Location Map

Water Access

Three most commonly identified types of water points, by functionality:

per shelter:

72 %	Handpump / tube well	78%	22%	- Forder
22%	Water tank	81%	19%	Functional
6%	Tapstand	79%	21%	Non-functional

5.2

Key sectoral standards:	Target	Current Round	Achievement
# of people per functional improved water source	max. 250	35	
% of shelters with at least 1 functional improved water source³ within 200m	100%	100%	
% of functional improved water sources with no latrine within 10m	100%	44%	

Sanitation

Latrine characteristics:

Functionality and safety

82% Functional (non-full) and safe² 18% Non-functional and / or unsafe

91% Functional (non-full) 9% Non-functional

Without lights

Safety

90% Safe² 10% Unsafe Lighting

15% With lights

85%

Key sectoral standards:	Target	Current Round	Achievement
# of people per functional (non-full) and safe latrine ²	max. 20	43	
# of people per functional (non-full) latrine	max. 20	39	
# of people per safe latrine ²	max. 20	40	
% of shelters with at least one functional and safe latrine ² block within 50m	100%	99%	

Targets based on long term WASH Sector Standards / Indicators for the Rohingya response, Sphere Minimum Standards as well as Department of Public Health and Environment (DPHE) Minimum Standards. Minimum standard/indicator reached, 75%-99% minimum standard/indicator reached, 50-74% minimum standard/indicator reached, indicator reached, Less than 50% of minimum standard/indicator reached.

^{1.} REACH enumerators conducted a full sweep of all sites and camps (as per boundaries defined by ISCG) and used an Open Data Kit (ODK) form to log all key infrastructure observed during this sweep, with further
