

South Sudan - Unity State

Assessment of Hard to Reach Areas in South Sudan

South Sudan Displacement Crisis

August 2016

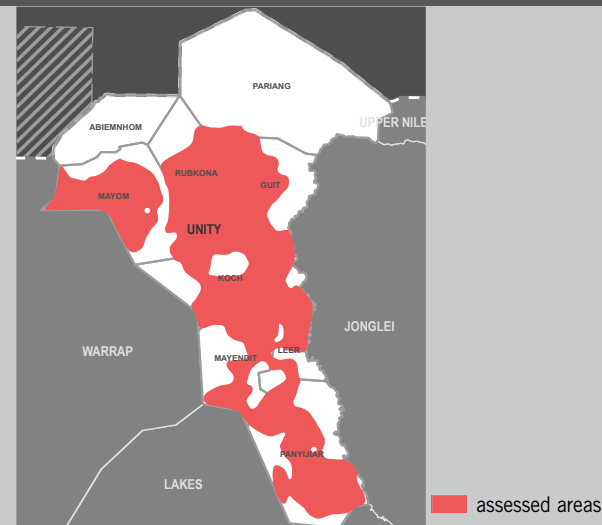

Overview

Conflict in Unity State first broke out in late December 2013, only days after fighting began in Juba. Since then, the State has been one of the worst affected by the conflict, and currently hosts the highest reported numbers of internally displaced persons in the country. Many areas in Unity are largely inaccessible to humanitarian actors due to insecurity and logistical constraints. As a result only limited information is available on the humanitarian situation outside major displacement sites.

In order to fill such information gaps and facilitate humanitarian planning, REACH has remotely collected data on hard-to-reach areas in Unity State since December 2015. Through AoO, REACH collects data from a network of Key Informants (KIs) who have sector specific knowledge of an area, from regularly travelling to and from the area, direct or indirect contact with people in the area, or recent displacement from the area. Although current

AoO coverage is still limited and its findings not statistically significant, they provide a good indication of the needs and current humanitarian situation in assessed areas of Unity State.

Findings presented in this document are drawn from primary data collected from KIs in August 2016, covering 75 communities across 7 of Unity's 9 counties. Data was collected from 337 KIs currently in Bentiu and Juba Protection of Civilians (PoC) sites and who reported on communities about which they have received up-to-date information in the month prior to data collection. The study focuses on the situation in villages or local communities from which many individuals have already fled, but where some families still remain. Health, shelter, food security, WASH, education and protection sectors are covered. No information has been collected for any PoC. Note that when reporting on level of access to services this refers to the proportion of KIs responding 'yes' with regards to access in August 2016.

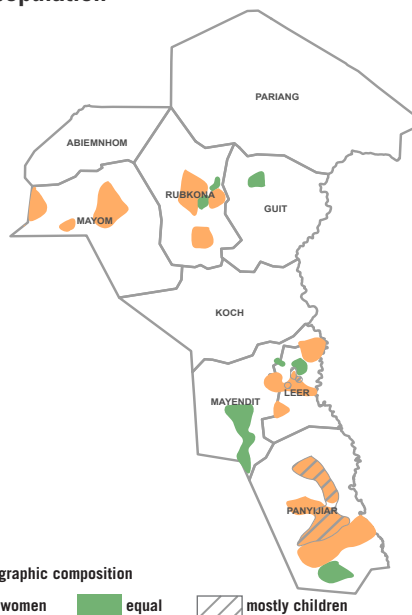

Demographics

Primary demographic composition of remaining local community (LC) population

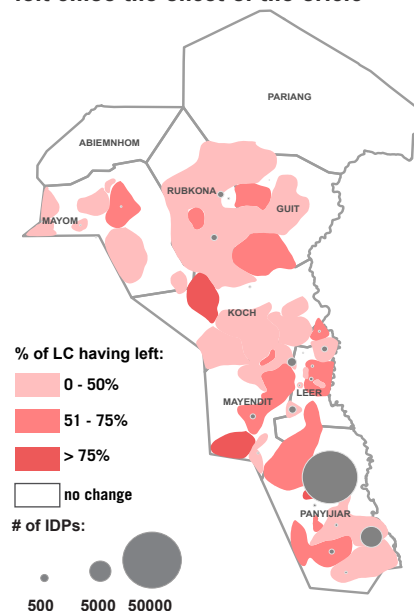

Primary demographic composition of internally displaced persons (IDPs) population

Population

Estimated population of IDPs and proportion of local community having left since the onset of the crisis

Top two reported reasons for leaving their last location, by IDPs¹

- 1 Insecurity 79%
- 2 Lack of food 55%

Top two reported reasons for coming to their current location, by IDPs¹

- 1 The area is secure 79%
- 2 Access to food 66%

Top two reported reasons for not leaving location, by local community¹

- 1 It is their home 68%
- 2 Family is there 41%

¹ Most frequently cited as first and second most important reasons

South Sudan Displacement Crisis

August 2016

Population

Communities reporting returned local community¹

Living situation and short-term displacement

Reported living locations of IDPs

With relatives	63%
In a spontaneous settlement	27%
With the local community	8%
In a PoC	2%

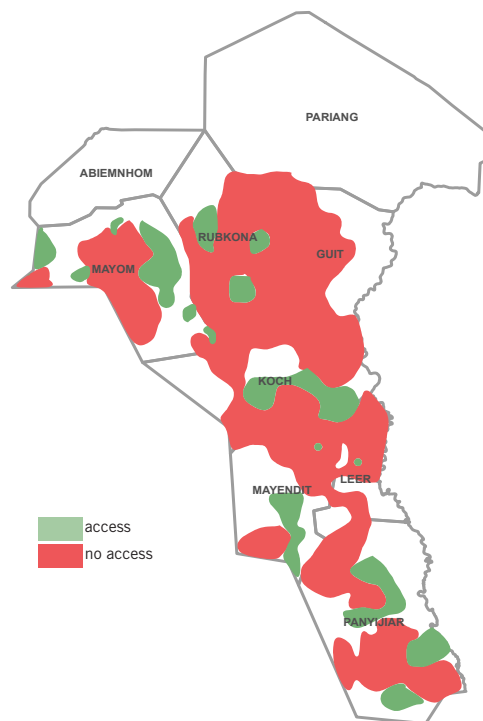

Reported living locations of local community²

Own home	57%
In a neighbour's home	19%
In the near bush	15%
In the far bush	6%
Other	3%

Health

Reported level of access to healthcare

Top two reasons why health services are not available³

- 1 Have never been available 68%
- 2 Facilities destroyed by fighting 29%

Health concerns

Top three reported health concerns³

- 1 Malaria 97%
- 2 Typhus 39%
- 3 Diarrhea 35%

Top three reported most needed items in health care centers³

- 1 Medicine (not specified) 99%
- 2 Medicine for malaria 81%
- 3 Paracetamol 51%

¹ Local community displaced and returned home

² The current location of LCs was asked in order to assess persons who were displaced within their local community

³ Key informants could choose more than one answer

Shelter/NFI

Reported proportion of local community sleeping outside

Reported main shelter types¹

Top two reported shelter types, by IDPs

- 1 Rakooba 85% 
- 2 Tukul 44%

Top two reported shelter types, by local community

- 1 Rakooba 98% 
- 2 Tukul 59%

Top two reported shelter types, by returned local community²

- 1 Rakooba 100% 
- 2 Tukul 53%

NFIs

Reported use of new mosquito nets¹

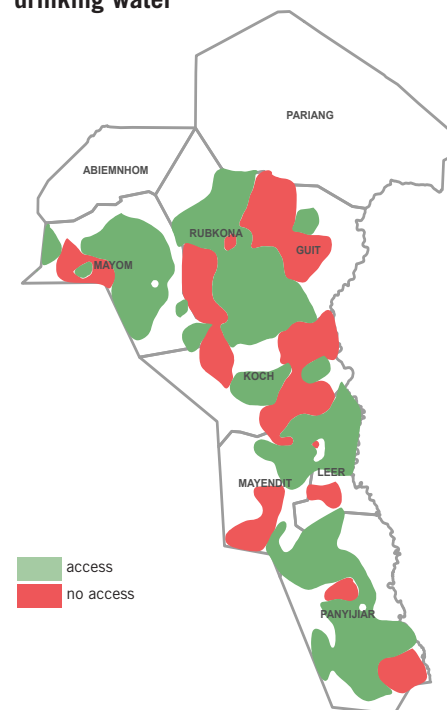

Protection from mosquitos	99%
Rope	32%
Building materials	30%
Crop protection	16%
Fishing	15%
Clothing	4%
Other	4%

Reported number of people sharing a shelter

1 to 5 people	37%
6 to 10 people	44%
11 to 15 people	16%
More than 15 people	3%

WASH

Reported level of access to safe drinking water

Reported primary sources of those with access to safe drinking water

Borehole	95%
Protected well	5%

For those with access to safe drinking water, reported time of a return trip to the water source

Water availability and sanitation

Of communities reporting presence of boreholes, **64%** are reportedly functional

Reported access to primary sanitation facilities

¹ Key informants could choose more than one answer; responses refer to percentage of communities having a reported shelter type, not the percentage of the population living in them

² Local community displaced and returned home

August 2016

Food Security

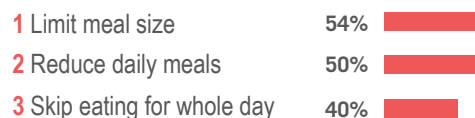

Reported level of access to food

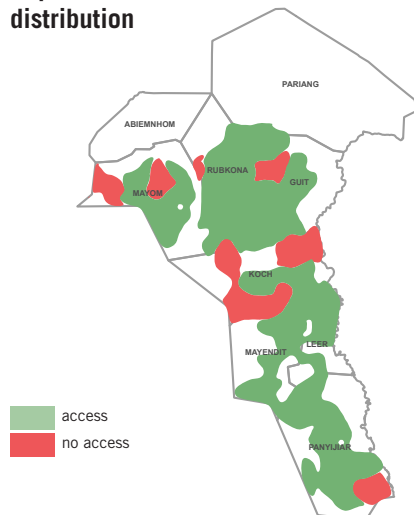

Top three reported reasons why food is not available¹

Top three reported most common coping strategies

Reported level of access to food distribution

Current access to market

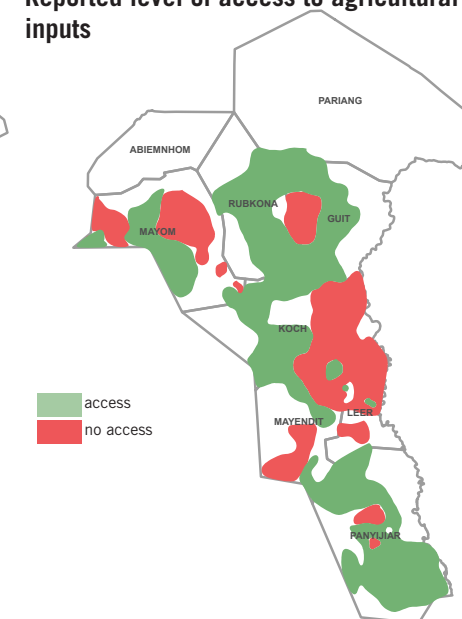

Livelihoods

Reported level of access to land for cultivation

Reported level of access to agricultural inputs

Reported current location of the assets of fishermen, drivers, and labourers²

Stolen/looted	34%
Looked after by the owner	31%
Looked after by immediate family	17%
Hidden in a safe location	7%
Don't know	7%
Other	4%

Reported current location of the communities' cattle

Stolen/looted	51%
Moved to a safe location	21%
Looked after by the owner	19%
On seasonal migration	4%
Looked after by immediate family	4%
Looked after by the community	2%

¹Key informants could choose more than one answer

²Assets included things such as cars, cooking tools, boats, building tools etc.

Education

Reported level of access to education services

Overall reported level of available education in assessed communities¹

None	81%	<div style="width: 81%;"></div>
Primary	19%	<div style="width: 19%;"></div>
Preprimary	14%	<div style="width: 14%;"></div>
Secondary	1%	<div style="width: 1%;"></div>
ALP	1%	<div style="width: 1%;"></div>
Vocational	1%	<div style="width: 1%;"></div>

Out of the 14 communities where education is reportedly available, the reported main reasons for children not attending school are

No supplies	33%	<div style="width: 33%;"></div>
Insecurity	11%	<div style="width: 11%;"></div>
Need to work	11%	<div style="width: 11%;"></div>
Poor relations with other communities at the school	11%	<div style="width: 11%;"></div>

Reported proportion of boys and girls aged 6-17 attending school

Protection

Protection concerns

Primary reported protection concerns for men and women

Community

Reported relationship between IDPs, returnees and local communities

Very good	0%
Good	100%
Moderate	0%
Poor	0%
Not specified	0%
Don't know	0%

About REACH

REACH facilitates the development of information tools and products that enhance the capacity of aid actors to make evidence-based decisions in emergency, recovery and development contexts. All REACH activities are conducted through inter-agency aid coordination mechanisms. For more information, you can write to our in-country office: south.sudan@reach-initiative.org or to our global office: geneva@reach-initiative.org.

Visit www.reach-initiative.org and follow us @REACH_info.
