Joint Multi-Cluster Needs Assessment: Diinsoor District Profile
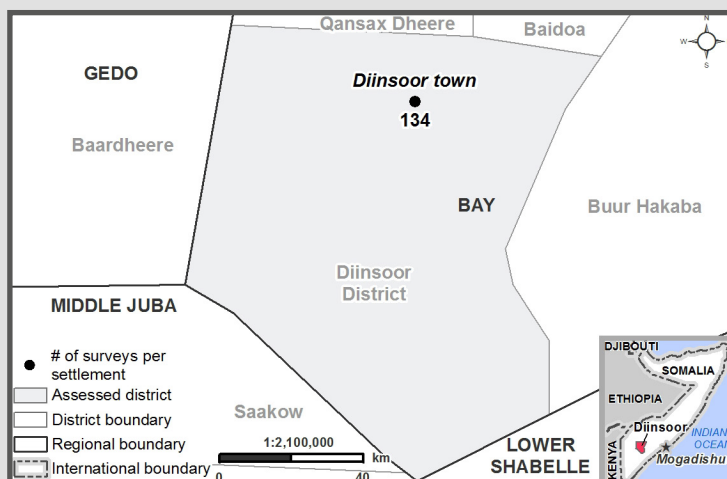

Bay Region, Somalia

August 2017

Background

The ongoing drought has contributed to a rapid deterioration of the humanitarian context in Somalia, with a predicted high risk of famine in 2017. In support of the humanitarian planning response, the Clusters and the Assessment Working Group developed the Joint Multi-Cluster Needs Assessment (JMCNA) with the support of REACH in order to assess needs and access to basic services in Somalia.

The Somalia population was sampled for statistical representativeness at the district level with a confidence level of 90% and a margin of error of +/- 10%, employing a cluster sampling approach using the Population Proportional to Size method with replacement. Data collection was conducted by AAHI, ACF, ACTED, ADESO, Aid Vision, CARE, DBG, DRC, Galmudug MoH, HINNA, INTERSOS, IOM, NRC, PAH, REACH, SADO, SCI, SHARDO and SI.

This factsheet presents an analysis of data collected in Diinsoor District between 18 and 24 August 2017 as part of the JMCNA. In total, 134 households were surveyed across Diinsoor District.

Survey Locations:

- # of surveys per settlement
- Assessed district
- District boundary
- Regional boundary
- International boundary

1:2,100,000

0 — 40 km

Demographics

Household composition, by gender and age:

	Age	
3%	60+ years	3%
13%	18 to 59 years	17%
12%	5 to 17 years	20%
6%	6 months to 4 years	12%
5%	0 to less than 6 months	8%

7% of households reported that they are not from the community they currently reside in.

Food Security

Food Consumption Scores (FCS) of households:

- **11%** Acceptable
- **25%** Borderline
- **64%** Poor
Coping Strategies Index (CSI) scores of households[3]:

0	Minimum score
12	Average score
44	Maximum score

Reported challenges experienced by households when attempting to access food over the past three months[2]:

Lack of resources to buy food	82%
Lack of food items available to purchase	22%
Lack of cooking utensils	7%
Lack of cooking fuel	1%
None of the above	1%
6.4 days on average that households' food stocks will reportedly last.

Vulnerabilities

% of households reporting the following members:

- **57%** Pregnant or lactating woman
- **40%** Sick child
- **30%** Disabled or chronically ill person
- **8%** Unaccompanied or separated child
Priority Needs

Top 3 priority needs reported by households[1]:

1.	Food	96%
2.	Water	64%
3.	Healthcare	35%
Nutrition

% of children under 5 in assessed households, by Mid-Upper Arm Circumference (MUAC) score:

- **11%** Normal
- **0%** At risk of malnutrition
- **39%** Moderately malnourished
- **50%** Severely malnourished

% of households reported access to the following nutrition services[2]:

Outpatient Therapeutic Programmes	64%
Stabilization Centre	29%
Targeted Supplementary Feeding Programme	7%
Blanket Supplementary Feeding Programme	7%
None	5%
19% of households reported increased difficulty in accessing nutrition services compared to more than 3 months ago.
