

Background and methodology

The aim of the Emergency Needs Tracking (ENT) System is to track the key priority needs of internally displaced persons (IDPs) in northwest Syria, as well as identifying communities with households in direct need of humanitarian assistance. The ENT assesses communities that have experienced any of the following in the three days prior to data collection: more than 40 IDP arrivals, natural hazards (including storms, fires, and flooding), conflict escalation, or any other event which impacts humanitarian needs. This information should serve to better inform immediate humanitarian operations, as well as provide a wider contextual understanding of the ongoing situation. As the humanitarian situation remains complex, it is critical to fill information gaps across sectors to ensure a well-coordinated humanitarian response.

Data was collected between 21 September and 27 September (excluding Friday and Saturday). Information was collected via a Key Informant (KI) methodology with one KI interview conducted per community. Findings should be considered indicative only. 116 communities including 13 camps were assessed overall across northern Aleppo and Idlib governorates. **The full dashboard can be accessed [here](#) and the full catalogue of datasets can be accessed [here](#).**

Protection

Percentage of assessed communities in which KIs reported the presence of newly-arrived IDPs with the following vulnerability types:¹

	%
Women headed households	41%
Elderly headed households	38%
Orphans	12%
Women travelling alone	5%
Disabled headed households	5%
Child headed households/children travelling alone	4%

Food security

Most commonly reported food sources for newly-arrived IDPs in assessed communities:¹

- 1 Stores/markets in this community 88%
- 2 Stores/markets in other communities 58%
- 3 Assistance from local councils/NGOs 16%

98%

of newly-arrived IDP households were reportedly eating one meal or more per day.

Shelter

Number and percentage of newly-arrived IDP households by shelter type:²

	#	%
Solid/finished buildings	673	45%
Functioning tents	490	32%
Unfinished/ damaged buildings	234	15%
Designated collective centres	16	1%

NFI Non-Food Items (NFIs)

Number and percentage of newly-arrived IDP households without the following NFIs:²

	#	%
Households without heating fuel	1137	75%
Households without cooking utensils	285	19%
Households without bedding	227	15%
Households without mattresses	216	14%

Health

6%

of newly-arrived IDP households reportedly could not access healthcare facilities.

Water, Sanitation and Hygiene (WASH)

Most commonly reported drinking water sources for newly-arrived IDPs in assessed communities:²

- 1 Combination of water network and private water trucking 43%
- 2 Formal water trucking conducted by authorities or an NGO 26%
- 3 Informal water trucking conducted by private citizens 16%

5%

of newly-arrived IDP households (77) reportedly did not have access to a sufficient quantity of drinking water

65%

In 84 communities, KIs reported that soap and other hygiene items are too expensive for some newly-arrived IDPs.
