# September 2020 INTENIII INTENTIONS

## **GOVERNORATE OF** DISPLACEMENT **IDPs IN FORMAL CAMPS**

people in protracted displacement. To address this ongoing need, REACH,

#### CONTEXT AND METHODS

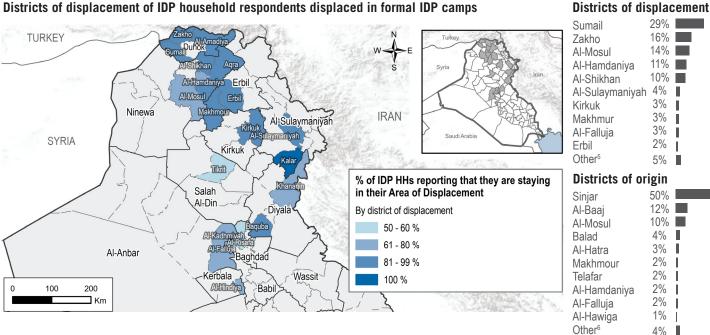

Since early 2018, the rate of return of internally displaced persons (IDPs) to their areas of origin (AoO) has slowly increased. However, many remained in displacement as of September 2020.<sup>1</sup> In 2018, the Iraqi government slowly began to close camps in order to consolidate the IDP population in Irag. While the COVID-19 pandemic slowed this process down, the camp closures resumed rapidly in October 2020.<sup>2</sup> At the time of data collection, there was a total of 1.3 million IDPs in Iraq, of which 261,854 individuals lived in 43 camps across Iraq.1,3

This constantly changing situation highlights the continuous need for comprehensive information on barriers to return and on requisite conditions that enable voluntary returns. Understanding IDP's movement intentions and vulnerabilities may contribute to facilitating safe and durable solutions for

#### 😡 KEY BARRIERS TO RETURN, BY GOVERNORATE OF DISPLACEMENT

- Al-Anbar: Almost half of IDP households (HHs) intended to return within 12 months (48%), influenced by their perception of livelihoods (83%) and security (76%) in their AoO.
- Al-Sulaymaniyah: A lack of security forces in their AoO was the main . barrier to return (65%), and most IDP HHs required an improvement in the security there to return (82%). Almost all considered their AoO as unsafe (98%).
- Baghdad: A relatively large portion of IDP HHs intended to return within 3 months (28%). Yet, they were disproportionately affected by a need for information about their AoO and a fear of gender-based violence there.
- Diyala: Important barriers to return for IDP HHs were damage to . shelters (53%) and a lack of livelihoods (50%) in their AoO.
- Dohuk: Fear or trauma associated with their AoO prevented a . relatively large percentage of IDP HHs (44%) from returning, and most stated that security would have to improve there to return (70%).

- in partnership with the Iraq Camp Coordination and Camp Management (CCCM) Cluster, conducted a seventh round of the in-camp intentions survey from 18 August to 10 September 2020 in formal IDP camps containing 100 or more IDP households.<sup>4</sup> These factsheets present findings by governorate of displacement, with findings by AoO being shown in another set of factsheets. REACH conducted a total of 2,547 phone-based household interviews across 40 camps in 10 governorates. Due to COVID-19 preventive measures, households were remotely interviewed and selected from previous assessments. Consequently, the representativeness of the sample cannot be guaranteed and the findings should be considered as indicative only. Full details on the methodology are included in the Terms of Reference.
- Erbil: IDP HHs frequently reported damage to their shelter (49%) and a lack of livelihoods (48%) in their AoO as barriers to return, citing the rehabilitation of homes (54%) and an increase of livelihoods (51%) as the main conditions for return.
- . Kerbala: A relatively large portion of IDP HHs intended to return within 3 months (26%). Factors encouraging this were the perception of security (84%) and the lower percentage of destroyed homes (21%) in their AoO.
- . Kirkuk: A large majority of IDP HHs reported that damage to their shelter in their AoO prevented their return (84%), with most citing home rehabilitation as a key condition for return (88%).
- Ninewa: Key barriers to return for IDP HHs were damage to shelters (45%) and a lack of livelihoods (40%) in their AoO.
- Salah al-Din: A relatively high proportion of IDP HHs intended to return . within 3 months (32%), encouraged by the common perception of livelihoods (76%) and security (72%) in their AoO.

## **AL-ANBAR GOVERNORATE**<sup>1</sup>

## GOVERNORATE OF DISPLACEMENT IDPs IN FORMAL CAMPS

#### 🗩 KEY BARRIERS TO RETURN

- Returns: Twenty-two percent (22%) of IDP HHs intended to return in the 3 months following data collection, and 48% in the 12 months following data collection.
- Barriers to return: Reported factors such as a lack of financial means (56%), damage to shelter in their AoO (55%), and a perceived lack of livelihoods in their AoO (44%) prevented IDP HHs from returning to their AoO.\*
- Shelter conditions in AoO: Over a third (38%) of IDP HHs owning a shelter in their AoO reported it to be completely destroyed.
- Safety conditions in AoO: A minority (17%) of IDP HHs perceived their AoO to be unsafe.
- Basic services in AoO: Over a quarter of IDP HHs (26%) reported • the absence of all basic services in their AoO.
- Livelihood opportunities in AoO: Most (83%) reported the presence of livelihood opportunities in their AoO.
- Humanitarian assistance in AoO: The majority (65%) of IDP HHs reported perceiving that no humanitarian assistance was available in their AoO.
