# Joint Multi-Cluster Needs Assessment: Gebiley District Profile

### Woqooyi Galbeed Region, Somalia

### August 2017

#### Background

The ongoing drought has contributed to a rapid deterioration of the humanitarian context in Somalia, with a predicted high risk of famine in 2017. In support of the humanitarian planning response, the Clusters and the Assessment Working Group developed the Joint Multi-Cluster Needs Assessment (JMCNA) with the support of REACH in order to assess needs and access to basic services in Somalia.

The Somalia population was sampled for statistical representativeness at the district level with a confidence level of 90% and a margin of error of +/- 10%, employing a cluster sampling approach using the Population Proportional to Size method with replacement. Data collection was conducted by AAHI, ACF, ACTED, ADESO, Aid Vision, CARE, DBG, DRC, Galmudug MoH, HINNA, INTERSOS, IOM, NRC, PAH, REACH, SADO, SCI, SHARDO and SI.

This factsheet presents an analysis of data collected in Gebiley District between 14 and 20 July 2017 as part of the JMCNA. In total, 129 households were surveyed across Gebiley District.

# **M** Demographics

Household composition, by gender and age:

of households reported that they are not from the community they currently reside in.

# Food Security

Food Consumption Scores (FCS) of households:

20% Acceptable16% Borderline64% Poor

Coping Strategies Index (CSI) scores of households<sup>3</sup>:

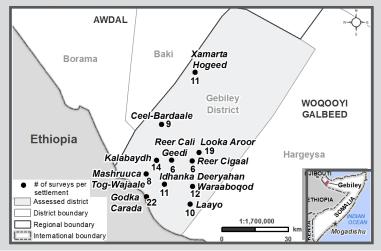

0	Minimum score
12	Average score
39	Maximum score

Reported challenges experienced by households when attempting to access food over the past three months<sup>2</sup>:

Lack of resources to buy food	<b>48%</b>	
Lack of food items available to purchase	2%	1
Lack of cooking utensils	0%	
Lack of cooking fuel	1%	1
None of the above	51%	

3.0 days on average that households' food stocks will reportedly last.

#### **Survey Locations**

# **Vulnerabilities**

% of households reporting the following members:

- 27% Pregnant or lactating woman
  - 6% Sick child
- **19%** Disabled or chronically ill person
- 2% Unaccompanied or separated child

### Priority Needs

Top 3 priority needs reported by households<sup>1</sup>:

1. Water	70%
2. Food	68%
3. Healthcare	54%

### 🧶 Nutrition

% of children under 5 in assessed households, by Mid-Upper Arm Circumference (MUAC) score:

45% Normal

- **37%** At risk of malnutrition
- 16% Moderately malnourished
- 2% Severely malnourished

% of households reported access to the following nutrition services<sup>2</sup>:

None	88%
Outpatient Therapeutic Programme	5%
Wet Feeding	3%
Do not know / Infant and Young Child Feeding	2%

**29%** of households reported increased difficulty in accessing nutrition services compared to more than 3 months ago.
