

South Sudan - Jonglei State

Assessment of Hard-to-Reach Areas in South Sudan

South Sudan Displacement Crisis

February 2017

Overview

Conflict in Jonglei State broke out in late December 2013, only days after the current conflict began in Juba. Since then, the state has been one of the worst affected by the conflict, and currently hosts the second highest reported numbers of internally displaced persons (IDPs) in the country after Unity State. Many areas in Jonglei are largely inaccessible to humanitarian actors due to insecurity and logistical constraints. As a result, only limited information is available on the humanitarian situation outside major displacement sites.

In order to fill such information gaps and facilitate humanitarian planning, in late 2015, REACH piloted its Area of Origin (AoO) methodology, which takes a territory-

based approach that may cover several bomas, to collect data in hard-to-reach areas of Unity State. The pilot was expanded to Jonglei State in March 2016, with data collected in Bor Town, Bor PoC, and Akobo in Jonglei State. Data is also collected from Mingkaman in Lakes State and PoCs in Juba.

In December 2016, REACH decided to refine the methodology, moving from the AoO to the Area of Knowledge (AoK) methodology, an approach collecting information at the settlement level. The most recent OCHA Common Operational Dataset (COD) released in February 2016 has been used as the reference for settlement names and locations.

Through AoK, REACH collects data from a network of Key Informants (KIs) who have sector specific knowledge and gain the information from regularly traveling to and from the settlement, direct or indirect contact with people in the settlement, or recent displacement.

Data collected is aggregated to the settlement level and all percentiles presented in this factsheet, unless otherwise specified, represent percent of settlements within Jonglei with that specific response.

Although current AoK coverage is still limited and its findings not statistically significant, it provides an indicative understanding of the needs and current humanitarian situation in assessed areas of Jonglei State.

Assessment coverage

869 Key Informants assessed

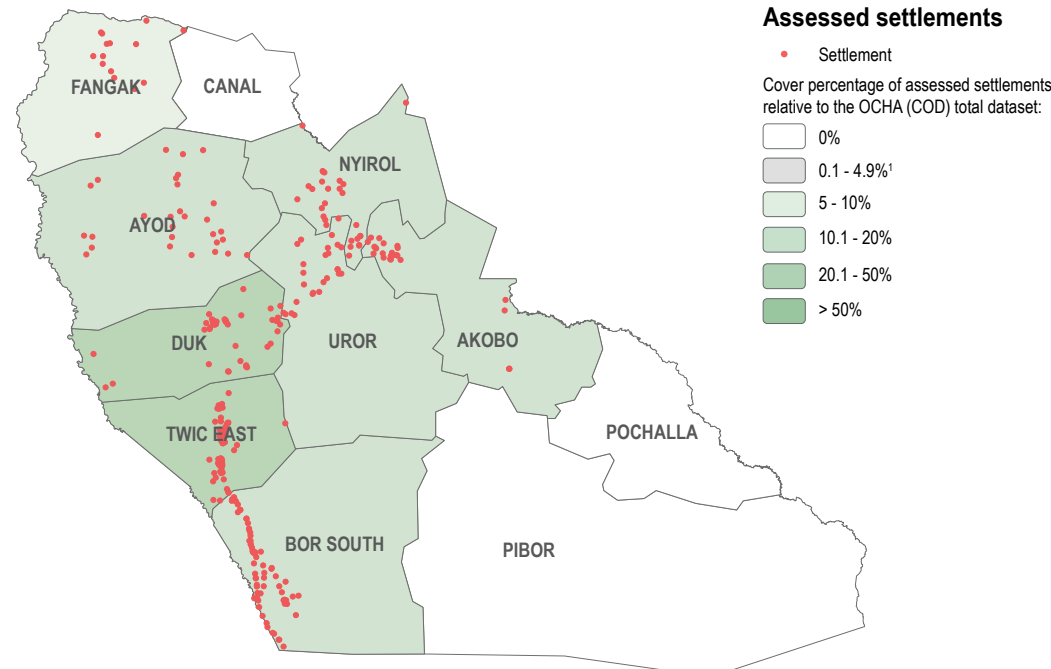

298 Settlements assessed

Contact with Area of Knowledge

17% KIs reported to have visited the AoK within the last month.

83% KIs reported to be in contact with someone living in the AoK within the last month.

Assessment coverage

Reached villages

County	Assessed settlements	OCHA (COD) settlements	Cover percentage
Akobo	25	169	15%
Ayod	29	241	12%
Bor South	68	388	18%
Canal	0	128	0%
Duk	40	100	40%
Fangak	15	205	7%
Nyirol	28	217	13%
Pibor	0	354	0%
Pochalla	0	75	0%
Twic East	67	210	32%
Uror	26	202	13%
Total	298	2,289	13%

¹ Counties with under 5% of settlement coverage are not disaggregated to the county level, but are included in state-level analysis.

South Sudan - Jonglei State

South Sudan Displacement Crisis

February 2017

New arrivals

Push factors

Top three reported reasons for leaving previous location:¹

Pull factors

Top three reported reasons for coming to current location:²

Previous location

Top three reported most recent long-term locations:

Displacement

Reported time of displacement from most recent long-term location:

Displacement

Demographic composition

Reported gender ratio of IDPs in assessed settlements:

Reported age ratio of IDPs in assessed settlements:

² Most frequently cited as first and second most important reasons.

Local community

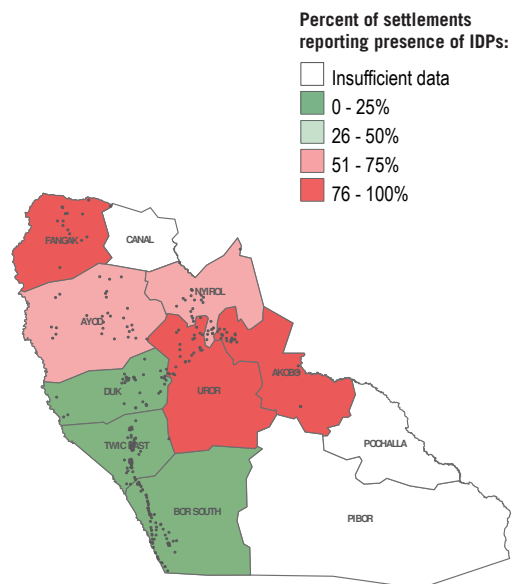

Demographic composition

Reported gender ratio of local community remaining in assessed settlements:

Reported age ratio of local community remaining in assessed settlements:

South Sudan - Jonglei State

South Sudan Displacement Crisis

February 2017

Health

Percent of settlements reporting access to healthcare:

Health concerns

Most commonly reported health concerns in the assessed settlements:³

Health distance

Reported distance of the nearest health care facilities from the assessed settlements:

Health unavailability

Top three reported reasons why health care facilities are not available from the assessed settlements:⁴

Feeding programmes

Reported availability of feeding programmes that provide Plumpy Sup, CSB++ or other nutrition supplements in the assessed settlements:

³ Rank three most common health concerns normalized.

⁴ Rank two reasons health facilities are not available.

Shelter/NFI

Percent of settlements reporting tukuls as a primary shelter type for LC:

Percent of settlements reporting tukuls as a primary shelter type for IDPs:

NFI

Reported number of people sharing a shelter:

Shelter sharing

Proportion of the local community sharing shelters with IDPs:

Food Security

Market distance

Reported distance of the nearest market from the assessed settlements:

Food unavailability

Top three reported reasons why people cannot access enough food in the assessed settlements:⁵

Coping strategies

The average number of reported coping strategies used in the assessed settlements:

1.7 coping strategies reported on average

Land availability

Reported availability of land for agriculture in the assessed settlements:

Market availability

Reported availability of a functioning market accessible from the assessed settlements:

WASH

Water distance

Reported distance of the nearest water source from the assessed settlements:

Borehole usage

99% of settlements with safe drinking water reported boreholes as the primary source.

County	Percentage of functioning boreholes
Akobo	88%
Ayod	68%
Bor South	76%
Canal	Insufficient data
Duk	65%
Fangak	86%
Nyirrol	77%
Pibor	Insufficient data
Pochalla	Insufficient data
Twic East	72%
Uror	78%

Sanitation

Reported usage of sanitation facilities in comparison with open defecation:

⁵ Rank three reasons adequate food is not available.

February 2017

Education

Percent of settlements reporting access to education:

Education availability

Reported available education services in the assessed settlements:⁶

Education attendance and availability

Top two reported reasons why children are not attending school in the assessed settlements:

Top two reported reasons why education services are not available in the assessed settlements:

School attendance

Reported proportion of 6-17 year girls and 6-17 year boys attending school in assessed settlements:

⁶ Key informants could choose more than one answer.

⁷ Accelerated learning programmes.

Protection

Women

Reported primary protection concerns for women in the assessed settlements:

Men

Reported primary protection concerns for men in the assessed settlements:

Children

Reported primary protection concerns for children in the assessed settlements:

Community relations

Reported relationships between IDPs, returnees⁸ and local community in the assessed settlements:

Land disputes

Reported presence of disputes over land ownership in the assessed settlements:

⁸ Local community displaced and returned home, reported in 66% of assessed settlements.

About REACH

REACH facilitates the development of information tools and products that enhance the capacity of aid actors to make evidence-based decisions in emergency, recovery and development contexts. All REACH activities are conducted through inter-agency aid coordination mechanisms. For more information, you can write to our in-country office: south.sudan@reach-initiative.org or to our global office: geneva@reach-initiative.org.

Visit www.reach-initiative.org and follow us @REACH_info.
