

The Rapid Response Mechanism (RRM) is a tool to monitor humanitarian action, conduct multisector assessments and intervene in NFI and WASH when there is no capacity on site. Currently RRM is made possible through the generous support of the CERF, Denmark, Ireland, European Commission's Humanitarian Aid and Civil Protection (ECHO), Global Thematic, IFRC and SIDA. All RRM products are available on the [Humanitarian Response portal](#).

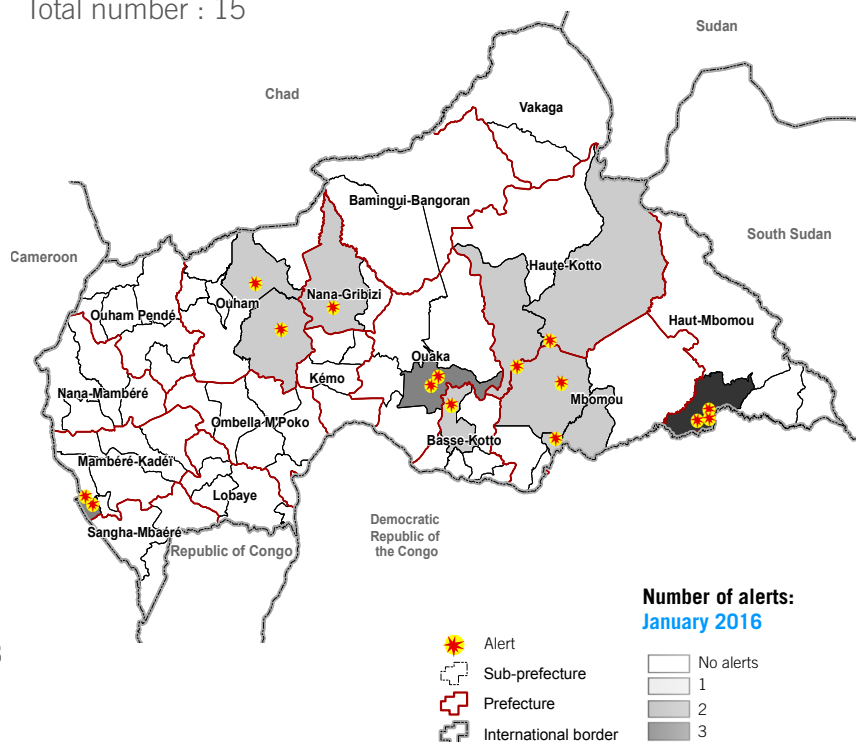

Activities : January 2016

Ongoing activities are not taken into account.
The WASH package is adapted to the priority needs identified at each answer.

Exploratory missions (MEX)	7
Multisectoral assessments MSA	8
