# Joint Multi-Cluster Needs Assessment: Woqooyi Galbeed Region

Somalia August 2018

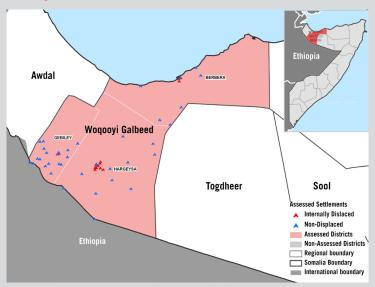

#### **Background**

Prolonged drought conditions, since early 2016, have resulted in a substantial livestock herd depletion and a reduction in cereal production in Somalia, impacting negatively on households' access to food and income1. In addition, above average rainfall in the first half of 2018 caused severe flooding across parts of South Central Somalia and coastal areas of Puntland and Somaliland, causing destruction to agricultural land and displacement in affected areas<sup>2</sup>. Parallel to these climatic trends, insecurity continues to limit humanitarian access especially in South Central Somalia.

In light of this evolving context, United Nations Office for the Coordination of Humanitarian Affairs (OCHA), in partnership with REACH conducted a Joint National Multi-Cluster Needs Assessment (JMCNA)<sup>3</sup> to assess humanitarian needs and access to basic services in Somalia. Households were sampled for statistical representativeness stratified by non-displaced and internally displaced person (IDP) households at the district level, with a 92% confidence level and a 10% margin of error.

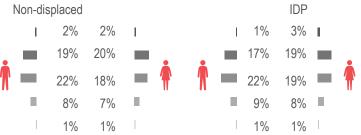

This factsheet presents analysis of data collected in Woqooyi Galbeed Region between 30 June and 12 August 2018. A total of 589 non-displaced and 395 IDP households were surveyed across the region. Findings relating to non-displaced households are representative with a 95% confidence level and a 4% margin of error while those relating to IDP households are representative with a 95% confidence level and a 5% margin of error.

#### **Survey Locations**

## **Demographics**

Household members age and gender breakdown:

18-59 years 60+ years 7 months-4 years | 5-17 years

Proportion of households reporting the following members<sup>6</sup>:

	Non- displaced	IDP
Pregnant or lactating woman	44%	45%
Sick child	9%	17%
Disabled or chronically ill person	16%	16%
Person with mental health issues	5%	5%

### **Protection**

Non-displaced Proportion of households reporting family separation in the three months prior to the assessment. Of those4:

**IDP** 

7%

51%

Non-displaced **IDP** 

Proportion of households reporting that they have no way of participating in decision making in their settlements:

Non-displaced **IDP** Proportion of households reporting that they do not own the land they are settled on:

Proportion of households reporting that they are at risk of eviction<sup>4,7</sup>:

Proportion of households reporting that they have formal land tenure documentation<sup>4,7</sup>:

Non-displaced	2%	
IDP	4%	

## **Food Security and Livelihoods**

Non-displaced IDP Proportion of households reporting 39% 50% inadequate food access:

Food Consumption Score5:

Proportion of households reporting use of the below food coping strategies in the seven days prior to this assessment<sup>6</sup>:

	displaced	IDP
Eat less expensive, less preferred food	85%	88%
Borrow food from relatives or friends	68%	87%
Reduce number of meals per day	62%	80%
Reduce portion sizes	55%	69%
Adults skip meals so children can eat	17%	31%
