Cox'<u>s Bazar</u>

cation Map

Site Overview		Key WASH Infrastructure		Loc
# of individuals:	40,648	# of latrines: /% functional and	1,815	
# of households:	9,381	(% functional and safe ²):	(69%)	
# of shelters: # of individuals	6,837	# of improved water sources: ³ (% functional):	839 (74%)	
per shelter:	5.9	# of washrooms:	1122	

Water Access

Three most commonly identified types of water points, by functionality:

Sanitation

Latrine characteristics:

Functionality and safety	Functionality		
69%Functional (non-full) and safe231%Non-functional and / or unsafe	0	75% Functional (non-full)25% Non-functional	
Safety	Lighting		
90% Safe ² 10% Unsafe	0	0%With lights100%Without lights	
Key sectoral standards:	Target	Current Round	Achievement
# of people per functional (non-full) and safe latrine ²	max. 20	32	
# of people per functional (non-full) latrine	max. 20	30	
# of people per safe latrine ²	max. 20	26	
$\%$ of shelters with at least one functional and safe latrine $^{\rm 2}$ block within 50m	100%	100%	

Targets based on long term WASH Sector Standards / Indicators for the Rohingya response, Sphere Minimum Standards as well as Department of Public Health and Environment (DPHE) Minimum Standards.
Minimum standard/indicator reached,
75%-99% minimum standard/indicator reached,
50-74% minimum standard/ indicator reached, Less than 50% of minimum standard/indicator reached.

1. REACH enumerators conducted a full sweep of all sites and camps (as per boundaries defined by ISCG) and used an Open Data Kit (ODK) form to log all key infrastructure observed during this sweep, with further

details to be logged for WASH infrastructure. 2. Safe refers to fully covered latrines (i.e. a latrine with four walls, a roof and a lockable door). 3. This includes handpumps / tube wells, tapstands and water tanks.
