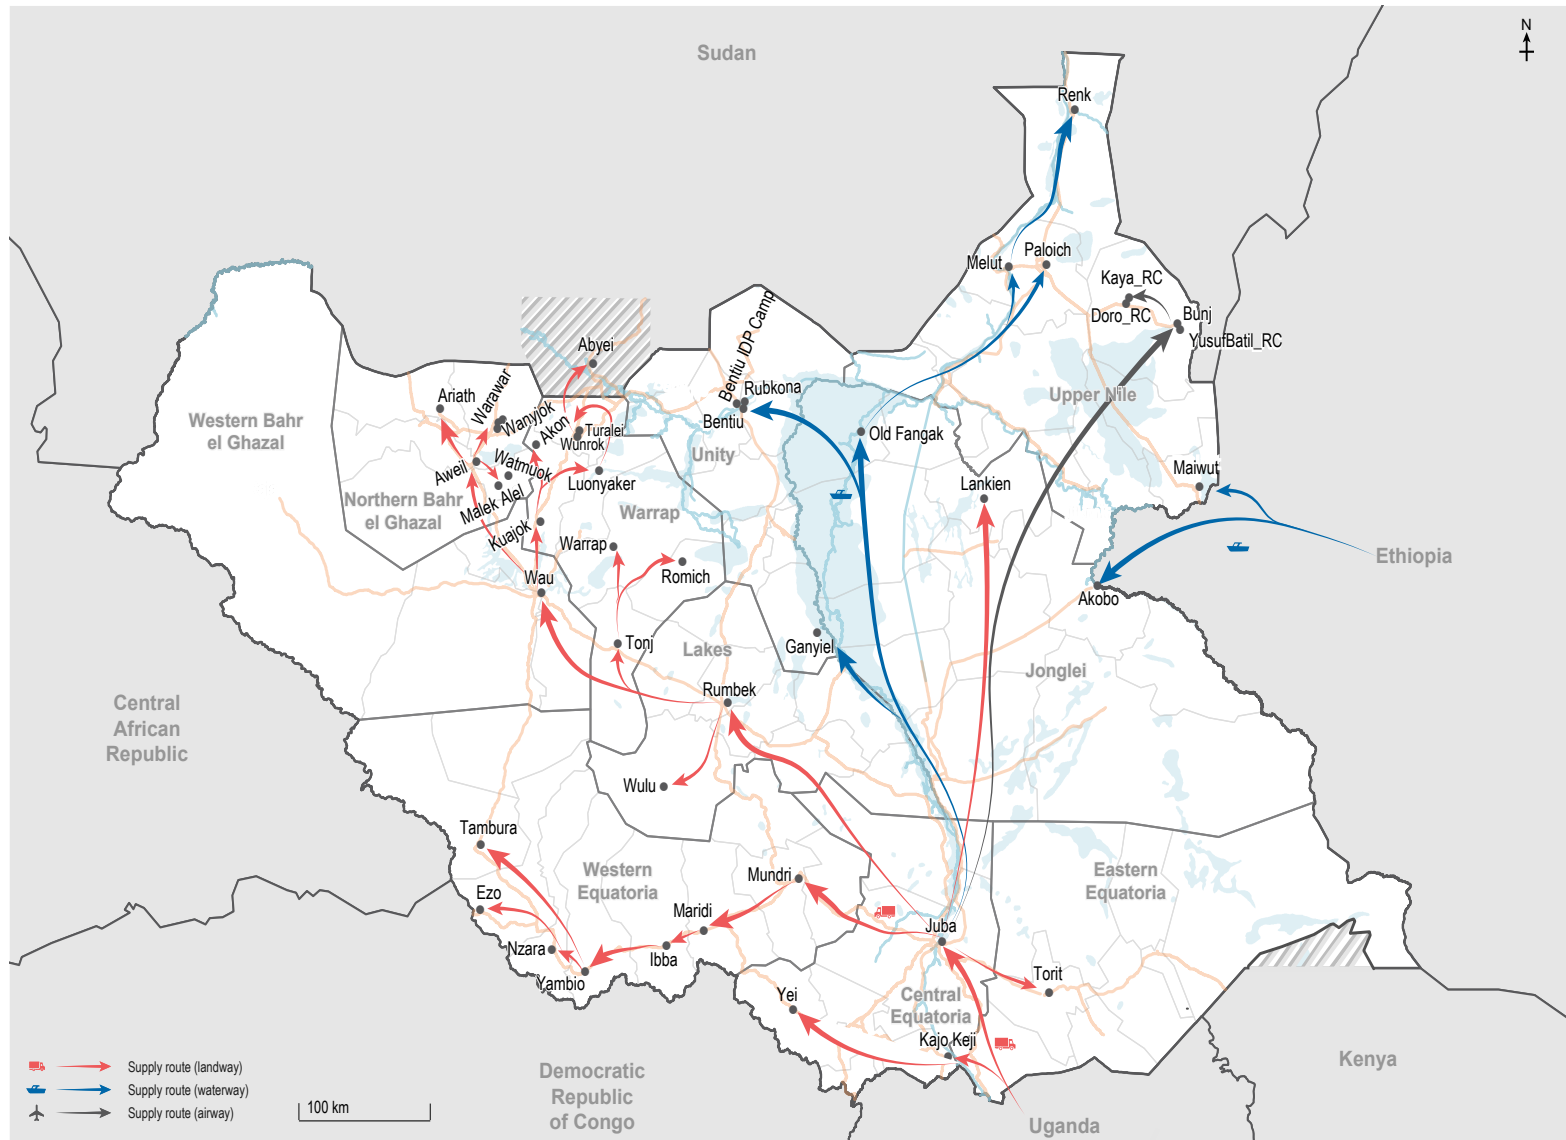

NA: no sufficient price data is available for calculating the WASH component cost of the MSSMEB.

Cost of WASH MEB¹
 38,999 SSP
 8.83USD³

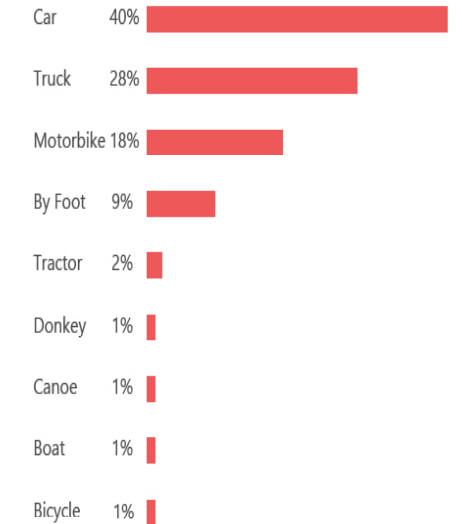

WASH components of the MEB

- Soap bar (1800 g) 3 Pcs
- Jerrycan 1 Pc
- Sanitary pads 2 Pcs
- Plastic bucket 1 Pc

MAIN NFI SUPPLY ROUTES

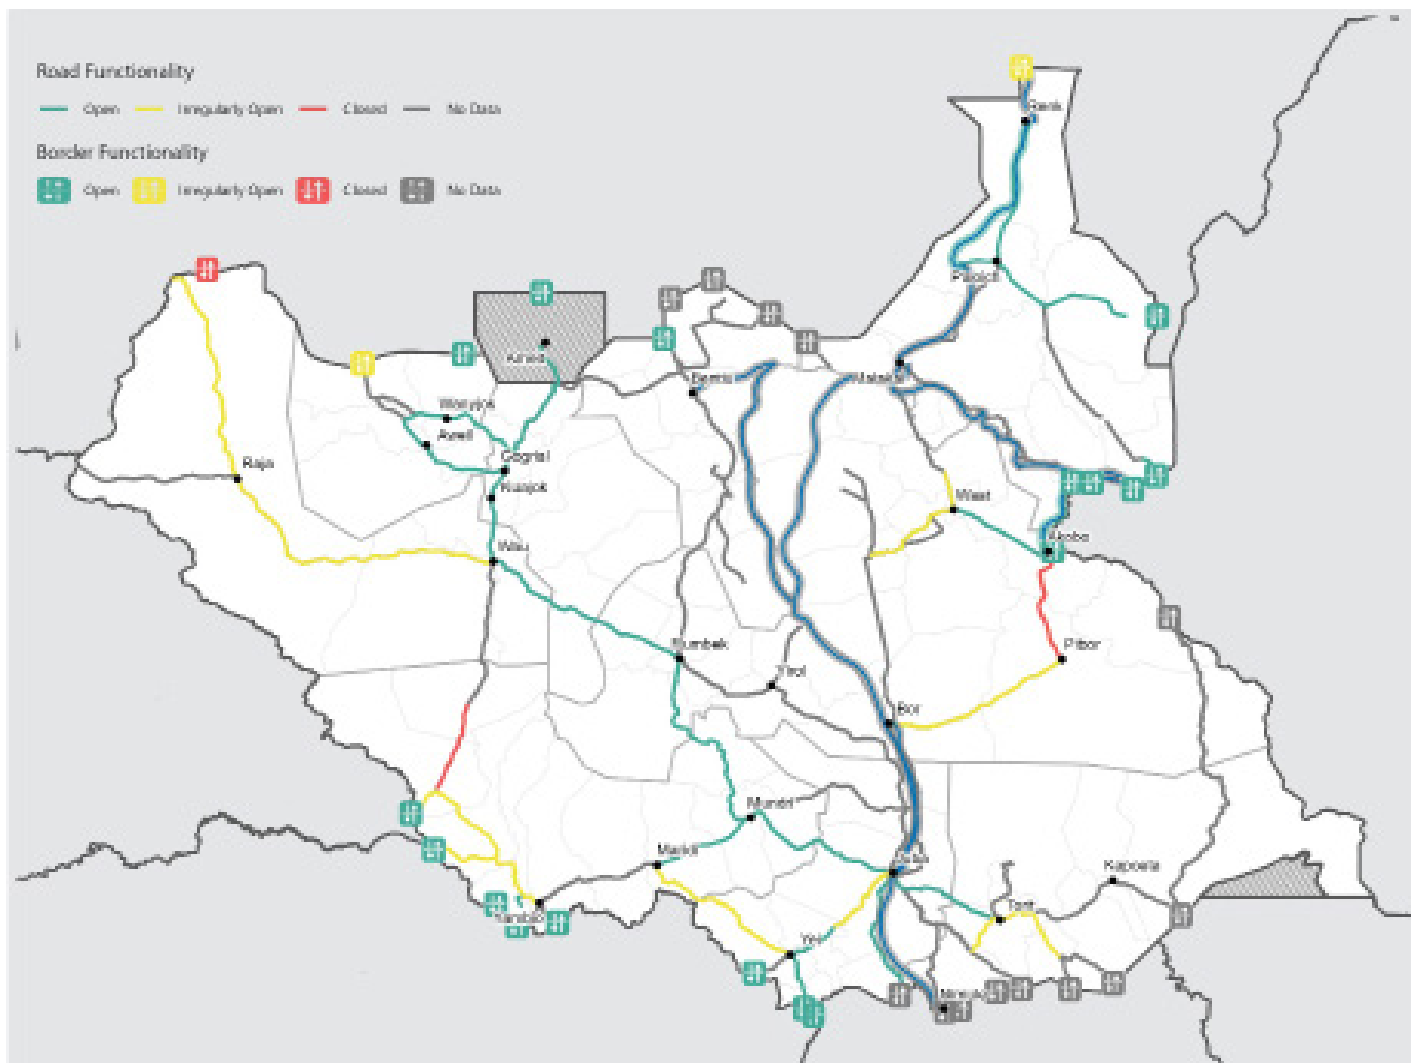

Primary modes of transport for restocking local cereals reported by traders

This map illustrates where vendors reported their market location to be supplied with NFIs. Only the most frequently reported non-food supply market connection is shown for each location. Additional linkages and supply routes may exist.

ROADS, RIVER ROUTES AND BORDER CONDITIONS

The map illustrates the reported road, river route and border crossing conditions at the time of data collection. The results are indicative of trade activity only.

Reported restocking constraints mentioned by the traders*

| | | |
|-------------------------------|-----|---------------------------------|
| No constraints | 38% | <div style="width: 38%;"></div> |
| Poor road conditions | 29% | <div style="width: 29%;"></div> |

How to read a boxplot

* The 'location median' is calculated by first finding the median price of a given item in each assessed location, then taking the median of the resulting set of median prices.

MEDIAN ITEM PRICES PER LOCATION (IN SSP)

na : no stock level data available

Methodology

The JMMI aims to inform market-based programming in South Sudan. Coverage depends on the interest of the partner organisations and their field teams' capacities to regularly collect market data. Locations are added once partners willing to cover them are identified, and their field teams are trained. As the initiative is currently being built up, coverage will likely be expanded in future data collection rounds.

In each assessed location, at least four prices per food, non-food, and livestock items need to be collected from different traders to ensure the quality and consistency of the collected data (2 for currencies and milling costs). In line with the purpose of the JMMI, only the prices of the cheapest available types are recorded for each item.

Partner field teams identify traders to assess based on the following criteria:

- Traders are retailers selling directly to consumers.
- Traders with weight scales are prioritised when recording prices of dry food items.
- Traders need to be representative of the local price level.
- To the extent possible, the same traders are revisited in every data collection round.

The data is collected by field staff familiar with the local market conditions. They are trained on methodology and tools by REACH. Data collection is conducted through the ODK Collect mobile application. The data collection tool is published alongside the dataset every month and disseminated to the humanitarian community. Following data collection, REACH compiles and cleans all partner data, normalizing prices, cross-checking outliers, and calculating the median cost of an MSSMEB in each assessed location.

The median item prices reported in this factsheet are 'location medians', designed to minimise the effects of outliers and differing amounts of data among assessed locations. First, the median prices of all assessed items are calculated within each assessed location; then, REACH calculates the median of this list of medians. All MSSMEB and price index calculations are created using this method.

MSSMEB Calculation

- The cost of the MSSMEB is calculated by multiplying the median price of each item in the respective location by the quantity listed in the table on page 3.

- Sorghum grain prices are used for the calculation of the cereal component, and maize grain prices for areas where maize is more commonly consumed. In areas where both cereals are consumed equally, the price of the cheaper item is used.
- Bean prices are used for the pulse component.
- Rather than the prices of vegetable oil, the prices of the cheapest locally available cooking oil is used.
- For airtime, a monthly cost of 1 USD is assumed, based on the rates of local telecom providers.
- All USD amounts are converted to SSP using the official rates of Central Bank of South Sudan.
- If a component of the MSSMEB is unavailable in a location, the overall median price is used for the calculation of the index.

More details on the methodology can be found in the [JMMI terms of reference \(ToR\)](#).

Challenges and Limitations

- Price data is only indicative for the time frame within which it was collected. Prices may vary between data collection rounds.
- The JMMI data collection tool requests the cheapest available type of each item to be recorded, as availability varies across regions. Therefore, price comparisons across regions may be based on slightly varying products.
- Standardising unit sizes of dry food items is inherently difficult in South Sudan, as many traders sell commodities by volume rather than weight. This may create a measurement error.
- With current coverage, data is mostly collected from main markets, which may not be representative of rural areas.
- As the JMMI continues to expand and is extended to additional locations, the reported changes in the overall median prices may be driven by shifts in coverage rather than actual price changes.

Participating Agencies in Feb

- ACF - Action Against Hunger
- ADRA- Adventist Development and Relief
- AYAD- Africa for Youth Aid and Development.
- Concern World wide
- IOM- international Organization for Migration
- IRC – International Rescue Committee
- IRW - Islamic Relief Worldwide
- MI-Malteser International
- NPA - Norwegian People's Aid
- Oxfam
- RI-Relief International
- Save the Children
- SPEDP - Support for peace and Education Development Programme
- SSRC-South Sudan Red Cross
- STO – Star Trust Organization
- WADA – Wider Aid and Dev't Agency
- YACA – Youth Affairs Centre for Africa

Endnotes

¹ The MSSMEB is calculated in each assessed location as described in the methodology box on the left and only includes key items. The overall MSSMEB is the median across all assessed locations.

² The food basket is composed of only the food items in the MSSMEB. The overall cost of the food basket is the median across all assessed locations.

³ Source: Central Bank of South Sudan (2020, November 1). Retrieved from <https://www.boss.gov.ss>. The rates from 14th February 2025 were used for the calculation of the monthly change and conversion to USD.

⁴ Reported changes are month-over-month and may be impacted by changes in coverage.

⁵ The number of participating agencies indicates the total number of partner organisations that collected

data in February 2025.

⁶ The prices were normalised by setting August 2019 as the baseline and dividing each month's price by the price in August 2019.

⁷ The Multipurpose Cash (MPC) is a cash transfer guide that has been designed to address multiple needs, with the transfer value calculated accordingly in the assessed locations.

⁸ The SMEB and MPC calculate that 70% of the food basket is to be covered in the priority counties while 50% will be covered in other counties.

About REACH

REACH Initiative facilitates the development of information tools and products that enhance the capacity of aid actors to make evidence-based decisions in emergency, recovery and development contexts. The methodologies used by REACH include primary data collection and in-depth analysis, and all activities are conducted through inter-agency aid coordination mechanisms. REACH is a joint initiative of IMPACT Initiatives, ACTED and the United Nations Institute for Training and Research - Operational Satellite Applications Programme (UNITAR-UNOSAT).

About the CWG

Established in 2019, the South Sudan Cash Working Group (CWG) is a community of humanitarian actors that support and coordinate cash-based interventions in South Sudan. Currently, CWG is co-led by OCHA, IOM, CRS, and ADA who provide technical support and leadership to the CWG hosted by IOM.
