# Joint Multi-Cluster Needs Assessment: Gaalkacyo North Profile

#### Mudug Region, Somalia

#### August 2017

#### Background

The ongoing drought has contributed to a rapid deterioration of the humanitarian context in Somalia, with a predicted high risk of famine in 2017. In support of the humanitarian planning response, the Clusters and the Assessment Working Group developed the Joint Multi-Cluster Needs Assessment (JMCNA) with the support of REACH in order to assess needs and access to basic services in Somalia.

The Somalia population was sampled for statistical representativeness at the district level with a confidence level of 90% and a margin of error of +/- 10%, employing a cluster sampling approach using the Population Proportional to Size method with replacement. Data collection was conducted by AAHI, ACF, ACTED, ADESO, Aid Vision, CARE, DBG, DRC, Galmudug MoH, HINNA, INTERSOS, IOM, NRC, PAH, REACH, SADO, SCI, SHARDO and SI.

This factsheet presents an analysis of data collected in Gaalkacyo North between 16 and 23 July 2017 as part of the JMCNA. In total, 144 households were surveyed across Gaalkacyo North.

### **M** Demographics

Household composition, by gender and age:

2%

of households reported that they are not from the community they currently reside in.

#### Food Security

Food Consumption Scores (FCS) of households:

2% AcceptableBorderlinePoor

Coping Strategies Index (CSI) scores of households<sup>3</sup>:

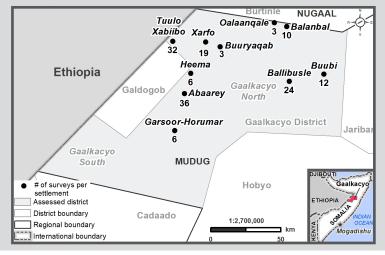

0	Minimum score
8	Average score
39	Maximum score

Reported challenges experienced by households when attempting to access food over the past three months<sup>2</sup>:

Lack of resources to buy food	82%	
Lack of food items available to purchase	47%	
Lack of cooking utensils	26%	-
Lack of cooking fuel	10%	
None of the above	3%	1.

5.9 days on average that households' food stocks will reportedly last.

#### **Survey Locations**

## **Vulnerabilities**

% of households reporting the following members:

- **31%** Pregnant or lactating woman
- **10%** Sick child
- **17%** Disabled or chronically ill person
- 9% Unaccompanied or separated child

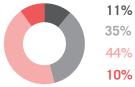

#### Priority Needs

Top 3 priority needs reported by households<sup>1</sup>:

1. Food	86%
2. Water	73%
3. Shelter	43%

#### 🧶 Nutrition

% of children under 5 in assessed households, by Mid-Upper Arm Circumference (MUAC) score:

- 11% Normal
- 5% At risk of malnutrition
- 4% Moderately malnourished
- 0% Severely malnourished

% of households reported access to the following nutrition services<sup>2</sup>:

None	78%	
Outpatient Therapeutic Programme	14%	•
Targeted Supplementary Feeding Programme	5%	• · · · · ·
Do not know	3%	1
Stabilisation Centre	1%	I

**48%** of households reported increased difficulty in accessing nutrition services compared to more than 3 months ago.

#### Ă Livelihoods

Top 3 primary support sources reported for the past year:

- 1. Livestock produce (for sale) 44% 2. Self-employed 19%
- 3. Day labour / Humanitarian assistance 8%
- of households reported losing livestock in the last three 73% months.

#### Health

Main health problems reported by households in the last month<sup>1</sup>:

1. Eye infection	33%
2. Suspected malaria	31%
3. Acute watery diarrhoea	30%

- of households reported increased difficulty in accessing 46% health services compared to more than three months ago.
- on average were reportedly spent by households on health 29 USD care in the past month.
- of households reported increased spending on health 36% services compared to more than three months ago.

#### Education 1 T I

of school-aged children (5-17 years) reportedly attend 36% school.

Medium

Low

Reported level of priority of education for households:

#### Communication

Top 3 preferred channels for receiving information reported<sup>1</sup>:

1. Community meetings	65%
2. Radio	62%
3. Loudspeakers	47%

Top 3 reported information needs of households<sup>2</sup>:

1. Food	94%
2. Water	79%
3. Health advice and treatment	56%

## Protection

- 10% of households reported that a household member has experienced violence, threats or intimidation in the past three months.
- of households reported not being able to move freely in their 15% community and surrounding area.
- of households reported a theft from their shelter in the past 14% three months.

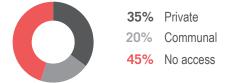

### Water, Sanitation & Hygiene (WASH)

Main sources of drinking water reported by households<sup>2</sup>:

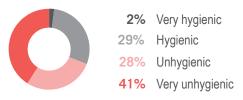

1. Burkad	62%
2. Borehole	28%
3. Tank and tap	13%

of households reported a problem of either quantity or 49% quality with their main water source.

Types of latrines reportedly accessible to households:

Reported hygiene status of latrines used by households<sup>4</sup>:

## Shelter

Primary structural materials reportedly used for main shelter, by proportion of households:

41% 1. Stones 2. Cement 27% 3. Wood 19%

Roof covering materials reportedly used for main shelter, by proportion of households:

- 1. Iron sheet 78% 2. Plastic sheet 10% 6% 3. Clothes or rags
- of households reported damage to their shelter within the past 17% three months.
- people on average were reported per shelter. 4.7

#### **Endnotes**

- 1. Respondents could select up to 3 options.
- 2. Respondents could select multiple options.

3. Higher scores indicate a greater degree of food insecurity, with the maximum possible score being 56. For more information about the CSI, please visit: http:// bit.ly/2vR37la

4 This guestion was only asked to respondents reporting access to a latrine.
