Joint Multi-Cluster Needs Assessment: Afgooye District Profile
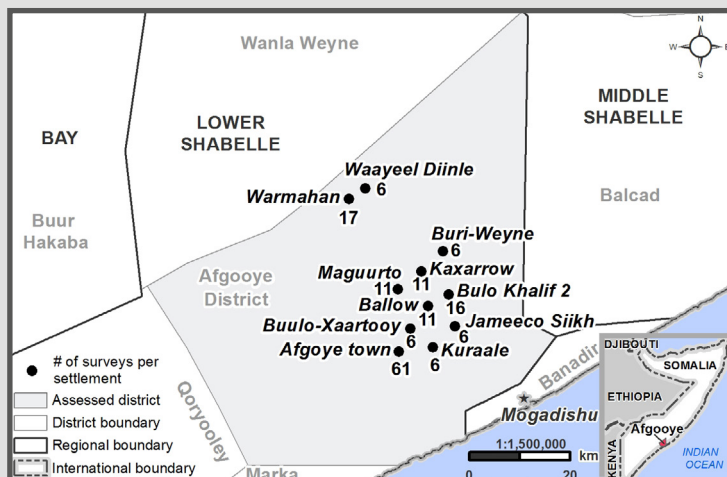

Lower Shabelle Region, Somalia

August 2017

Background

The ongoing drought has contributed to a rapid deterioration of the humanitarian context in Somalia, with a predicted high risk of famine in 2017. In support of the humanitarian planning response, the Clusters and the Assessment Working Group developed the Joint Multi-Cluster Needs Assessment (JMCNA) with the support of REACH in order to assess needs and access to basic services in Somalia.

The Somalia population was sampled for statistical representativeness at the district level with a confidence level of 90% and a margin of error of +/- 10%, employing a cluster sampling approach using the Population Proportional to Size method with replacement. Data collection was conducted by AAHI, ACF, ACTED, ADESO, Aid Vision, CARE, DBG, DRC, Galmudug MoH, HINNA, INTERSOS, IOM, NRC, PAH, REACH, SADO, SCI, SHARDO and SI.

This factsheet presents an analysis of data collected in Afgooye District between 16 and 22 August 2017 as part of the JMCNA. In total, 157 households were surveyed across Afgooye District.
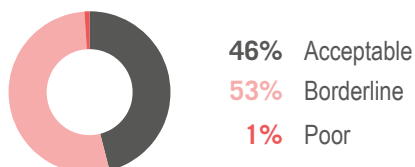

Survey Locations:

Demographics

Household composition, by gender and age:

	Age	
3%	60+ years	2%
14%	18 to 59 years	15%
19%	5 to 17 years	20%
10%	6 months to 4 years	11%
3%	0 to less than 6 months	3%

10% of households reported that they are not from the community they currently reside in.

Food Security

Food Consumption Scores (FCS) of households:

- 46% Acceptable
- 53% Borderline
- 1% Poor

Coping Strategies Index (CSI) scores of households[3]:

5	Minimum score
20	Average score
43	Maximum score

Reported challenges experienced by households when attempting to access food over the past three months[2]:

Lack of resources to buy food	98%
Lack of food items available to purchase	0%
Lack of cooking utensils	3%
Lack of cooking fuel	1%
None of the above	2%
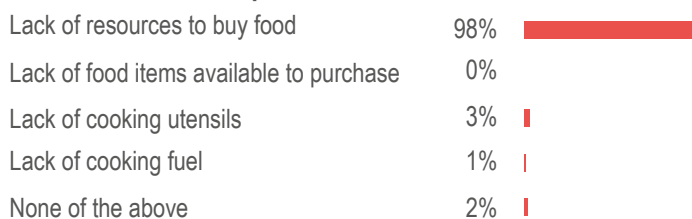

3.4 days on average that households' food stocks will reportedly last.

Vulnerabilities

% of households reporting the following members:

57%	Pregnant or lactating woman
36%	Sick child
40%	Disabled or chronically ill person
2%	Unaccompanied or separated child

Priority Needs
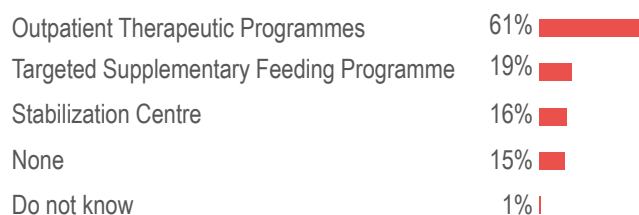

Top 3 priority needs reported by households[1]:

1. Food	91%
2. Healthcare	72%
3. Education	45%

Nutrition

% of children under 5 in assessed households, by Mid-Upper Arm Circumference (MUAC) score:

- 20% Normal
- 37% At risk of malnutrition
- 35% Moderately malnourished
- 8% Severely malnourished
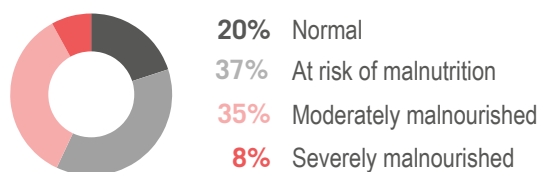

% of households reported access to the following nutrition services[2]:

Outpatient Therapeutic Programmes	61%
Targeted Supplementary Feeding Programme	19%
Stabilization Centre	16%
None	15%
Do not know	1%

27% of households reported increased difficulty in accessing nutrition services compared to more than 3 months ago.

Joint Multi-Cluster Needs Assessment: Afgooye District Profile

Livelihoods

Top 3 primary support sources reported for the past year:

1. Subsistence farming	43%
2. Day labour	22%
3. Cash crop farming	17%

41% of households reported losing livestock in the last three months.

Health

Main health problems reported by households in the last month[1]:

1. Suspected malaria	82%
2. Suspected measles	54%
3. Respiration infection	43%

61% of households reported increased difficulty in accessing health services compared to more than three months ago.
