

# Flood Events	# IDP Sites	# Managed IDP Sites
🔴 (7-8) Flood events	3	3
🟠 (4-6) Flood events	9	8
🟡 (1-3) Flood events	331	308
🟢 (0) Flood events	1,959	457

**Map Description:**

This map illustrates the historical flood events reported in internally displaced person (IDP) sites in Yemen. Information on flood incidents was reported by CCCM partners through the CCCM Flood Report from June 2021 to January 2023. In total, 521 flood incidents were reported in 343 IDP sites across 17 governorates. It has to be noted, that potentially not all flood events were reported by CCCM partners, so the total number of flood events could be higher. This map was designed by REACH in collaboration with the CCCM Cluster, as part of the 2023 National Flood Risk Analysis in IDP sites in Yemen. Exact location information is missing for 82 IDP sites in which flooding occurred in 2021-2022. Thus, not all existing IDP sites and their related flood events are shown on the map.

**Note**

Data, designations and boundaries contained on this map are not warranted to be error-free and do not imply acceptance by the REACH partners, associated, donors mentioned on this map.
