Camp 4, Ukhiya, Cox's Bazar, Bangladesh

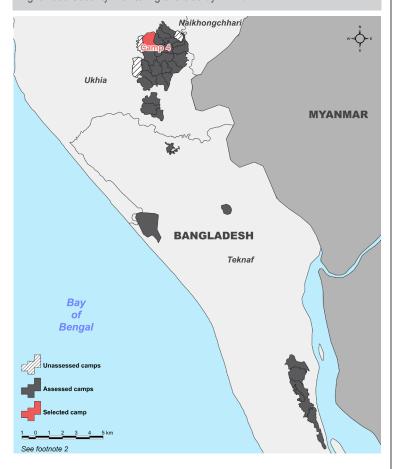

Background and Methodology

An estimated 723,000 Rohingya refugees have fled violence in Myanmar's Rakhine state since August 25, 2017¹. Most of the refugees rely on humanitarian assistance, having left with few possessions and exhausted their financial resources on the journey. The monsoon season began in May and continues into September, threatening the vast majority of refugees living in makeshift shelters and settlements highly vulnerable to floods and landsides.

To understand the evolving priority needs of the refugees, an inter-agency Multi-Sector Needs Assessment (MSNA), coordinated by the United Nations High Commissioner for Refugees (UNHCR) and with technical support from REACH, was conducted in 31 refugee sites using a household survey methodology. Support for questionnaire translation and enumerator language training was provided by Translators Without Borders.

Results of this MSNA are generalizable to the camp level with 95% confidence level and 10% margin of error. This factsheet presents an analysis of data collected in Camp 4 where 97 households were surveyed between 2 and 31 July 2018.

In order to avoid duplication, data on WASH and Food Security were not extensively collected. WASH data was collected by REACH in April 2018 and can be found here³. More information on Food Security can be found in the Light Food Security Monitoring exercise by VAM / WFP.

Population in camp (individuals)¹

30,484

Population in camp (families)¹

7,490

Protection

% of households reporting safety concerns (read: fears) for boys and girls (aged under 18)4,5

	48%	Kidnapping	0	Natural disaster	34%	
Boys	37%	Violence within community	2	Kidnapping	31%	Girls
	33%	Natural disaster	3	Child marriage	27%	

72% of households reporting the presence of a youth group community watch during the night

55% of households reporting the presence of someone in the community outside of their own household who can assist them in case of need

% of households reporting first port of call for assistance in dealing with safety or security issues^{4,6}

Mahji	88%	
None	7%	
Local government	6%	

69% of households reporting not having enough light at night for household members to safely access latrines in their area of the camp

% of women reported to be attending activities at an NGO-run space where only women and girls are allowed in the 7 days prior to data collection⁷

12-17 years	15%
18+ vears	7%

% of children reported to be attending activities at an NGO-run safe space for children in the 7 days prior to data collection8

0% of all households with children under 18 reporting at least one child involved in hazardous labour in the 30 days prior to data collection9

% of households reporting areas in the camp where men, women, boys, and girls do not feel safe^{4,10}

	Men 🖍		Womer	1
74%	No area unsafe	0	No area unsafe	65%
12%	Distribution points	2	Bathing areas	21%
10%	Market	3	Latrines	21%
	Boys 🛉		Girls	
58%	Boys no area unsafe	0	Girls No area unsafe	43%
58%	, n	1 2	"	43% 34%

64% of households reported the presence of groups or committees in their area working to protect their rights and protect them from harm

% of households reporting different relationships with Bangladeshi host community and refugee neighbours in the same block

- 4. Respondents could select multiple options
- 5. Three most common safety concerns for boys and girls are shown
- 6. Three most common first ports of call for assistance are shown
- 7. Respondents were asked to report information for each woman in their household. This indicator shows the proportion of all individual women reported
- 8. Respondents were asked to report information for each child in their household. This indicator shows the proportion of all individual children reported
- 9. In this assessment hazardous labour was defined as: working with heavy machinery or lifting heavy objects, exposure to harmful chemicals, exposure to extreme heat (eg. furnace, bakery), working more than 40 hours per week, working at night (between 8 pm and 6 am), and using
- 10. Three most common areas where men, women, boys and girls do not feel safe are shown

Camp 4, Ukhiya, Cox's Bazar, Bangladesh

Health

71% of households with children under 5 reported all children under 5 having an immunization card

96% of households with children under 5 reported all children under 5 sleeping under a mosquito net the night prior to data collection

% of households reporting seeking treatment for an individual with a serious illness in the 30 days prior to data collection⁴

NGO clinic	84%	
Pharmacy	23%	
Traditional healer	2%	L

% of households reporting challenges in accessing NGO run clinics since arriving in the camp^{4,11}

No challenge	73%	
Clinic too far	15%	
Supplies unavailable	12%	
Treatment unavailable	8%	
Inconvenient hours	2%	L

% of households with children under 5 reported receiving a breast milk substitute, infant formula or baby bottles through donation in the 30 days prior to data collection⁴

Formula / Breast milk substitute	2%
Bottles	2%

Food Security

100% of households reported possession of a ration card

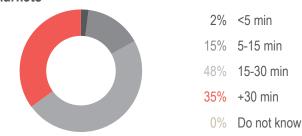

% of households reporting receiving food assistance in the 30 days prior to data collection⁴

ICRC / WFP	97%
Bangladesh army	0%
Other	0%

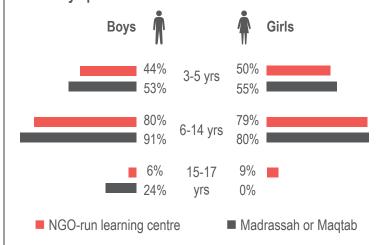

89% of households reported access to a market to buy food

% of households reporting travel time on foot to food markets

Education

% of children reported to be attending learning centres in the 7 days prior to data collection^{4,8}

Shelter & Non-Food Items

37% of households reported sharing their shelter with other households

% of households reporting destruction or damage of their shelter in the 30 days prior to data collection

12%	Roof damaged	5%	Wall damaged
12%	Roof destroyed	12%	Wall destroyed

^{4.} Respondents could select multiple options

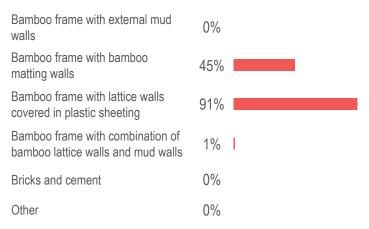

^{8.} Respondents were asked to report information for each child in their household. This indicator shows the proportion of all individual children reported

^{11.} Five most common health care access challenges are shown

Camp 4, Ukhiya, Cox's Bazar, Bangladesh

% of households reporting using different materials for the frame and walls of the household shelter⁴

% of households reporting using different materials for the roof of the household shelter⁴

Tarpaulin	100%
Bamboo	100%
Sheet metal	1%
Bricks and cement	0%
Other	0%

% of shelters with windows and ventilation mesh, by number of openings

% of households reporting ownership of the following non-food items at the time of data collection

Solar lamp	49%	
Kitchen set	80%	
Floor mat	85%	
Cooking stove	71%	
None	12%	

94% of households reported receiving a distribution of cooking fuel within the 30 days prior to data collection

% of households reporting most urgently needed non-food items^{12,13}

Fuel	64%	
Cooking stove	53%	
Kitchen set	51%	
Umbrella	27%	
Floor mat	23%	
Portable lamp	19%	
Clothes - Children	15%	

Site Management

52% of households reported being aware of the role of Cyclone Preparedness Program volunteers in their area¹⁴

% of households reporting steps they would take to prepare for an approaching cyclone^{4,15}

Secure shelter	75%
Stay in shelter	48%
Evacuate shelter	35%

Communication with Communities

48% of households reported being aware of a complaint/feedback mechanism within their camp

% of households reporting use of complaint/feedback mechanisms in the 30 days prior to data collection^{4,16}

No mechanism used	74%	
Mahji	23%	
NGO staff	2%	T.

- 4. Respondents could select multiple options
- 12. Respondents could select up to 3 options
- 13. Seven most common non-food item needs are shown
- 14. CPP is a joint community-based disaster risk reduction initiative of the Government of Bangladesh and the Bangladesh Red Crescent Society. It trains volunteers to deliver cyclone warnings to communities, assist with shelter and rescue, and provide medical attention
- 15. Three most common steps for cyclone preparedness are shown
- 16. Three most common complaint mechanisms used are shown

Camp 4, Ukhiya, Cox's Bazar, Bangladesh

84% of households that reported using complaint/ feedback mechanisms reported receiving a response to their complaint/feedback

% of households reporting barriers to using complaint/ feedback mechanisms^{4,17}

No barriers	80%	
Unaware of mechanisms	16%	
Believe mechinism is useless	2%	T. Control

% of households reporting use of information channels in the 7 days prior to data collection⁴

Phone	80%	
Radio	15%	
Television	8%	•
WhatsApp	7%	
Imo (instant messaging app)	12%	-
