*Please note the BSU boundaries determine the density displayed on this map and were provided through Key Informant Interviews rather than from official administrative boundaries. This could impact the accuracy and population density of the BSU coverage.

The information presented cannot be guaranteed as an exhaustive picture of the situation as it is not based on a census of the refugee population. The predominant types displayed here should be interpreted with caution as their interpretation largely depends on an unknown population size at the "Basic Service Unit" level. The present map reflects a snapshot at a given time and as perceived by the refugee community. Thus, the data from this assessment can be used to discover characteristic patterns but is not legally valid for case based decisions.
