Returnees	5	30	6

Size of settlement	6,968 sq m
Average area per person	23 sq m
Altitude	1,770 m

Displacement

The informal settlement at Lab-e Jar Khani Noor is based on a small plot of land owned by the Government of Afghanistan. Residents do not currently pay rental fees. The population is comprised of 53% Pashtun communities, 45% Tajik populations and 2% Hazara communities. The vast majority of the site is populated by IDPs from Parwan and Nangarhar provinces, although a small number of houses are occupied by returnees from Pakistan.

In 2002, the settlement was first established by 20 IDP households mostly travelling from Ghorband, Parwan and some from Kabul province. In 2005, 15 households from Sindh province, Pakistan joined the site. Five years later, 17 households belonging to IDPs from Muhmand Dara, Nangarhar moved to Lab-e Jar Khani Noor. Spatial constraints prevent the settlement for further expanding.

These residents do not reportedly plan to leave this informal settlement as the site is free and they feel they have no alternative shelter options.
