Round 20: Overview of Compliance with Minimum Standards

Collective Site Monitoring, Round 20

May 2026

Methodology and Minimum Standards Calculations

- The list of minimum standards has been adopted based on the provision of **Resolution #930**
- Data from regular **CSM rounds** serves as the primary source for **calculating compliance** with these standards.
- The latest CSM Round 20 was conducted from **March 30 to April 17, 2026**, with a total of **1,337 collective sites** assessed.
- The minimum standards may be simple (based on one specific indicator from the CSM questionnaire) or composite (including all or part of two or more indicators).

Organizational and legal principles of collective sites functioning

Compliance with minimum standards, % of CSs

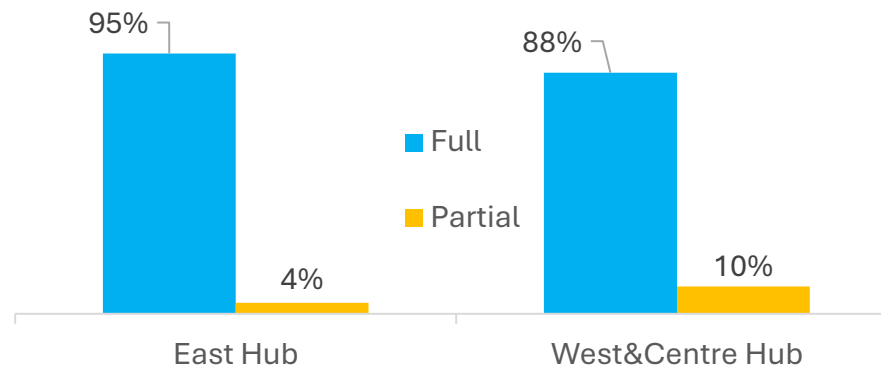

* Access to information means the availability in the premises of the collective site of an information stand(s) indicating the address, contact phone numbers, official websites of emergency services, social services, health care institutions, executive power bodies, local self-government bodies, educational, social, psychological, and legal assistance institutions as well as information about the presence of the bomb shelters near the collective site, etc.

'Agreement and rules of stay' standard compliance, % of the CSs (by Hub)**

Ternopilska (65%) oblasts reported the lowest compliance rates.

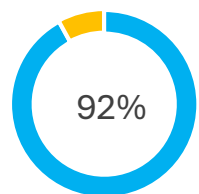

'Registration of residents of the collective site' standard compliance, % of the CSs (by Hub)**

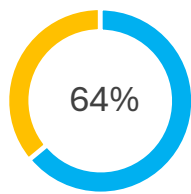

Arrangement and infrastructure in collective sites

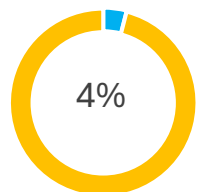

Compliance with minimum standards, % of CSs

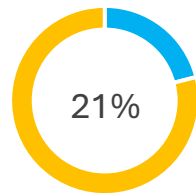

Premises of collective sites are divided into common areas for IDPs and living space

Separation between the space allocated to IDPs from other premises of the building

Sufficient number of common spaces for the needs of the residents of the collective site*

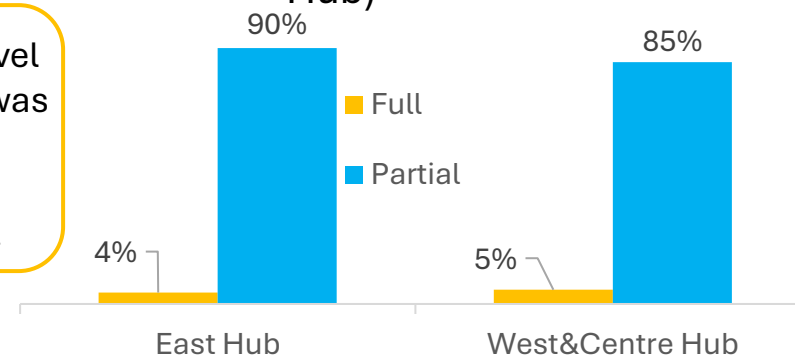

Premises of CSs are equipped with infrastructure (ramps, handrails, etc.) for people with disabilities

The proportion of CSs fully meeting the **'Separation between the space allocated to IDPs from other premises of the building'** standard was **the highest in Zakarpatska (96%) oblast** and the **lowest in Kyivska oblast (32%)**.

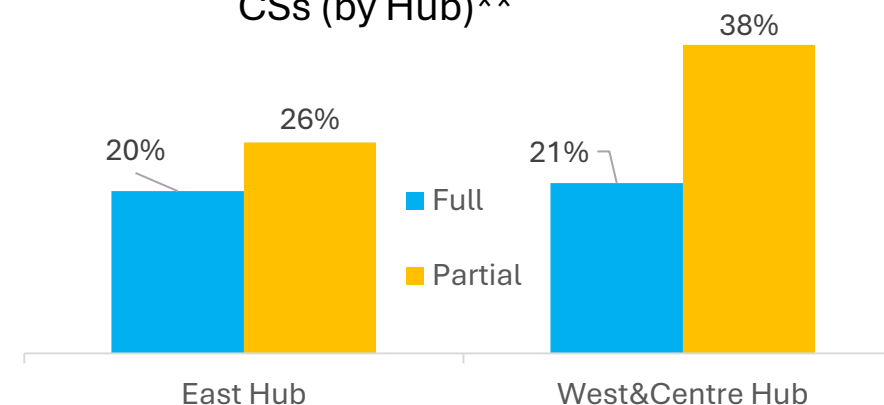

* Common areas include places for general meetings, leisure activities, rooms for children's distance learning, the provision of services, etc.

'Sufficient number of shared spaces' standard compliance, % of the CSs (by Hub)**

The highest level of compliance was reported in **Khmelnyska (17%) oblast**.

'Accessibility infrastructure for people with disabilities' standard compliance, % of the CSs (by Hub)**

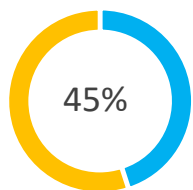

** Full compliance with this standard means the availability of all the above types of places.

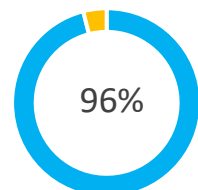

Arrangement and infrastructure in collective sites

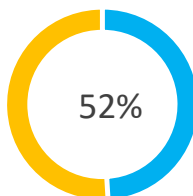

Compliance with minimum standards, % of CSs

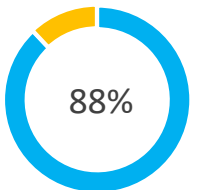

Living spaces are separated by gender

Temperature in the premises of the CS is maintained within the range of 18-25 °C

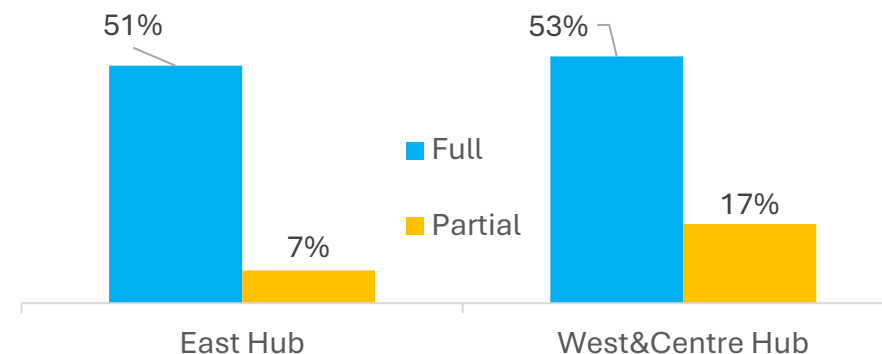

Allocation of at least 6 square meters per one bed (person) in living spaces

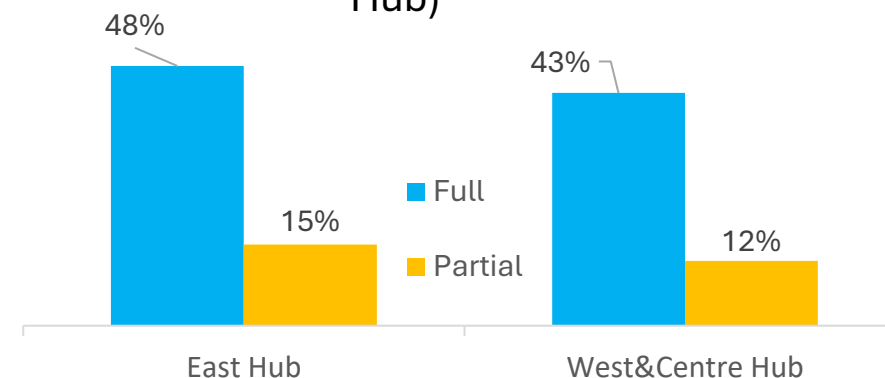

Entrances to living spaces are equipped with locks or latches

In terms of compliance with **'Allocation of at least 6 square meters per one bed in living spaces'** standard, **the highest compliance** was reported in **Ivano-Frankivska (82%) oblast**.

'Allocation of at least 6 square meters per one bed in living spaces' standard compliance, % of the CSs (by Hub)**

'Living spaces are separated by gender' standard compliance, % of the CSs (by Hub)**

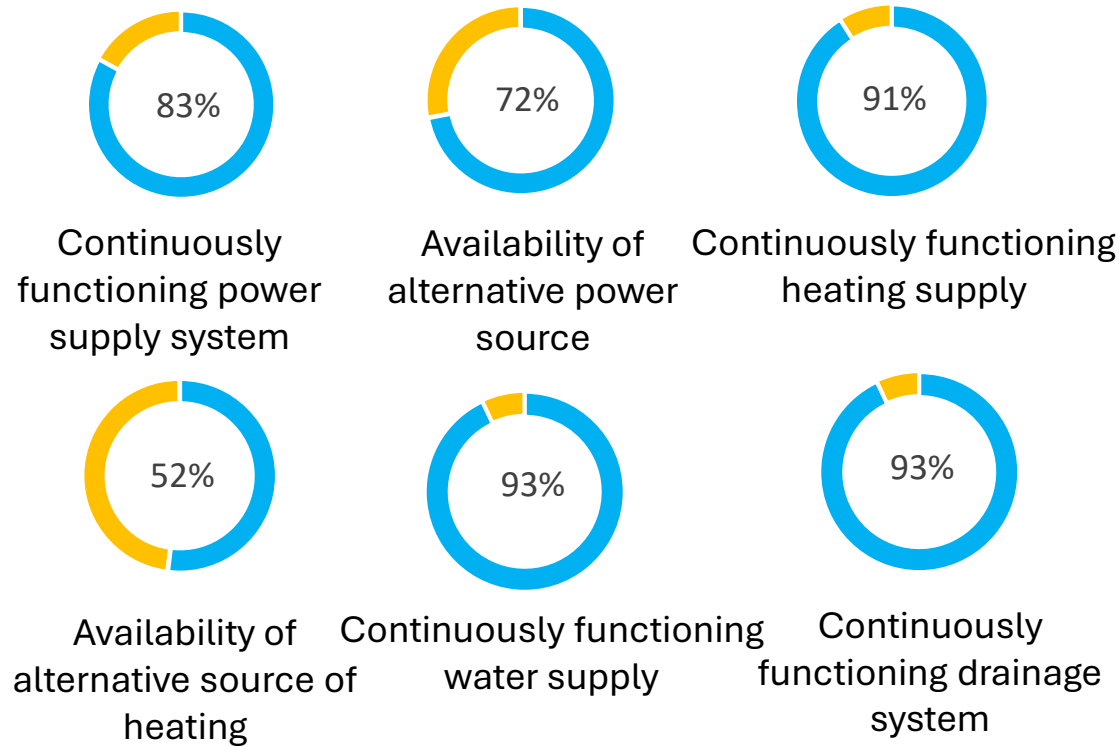

** Partial compliance with the standard means that some sleeping areas of the specific collective site allocate at least 6 sqm per bed while others allocate less.

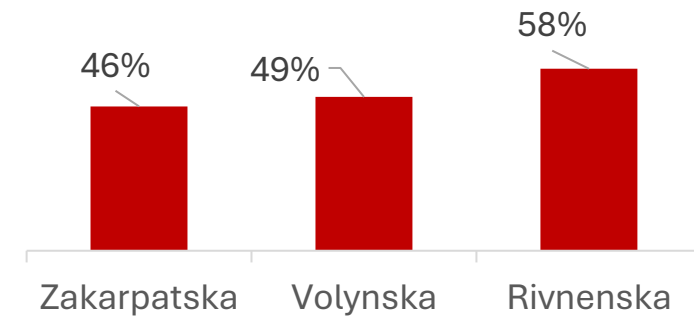

Engineering systems in collective sites

Compliance with minimum standards, % of CSs

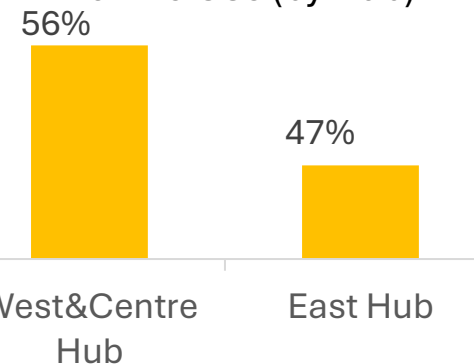

The proportion of CSs fully meeting the **‘Availability of Continuously functioning power supply system’** standard was the **lowest in Khersonska (22%) and Chernihivska (33%) oblasts.**

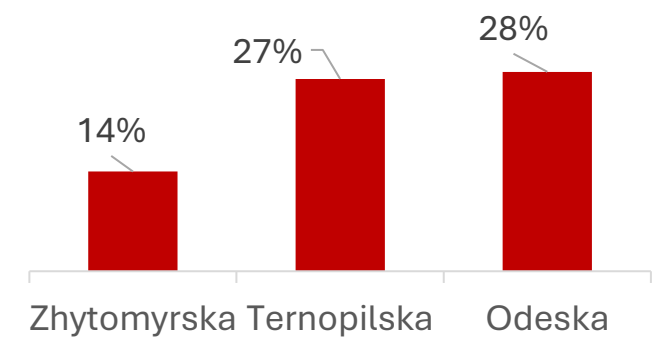

Oblasts with the **lowest compliance** with the **‘Availability of alternative power source’** standard, % of the CSs (by oblasts)

‘Availability of alternative source of heating’ standard **compliance**, % of the CSs (by Hub)

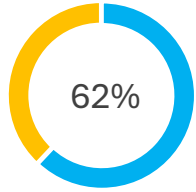

Oblasts with the **lowest compliance** with the **‘Availability of alternative heating sources’** standard, % of the CSs (by oblasts)

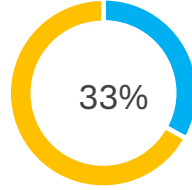

Sanitation and hygiene in collective sites

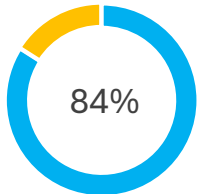

Compliance with minimum standards, % of CSs

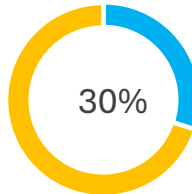

Sufficient number of showers / bathtubs*

Availability of disability-friendly bathing facilities

shower/bathroom equipment with individual locks or latches

Bathing facilities are separated by gender

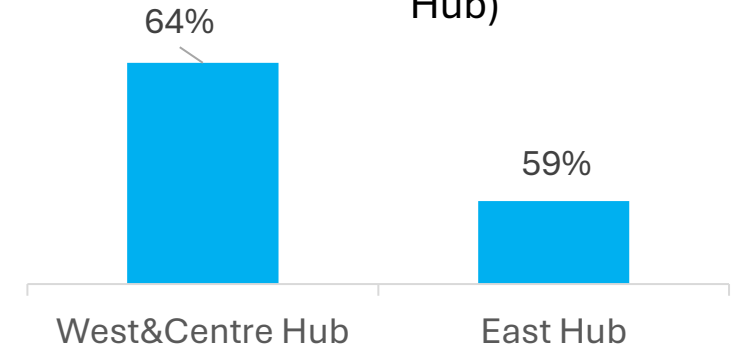

The proportion of CSs fully meeting the **'Bathing facilities are separated by gender'** standard **was the lowest in Ivano-Frankivska (17%) oblast.**

* According to Resolution 930, one shower/bathtub for every 12 people is considered a sufficient number of showers/baths in a collective site

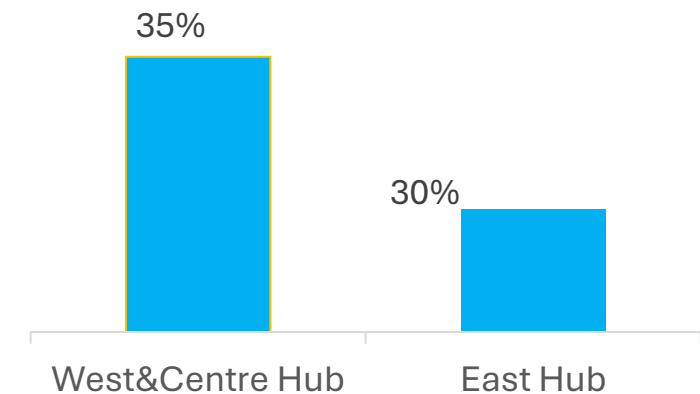

Kyivska (79%) oblast reported the highest **compliance** rates with regards to the **'Sufficient number of showers/ bathtubs'** standard.

Kyivska (69%) oblast reported the highest **compliance** rates with regards to the **'Availability of disability-friendly bathing facilities'** standard.

'Sufficient number of showers/bathtubs' minimum standard compliance, % of the CSs (by Hub)

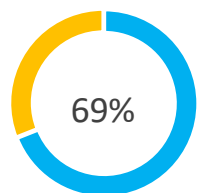

'Availability of disability-friendly bathing facilities' minimum standard compliance, % of the CSs (by Hub)

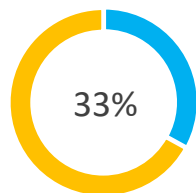

Sanitation and hygiene in collective sites

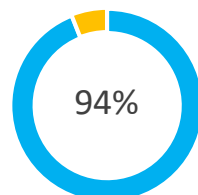

Compliance with minimum standards, % of CSs

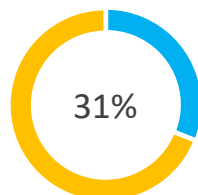

Sufficient number of toilets*

Availability of disability-friendly toilets

Privacy in toilets in the CSs

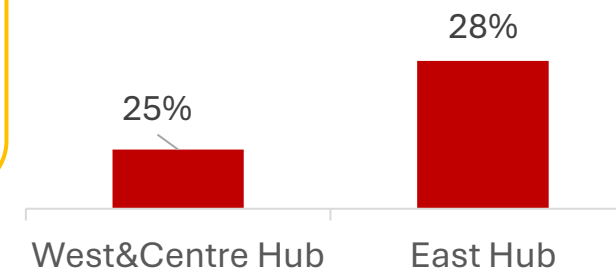

Toilets are separated by gender

The proportion of CSs fully meeting the **'Toilets are separated by gender'** standard was the **lowest in Ivano-Frankivska (15%) oblast**.

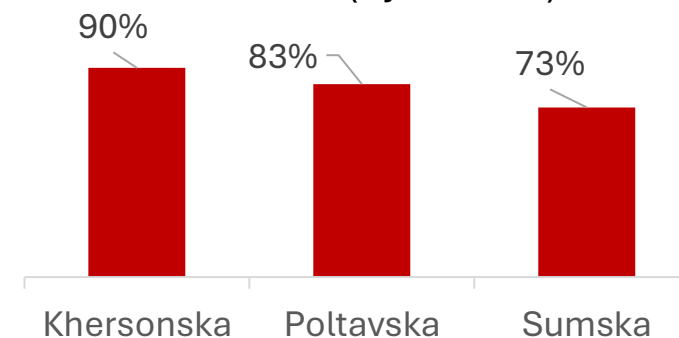

* According to Resolution 930, one toilet (separate seat) for every 10 people is considered a sufficient number of toilets in a collective site

Chernihivska oblast (67%) had the highest **non-compliance** rates related to the **'Sufficient number of toilets'** standard.

Percentage of sites reported **insufficient number of toilets**, % of the CSs (by Hub)

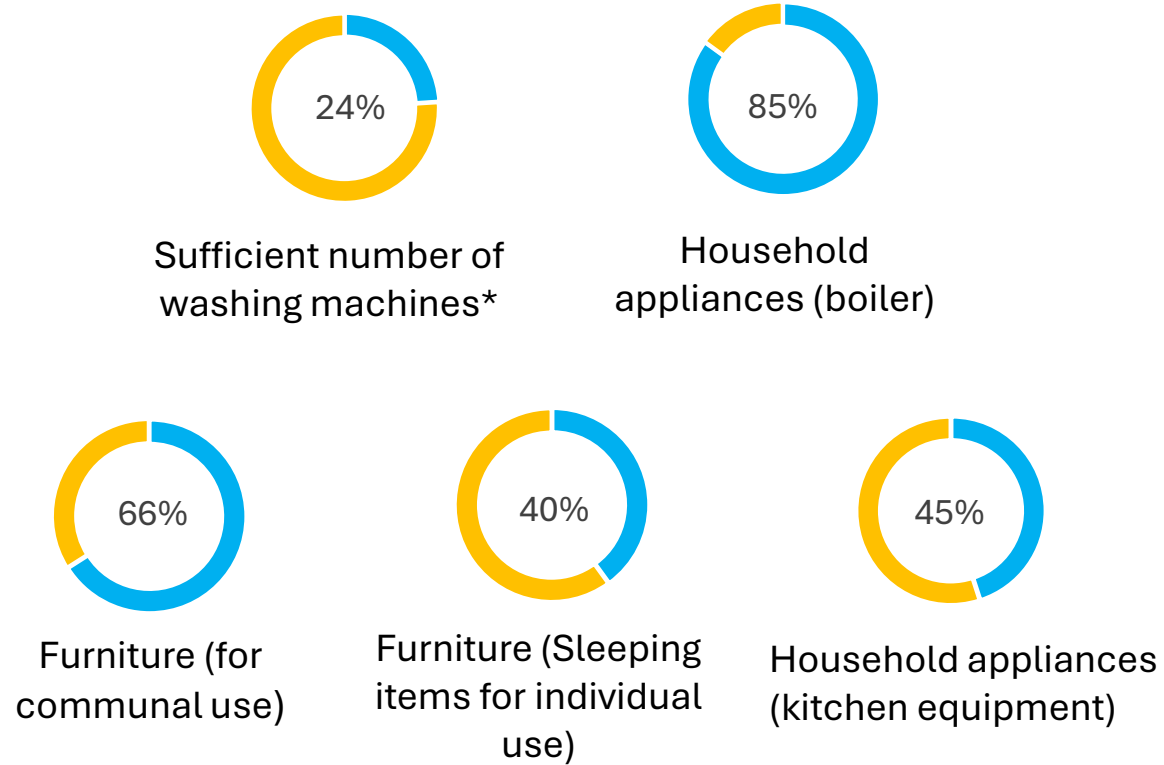

Oblasts with the highest **non-compliance** with the **'Availability of disability-friendly toilets'** standard, % of the CSs (by oblasts)

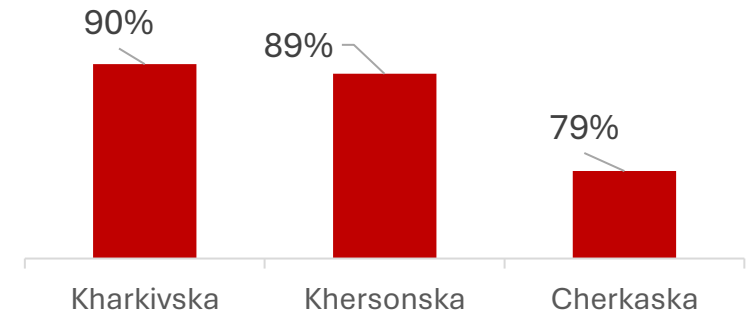

Equipment of collective site premises

Compliance with minimum standards, % of CSs

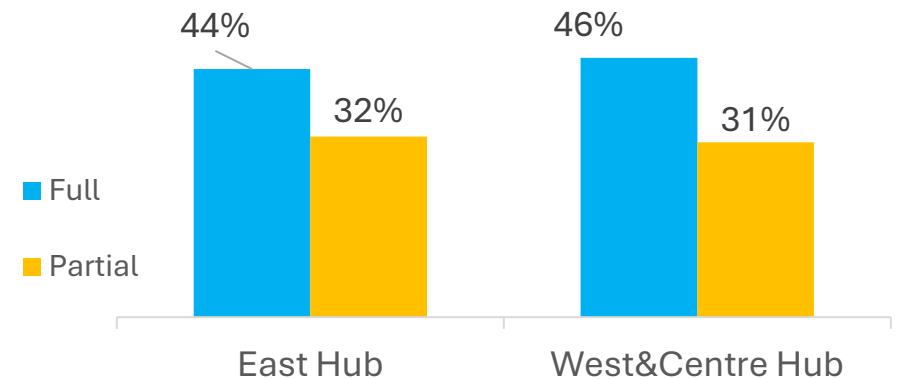

* According to Resolution 930, one washing machine for every 10 people is considered a sufficient number of washing machines in a collective site

Oblasts with the highest **non-compliance** with the 'Sufficient number of washing machines', % of the CSs (by oblasts)

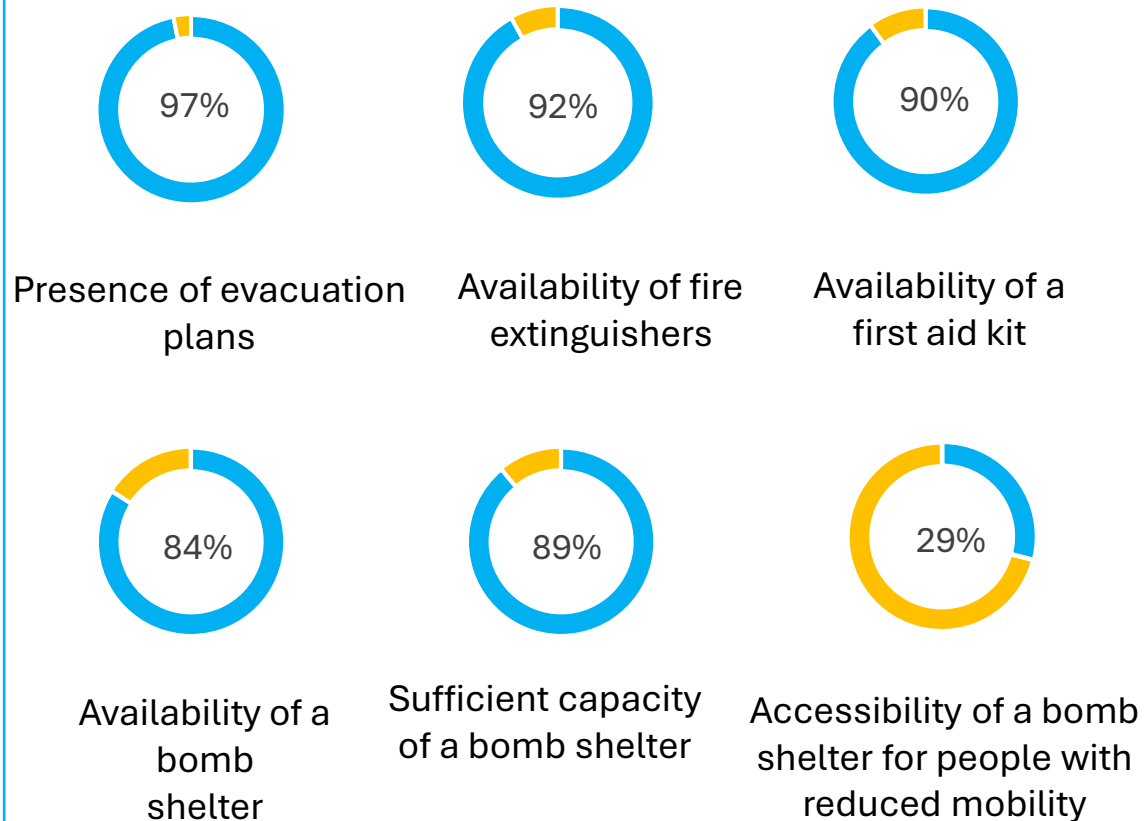

'Equipping the kitchen with the necessary appliances', % of the CSs (by Hub)**

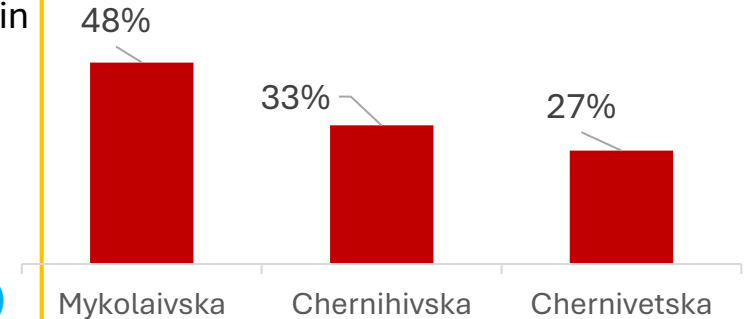

Equipment of collective site premises

Compliance with minimum standards, % of CSs

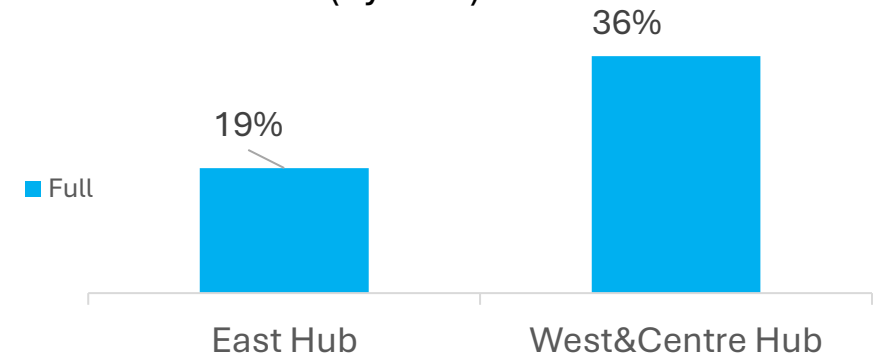

The **highest compliance rates** in terms of the **'Availability of a bomb shelter'** in collective sites showed **Khmelnyska (98%)** oblast.

Oblasts with the highest **non-compliance** with the **'Availability of a bomb shelter'**, % of the CSs (by oblasts)

'Availability of a bomb shelter for people with reduced mobility' standard **compliance**, % of the CSs (by Hub)

* Availability of a bomb shelter (collective site is equipped with the simplest shelter and/or is located 500 meters from the shelter)
