

# SUDAN MULTI-SECTOR NEEDS ASSESSMENT (MSNA)

Key Findings: **Inter-sector Coordination Group**

15 December 2020

# Contents

1. Overview of the MSNA
2. Scope and coverage
3. Methodology
4. Main takeaways
5. Key findings
6. Next steps
7. Discussion points

ANNEX: Supplemental maps, graphs & tables

01

# Overview of the MSNA

## Background

### Objectives of the MSNA

- The MSNA seeks to understand **multi-sectoral priority humanitarian needs** of populations and localities across the whole of Sudan.
- The findings intend to **provide timely updates** on key sectoral needs and priorities in order to **inform humanitarian response** and strategic programming for non-displaced, IDP and refugee households.
- The 2020 MSNA **aims to inform the 2021 Humanitarian Needs Overview (HNO) and the 2021 Humanitarian Response Plan (HRP)**.
- Contribute to a more **targeted and evidence-based** humanitarian response.

# Coordination framework

humanitarian action

# Quick guide to the versions of the MSNA HH survey dataset

**Rationale:** Versions 1 and 2 released to aid in the writing of the HNO and HRP

	<b>Version 1</b>	<b>Version 2</b>	<b>Version 3</b>
<b>Date circulated</b>	12 September	6 October	1 December
<b>Dates of data collection</b>	<b>HH surveys:</b> 16 August-7 September	<b>HH surveys:</b> 16 August-27 September	<b>HH surveys:</b> 16 August-27 October
<b>Geographic coverage</b>	<b>HH surveys:</b> 12 states and 36 localities	<b>HH surveys:</b> 17 states and 120 localities, plus Abyei PCA	<b>HH surveys:</b> 18 states and 165 localities, plus Abyei PCA
<b>Number of surveys</b>	<b>HH surveys:</b> 2,508	<b>HH surveys:</b> 9,003	<b>HH surveys:</b> 13,769
<b>Criteria for including a stratum</b>	<b>HH surveys:</b> $\geq 80\%$ of the original sample quota, $\geq 30$ surveys, and surveys validated	<b>HH surveys:</b> $\geq 80\%$ of the original sample quota, $\geq 30$ surveys, and surveys validated	<b>HH surveys:</b> $\geq 90\%$ of the original sample quota and surveys validated

02

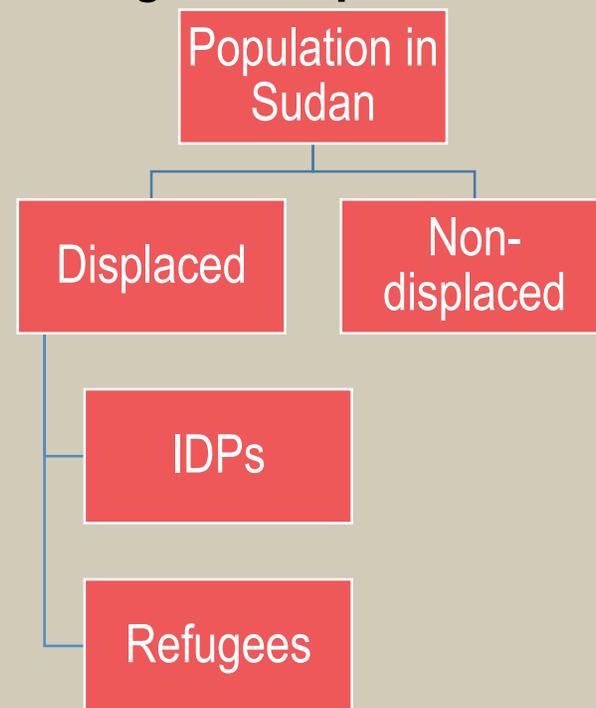

## Scope and Coverage

# Geographic and demographic scope

## Geographic Scope

- Nation-wide
- All 18 states, 184 localities
  - In South Kordofan, 3 localities excluded
  - In Blue Nile, only government-controlled portions of localities included
  - In White Nile, Kosti excluded due to lack of partner
- Plus Abyei PCA

## Targeted Populations

**Thematic  
scope**

Food Security & Livelihoods

Health

Nutrition

WASH

Emergency Shelter & NFIs

Protection (including CP, GBV, HLP, and MA)

Education

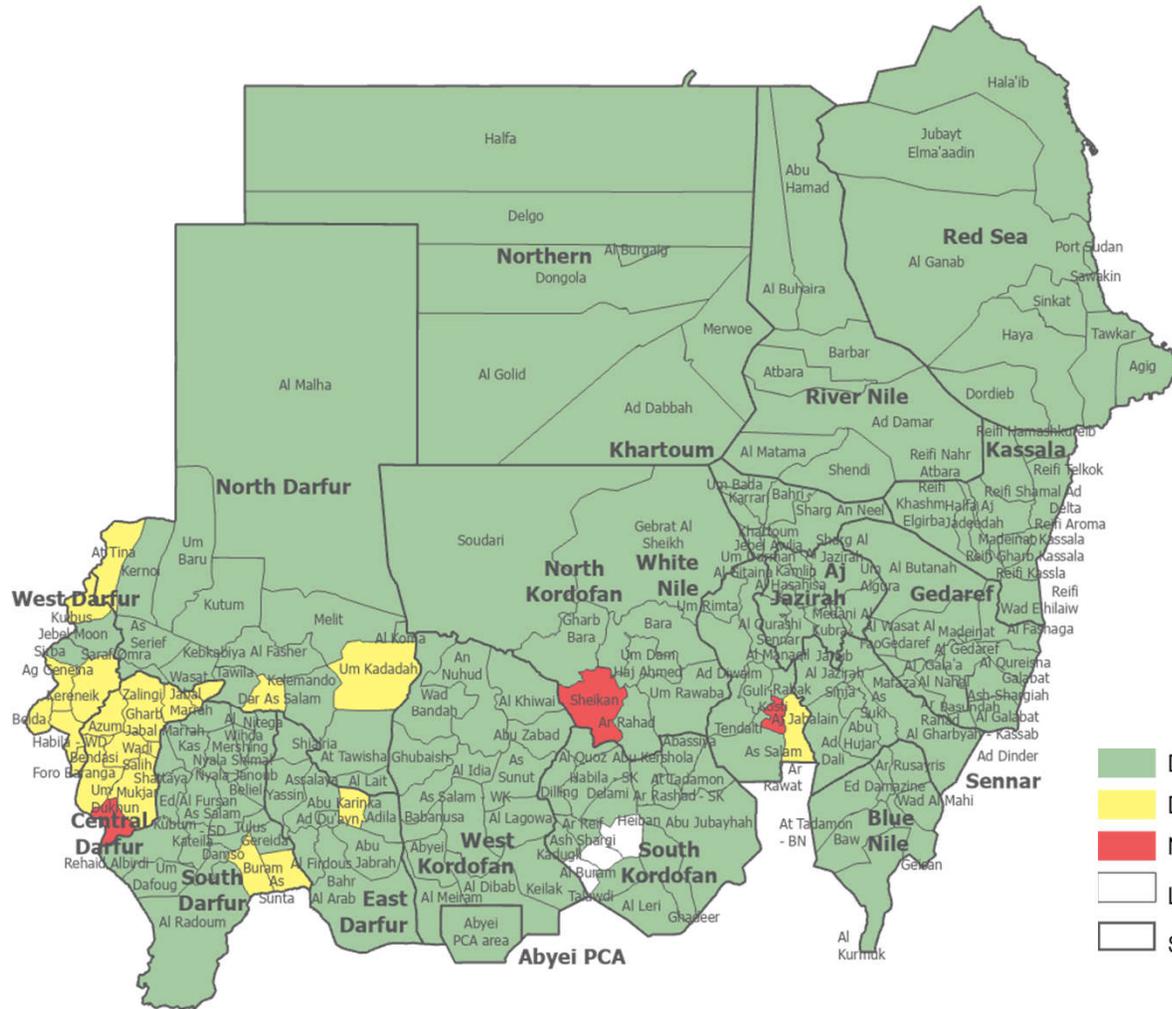

Accountability to Affected  
Populations

## Data collection by the numbers

- Data was collected using both **household (HH) surveys** and **Area of Knowledge Key Informant Interviews (AoK KIIs)**.
- Initial target collection targets were ambitious. In the end, almost all non-displaced and IDP strata were completed. However, only about a third of refugee strata were completed.

Population group	# of strata	Completed with HH surveys	Completed with AoK KIIs	Total completed
Non-displaced	186	162 (87%)	22 (12%)	184 (99%)
IDPs	52	22 (42%)	28 (54%)	50 (96%)
Refugees	84	22 (26%)	5 (6%)	27 (32%)
<b>Total</b>	<b>322</b>	<b>206 (64%)</b>	<b>55 (17%)</b>	<b>261 (81%)</b>

# Details of non-displaced population coverage

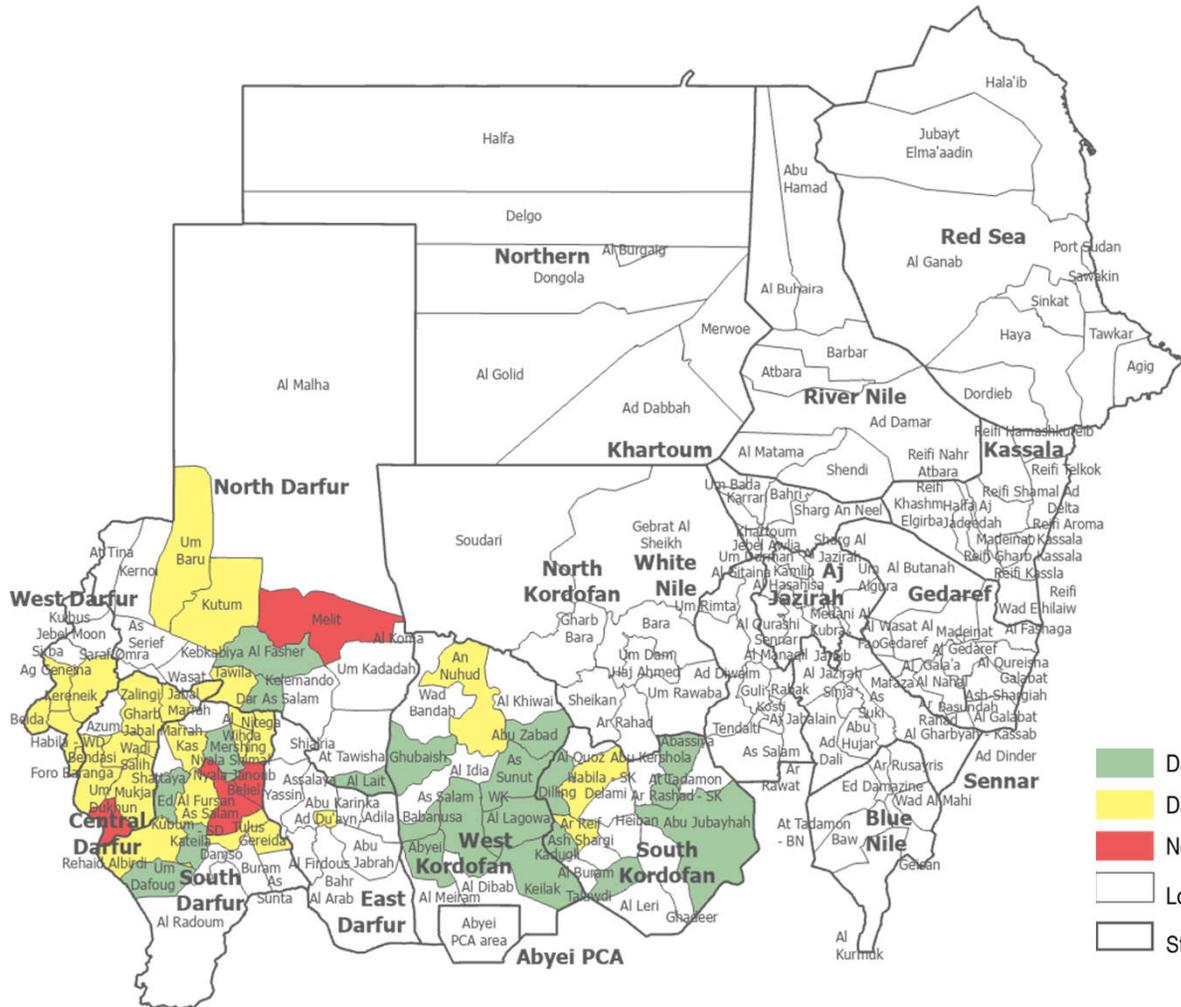

**12,065**

Non-displaced HH surveys were included in the MSNA HH survey dataset v3

- Data collected via household (HH) survey
- Data collected via Area of Knowledge Key Informant Interviews (AoK KII)
- No/insufficient data collected
- Locality boundaries
- State boundaries

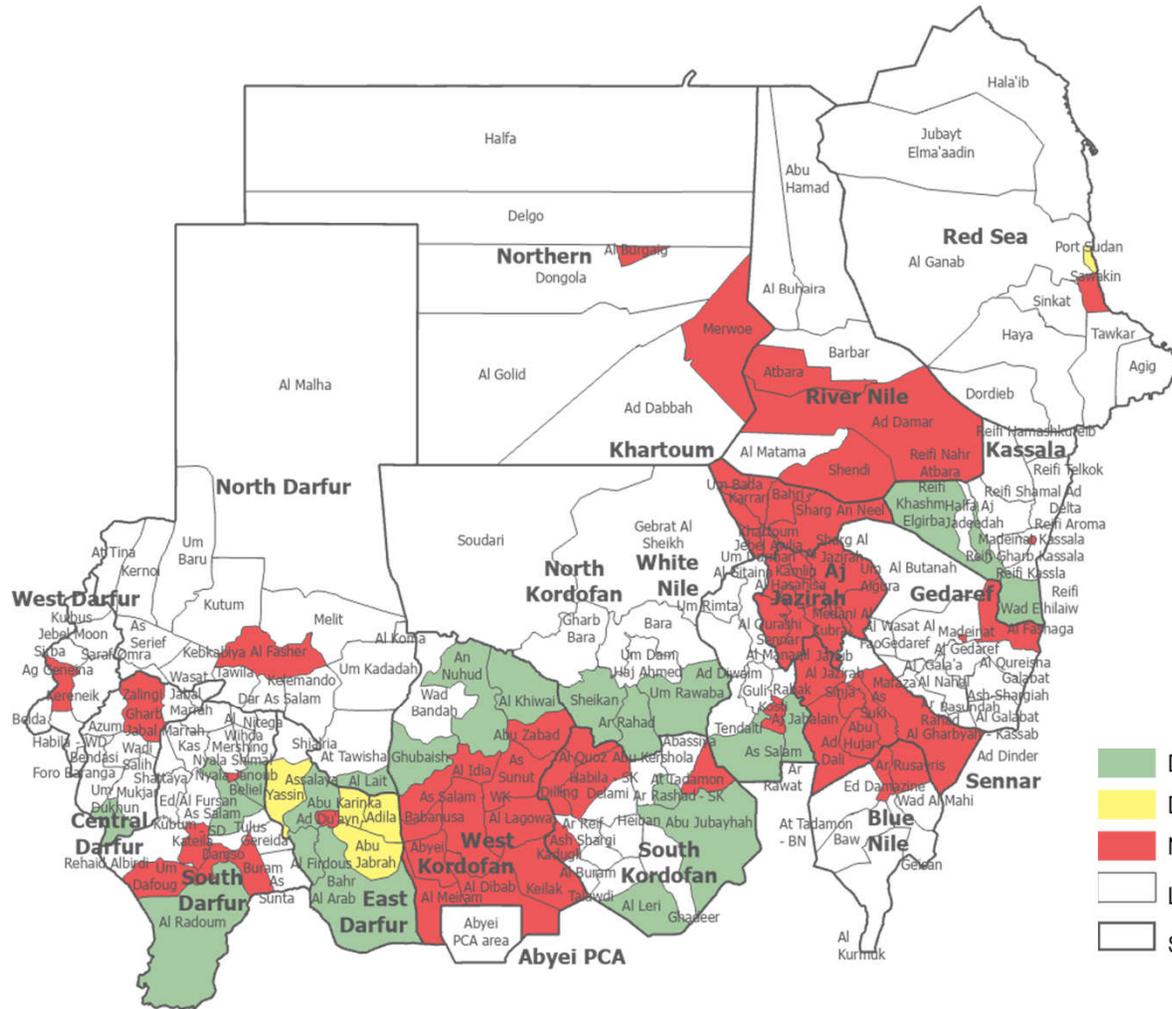

# Details of IDP population coverage

**820**  
 IDP HH surveys  
 were included in the  
 MSNA HH survey  
 dataset v3

- Data collected via household (HH) survey
- Data collected via Area of Knowledge Key Informant Interviews (AoK KII)
- No/insufficient data collected
- Locality boundaries
- State boundaries

# Details of refugee population coverage

**884**

Refugee HH surveys were included in the MSNA HH survey dataset v3

- Data collected via household (HH) survey
- Data collected via Area of Knowledge Key Informant Interviews (AoK KII)
- No/insufficient data collected
- Locality boundaries
- State boundaries

03

Methodology

# Sampling methods

## Household surveys (HH surveys)

- Non-representative, snowball quota sampling
- Stratum = Population group in a specific locality
- Data collection targets determined proportionally, based on population size, with  $\geq 33$  HH surveys (30 + 10% buffer) per stratum
- Data collected via phone and face-to-face
- Data collection ran from 16 August-27 October
- Final total: 13,769 HH surveys
- Strata-specific sampling weights applied to data when calculating results

## Area of Knowledge Key Informant Interviews (AoK KIIs)

- AoK KIIs were conducted for strata which could not be covered by HH surveys (e.g. due to partner capacity)
- Purposive sampling
- AoK KIIs selected on the basis of their recent knowledge of humanitarian conditions for the targeted stratum
- Minimum of 3 AoK KIIs per stratum
- Data collected via phone and face-to-face
- Data collection ran from 27 October-26 November
- Final total: 196 AoK KIIs

A person wearing a grey vest with the REACH logo and the text 'AN EVALUATION OF IMPACT TRAINING ACTION FOR CHANGE' is seen from behind in a field setting. The vest is the central focus, with the REACH logo prominently displayed. The background shows a blurred scene of people and a white car, suggesting a field or community setting.

## Limitations (1 of 2)

### Sampling approach

- **Results indicative, not representative:** Findings should be considered as indicative only, due to the applied non-probability sampling.
- **Limited comparability of HH survey and AoK KII data:** HH survey and AoK KII results cannot be directly compared since they were conducted using different sampling approaches. Comparison between the results of the two datasets should be qualitative (i.e., through narrative) only.

### Geographic coverage

- **<100% geographic coverage:** <100% of the strata in the original sampling frame for all 3 population groups are covered in the final dataset. Refugee coverage was especially low, with only 32% of the original strata covered. This limits the extent to which findings can be considered indicative for the population groups as a whole, or for the country as a whole.
- **NSAG-controlled areas excluded:** NSAG-controlled portions of South Kordofan and Blue Nile were excluded.

A person wearing a grey vest with the REACH logo and the text 'AN INITIATIVE OF IMPACT TRAINING AGENTS FOR URBAN' is seen from behind in a field setting. The vest is the central focus, with the REACH logo prominently displayed. The background shows a blurred outdoor environment with other people and a white car.

## Limitations (2 of 2)

### Data collection period

- **Long data collection period:** Data collection started in August and ended in November. Since certain indicators (e.g., problems with drinking water) may fluctuate seasonally, their data was likely affected by the relatively long data collection period.

### Data collection methods

- **Potential respondents limited by phone-based data collection:** Some of the HH survey and AoK KII data was collected via phone, as a way of reducing COVID-related risks. However, using phone-based data collection may have excluded some vulnerable HHs or individuals (e.g., women) that do not have access to a phone (theirs or borrowed) and/or who live in an area without mobile network coverage.
- **Protection needs likely under-represented by results:** Because the MSNA data is largely composed of HH surveys conducted with HoHs, protection needs are likely under-represented.
- **HH surveys and AoK KIIs not suitable for collecting certain types of data:** Certain indicators of interest to sectors (e.g., health care facility capacity) cannot be readily collected via HH survey, and especially via phone-based HH survey. For this reason, these indicators – although important – were excluded.

04

## Main takeaways

## Main takeaways from sector key findings

1. Most households are experiencing economic strain
2. Many households are struggling to access certain services (especially health care)
3. Higher proportions of surveyed IDP and/or refugee households showed greater need under certain indicators than non-displaced households did (e.g., FCS/rCSI scores, access to/quality of water, shelter type, reported movement restrictions)

05

## Key Findings

# Demographics of surveyed households

## Typical characteristics of households overall

7

Median HH size

3

Median number of children per HH

43 years

Median age of Head of HH

21%

Of HHs were female-headed

## Most common settlement typologies, by population group

60% of non-displaced HHs were living in **cities**, and 39% of them were living in **villages**.  
In contrast, 57% of IDP HHs and 82% of refugee HHs were living in **camps**.

## Displacement

7% of **non-displaced** HHs were returnees

\*Limited sample

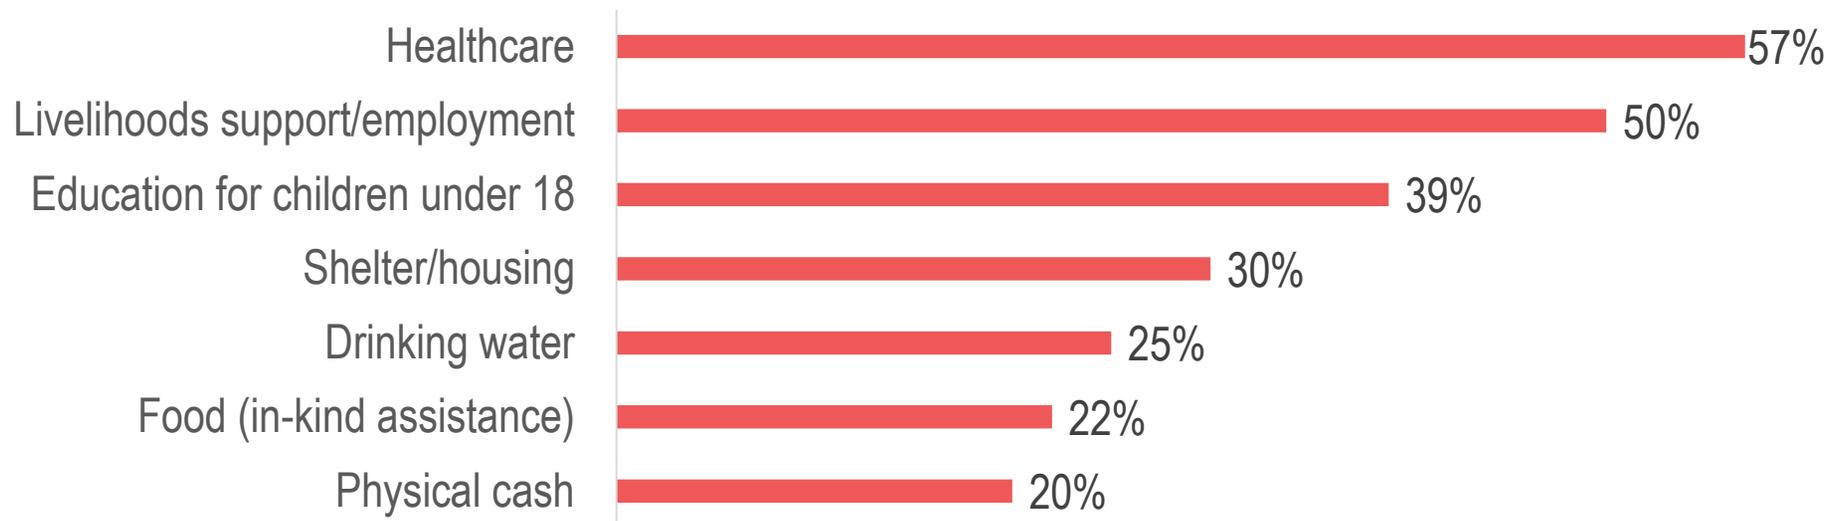

## Refugee HH countries of origin

1. South Sudan (75%)
2. Eritrea (23%)
3. Central African Republic, Ethiopia and other countries (2%)

## Self-reported needs: Top 7 needs

**Health care** was the most common self-reported priority need among surveyed HHs, followed closely by **livelihoods support/employment**.

% of HHs overall by top 7 self-reported priority needs  
(HHs selected their top 3)

# Self-reported needs: Top 5 states for each of the top 7 most commonly-reported needs

## 1 - Health care

1. Northern (68%)
2. North Kordofan (65%)
3. South Darfur (60%)
4. Blue Nile (60%)
5. North Darfur (60%)

## 2 - Livelihoods support / employment

1. North Darfur (63%)
2. East Darfur (56%)
3. White Nile (54%)
4. Sennar (54%)
5. West Darfur\* (53%)

## 3 - Education for children under 18

1. South Darfur (55%)
2. Blue Nile (52%)
3. North Darfur (49%)
4. North Kordofan (47%)
5. East Darfur (46%)

## 4 - Shelter / housing

1. Central Darfur\* (61%)
2. South Kordofan (38%)
3. Sennar (37%)
4. East Darfur (35%)
5. North Darfur (35%)

## 5 - Drinking water

1. Red Sea (46%)
2. West Kordofan (40%)
3. Kassala (38%)
4. South Darfur (38%)
5. North Kordofan (38%)

## 6 - Food (in-kind assistance)

1. Central Darfur\* (86%)
2. River Nile (25%)
3. Khartoum (25%)
4. Al Jazirah (23%)
5. Kassala (22%)

## 7 - Physical cash

1. West Darfur\* (63%)
2. Khartoum (26%)
3. North Darfur (25%)
4. White Nile (22%)
5. River Nile (21%)

\*Limited sample

# Food Security & Livelihoods: Challenges obtaining enough money to meet basic needs & shocks

**80%**

Of HHs overall faced challenges in obtaining enough money to meet their needs in the 30 days prior to data collection

Non-displaced **(80%)**  
IDP\* **(98%)** Refugee\* **(84%)**

**76%**

Of HHs overall experienced a shock in the 6 months prior to data collection

Non-displaced **(76%)**  
IDP\* **(91%)** Refugee\* **(68%)**

Among the **76%** of HHs overall that experienced a shock in the 6 months prior to data collection, the 5 most commonly-reported types of shocks among HHs were

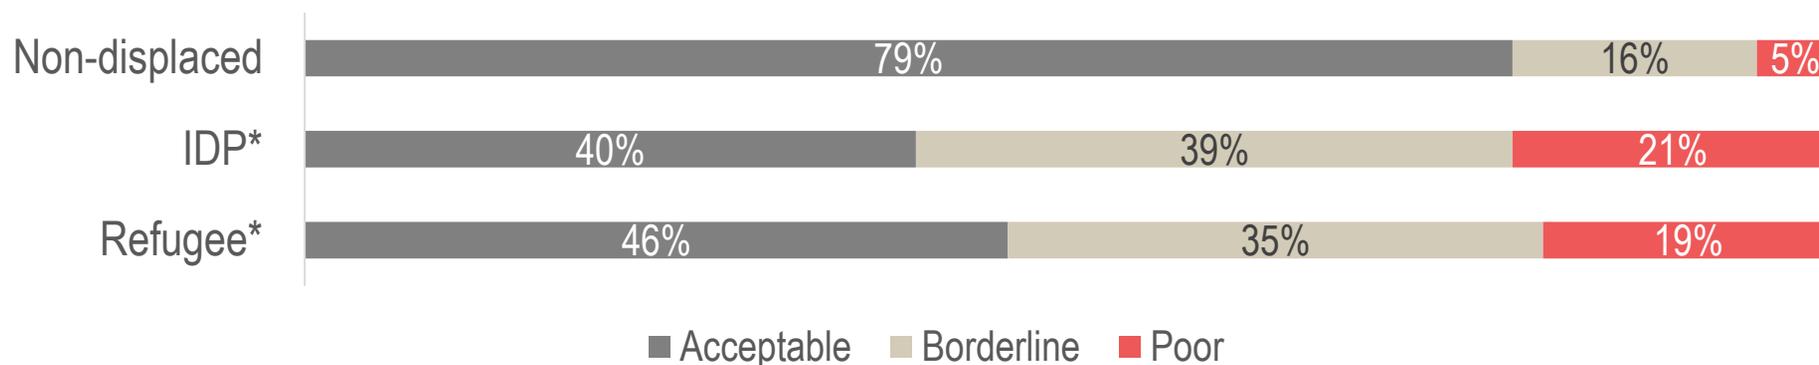

(HHs could select multiple):

1. Unusually high food prices **(69%)**
2. COVID-19 (i.e., any shock related to COVID) **(54%)**
3. Reduced income of any HH member **(53%)**
4. Unusually high prices of fuel/transport and other non-food prices **(23%)**
5. Loss of or reduced employment for any HH member **(22%)**

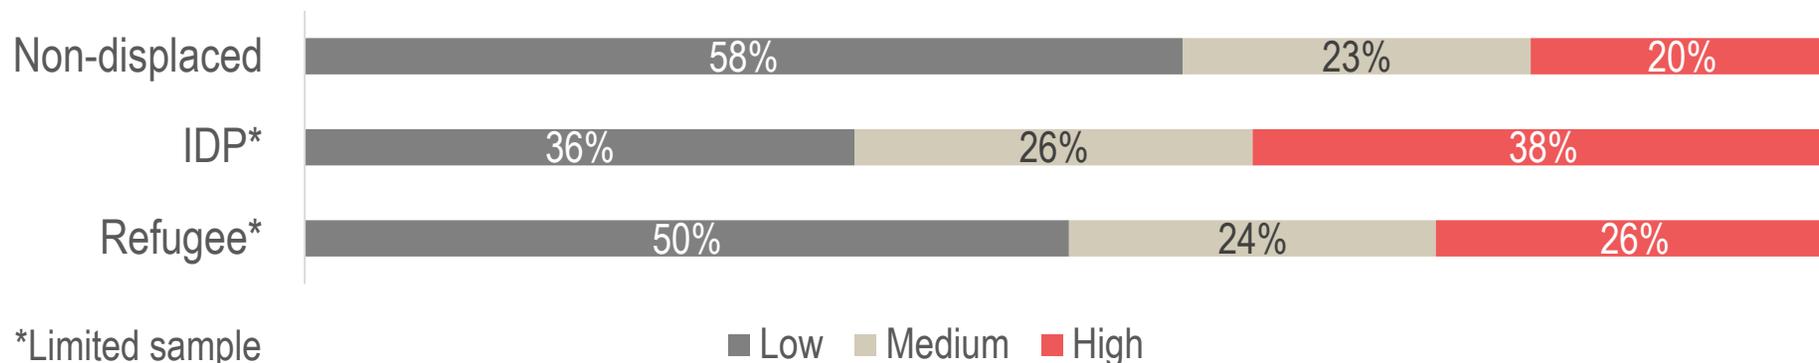

\*Limited sample

# Food Security & Livelihoods: Food Consumption Score & Reduced Coping Strategy Index

% of HHs in each Food Consumption Score category, by population group

% of HHs in each Reduced Coping Strategy Index category, by population group

\*Limited sample

## Health: Access to health care

**91%**

of HHs overall can access the nearest primary health care facility from their dwellings in  $\leq 1$  hour

Non-displaced (90%) IDP\* (83%) Refugee\* (93%)

---

Among the 80% of households overall that attempted to access health care in the 3 months prior to data collection,

**81%**

Of HHs overall experienced barriers to accessing this health care.

Non-displaced (82%)  
IDP\* (96%) Refugee\* (58%)

And

**97%**

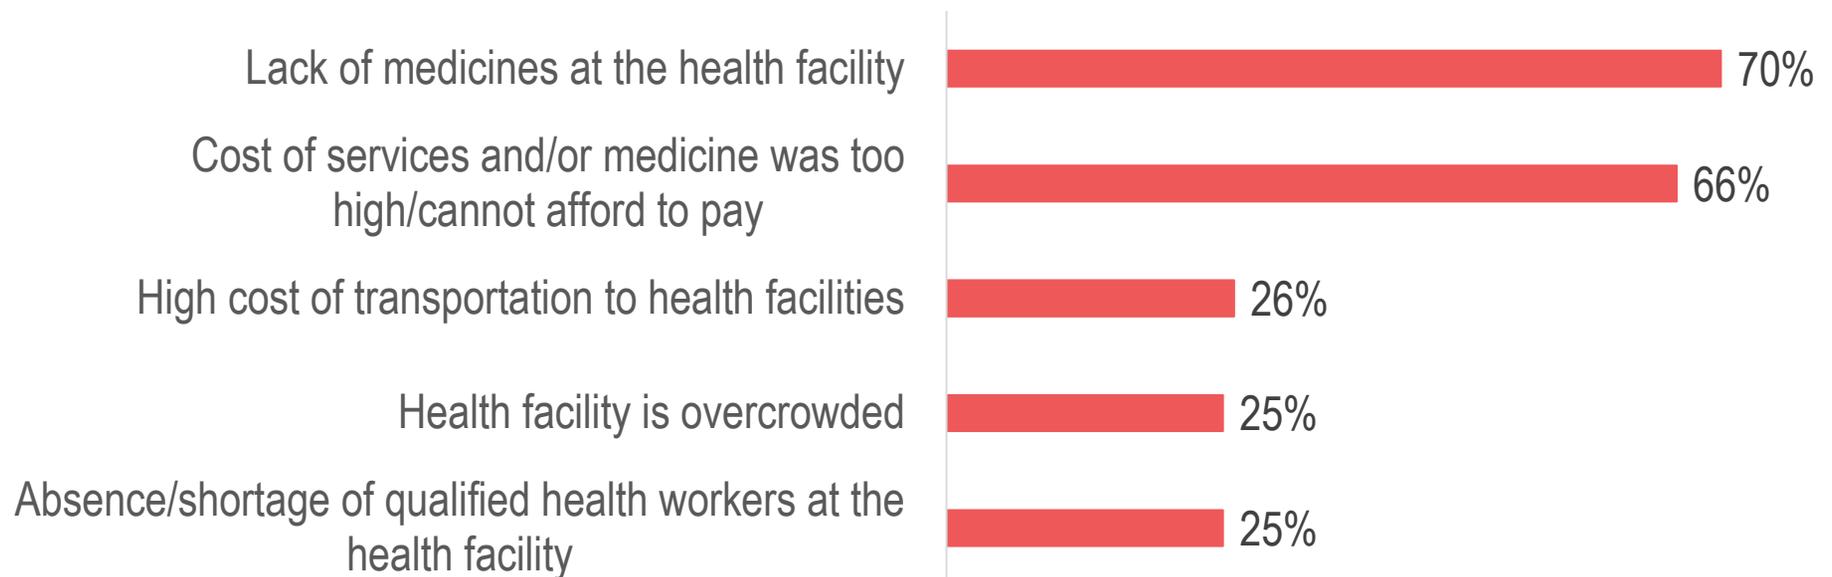

Of HHs had to pay for it.

Non-displaced (97%)  
IDP\* (97%) Refugee\* (74%)

\*Limited sample

## Health: Barriers to accessing health care

Among the **65%** HHs overall that attempted to access health care in the 3 months prior to data collection, and who experienced barriers to accessing this health care, top 5 barriers by % of HHs  
(HHs could select multiple)

# Nutrition: Therapeutic feeding programmes & exclusive breastfeeding

**16%**

Of HHs overall had  $\geq 1$  child aged 6-59 months enrolled in a therapeutic feeding programme

Non-displaced **(16%)** IDP\* **(26%)** Refugee\* **(22%)**

---

Among HHs overall with  $\geq 1$  woman who has given birth in the 2 years prior to data collection,

**63%**

of HHs relied exclusively on breastfeeding between the ages of 0-6 months

Non-displaced **(63%)** IDP\* **(68%)** Refugee\* **(64%)**

# Water, Sanitation & Hygiene: Problems with access to or quality of water & sanitation

**61%** of HHs overall have problems related to access to or quality of water  
Non-displaced (60%) IDP\* (80%) Refugee\* (61%)

Among the **61%** of HHs overall with problems related to access to or quality of water, % of HHs by top 5 problems (HHs could select multiple):

1. Do not like the taste/quality of the water (41%)
2. Water is too expensive (32%)
3. Cannot get enough water to meet all needs (27%)
4. Water points are not functioning (25%)
5. Water points are too far (18%)

**37%** of HHs overall primarily rely on unimproved sanitation facilities (i.e., **not** a pour/flush toilet or pit latrine with slab/platform)  
Non-displaced (37%) IDP\* (59%) Refugee\* (37%)

\*Limited sample

## Emergency Shelter & NFIs: Shelter type & condition

**27%**

of HHs overall were living in an unfinished/unenclosed building, collective shelter, tent or emergency shelter

Non-displaced (25%) IDP\* (75%) Refugee\* (84%)

---

Among HHs with shelter (i.e., excluding the 0.1% of HHs overall with no shelter of any kind),

**62%**

of these HHs overall were living in shelters that did **not** meet agreed technical and performance standards (i.e., had damage or structural problems) at the time of data collection

Non-displaced (61%) IDP\* (90%) Refugee\* (78%)

\*Limited sample

## General Protection: Movement restrictions, safety/security incidents & civil documentation

**48%** of HHs overall reported having experienced movement restrictions in the 6 months prior to data collection

Non-displaced (48%) IDP\* (63%) Refugee\* (34%)

**6%** of HHs overall reported having experienced safety or security incidents affecting HH members in the 3 months prior to data collection

Non-displaced (6%) IDP\* (6%) Refugee\* (8%)

**22%** of HHs overall reported having  $\geq 1$  members who were missing  $\geq 1$  types of civil documentation, such as a passport, national ID or birth certificate, at the time of data collection

Non-displaced (22%) IDP\* (36%) Refugee\* (33%)

\*Limited sample

# Child Protection: Psychological distress, child(ren) not living with the HH & child labour

**30%** of HHs overall reported having  $\geq 1$  member who had shown signs of psychological distress in the 3 months prior to data collection  
Non-displaced (30%) IDP\* (30%) Refugee\* (29%)

**3%** of HHs overall reported having  $\geq 1$  child under the age of 18 who was **not** living with the HH at the time of data collection  
Non-displaced (3%) IDP\* (5%) Refugee\* (12%)

**57%** of HHs overall reported having  $\geq 1$  child aged 6-17 years who was engaged in *any* form of child labour (inside or outside the home), in the 6 months prior to data collection  
Non-displaced (58%) IDP\* (58%) Refugee\* (40%)

\*Limited sample

# Gender-based Violence: Feelings of safety, services/programs for women & reporting GBV cases

**16%** of HHs overall reported having women and/or girls who had avoided areas in their current location because they felt unsafe, in the 6 months prior to data collection  
Non-displaced (15%) IDP\* (27%) Refugee\* (18%)

---

**24%** of respondents overall reported that they were aware of services or programs available in their community that were specifically for women  
Non-displaced (24%) IDP\* (30%) Refugee\* (38%)

---

**88%** of respondents overall said that if they heard of a case of violence against a woman or girl, they would report it  
Non-displaced (88%) IDP\* (90%) Refugee\* (85%)

\*Limited sample

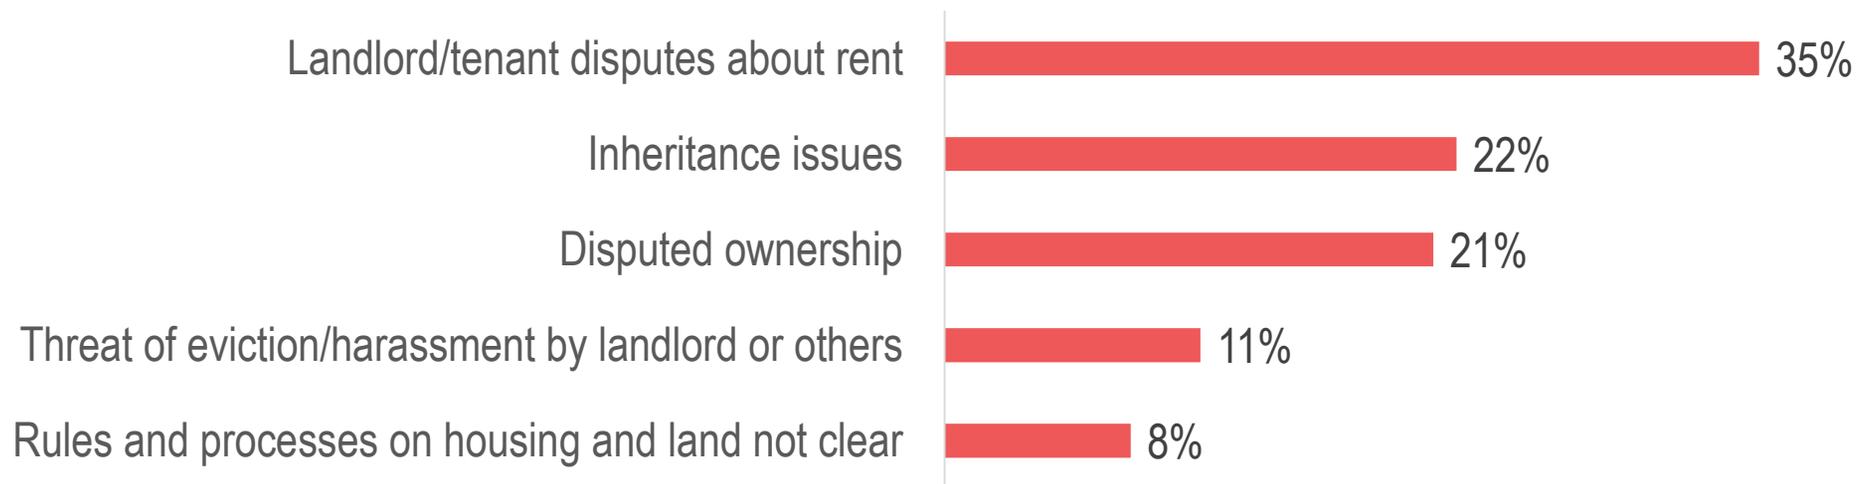

# Housing, Land & Property: Housing, land & property issues

**13%**

of HHs overall reported that they had housing, land or property issues at the time of data collection

Non-displaced (13%) IDP\* (11%) Refugee\* (7%)

Among the **13%** of HHs overall that reported that they had housing, land or property issues, % of HHs by top 5 types of issues  
(HHs could select multiple)

# Mine Action: Contamination, awareness-raising & survivors

**4%**

of HHs overall reported that they were impacted by contamination from landmines and/or Explosive Remnants of War (ERW) at the time of data collection

Non-displaced (4%) IDP\* (12%) Refugee\* (<1%)

and among these HHs overall,

**↳ 58%**

reported that they had members who had received awareness raising on ERWs\*\*

**2%**

of HHs overall reported that they had  $\geq 1$  member who is a landmine and/or Explosive Remnants of War (ERW) victim/survivor at the time of data collection (230/13,769 respondent HHs)\*\*

Non-displaced (2%) IDP\* (4%) Refugee\* (<1%)

\*\*Represents a small subset

# Education: School attendance & remote learning

Among the **76%** of HHs with children aged 4-16 years,

**76%** of these HHs have children who were attending school regularly ( $\geq 4$  days/week) during the 2019-2020 school year *before* the schools were closed on 15 March 2020 due to COVID-19

Non-displaced (**77%**) IDP\* (**62%**) Refugee\* (**49%**)

and among these HHs overall,

**↳ 98%** declared that their children either would return to school once the schools re-opened, or if the schools had already re-opened, that they had already returned to school

**↳ 40%** had children that continued learning activities remotely

**↳ 72%** had parents, caregivers or older siblings who were able to support home-based learning

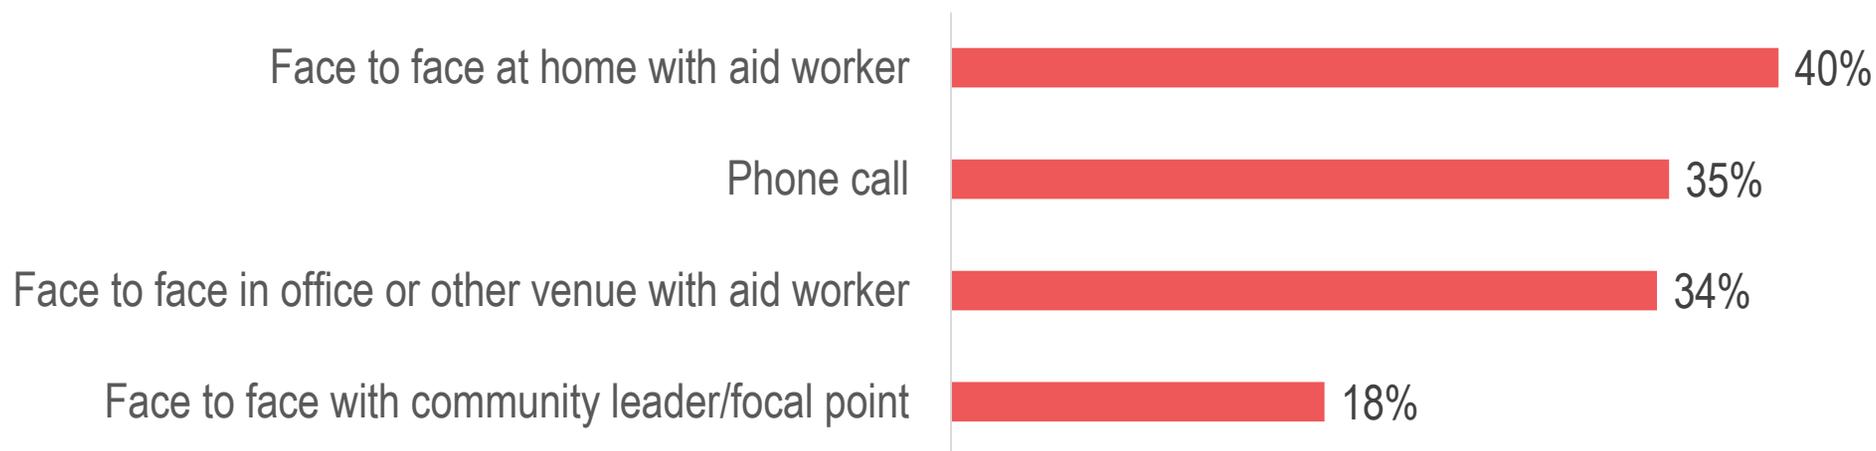

\*Limited sample

# Accountability to Affected Populations: Paying for aid & feedback mechanisms

**16%** of respondents said that they thought paying to receive humanitarian assistance was OK

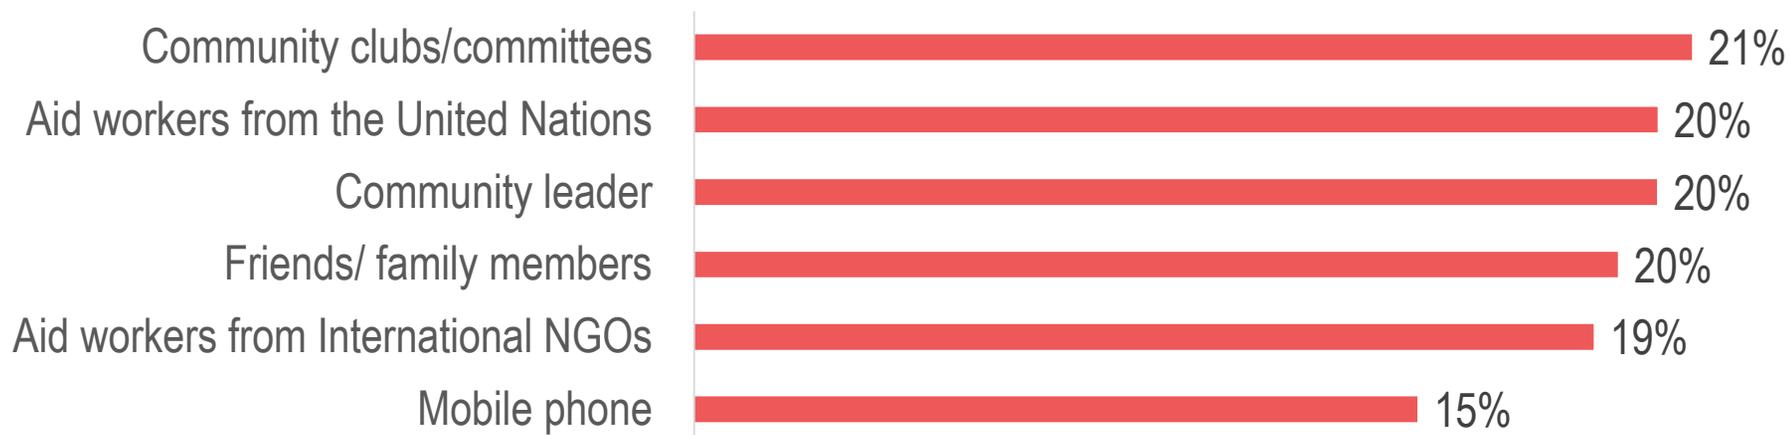

**11%** of respondents said that they thought paying for humanitarian assistance *might* be OK, depending on the situation

% of respondents by top 5 preferred means of providing feedback to aid providers about the quality, quantity and appropriateness of aid (HHs could select multiple)

# Accountability to Affected Populations: Information on assistance

Among the **97%** of HHs overall that reported that they needed assistance, % of HHs by top 6 preferred sources of information on assistance (HHs could select multiple)

**48%** respondents said that they were aware of people who might be unable to access available information about humanitarian assistance because of their specific needs

06

Next Steps

# Summary of next steps\*

## ANALYSIS TABLES

Analysis tables (Excel) will be circulated in **early December**

## PRESENTATIONS

REACH will present findings to the sectors between **2-9 December** and to the ISCG on **15 December**

## DASHBOARD

An online, interactive dashboard will go live at the **end of January**

## FINAL REPORT

The final report will be published at the **end of February**

\*Dates are subject to change.

07

## Discussion Points

## Questions to guide discussion

1. Any general thoughts on the MSNA findings?
2. Are there any lessons learned that you would like to raise for future MSNAs or other assessments in Sudan?
3. If the next MSNA were to include qualitative data collection (e.g., open-ended KIIs, FGDs), what type(s) of qualitative data would you like to see included?

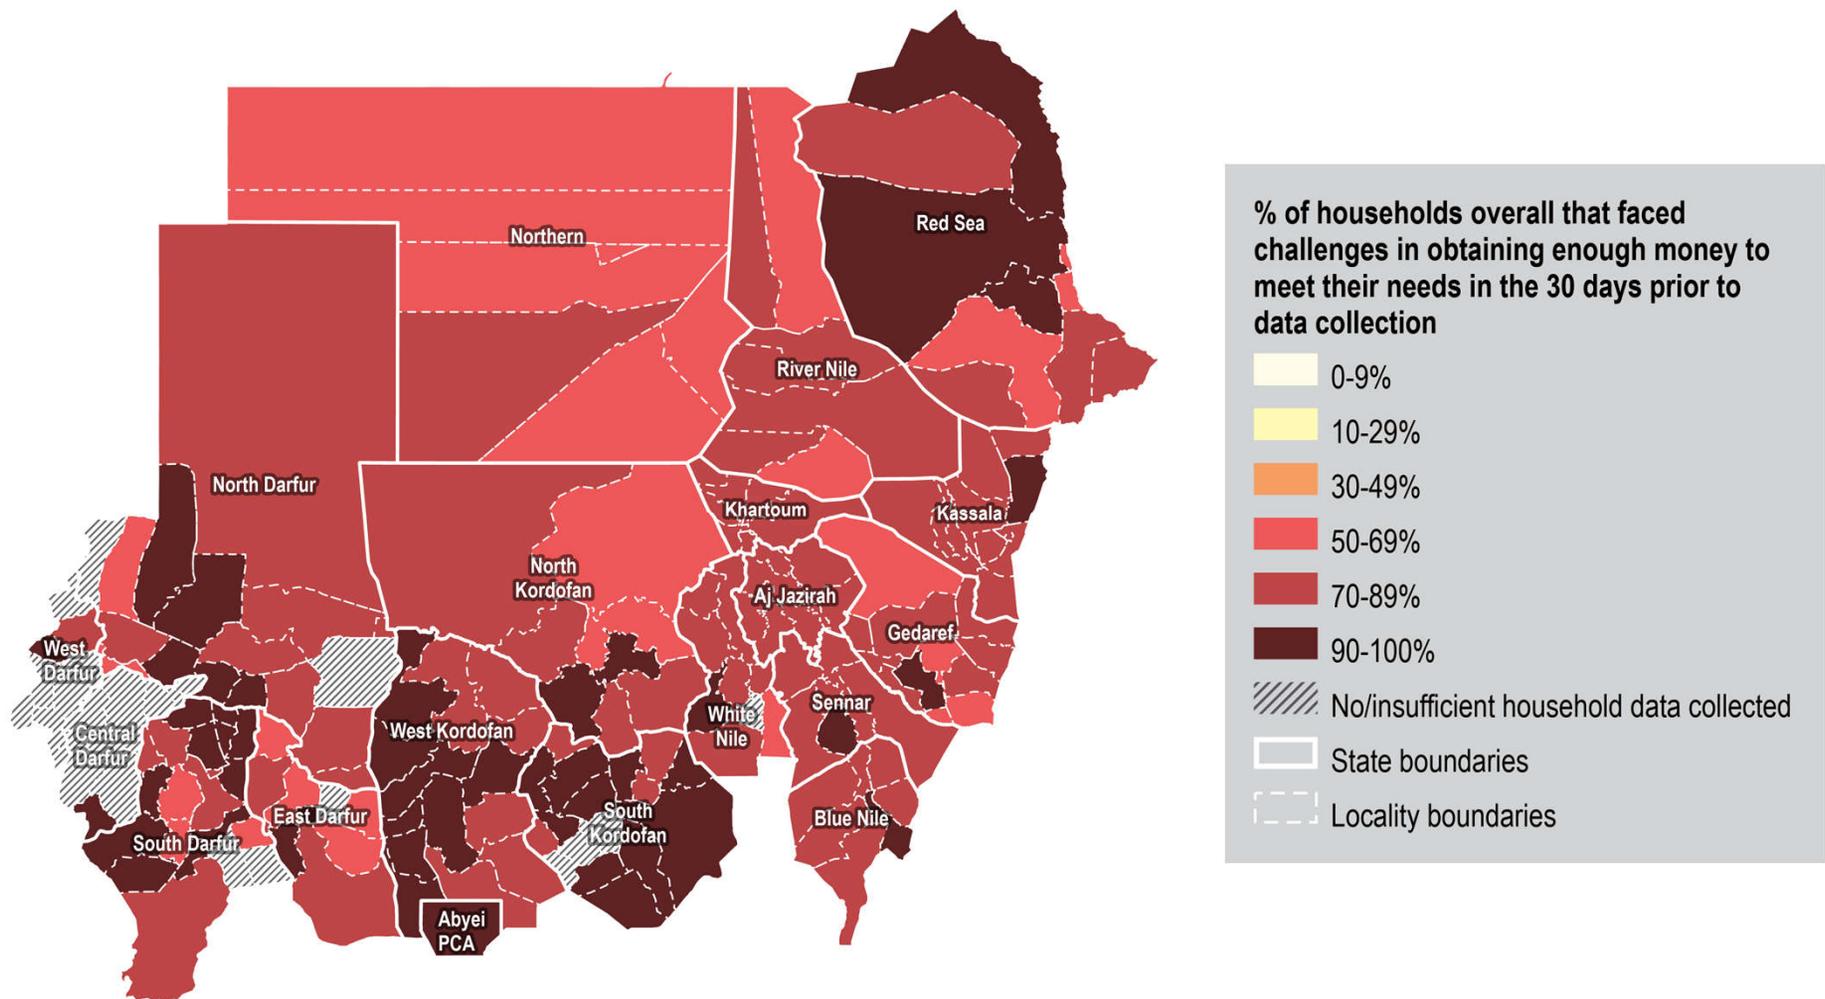

**THANK YOU  
FOR YOUR  
ATTENTION**

**REACH** Informing  
more effective  
humanitarian action

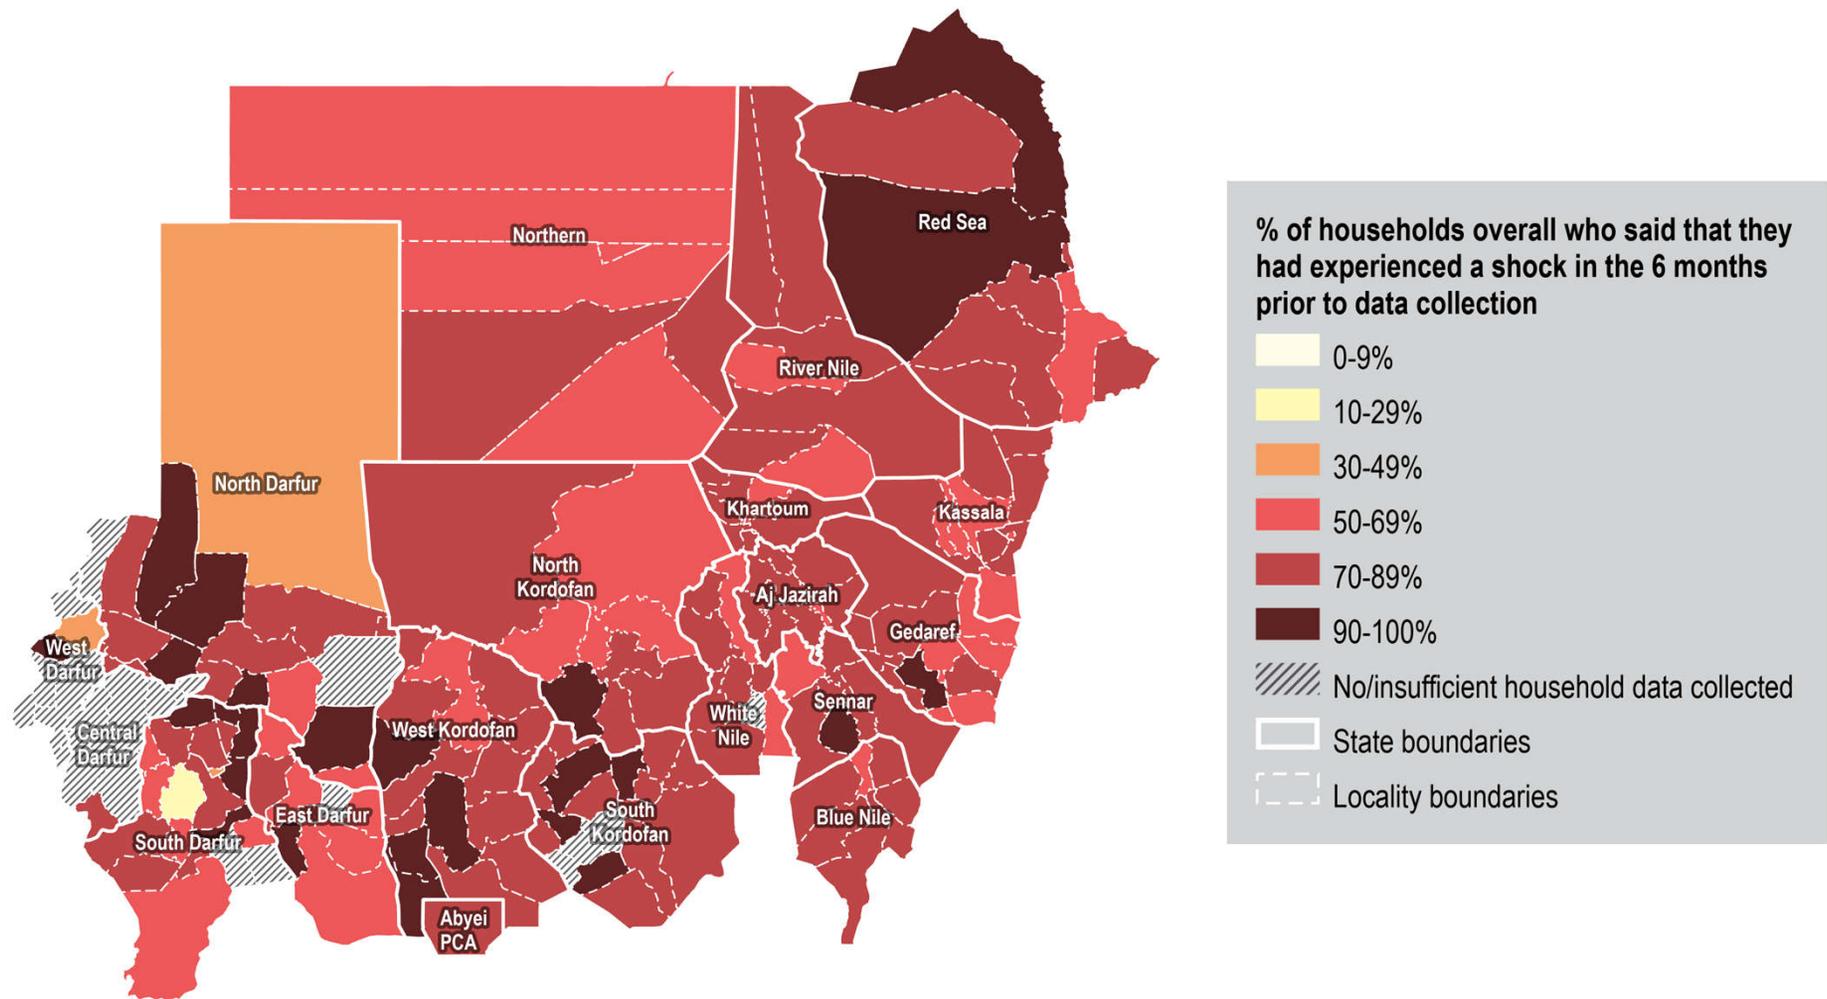

# Annex

# Food Security & Livelihoods: Challenges obtaining enough money to meet basic needs

# Food Security & Livelihoods: Shocks

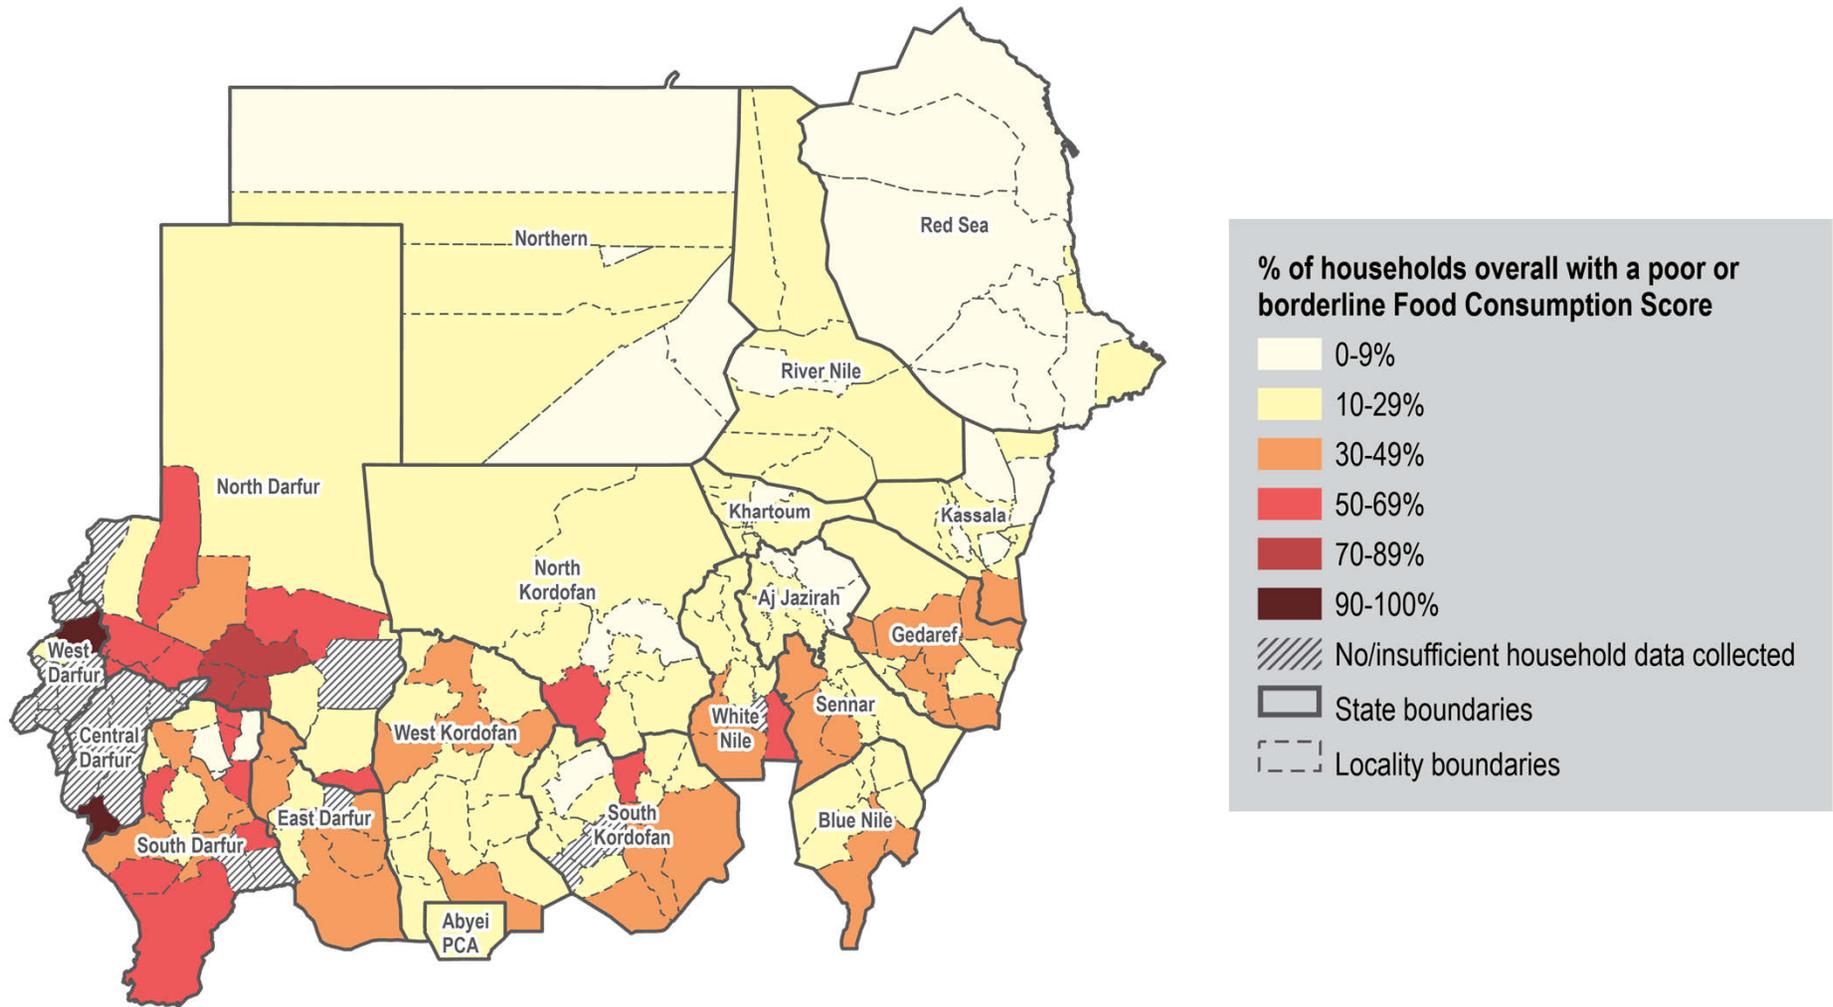

# Food Security & Livelihoods: Shocks breakdown

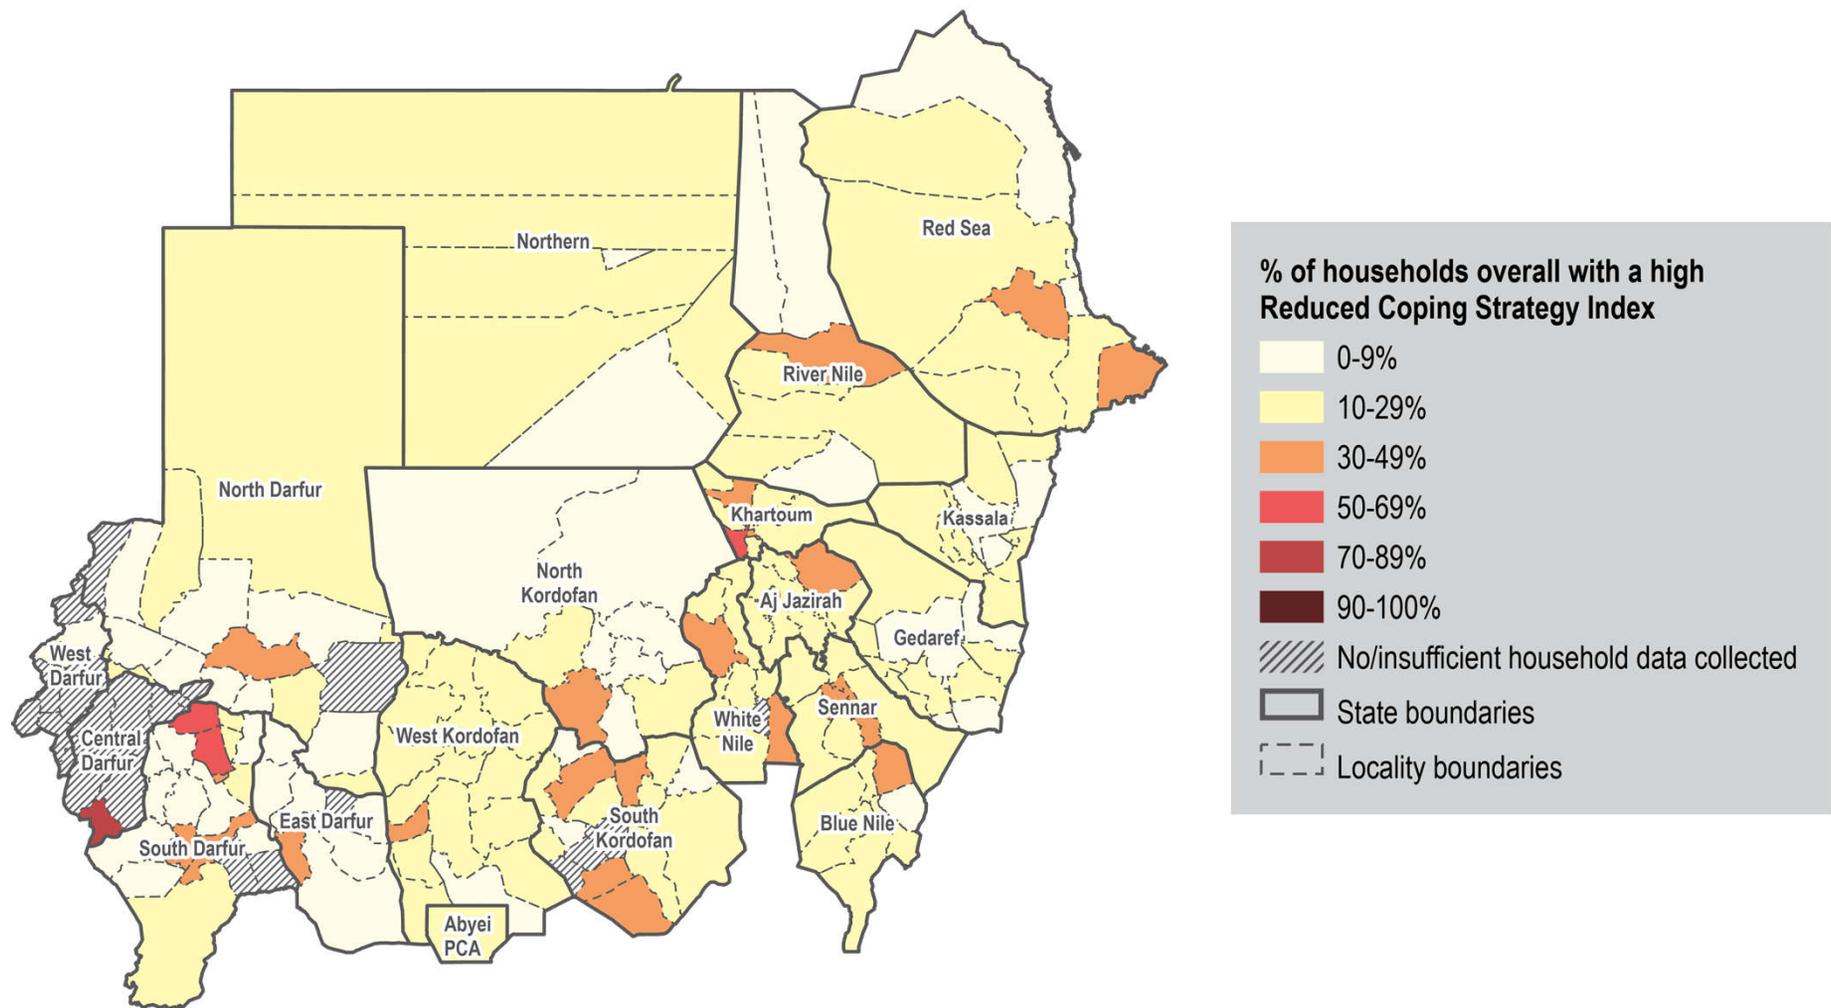

Among HHs that experienced $\geq 1$ shock in the 6 months prior to data collection, top 8 types of shocks (HHs could select multiple)	Overall	Non-displaced	IDP	Refugee
Unusually high food prices	69%	69%	82%	61%
COVID-19 (i.e., any shock related to COVID)	54%	55%	45%	36%
Reduced income of any household member	53%	53%	65%	53%
Unusually high prices of fuel/transport and other non-food prices	23%	23%	25%	12%
Loss of or reduced employment for any household member	22%	21%	32%	43%
Too much rain, flooding	11%	11%	6%	8%
Serious illness (other than COVID-19) or accident resulting in injury for any household member	4%	4%	4%	11%
Insecurity/violence/raiding/looting	3%	3%	11%	2%

\*Limited HH survey sample

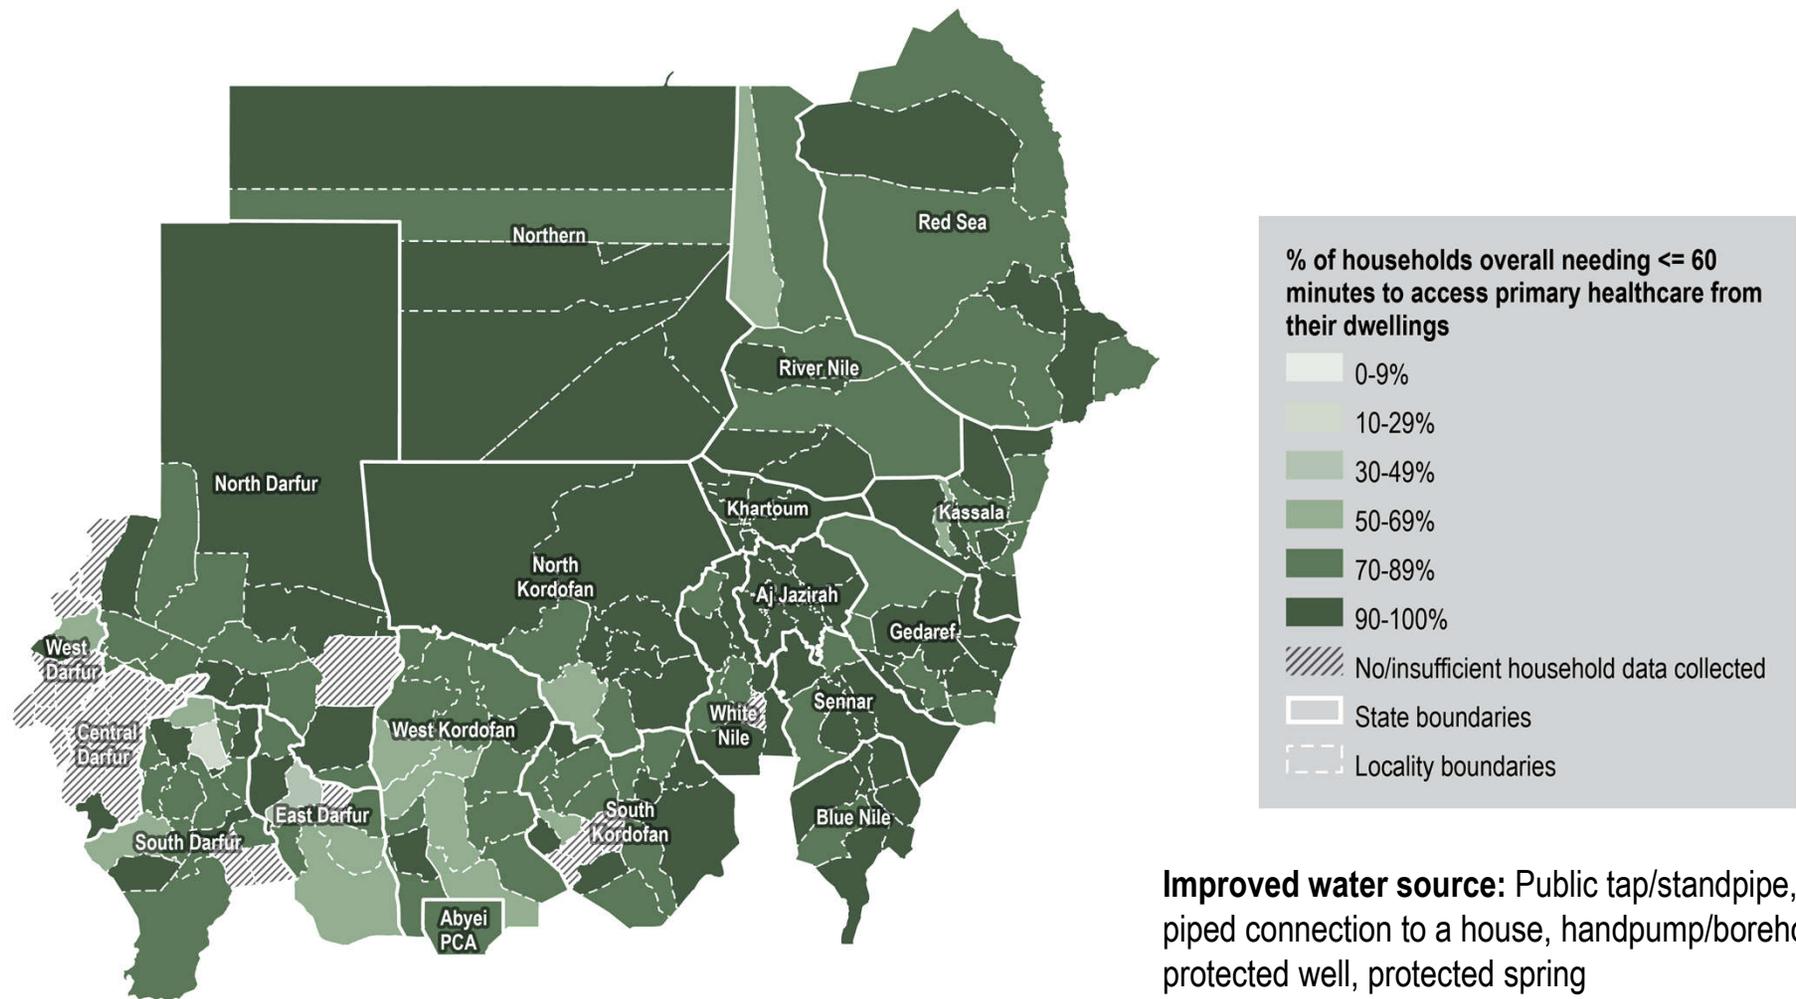

# Food Security & Livelihoods: Food Consumption Score (scores of 'borderline' or 'poor')

# Food Security & Livelihoods: Reduced Coping Strategy Index (scores of 'high')

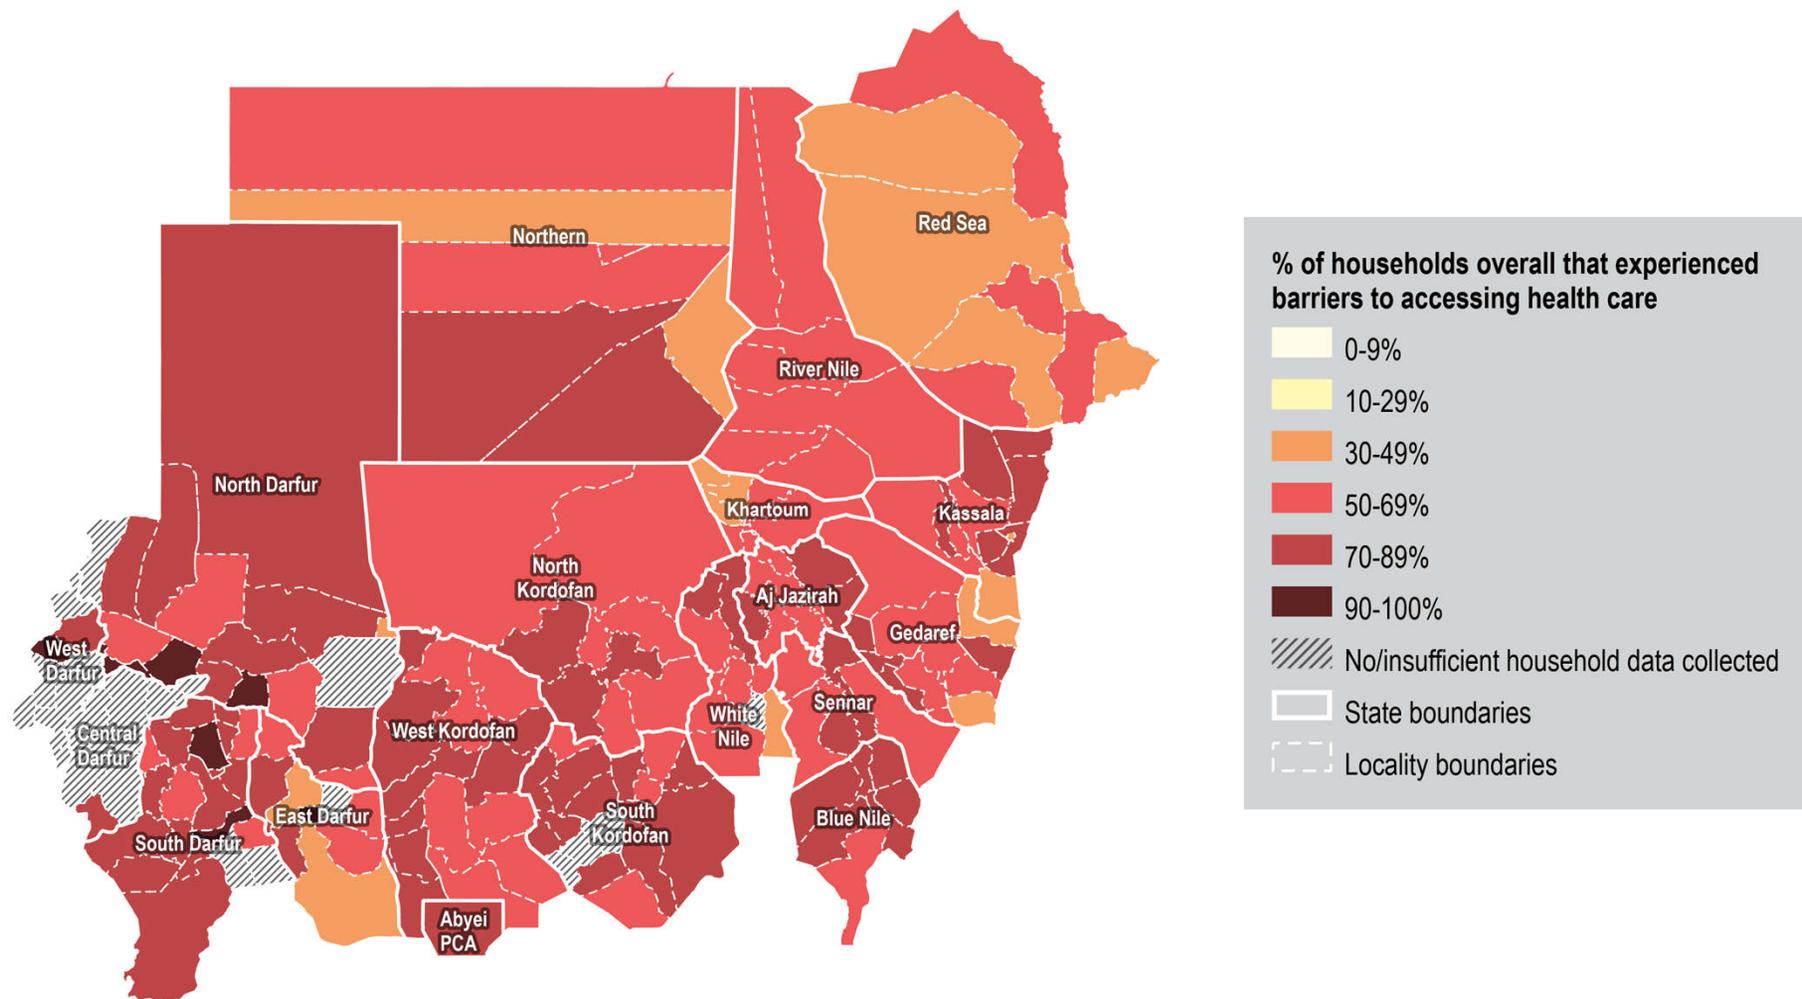

# Health: Duration to access primary health care facilities

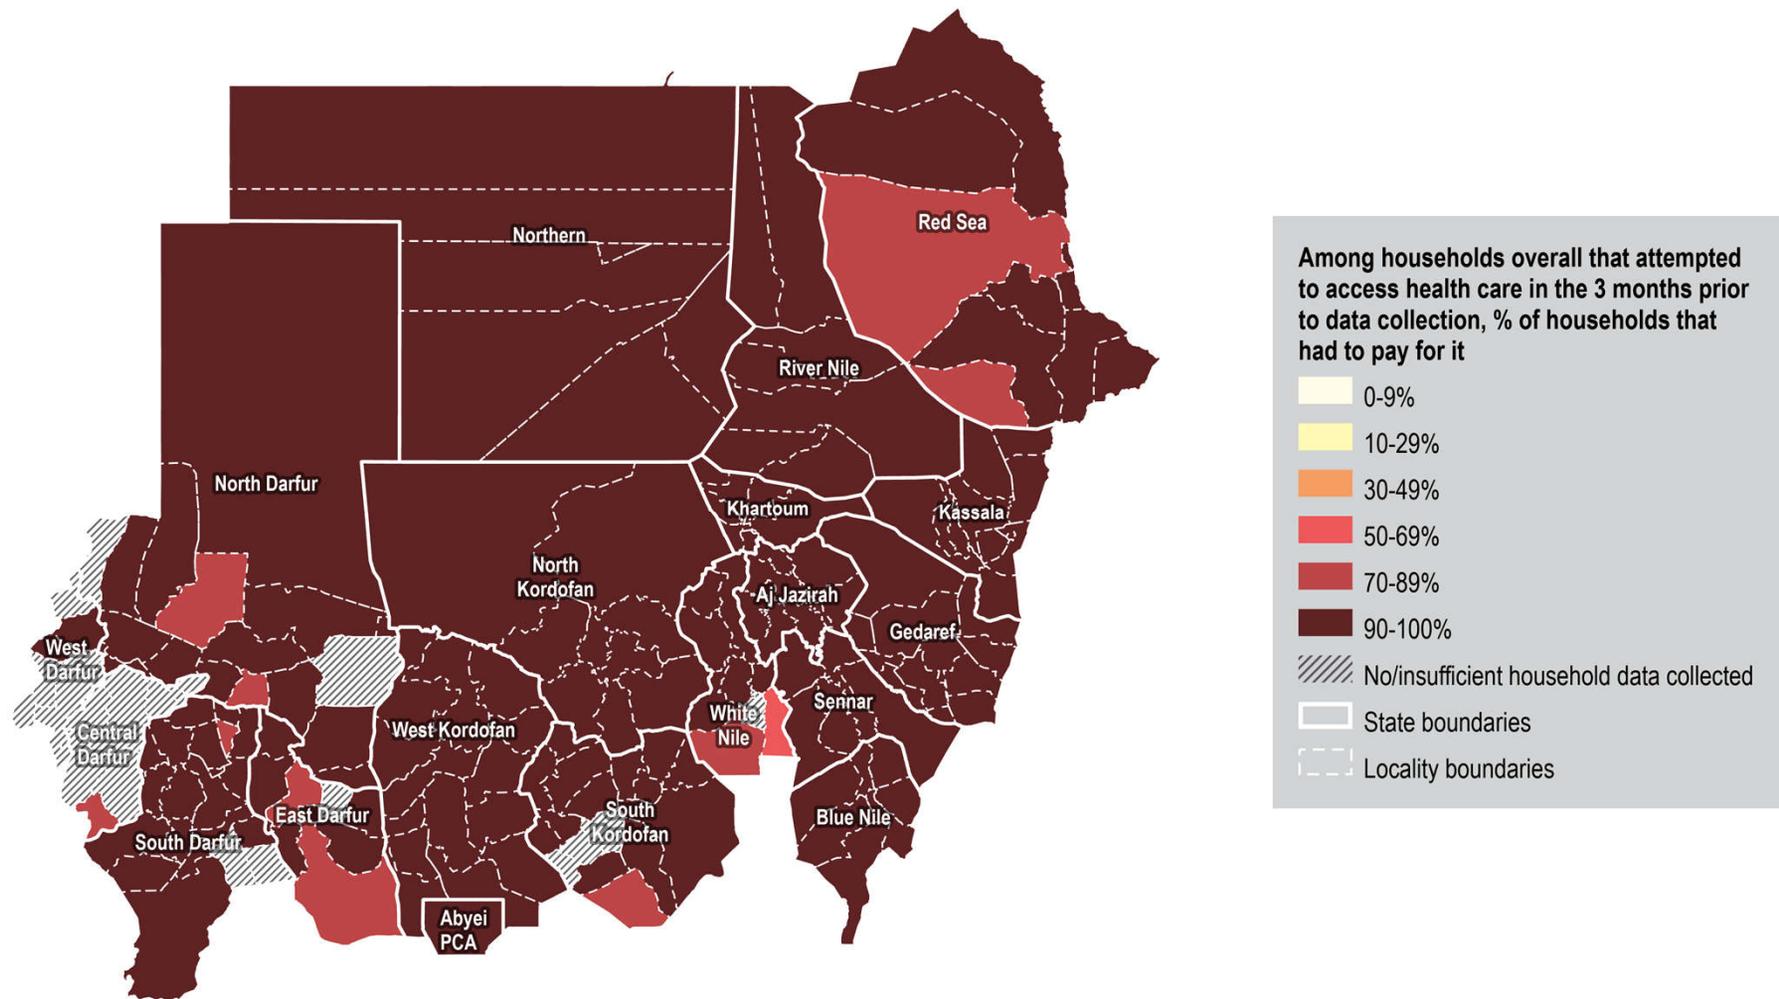

**Improved water source:** Public tap/standpipe, piped connection to a house, handpump/borehole, protected well, protected spring

# Health: Barriers to accessing health care

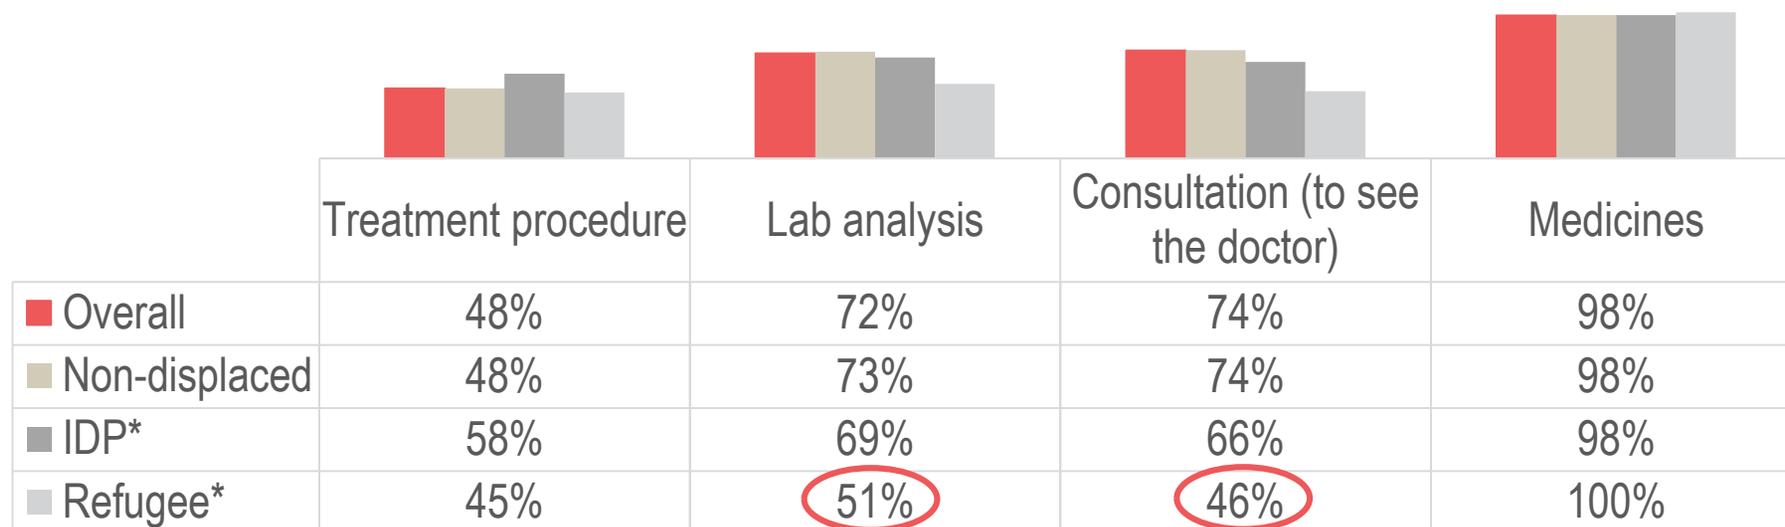

# Health: Paying for health care

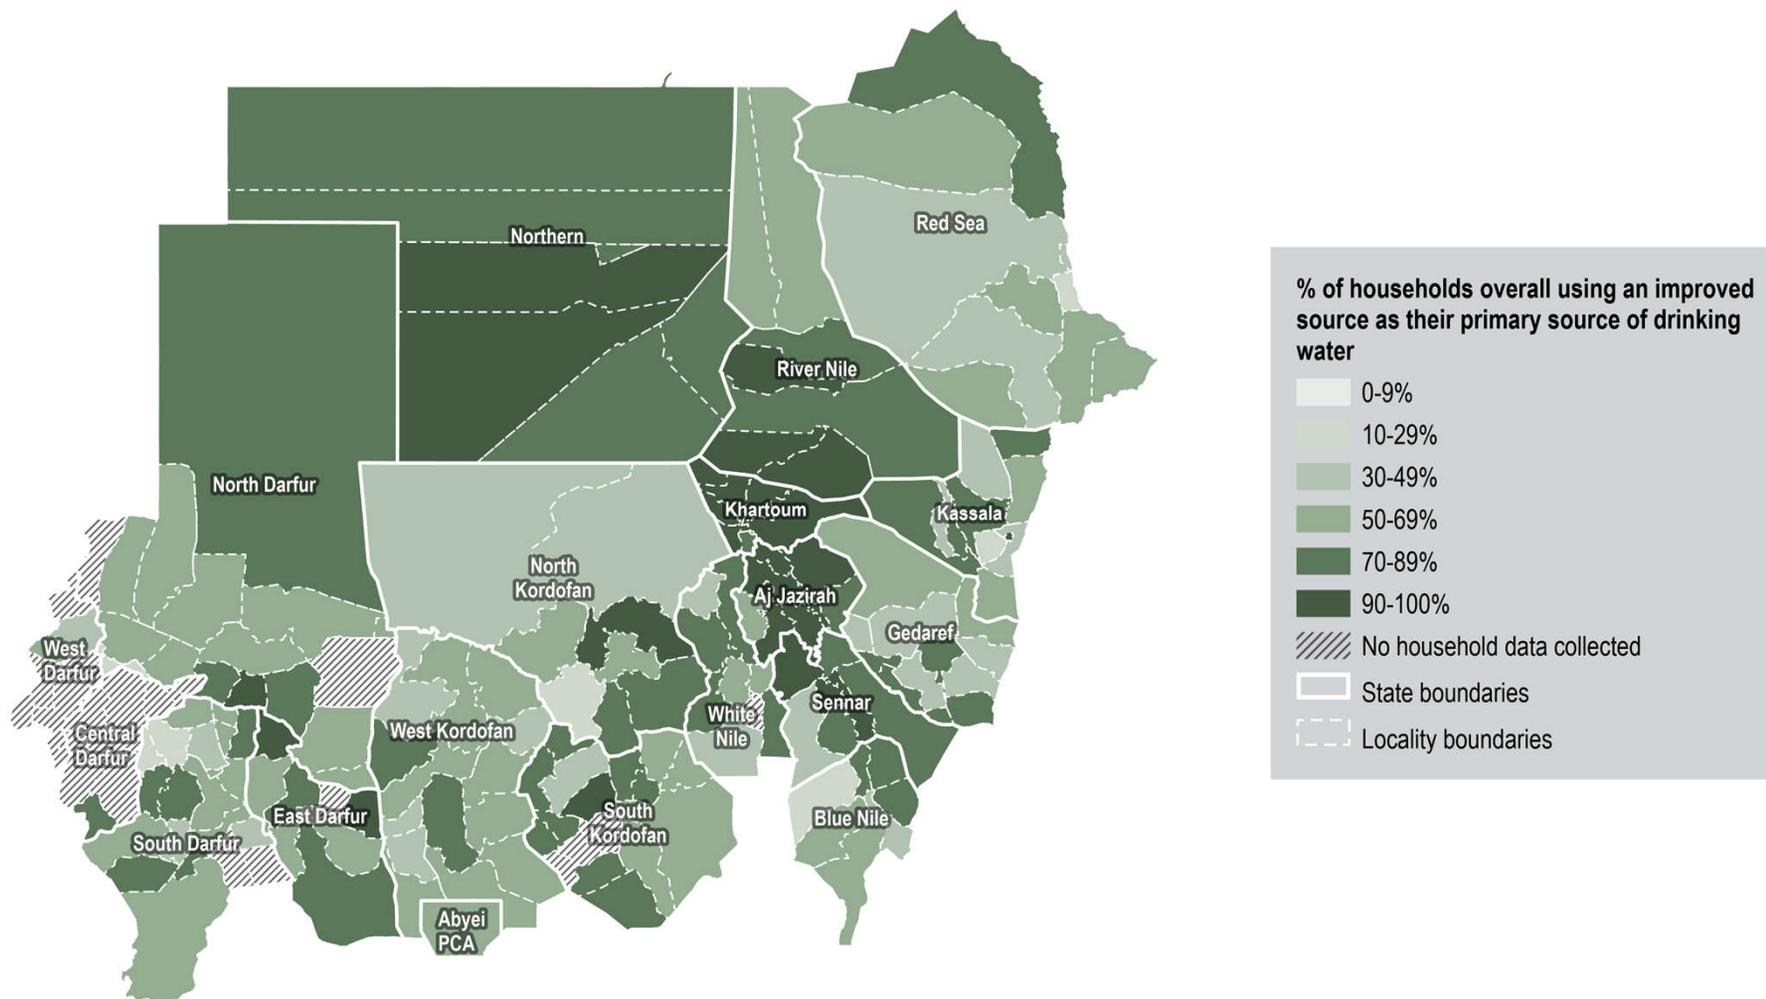

# Health: Paying for health care breakdown

Among HHs that attempted to access health care in the 3 months prior to data collection, and who had to pay for it, services paid for by % of HHs (HHs could select multiple)

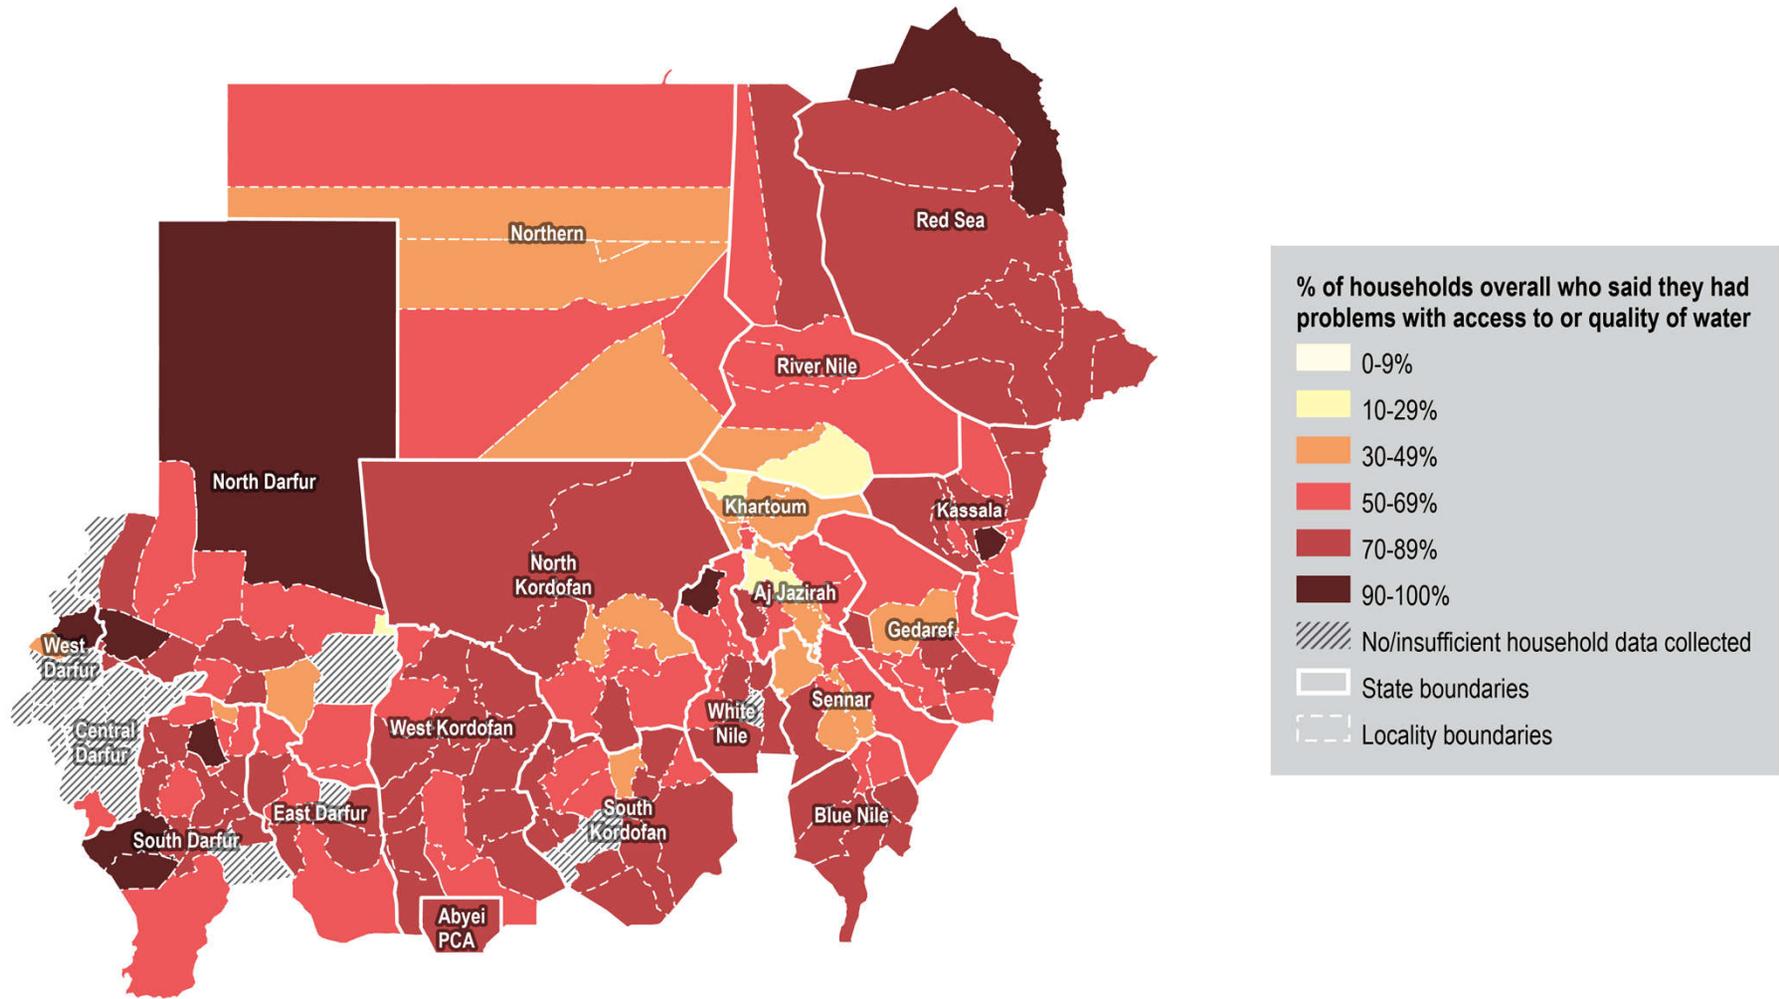

\*Limited sample

# Water, Sanitation & Hygiene: Primary source of drinking water

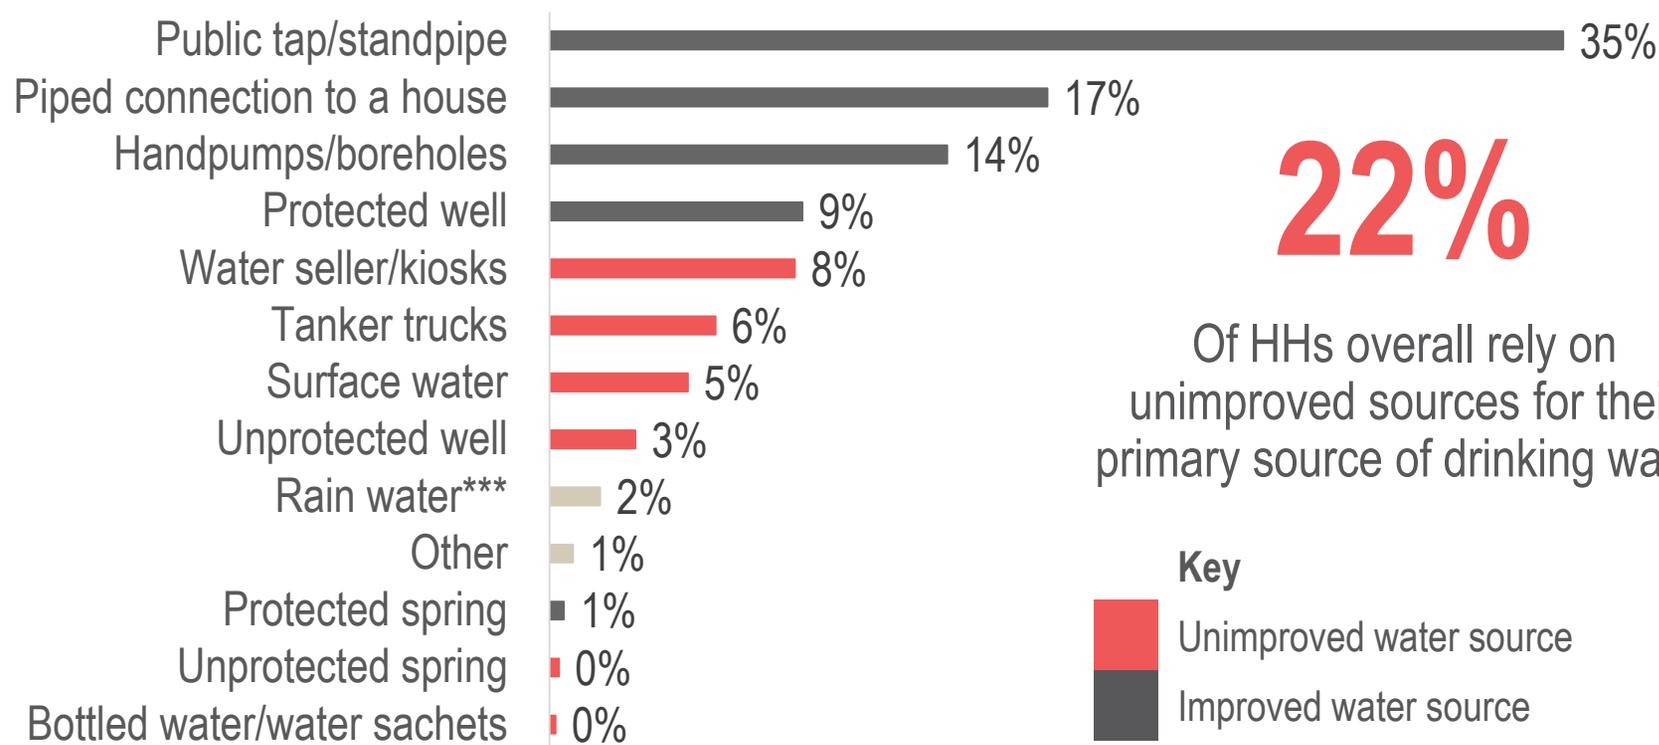

# Water, Sanitation & Hygiene: Problems with access to or quality of water

# Water, Sanitation & Hygiene: Primary source of drinking water breakdown

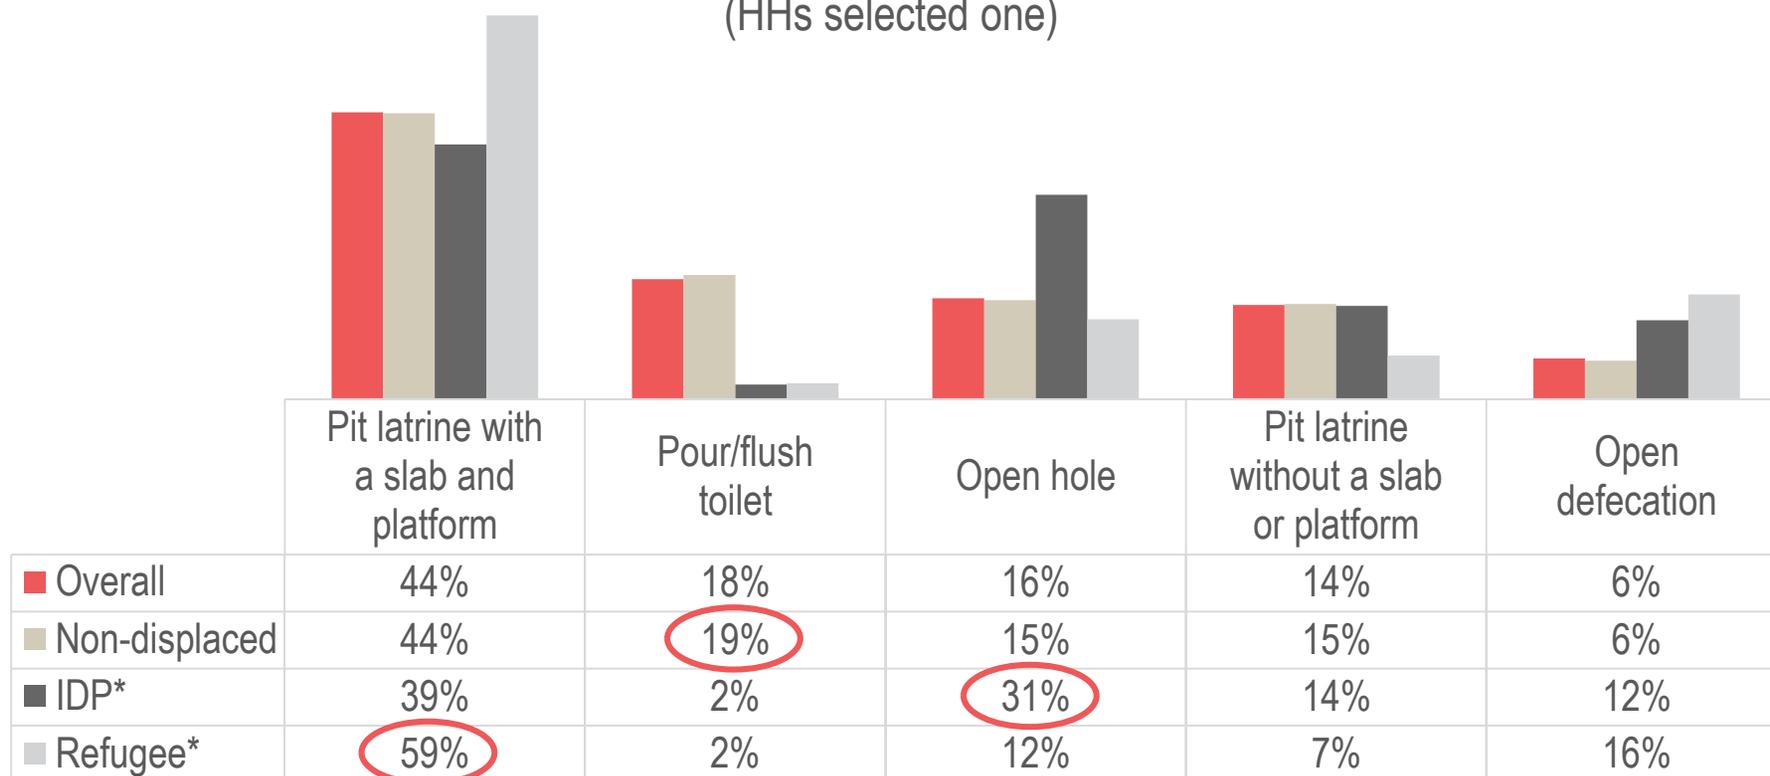

% of HHs overall by primary source of drinking water  
(HHs selected one)

\*\*\*Data collected did not distinguish between protected and unprotected rain water. Therefore, it is classified as neither 'improved' nor 'unimproved.'

# Water, Sanitation & Hygiene: Sanitation facility breakdown

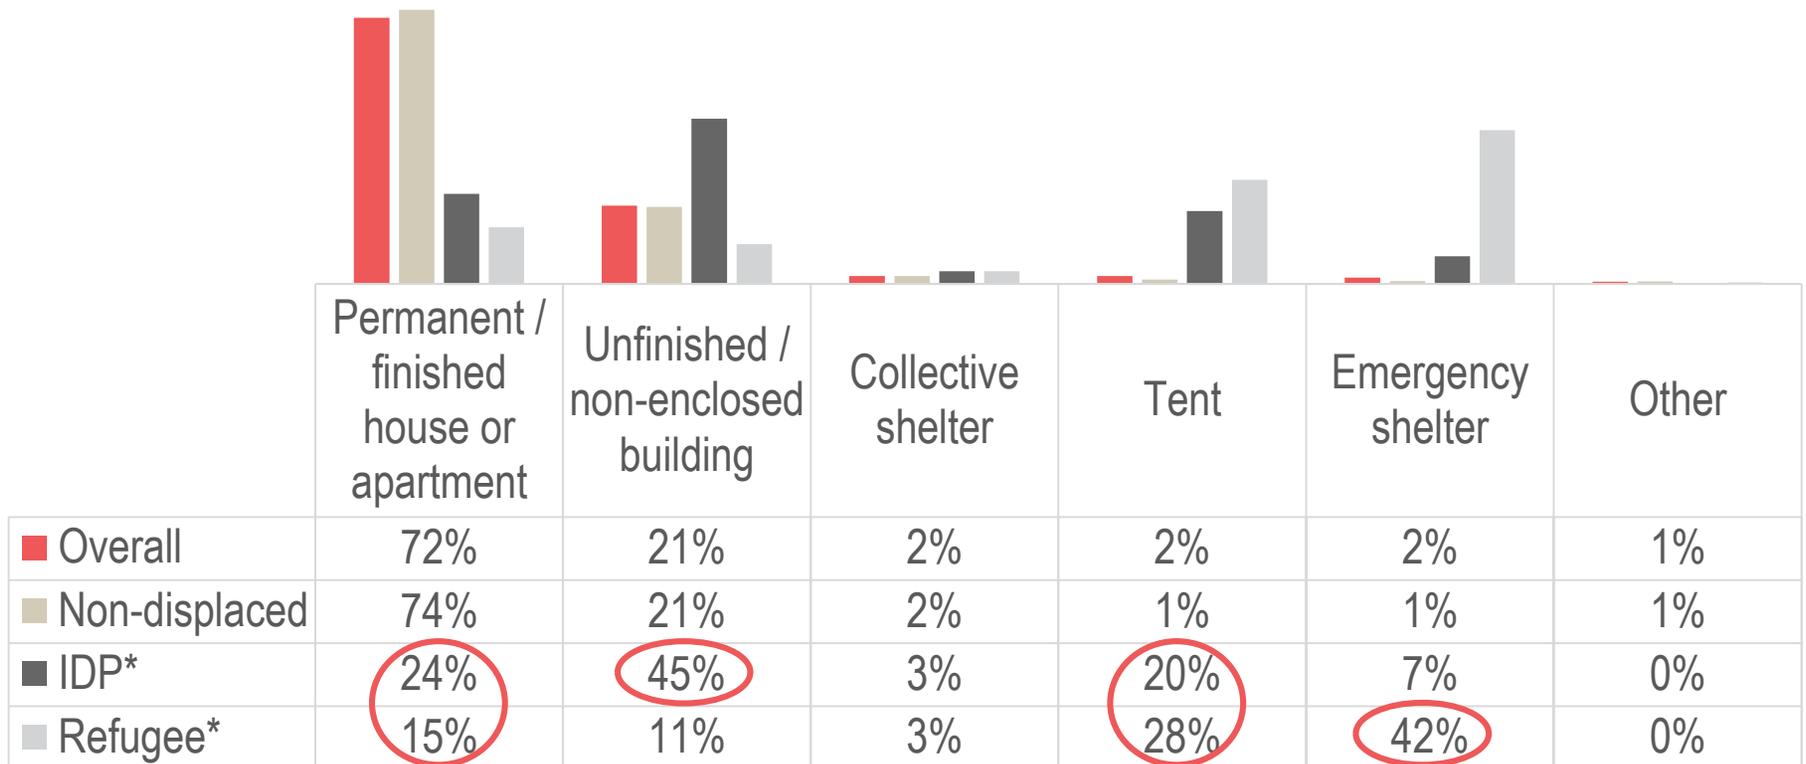

Top 5 types of sanitation facility,  
by % of HHs for whom this is the main type used  
(HHs selected one)

\*Limited sample

# Emergency Shelter & NFIs: Shelter type breakdown

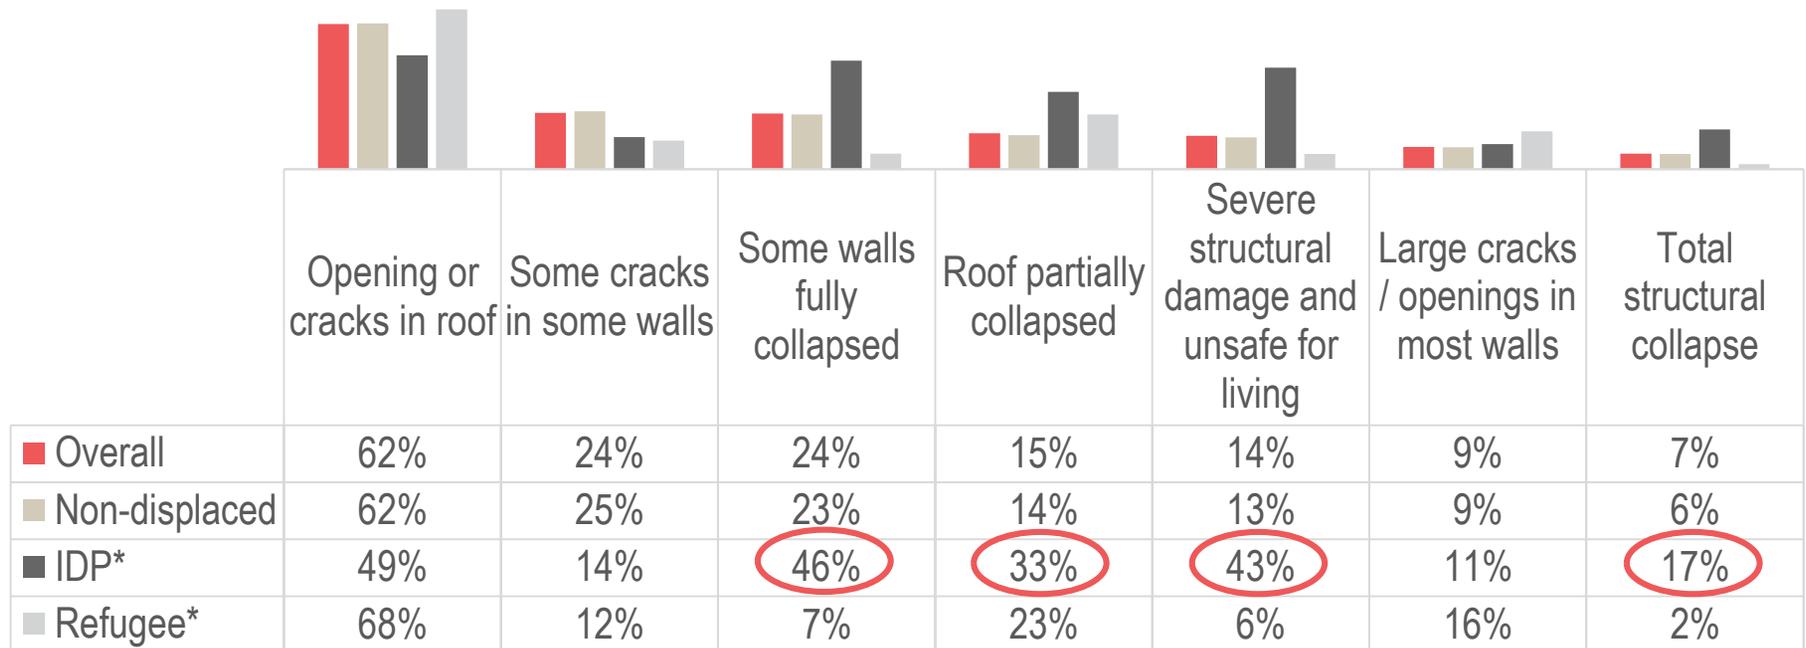

% of HHs by type of shelter  
(HHs could select one)

\*Limited sample

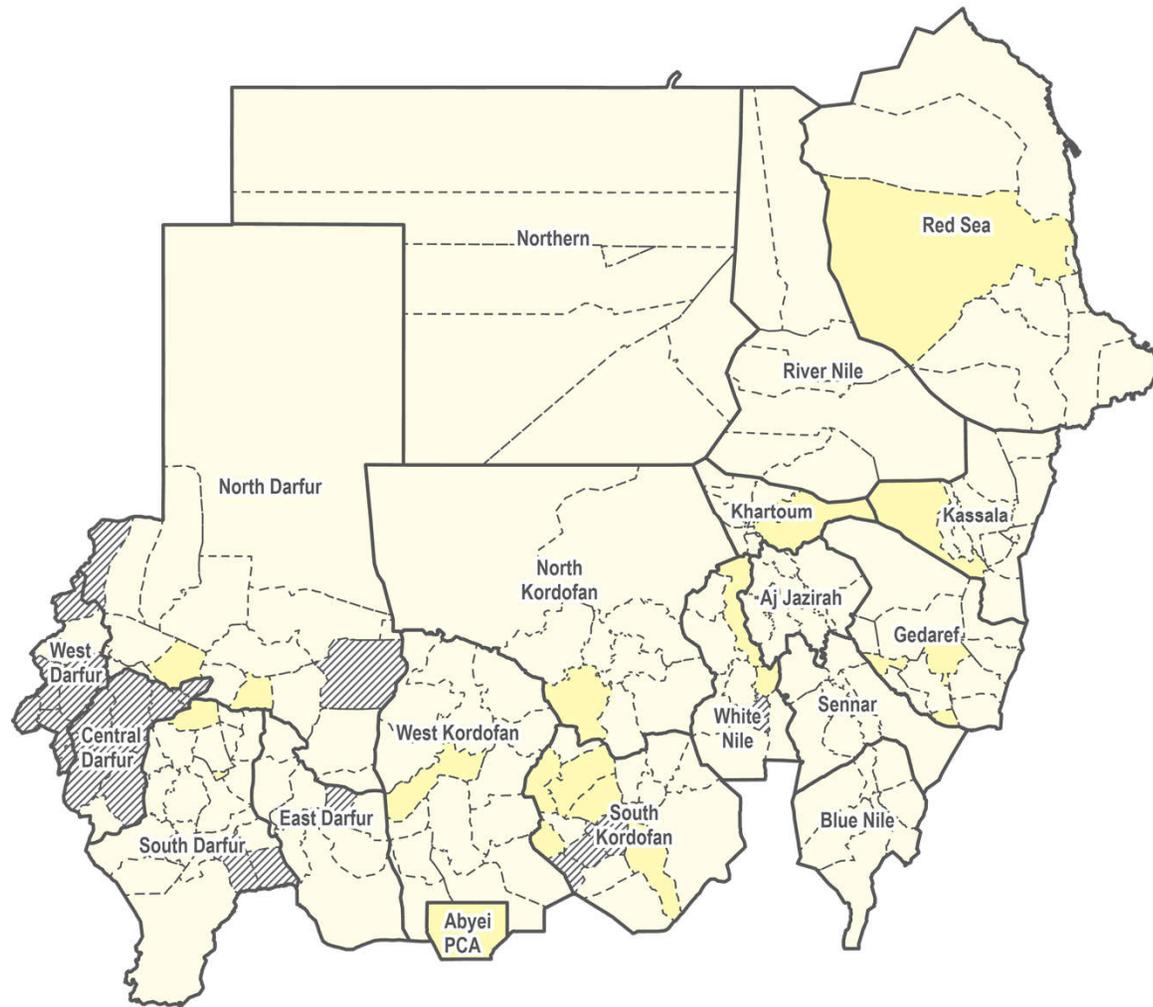

# Emergency Shelter & NFIs: Shelter condition breakdown

Among HHs whose shelter solutions did not meet agreed technical and performance standards at the time of data collection,  
 % of HHs by top 7 types of damage or defect  
 (HHs could select multiple)

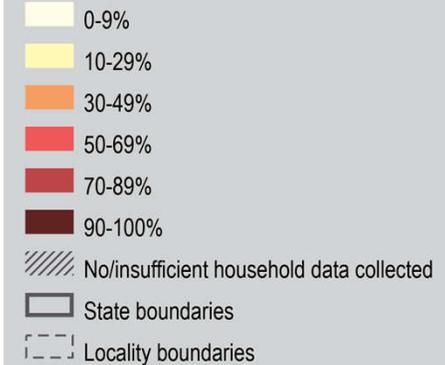

\*Limited sample

# General Protection: Safety and security incidents

% of households overall that have experienced safety or security incidents affecting household members in the 3 months prior to data collection

# General Protection: Movement restrictions breakdown

Among HHs that reported having experienced movement restrictions in the 6 months prior to data collection, % of HHs by type of restriction (HHs could select multiple)	Overall	Non-displaced	IDP*	Refugee*
COVID-related lockdown	74%	75%	70%	40%
Unable to afford travel	34%	33%	58%	30%
Road closures	24%	23%	45%	10%
Fear for safety and/or security	14%	13%	35%	17%
Other government-imposed lockdown (not COVID-)	5%	5%	17%	9%
Other	3%	3%	1%	3%
Difficulties to move around due to floodings	2%	3%	1%	0%
Lack of transportation	2%	2%	1%	1%
Discrimination because of other reasons	1%	1%	1%	12%
Discrimination because of my displacement status	1%	0%	14%	16%
Did not have appropriate civil documents to move freely	1%	0%	0%	24%

\*Limited sample

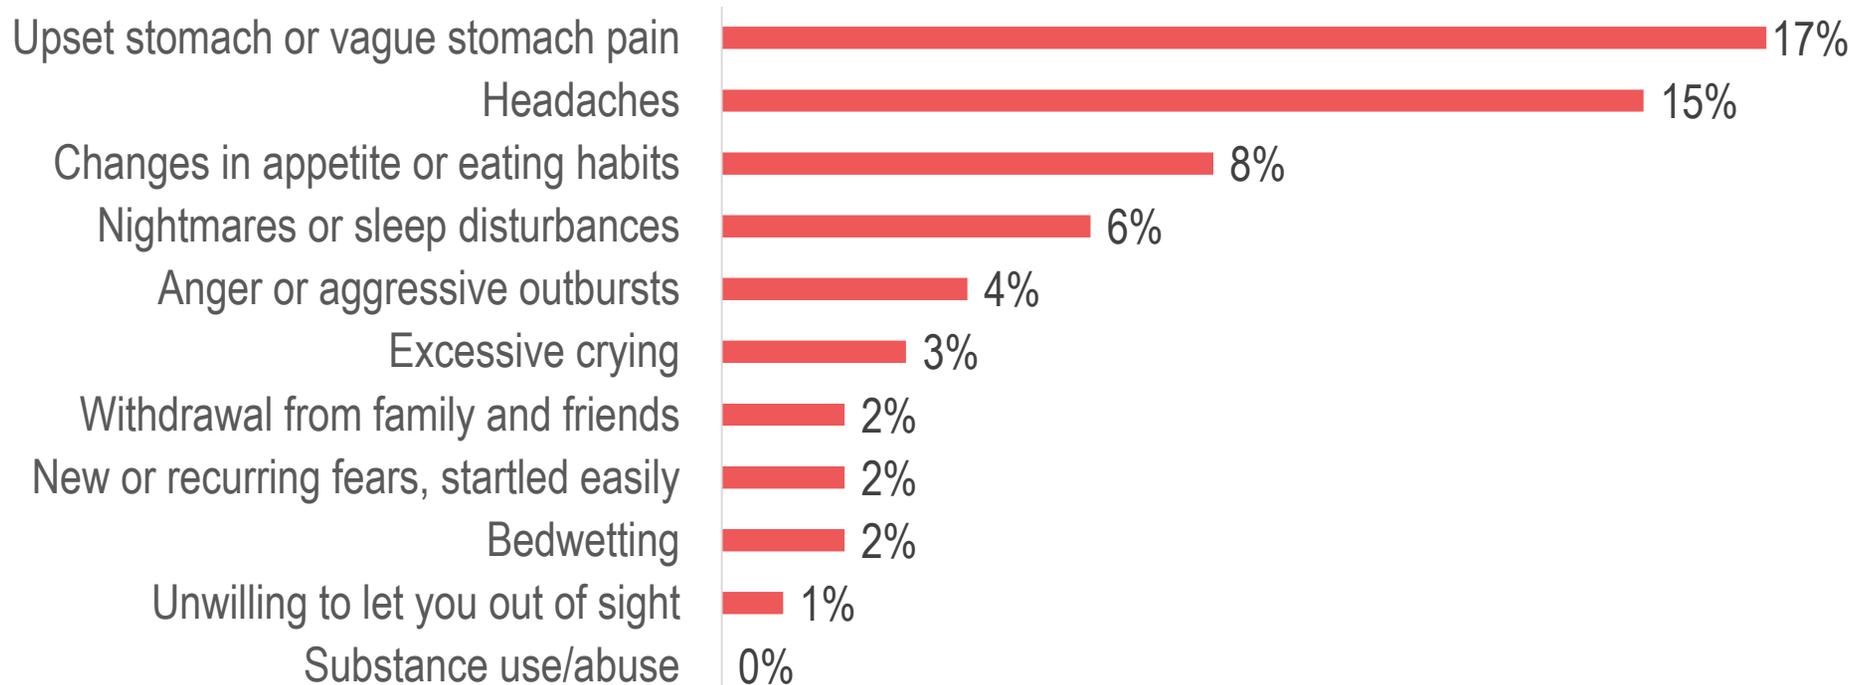

# Child Protection: Reasons why child(ren) not living with HH breakdown

Among HHs that reported having ≥1 child <18 years who was not living with the HH at the time of data collection, % of HHs by reason (HHs entered the number of children for each reason)	By population group				By HoH gender	
	Overall	Non-displaced	IDP*	Refugee*	Female-headed HH	Male-headed HH
Studying	36%	36%	52%	37%	33%	37%
Married	35%	39%	2%	9%	33%	36%
