Assessment of Hard-to-Reach Areas in South Sudan

South Sudan Displacement Crisis

November 2017

Overview

Conflict in Unity State broke out in late December 2013, only days after the current conflict began in Juba. Since then, the state has been one of the worst affected by the conflict, and currently hosts the highest reported numbers of internally displaced persons (IDPs) in the country. Many areas in Unity are largely inaccessible to humanitarian actors due to insecurity and logistical constraints. As a result, only limited information is available on the humanitarian situation outside major displacement sites.

In order to fill such information gaps and facilitate humanitarian planning, in late 2015, REACH piloted its Area of Origin (AoO) methodology, which takes a territory-based approach that may cover several bomas, to collect

data in hard-to-reach areas of Unity State. The pilot began in Bentiu PoC site in December 2015, and was expanded to Nyal in June 2016 in order to interview new arrivals as they were displaced from recent fighting.

In December 2016, REACH refined the methodology moving from the AoO to the Area of Knowledge (AoK) methodology, an approach collecting information at the settlement level. The most recent OCHA Common Operational Dataset (COD) released in February 2016 has been used as the reference for settlement names and locations.

Through AoK, REACH collects data from a network of Key Informants (KIs) who have sector-specific knowledge and

gain the information from regularly traveling to and from the settlement, direct or indirect contact with people in the settlement, or recent displacement.

Data collected is aggregated to the settlement level and all percentiles presented in this factsheet, unless otherwise specified, represent percent of settlements within Unity with that specific response. The displacement section on page 2 refers to the proportion of assessed KIs arrived within the previous month (newly arrived IDPs).

Although current AoK coverage is still limited and its findings not statistically significant, it provides an indicative understanding of the needs and current humanitarian situation in assessed areas of Unity State.

Assessment coverage

337 Key Informants interviewed

209 Settlements assessed

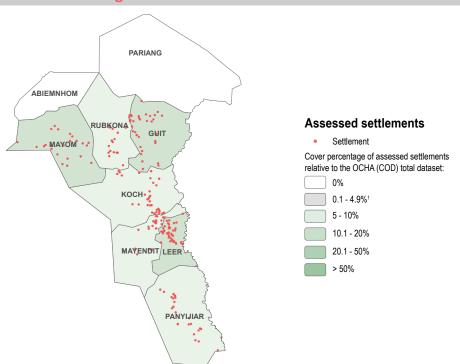

Contact with Area of Knowledge

91% KIs reported being newly arrived IDPs.

Kls reported having visited AoK within last month.

KIs reported being in contact with someone living in AoK within last month.

Assessment coverage

Reached settlements

County	Assessed settlements	OCHA (COD) settlements	Cover percentage
Abiemnhom	0	21	0%
Guit	34	177	19%
Koch	32	432	7%
Leer	50	330	15%
Mayendit	26	347	7%
Mayom	27	135	20%
Panyijiar	24	452	5%
Pariang	0	168	0%
Rubkona	16	274	6%
Total	209	2,336	9%

¹ Data from counties with under 5% settlement coverage are not included in county level analysis, but are included in state-level analysis.

Assessment of Hard-to-Reach Areas in South Sudan

South Sudan Displacement Crisis

November 2017

Primary reported reason why healthcare facilities

17%

are not available from assessed settlements:

Health concerns

Primary reported heath concern in assessed settlements:

1	Malaria	75%
2	Pneumonia	5%
3	Typhoid	5%
4	Diarrhoea	5%
5	Cholera	4%

Healthcare distance

Reported distance of nearest healthcare facilities from assessed settlements:

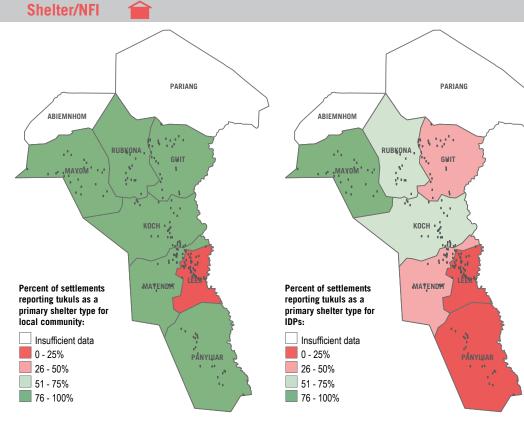

Under 30 minutes	18%
30 minutes to under 1 hour	25%
1 hour to under half a day	43%
Half a day	12%
More than half a day	2%

Feeding programmes

Reported availability of feeding programmes that provide Plumpy Sup, CSB++ or other nutrition supplements in assessed settlements:

54% Not available46% Available

Shelter damage

Reported destruction or partial destruction of shelters by violence in assessed settlements:

NFI Needs

Primary reported non-food item needed to meet needs of IDPs in assessed settlements with IDPs present:

P		
1	Mosquito net	35%
2	Plastic sheet	25%
3	Cooking pot	12%
4	Bucket	8%
5	Blanket	6%

No health care workers in area

available

Facilities were never

Facilities are to far

Protection

Women

Primary reported protection concern in assessed settlements:

1	Sexual violence	21%
2	Domestic violence	17%
3	Looting	9%
4	Harassment to disclose information	5%

Girls

5 Abduction

Primary reported protection concern in assessed settlements:

Early marriage	15%
Harassment to disclose information	11%
Sexual violence	8%
Family separation	7%
	Harassment to disclose information Sexual violence

Primary reported protection concern in assessed settlements:

Men

Boys

1	Forced recruitment	28%
2	Killing/injury by same community	25%
3	Killing/injury by other community	16%
4	Looting	8%
5	Harassment to disclose information	7%

Community relations

Reported relationships between IDPs, returnees4 and local community in assessed settlements:

Very Good	68%
Good	32%

Primary reported protection concern in assessed settlements:

1	Harassment to disclose information	18%
2	Forced recruitment	9%
3	Killing/injury by other community	7%
4	Looting	4%
5	Family separation	4%

Land disputes

Reported presence of disputes over land ownership in assessed settlements:

⁴Local community displaced and returned home, reported in 58% of assessed settlements

About REACH

5 Abduction

REACH facilitates development of information tools and products that enhance capacity of aid actors to make evidence-based decisions in emergency, recovery and development contexts. All REACH activities are conducted through inter-agency aid coordination mechanisms. For more information, you can write to our in-country office: south.sudan@reach-initiative.org or to our global office: geneva@reach-initiative.org.

Visit www.reach-initiative.org and follow us @REACH_info.
