

WASH Site Profile - Zone JJ

Ukhiya, Cox's Bazar, Bangladesh (November 2017)

GPS Coordinates: 21,193562 92,155093

Summary

This profile provides an overview of water, sanitation and hygiene (WASH) infrastructure within Zone JJ in Ukhiya, Cox's Bazar. Primary data for this round was collected between 20 October and 9 November 2017. Findings should be considered indicative only.

Site Overview

of individuals: 15,750
of households: 3,150
of shelters: 2,295
of individuals 7
per shelter:

Key WASH Infrastructure

of latrines 1,140 (% functional): (76%)
% of safe latrines²: 76%
of handpumps (% functional): 421 (78%)

of washrooms:

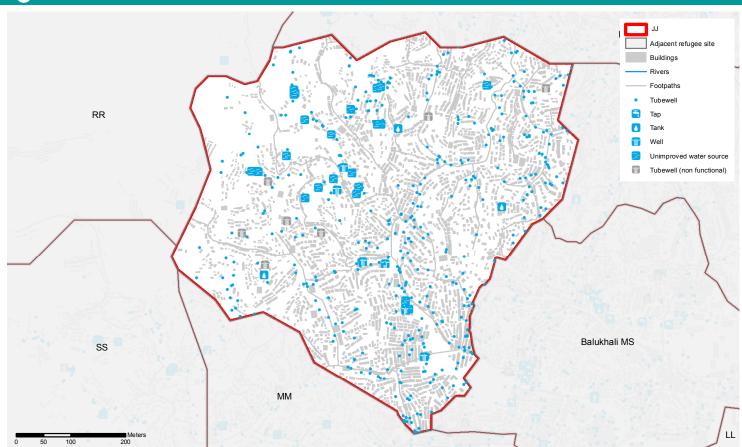

1,370

Location Map

Access to Water

Three most commonly identified types of water points, by functionality

93% Handpump/tubewell	78%	22%	
5% Unimproved water source	78%	22%	Functional Non-functional
1% Well	17%	83%	non landional

Key sectoral achievements

	Target	Previous Round	Current Round	Achievement
# of people per functional hand pump	max. 500 ³	61	48	
% of shelters within 200 metres of a functional hand	100%	100%	100%	

Targets based on WASH Sector Standards/Indicators for the Rohingya response, Sphere Minimum Standards/Indicators as well as Department of Public Health and Environment (DPHE) Minimum Standards/Indicators • Minimum standard/indicator reached, • 75%-99% minimum standard/indicator reached, • 50-74% minimum standard/indicator reached, • Less than 50% of minimum standard/indicator reached

¹ REACH enumerators conducted a full sweep of all sites and camps (as per boundaries defined by ISCG) and used an Open Data Kit (ODK) form to log all key infrastructure observed during this sweep, with further details to be logged for WASH infrastructure. ² Safe refers to fully covered latrines (i.e. a latrine with four walls, a roof and a door) ³ This target is based on standards for the medium and long term (3 months +), for the immediate phase (0-3 months) it is 1000. ⁴ The distance is based on standards for the long term (6 months+), for the immediate phase (0-3 months) it is 750 metres and for the medium phase (3-6 months) 500 metres.
