# Joint Multi-Cluster Needs Assessment: Mudug Region Profile

Somalia August 2018

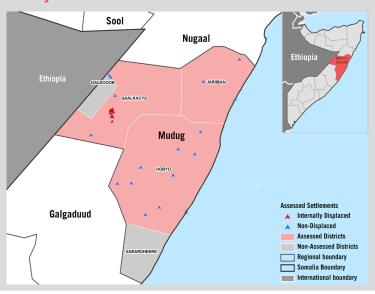

#### Background

Prolonged drought conditions, since early 2016, have resulted in a substantial livestock herd depletion and a reduction in cereal production in Somalia, impacting negatively on households' access to food and income¹. In addition, above average rainfall in the first half of 2018 caused severe flooding across parts of South Central Somalia and coastal areas of Puntland and Somaliland, causing destruction to agricultural land and displacement in affected areas². Parallel to these climatic trends, insecurity continues to limit humanitarian access especially in South Central Somalia.

In light of this evolving context, United Nations Office for the Coordination of Humanitarian Affairs (OCHA), in partnership with REACH conducted a Joint National Multi-Cluster Needs Assessment (JMCNA)<sup>3</sup> to assess humanitarian needs and access to basic services in Somalia. Households were sampled for statistical representativeness stratified by non-displaced and internally displaced person (IDP) households at the district level, with a 92% confidence level and a 10% margin of error.

This factsheet presents analysis of data collected in Mudug Region between 30 June and 12 August 2018. A total of 925 non-displaced and 153 IDP households were surveyed across the region. Findings relating to non-displaced households are representative with a 95% confidence level and a 3% margin of error while those relating to IDP households are representative with a 95% confidence level and a 8% margin of error.

#### **Survey Locations**

## **∳**∳ Demographics

Household members age and gender breakdown:

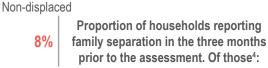

0-6 months 7 months-4 years 5-17 years 18-59 years 60+ years

Proportion of households reporting the following members<sup>6</sup>:

	Non- displaced	IDP
Pregnant or lactating woman	34%	42%
Sick child	6%	7%
Disabled or chronically ill person	13%	19%
Person with mental health issues	3%	18%

### Protection

Non-displaced IDP

46% Proportion of households reporting that they have no way of participating in decision making in their settlements:

32%

**IDP** 

8%

Non-displaced IDP

43% Proportion of households reporting that they do not own the land they are settled on:

Proportion of households reporting that they are at risk of eviction<sup>4,7</sup>:

Non-displaced	34%	
IDP	23%	

Proportion of households reporting that they have formal land tenure documentation<sup>4,7</sup>:

Non-displaced	8%	
IDP	5%	

## Food Security and Livelihoods

Non-displaced	55%	13%	32%	
IDP	46%	10%	44%	
	Acceptable	Borderline	Poor	

Proportion of households reporting use of the below food coping strategies in the seven days prior to this assessment<sup>6</sup>:

	Non- displaced	IDP
Eat less expensive, less preferred food	56%	50%
Borrow food from relatives or friends	64%	84%
Reduce number of meals per day	50%	69%
Reduce portion sizes	46%	63%
Adults skip meals so children can eat	29%	47%
