

Map Description:

This map illustrates IDP hosting sites in Yemen according to their flood hazard score classification from the REACH 2024 National Flood Hazard Analysis Dataset. Crucially, not all sites are displayed on this map due to the unavailability of GPS coordinates for many sites. Therefore, this map displays data for 1153 IDP hosting sites out of a total of 2285 relevant sites (50%). This map was designed by REACH as part of the National Flood Hazard Analysis for Yemen

Note

Data, designations and boundaries contained on this map are not warranted to be error-free and do not imply acceptance by the REACH partners, associated, donors mentioned on this map.
