

MYRNE HROMADA

OVERVIEW

APRIL 2021

This factsheet is a part of strategic 12-month project funded by the Ukraine Humanitarian Fund (UHF) and implemented by ACTED/IMPACT, Right to Protection, Danish Red Cross and Ukrainian Red Cross Society. The project aims to meet humanitarian needs through sustainable response modalities in 3 prospective hromadas in the Volnovahka area - Olhynka, Myrne and Volnovahka. More information on the context, rationale, methodology and limitations in the annex and in the online [Agora Information Hub](#).

Findings are based on data collected in March 2021 via **545** household surveys representing **1,281** household members, **27** interviews with facility key informants (FKI) and **103** community representative KIs.

Most commonly reported concerns by households:

- | | |
|-------------------|-------------------|
| 1. Transportation | 1. Armed conflict |
| 2. Employment | 2. Employment |
| 3. Armed conflict | 3. Transportation |

Most commonly suggested intervention priorities by households:

- | | |
|----------------------------|------------------------------|
| 1. Reduce unemployment | 1. Reduce unemployment |
| 2. Streets and roads | 2. Streets and roads repairs |
| 3. Improving the lightning | 3. Improving the lightning |

Types of utilities households most commonly reported being dissatisfied with:

- | | |
|----------------------------|----------------------------|
| 1. Roads | 1. Roads |
| 2. Recreational facilities | 2. Recreational facilities |

Center Periphery Overall

ECONOMIC SECURITY

25% of the population* (16+) were **unemployed**

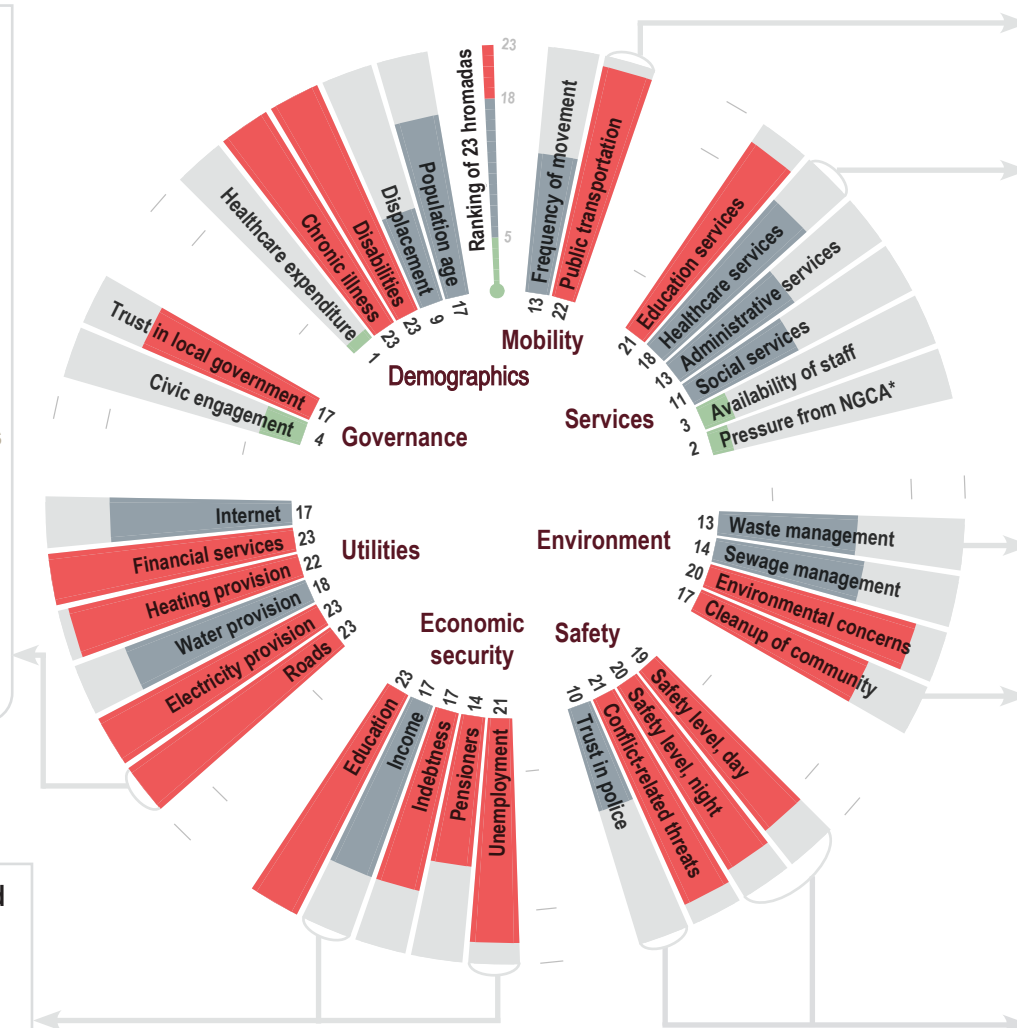

19% of the population* (16+) were **employed**

73% of the working-age population* (16+) had an average monthly income of **less than 4,000 UAH**

* % of working-age household members

Most commonly reported employment sectors in which members were employed:

Services **56%**
Agriculture **14%**
Education **10%**

The graph above summarizes selected hromada-level indicators (full list available [here](#)) as reported through household and facility surveys and grouped into 8 domains. Indicators are shown as a ranked comparison against the 23 sampled hromadas included in this assessment: the longer the bar, the lower the hromada is ranked. A **red colour** indicates that the hromada is ranked among the 5 lowest-scoring hromadas on a particular indicator, and a **green colour** indicates that the hromada is ranked among the 5 highest-scoring hromadas. Numbers inside the circle display the actual ranking of the hromada for each indicator.

* Non-government controlled areas

39% of households reported being **dissatisfied with the public transportation** in their settlement (61% in center, and 35% in periphery)

58% of households were reportedly **dissatisfied with the provision of healthcare** (49% in center, and 60% in periphery)

ENVIRONMENT

53% of households who **don't have access to waste management services**, (8% in center, and 61% in periphery)

46% of households reported being **dissatisfied with the level of cleanup in their community** (45% in center and 46% in periphery)

REPORTED SAFETY

35% of households reported **trusting police** in their settlement (while 33% did not, and 32% were indifferent)

% of respondents reporting feeling unsafe and most commonly reported reason why:

Day	13%	→	Stray animals
Night	30%	→	Lack of lighting
