

BANGLADESH - Rohingya Refugee Crisis - Cox's Bazar District

Camp 19 - Potential Hazard Impact to Latrines

For Humanitarian Purposes Only
Production date: 19 March 2018

This map highlights the potential impact of flood and landslide on camp infrastructure. Latrines shown in black intersect either one or both of the hazard areas. Latrines shown in green fall outside of the hazard areas (Note: this does not necessarily mean the location is free from risk).

Infrastructure locations are from round 4 of the camp infrastructure mapping exercise. Labels correspond to the unique IDs in the dataset currently available on HDX here:
<https://data.humdata.org/dataset/cox-s-bazar-refugee-settlement-infrastructure>

The high risk landslide areas were produced by the Asian Disaster Preparedness Center at the request of UNHCR. These replace an earlier version.

The flood areas, prepared by IOM and UNHCR, predate the construction of the Military Road and should be seen as indicative only.

More information on the hazard analysis can be found here:
