Settlement and Protection Profiling

Camp 26 Teknaf, Cox's Bazar, Bangladesh

July 2019 and November 2019 comparison

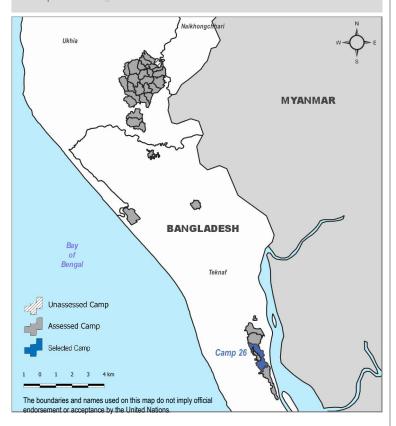

Round 6
November 2019

Background and methodology

Since August 2017, an estimated 744,400 Rohingya refugees have fled from Myanmar into Cox's Bazar, Bangladesh, increasing the total number to around 914,998.¹ The majority are reliant on humanitarian assistance, services, and resources including shelter, food, clean water, and sanitation. Information on Rohingya households, particularly in relation to protection and access to services, is in need of regular updating due to the variation in service provision across settlements, challenges presented by the monsoon and cyclone seasons, and the evolving social and contextual dynamics within each settlement. Therefore, REACH in partnership with UNHCR conducted periodic Settlement and Protection Profiling in order to support evidence-based monitoring and analysis of cross-cutting protection issues in Rohingya refugee settlements.

The sixth round of SPP was conducted in 33 out of 34 refugee camps and settlements in Cox's Bazar District from 28 October - 28 November, 2019. Surveys were conducted with households selected through simple random sampling of shelter footprints. Translators Without Borders supported with translating the form into Rohingya. Results of this assessment are generalisable to the population of each camp with a 95% confidence level and 10% margin of error. This factsheet presents an analysis of data collected in Camp 26, where 111 households were surveyed.

Where relevent, findings are compared to those of SPP Round 5 which took place from 25 June - 5 August, 2019.² November 2019 data is presented in dark blue, and July 2019 data is presented in light blue.

^{2.} UNHCR, Bangladesh: UNHCR Camp Settlement and Protection Profiling - Round 4, December 2018. https://data2.unhcr.org/en/documents/details/71873

^{3.} For definitions of key terms relating to special needs and disability, refer to UNHCR "Guidance on the Use of Standardized Specific Needs Codes" https://bit.ly/2GnJE0h.

^{4.} For this round of data collection, disability was measured at the household level using the Washington Group Short Set of questions on disability. According to this methodology, 'disability' is determined as anyone in the household having at least 'a lot of difficulty' following six domains: walking, seeing, hearing, cognition, self-care, and communication.

^{5.} Respondents could give up to three answers.

July 2019

Women

Settlement and Protection Profiling Camp 26

Three most frequently reported perceived risks faced by individuals in the camp^{6,7}:

in the early .

usual facility for defecation

^{7.} These results are based on the respondent's subjective perception of risks in the camp, and not the actual number of security incidents.

^{9.} This question was asked to a subset of 93 households that reported a community watch group in their area.

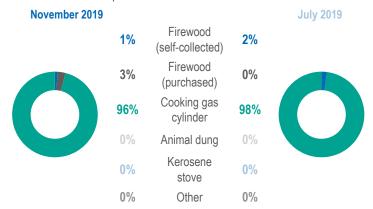

^{10.} This question was asked to a subset of 73 households that contained children under 5.

^{11.} Findings on specific issues are reported as a percentage of households who reported any issues accessing latrines.

Settlement and Protection Profiling Camp 26

Shelter and Non-Food Items (NFIs)

% of households reported their main source of fuel:

Novembe	er 2019 J	uly 2019
99%	of households reported cooking inside their shelter	99%
86%	of households reported having a lock either inside or outside of their shelter	86%
80%	of households reported having a lock both inside and outside of their shelter	29%

Three most frequently reported items needed to address household shelter and NFI needs13:

Novembe	r 2019			July 2019
52 %	Solar light	0	Solar light	63%
51%	Blanket	2	Cooking items	52 %
43%	Cooking items	3	Shelter materials	44%

Health

Novemb	er 2019	July 2019
28%	of household members were reported to have an illness serious enough to require medical treatment in the 30 days prior to data collection ¹⁴	33%
64%	households reported being visited by a community health worker in the two weeks prior to data collection	55%

Three most frequently reported challenges in accessing NGO clinics in the camps15:

Novemb	er 2019			July 2019
69%	Crowded	0	Crowded	55 %
42 %	Supplies unavailable	2	Clinic too far away	50%
36%	Clinic too far away	8	Supplies unavailable	48%

- 13. Respondents could give up to three answers.
- 14. Respondents were asked to report information for each individual in their household. The denominator for this indicator is all individuals.
- 15. Respondents could give multiple responses.
- 16. In July, this question was asked to households with children under the age of 18. In November 2019, it was asked to all households reporting the presence of members aged between 3 and 18 years old.

Education
