

# **Cross-Border Population Movement Factsheet Akobo Port and Road Monitoring**

Akobo County, Jonglei State, South Sudan

## CONTEXT AND METHODOLOGY

Akobo town is located in the eastern side of Akobo County, Jonglei State, close to the land and river border crossings with Ethiopia. Akobo is a key point of trade and transit between South Sudan and Ethiopia.

Since the beginning of the crisis in 2013, this route has been used by South Sudanese heading to or coming back from refugee camps in Ethiopia. In four locations, Gadrang Road, Koatkoangthor Road, Tundol Port and Market Port, REACH has recorded arrivals and departures of South Sudanese households (HHs) on a daily basis since May 2015.

In order to provide an indication of wider trends, data is collected on the volume of movement, as well as the motivations and intentions of those travelling. For movements larger than three households, a short alternative survey is used to assess HH and individual numbers by speaking to the transport focal point, such as the driver or transport authority<sup>1</sup>. Due to insecurity and other issues, data is not always collected on a daily basis. To correct for this inconsistency, data presented for general movement trends across months represents an average based on the number of days of data collection each month. The data presented here is not representative, nor does it capture all movements in and out of Akobo. Rather, it is indicative of movement trends for the assessed population<sup>2</sup>.

The following findings are based on primary data collected between 1 and 30 November 2019. REACH teams interviewed arrivals and departures at the household (HH) level.

# **GENERAL MOVEMENT TRENDS**

Data provided below has been taken from REACH Port and Road Monitoring (PRM) data collection, as well as data provided using the Transport Focal Point (TFP) survey which captures larger movements between Akobo and Ethiopia

### Type of movement

Total monthly number of HHs and individuals recorded in August 2019:

Individuals	HHs %
972	45%
1139	49%
76	6%
	972 1139

#### Security concerns during travel

Uror

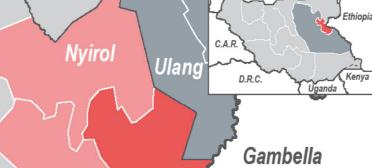

Primary destinations

Secondary destinations

During the reporting period, in addition to interviewing 201 HHs through the PRM survey, coming on foot or in small vehicles and boats, REACH also used the TFP tool to estimate the number of households travelling on larger boats which the enumerator team is not able to interview individually. In November, 2 larger inbound boats were recorded carrying an estimated 179 people across the two boats, and 1 larger outbound boat carrying an estimated 120 people.

# **Vulnerabilities**

Akobo

72% of total outbound HHs reported that at least

• 21% Separated child

67% Pregnant or breastfeeding.

one member of the HH had a vulnerability, including:

Sudar

Jonglei

MAIN DESTINATIONS OF INBOUND HHs

# Reasons for coming to South Sudan

Akobo County

Nyirol County

Uror County

Push factors

Distance from family/ home

Lack of work opportunities

Tensions with host community

Primary reported reasons for inbound HHs, August 2019 to November 2019:

Primary reported push factors for inbound HHs to leave their last location:

	August 2019	September 2019	October 2019	November 2019
Rejoining family/ home	67%	64%	67%	57%
Perceived security	21%	27%	16%	15%
Presence of work opportunities	3%	5%	11%	15%

Distan

Notes: 1. The TFP tool asks the driver (or another focal point) of the transportation to give details of the number of individuals and number of households travelling. This methodology is used if the number of households travelling exceeds 3 or 4 households and therefore cannot all be interviewed. For more details, please access the Port and Road Monitoring Terms of Reference here: https://www.impact-repository.org/document/ reach/830456c9/reach-ssd-terms-of-references-port-monitoring-october-2019-for-public-use.pdf 2. While internal movement within South Sudan was also recorded in Akobo over the data collection period, this factsheet covers crossborder movement between South Sudan and Ethiopia, and vice versa, only. Throughout November two PRM surveys were conducted with HHs outbound to Sudan and a TFP survey was conduced with a movement containing an estimated 25 HHs, also inbound from Sudan. 3. Outbound transport focal points were asked what security concerns they anticipated on their onward journey based on historical trips. 4. Partial HHs are those where not all members of the self-identified family unit were reportedly travelling. Please note, family units in South Sudan often extend beyond the nuclear family.

Mer

# 📣 OUTBOUND FROM SOUTH SUDAN

of outbound HHs reported intending to stay more than six months in 79% their final destination outside of South Sudan.

#### **Demographics**

79%

Proportion of recorded travellers by demographic group:

of outbound HHs were partial HHs.

#### Previous location in South Sudan

Primary reported locations from which outbound HHs were leaving:

Akobo County	75%	
Nyirol County	11%	
Uror County	9%	•

### Intended destination in Ethiopia

Primary reported intended destinations for outbound HHs:			
Nguenyyiel Camp	32%		
Jewi Camp	27%		
Kule Camp	19%		

### **Pull factors**

Primary reported pull factors for outbound HHs to go to another country:

Presence of educational services	26%
Presence of food distributions	24%
Rejoining family/home	15%

#### **Reasons for leaving South Sudan**

Primary reported reasons for outbound HHs, August 2019 to November 2019:

	August 2019	September 2019	October 2019	November 2019
Lack of education	25%	61%	47%	26%
Lack of food	30%	16%	26%	24%
nce from family/home	22%	12%	12%	15%
