

South Sudan | Joint Market Monitoring Initiative (JMMI)

1 - 7 December 2023

INTRODUCTION

In an effort to inform cash-based interventions and better understand market dynamics in South Sudan, the Joint Market Monitoring Initiative (JMMI) was created by the South Sudan Cash Working Group (CWG) in August 2019. The initiative is guided by the JMMI Technical Working Group (JMMI-TWG), led by REACH and supported by the CWG members. The initiative is funded by Complementary Action for Resilience Building (CARB). Marketplaces across South Sudan are assessed on a monthly basis. In each location, field teams record prices and other market indicators through trader interviews. This factsheet presents an overview of prices for key foods and non-food items (NFIs) in the assessed areas, as well as the costs associated with key elements of the **Multi-Sector Survival Minimum Expenditure Basket (MSSMEB)**.

Market Functionality Score (MFS)

The Market Functionality Score (MFS) is a method of classifying markets based on their level of functionality. The MFS is divided into five dimensions:

- **Accessibility (25%):** physical and social access to markets
- **Availability (30%):** ability of markets to consistently supply core commodities
- **Affordability (15%):** financial access to markets and price volatility
- **Resilience (20%):** vulnerability of supply chains and ease of restocking
- **Infrastructure (10%):** state of markets' physical and financial infrastructure

MARKET FUNCTIONALITY SCORE (MFS), BY LOCATION

KEY FINDINGS

- The Highest Multi-Sectoral Survival Minimum Expenditure Basket (MSSMEB) price was recorded in Leer (Leer Town). The high MSSMEB price in Leer Town could be partially explained by the high level of prices reported for sorghum, reaching **2,228 SSP** for 1 kilogram.
- The maximum monthly increase in the total value of the MSSMEB was recorded in **Doro Refugee Camp (RC) at 93%** since November 2023.
- The maximum monthly increase in the value of the food basket was also recorded as the highest in **Doro Refugee Camp (RC) at 107%**, since November 2023.
- In early December, traders in the assessed locations reported that the roads from (i) Lankien to Waat (ii) Dukpadiet to Waat (iii) Malakal to Lankien (iv) Guit to Leer (v) Koch to Leer were closed due to seasonality and insecurity along the supply routes

Multi-Sectoral Survival Minimum Expenditure Basket (MSSMEB)

The Multi-Sectoral Survival Minimum Expenditure Basket (MSSMEB) represents the minimum culturally adjusted group of items required to support a six-person South Sudanese household for one month. The cost of the MSSMEB can be used as a proxy for the financial burdens faced by households in different locations. The MSSMEB's contents were defined by the CWG in consultation with relevant sector leads.

Food Items

Cereals	90 kg	Vegetable oil	6 L
Pulses	9 kg	Salt	1 kg

Non-Food Items (Monthly)

Charcoal	50 kg	School fee	3 USD

Main NFI Supply Routes

This map illustrates where vendors reported their market location to be supplied from with NFIs. Only the most frequently reported non-food supply market connection is shown for each location. Additional linkages and supply routes may exist.

Primary modes of transport for restocking local cereals reported by traders

Roads, River Routes and Border Conditions

The map illustrates the reported road, river route and border crossing conditions at the time of data collection. The results are indicative of trade activity only.

Reported restocking constraints*

No constraints	60%	
Poor road conditions	22%	
High taxation in marketplace	20%	
High checkpoint costs	17%	
Lack of capital	15%	
High fuel prices	13%	
No access to foreign currency	11%	
Insecurity along supply route	8%	
No mode of transport	7%	
Lack of storage	7%	
Poor river conditions	7%	
Borders closed	6%	
Insecurity in the marketplace	5%	
Lack of supplies	4%	
Movement restrictions	3%	

Accepted payment modalities*

Cash (SSP)	99%	
Cash (USD)	24%	
Cash (other currency)	2%	
Credit	3%	
Mobile Money	1%	
Barter	1%	

* Values do not add up to 100% as traders were allowed to select multiple options.

How to read a boxplot

* The 'location median' is calculated by first finding the median price of a given item in each assessed location, then taking the median of the resulting set of median prices.

Methodology

The JMIMI aims to inform market-based programming in South Sudan. Coverage depends on the interest of the partner organisations and their field teams' capacities to regularly collect market data. Locations are added once partners willing to cover them are identified, and their field teams are trained. As the initiative is currently being built up, coverage will likely be expanded in future data collection rounds.

In each assessed location, at least four prices per food, non-food, and livestock item need to be collected from different traders to ensure the quality and consistency of the collected data (2 for currencies and milling costs, 5 for casual labor). In line with the purpose of the JMIMI, only the prices of the cheapest available types are recorded for each item.

Partner field teams identify traders to assess based on the following criteria:

- Traders are retailers selling directly to consumers.
- Traders with weight scales are prioritised when recording prices of dry food items.
- Traders need to be representative of the local price level.
- To the extent possible, the same traders are revisited in every data collection round.

The data is collected by field staff familiar with the local market conditions. They are trained on methodology and tools by REACH. Data collection is conducted through the ODK Collect mobile application. The data collection tool is published alongside the dataset every month and disseminated to the humanitarian community. Following data collection, REACH compiles and cleans all partner data, normalizing prices, cross-checking outliers, and calculating the median cost of an MSSMEB in each assessed location.

The median item prices reported in this factsheet are 'location medians', designed to minimise the effects of outliers and differing amounts of data among assessed locations. First, the median prices of all assessed items are calculated within each assessed location; then, REACH calculates the median of this list of medians. All MSSMEB and price index calculations are created using this method.

MSSMEB Calculation

- The cost of the MSSMEB is calculated by multiplying the median price of each item in the respective location by the quantity listed in the table on page 2.
- Sorghum grain prices are used for the calculation of the cereal component, and maize grain prices for areas where maize is more commonly consumed. In areas where both cereals are consumed equally, the price of the cheaper item is used.
- Bean prices are used for the pulse component.
- Rather than the prices of vegetable oil, the prices of the cheapest locally available cooking oil is used.
- For airtime, a monthly cost of 1 USD is assumed, based on the rates of local telecom providers.
- All USD amounts are converted to SSP using the local parallel market exchange rates.
- If a component of the MSSMEB is unavailable in a location, the overall median price is used for the calculation of the index.

More details on the methodology can be found in the [JMIMI terms of reference \(ToR\)](#).

Challenges and Limitations

- Price data is only indicative for the time frame within which it was collected. Prices may vary between data collection rounds.
- The JMIMI data collection tool requests the cheapest available type of each item to be recorded, as availability varies across regions. Therefore, price comparisons across regions may be based on slightly varying products.
- Standardising unit sizes of dry food items is inherently difficult in South Sudan, as many traders sell commodities by volume rather than weight. This may create a measurement error.
- With current coverage, data is mostly collected from main markets, which may not be representative of rural areas.
- As the JMIMI continues to expand and is extended to additional locations, the reported changes in the overall median prices may be driven by shifts in coverage rather than actual price changes.

Participating Agencies in November

- ACF - Action Against Hunger
- ACTED – Agency for Technical Cooperation and Development
- AWACD - Agency for women and children development
- CARE - CARE International
- Concern - Concern WorldWide
- DRC - Danish Refugee Council
- DCA – Danish Church Aid
- IOM – International Organization for Migration
- IRC – International Rescue Committee
- IRW - Islamic Relief Council
- LDO – Lomere Development Organization
- MI - Malteser International
- NPA - Norwegian People's Aid
- NRC - Norwegian Refugee Council
- NRDC – National Relief and Development Corps
- Relief International
- Save the Children
- Solidarités International
- SPEDP – Support for Peace and Education Development Programme
- SSRC - South Sudan Red Cross
- STO – Star Trust Organization
- WADA – Wider Aid and Dev't Agency
- WHH – Welthungerhilfe
- World Vision
- YACA – Youth Affairs Centre for Africa

Endnotes

¹ The MSSMEB is calculated in each assessed location as described in the methodology box on the left and only includes key items. The overall MSSMEB is the median across all assessed locations.

² The food basket is composed of only the food items in the MSSMEB. The overall cost of the food basket is the median across all assessed locations.

³ Source: Central Bank of South Sudan (2020, November 1). Retrieved from <https://www.boss.gov.ss> The rates from 01 December 2023 were used for the calculation of the monthly change and conversion to USD.

⁴ Reported changes are month-over-month and may be impacted by changes in coverage.

⁵ The number of participating agencies indicates the total number of partner organisations that collected data in December 2023.

⁶ The prices were normalised by setting August 2019 as the baseline and dividing each month's price by the price in August 2019.

About REACH

REACH Initiative facilitates the development of information tools and products that enhance the capacity of aid actors to make evidence-based decisions in emergency, recovery and development contexts. The methodologies used by REACH include primary data collection and in-depth analysis, and all activities are conducted through inter-agency aid coordination mechanisms. REACH is a joint initiative of IMPACT Initiatives, ACTED and the United Nations Institute for Training and Research - Operational Satellite Applications Programme (UNITAR-UNOSAT).

About the CWG

The South Sudan Cash Working Group (CWG), established in August 2019, is a community of humanitarian actors that support and coordinate cash-based interventions in South Sudan. The CWG is currently led by UNHCR and co-led by IOM.
