

# **WASH Site Profile - Kutupalong MS**

Ukhiya, Cox's Bazar, Bangladesh (November 2017)

GPS Coordinates: 21.207672 92.160916

#### **Summary**

This profile provides an overview of water, sanitation and hygiene (WASH) infrastructure within Kutupalong MS in Ukhiya, Cox's Bazar. Primary data for this round was collected between 20 October and 9 November 2017.¹ Findings should be considered indicative only.

#### **Site Overview**

# of individuals: 113,688
# of households: 22,898
# of shelters: 6,632
# of individuals 17
per shelter:

#### **Key WASH Infrastructure**

# of latrines 1,340 (80%)
% of safe latrines²: 86%
# of handpumps (% functional): 579 (79%)

# of washrooms: 1343

### **Location Map**

### **Access to Water**

### Three most commonly identified types of water points, by functionality

•	**		
88% Handpump/tubewell	79%	21%	<u></u>
6% Tapstand	74%	26%	Functional  Non-functional
4% Water tank	96%	4%	Non-iunctional

## Key sectoral achievements

	Target	Previous Round	<b>Current Round</b>	Achievement
# of people per functional hand pump	max. 500 <sup>3</sup>	197	250	
% of shelters within 200 metres of a functional hand	100%	100%	100%	

Targets based on WASH Sector Standards/Indicators for the Rohingya response, Sphere Minimum Standards/Indicators as well as Department of Public Health and Environment (DPHE) Minimum Standards/Indicators • Minimum standard/indicator reached, • 75%-99% minimum standard/indicator reached, • 50-74% minimum standard/indicator reached, • Less than 50% of minimum standard/indicator reached

<sup>1</sup> REACH enumerators conducted a full sweep of all sites and camps (as per boundaries defined by ISCG) and used an Open Data Kit (ODK) form to log all key infrastructure observed during this sweep, with further details to be logged for WASH infrastructure. <sup>2</sup> Safe refers to fully covered latrines (i.e. a latrine with four walls, a roof and a door) <sup>3</sup> This target is based on standards for the medium and long term (3 months +), for the immediate phase (0-3 months) it is 1000. <sup>4</sup> The distance is based on standards for the long term (6 months+), for the immediate phase (0-3 months) it is 750 metres and for the medium phase (3-6 months) 500 metres.

# **WASH Site Profile - Kutupalong MS**

#### **Latrine characteristics**

% of functional/non-functional latrines

80% functional (non-full) latrines20% non-functional latrines

#### % of safe/unsafe latrines:

86% Safe (roof, door, wall)14% Unsafe

#### % of latrines with/without lights

With lights Without lights

## Key sectoral achievements

	Target	Previous Round	<b>Current Round</b>	Achievement
# of people per functional (non-full) latrine	max. 50 <sup>4</sup>	95	106	
# of people per safe latrine	N/A	99	22	N/A
% of shelters within 50 meters to a functional (non-full) latrine	100%	84%	96%	
% of latrines that are at least 10 meters away from a water point	100%	67%	73%	

Targets based on WASH Sector Standards/Indicators for Rohingya response, Sphere Minimum Standards/Indicators as well as DPHE Minimum Standards/Indicators as

<sup>&</sup>lt;sup>4</sup>This target is based on standards for the long term (6 months +), for the immediate phase (0-3 months) it is 100 and for the medium phase (3-6 months) 75.
