

WASH Site Profile - Leda C

Teknaf, Cox's Bazar, Bangladesh (March 2018) GPS Coordinates: 92.24700278 20.97445536

Summary

This profile provides an overview of water, sanitation and hygiene (WASH) infrastructure within Leda C in Teknaf, Cox's Bazar. Primary data for this round was collected between 11 March - 2 April 2018. Findings should be considered indicative only.

Site Overview

# of individuals:	6982
# of households:	1716
# of shelters:	179
# of individuals per shelter:	39

Key WASH Infrastructure

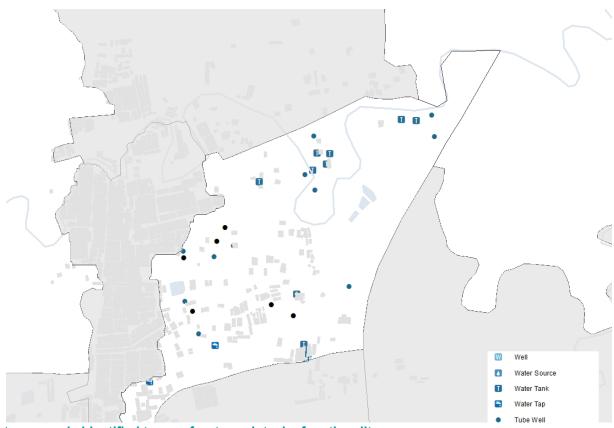

# of latrines	110
(% functional):	(79%)
% of safe latrines ² :	87
# of handpumps	17
(% functional):	(65%)
# of washrooms:	56

Location Map

Access to Water

Three most commonly identified types of water points, by functionality

69%	Handpump/tube well	79%	21%	
13%	Water tank	20%	80%	Functional Non-functional
13%	Tapstand	33%	77%	Non-iunctional

Key sectoral achievements

	Target	Current Round	Achievement
# of people per functional handpump	max. 250 ³	411	
% of shelters with at least 1 functional handpump within 200m⁴	100%	100%	

Targets based on WASH Sector Standards/Indicators for the Rohingya response, Sphere Minimum Standards/Indicators as well as Department of Public Health and Environment (DPHE) Minimum Standards/Indicators • Minimum standard/indicator reached, • 75%-99% minimum standard/indicator reached, • 50-74% minimum standard/indicator reached, • Less than 50% of minimum standard/indicator reached

¹ REACH enumerators conducted a full sweep of all sites and camps (as per boundaries defined by ISCG) and used an Open Data Kit (ODK) form to log all key infrastructure observed during this sweep, with further details to be logged for WASH infrastructure. ² Safe refers to fully covered latrines (i.e. a latrine with four walls, a roof and a door) ³ This target is based on standards for the medium and long term (3 months +), for the immediate phase (0-3 months) it is 750 metres and for the medium phase (3-6 months) 500 metres.

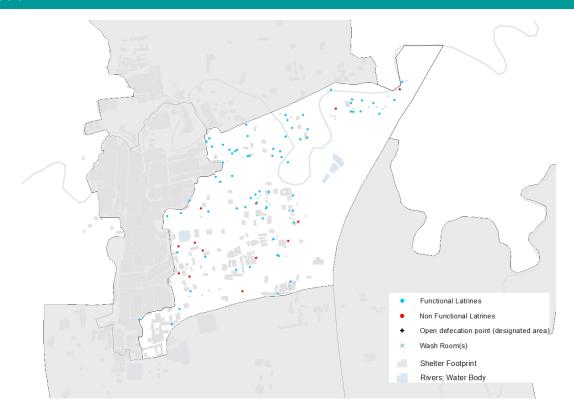

WASH Site Profile - Leda C

Sanitation

Latrine characteristics

% of functional/non-functional latrines

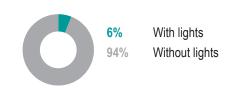

70% Functional (non-full) latrines30% Non-functional latrines

% of safe/unsafe latrines

% of latrines with/without lights

Key sectoral achievements

	Target	Current Round	Achievement
# of people per functional (non-full) latrine	max. 20 ⁴	80	
# of people per safe latrine	N/A	73	N/A
% of shelters with at least one functional latrine block within 50m	100%	49%	
% of functioning handpumps with no latrine within 10m	100%	0%	

Targets based on WASH Sector Standards/Indicators for Rohingya response, Sphere Minimum Standards/Indicators as well as DPHE Minimum Standards/Indicators • Minimum standard/indicator reached, • 75%-99% minimum standard/indicator reached, • 50-74% minimum standard/indicator reached, • Less than 50% of minimum standard/indicator reached

⁴This target is based on standards for the long term (6 months +), for the immediate phase (0-3 months) it is 100 and for the medium phase (3-6 months) 75.
