Al Rummaneh Sub-district - Al Kaim District - Al Anbar Governorate, Iraq

Situation Overview

Whilst movement trends in Iraq have generally remained stable since early 2018, there has been a considerable shift since August 2019 with increasing numbers of internally displaced persons (IDPs) returning to their area of origin (AoO) or being displaced for a second time. The International Organization for Migration (IOM) Displacement Tracking Matrix (DTM)'s Emergency Displacement Tracking¹ recorded over 9,600 households being displaced or returned to non-camp locations between 29 February and 15 June 2020, only 3% of which were recorded in Al Kaim district (representing 41% for Al Anbar governorate).²

There have been concerns in the humanitarian and development community over the principled character and durability of new returns and potential consequences for humanitarian needs and social cohesion in areas to which families have returned or been secondarily displaced.³

Al Rummaneh

Al Rummaneh is a sub-district of Al Kaim district, located on the north side of the Euphrates in western Al Anbar governorate, on the Iraq-Syria border.

KIs reported that AI Rummaneh town was housing over 3,600 families before 2014, mostly Sunni Muslim Arab population. The sub-district fell under the control of the so-called Islamic State of Iraq and the Levant (ISIL) in June 2014 forcing over 2,500 families to flee their homes, as reported by key informants (KIs) during data collection. However, since AI Rummaneh was retaken in November 2017, most residents displaced in 2014 have reportedly returned. At the time of data collection, an estimated total of 718 families were reported to remain in displacement.

******* Population Profile

3,360-3,945 families were reported by KIs to be residing in Al Rummaneh before the events in 2014.

65-70% of the pre-2014 population in Al Rummaneh settlements displaced in 2014, as reported by Kls.

81-85% of the population displaced in 2014 have returned, as reported by KIs.

11-20 IDP families are reported by KIs to reside in Al Rummaneh settlements (not specified area of origin).

Coverage Map

Background and Methodology

To date, IOM DTM's bi-monthly tracking⁵ of returnees and IDPs provides an overview of numbers and trends in movement and returns. Simultaneously, IOM DTM has run the Returns Index since 2018⁶, collecting data bimonthly to provide indicative trends in the severity of conditions conducive to return in aeas of return (AoR) nationwide. Similarly, the Camp Coordination and Camp Management (CCCM) Cluster, IOM DTM, and the Returns Working Group (RWG) have conducted assessments with IDPs that have left camps following or in anticipation of closures, to better understand and map areas of return and secondary displacement.

REACH Initiative (REACH) has been conducting nationwide multisectoral assessments which include indicators concerning durable solutions. In addition, in light of recent movement trends, REACH conducted an assessment in Al Rummaneh sub-district to have an immediate understanding and in-depth profiling of needs and community interrelations between remainee, returnee⁷, and/or IDP populations⁸. This report outlines the overall conditions to examine how and to what extent durable solutions for returnees and IDPs have or can be achieved. The findings are based on 40 KIs interviews conducted between 04 and 14 June 2020, combining qualitative and quantitative data adapted to the context and restrictions during the COVID-19 pandemic. Purposive sampling methods were employed to identify KIs. Findings are based on KI level data and should therefore be considered as indicative. Al Rummaneh sub-district was selected for the assessment as: more than 50% of host community members are reported to have returned; social cohesion severity⁹ is medium; it is an AoO for IDPs in camps at risk of closure; and recent reports of dynamic population movements and movement intentions to/from this district.

Recent population returns and displacement

₹ Recent returns

20 of 40

KIs reported that additional families returned to Al Rummaneh in the six months prior to data collection.

46-70

families returned to Al Rummaneh. The main reasons for return, as reported by 18 Kls, were the sense of increased security and following the return of other family members. Two Kls also noted camp closures in the area of displacement (AoD) as a reason for recent returns.

Reported impact of recent returns in the community^{10, 11}

Family reunification	23 Kls
Increased access to assistance	6 KIs
Increased access to jobs	2 Kls

₹ Failed return movements¹²

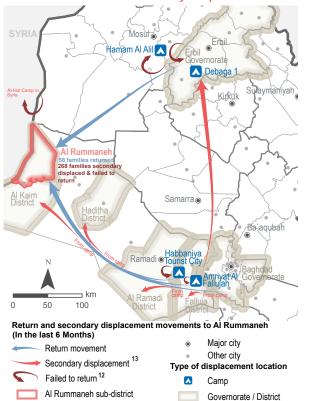

210-325 families reportedly attempted to return to Al Rummaneh in the six months prior to data collection but did not succeed.

Reported reasons for failed returns^{10, 11}

Destroyed/damaged housing in AoO	18 KIs
Lack of jobs	17Kls
Resistance from community and/or local actors	14 Kls
Lack of services	5 Kls
Unstable security	4 KIs

Three KIs (remainees in Al Rummaneh) reported that failed returns resulted to less people present to compete for the reduced number of available jobs in the area, and less competition between business owners to sell their products. They also noted this negatively affected some employees who still have pending salaries since their employers did not yet return to Al Rummaneh.

Recent Returns and Secondary Displacements

Recent host community displacement

10-20

host community families reportedly displaced to Erbil governorate in the six months prior to data collection due to lack of services and jobs in Al Rummaneh. KIs reported that this displacement did not impact the remaining community.

🏞 Recent IDP arrivals

6 of 40

KIs reported that additional IDP families have arrived to Al Rummaneh in the six months prior to data collection.

125-175

IDP families arrived in the six months prior to data collection as reported by two KIs.

Reported impact in the community were increased available assistance, family reunification and increased workers.

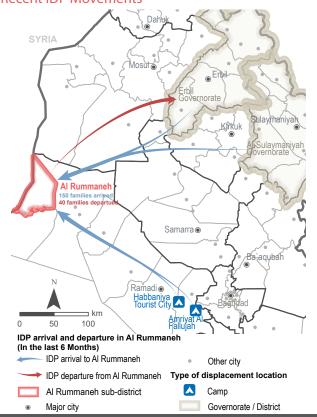

Reported drivers for recent IDP arrivals^{10, 11}

Increased sense of safety and security	2 Kls
Expected increase in job opportunities	2 Kls
Expected increase in available services	2 Kls
Rummaneh is considered a transition area	1 KI
Kinship ties	1 KI

Recent IDP departures

Two KIs reported IDP families displaced to Erbil district or returned to their AoO due to lack of jobs and services, and resistance from local actors in Al Rummaneh. One KI reported between 30 and 50 IDP families recently displaced from Al Rummaneh, resulting in family separation but decreasing the number of disputes in the area.

Recent IDP Movements

Expected population returns and displacement

パマ Expected returns

KIs reported that additional families from Al Rummaneh 27 of 35 might return in the six months following data collection.

families are expected to return to the area in the six months 85-150 following data collection, according to KIs' estimates.

Reported drivers for returns 10, 11

26 KIs
23 Kls
8 KIs
5 Kls

Reported barriers to return 10, 11

Destroyed/damaged housing in AoO	25 Kls
Lack of jobs	19 Kls
Lack of services	8 Kls
Unstable security	6 KIs
Fear of being perceived as ISIL affiliated	5 Kls
Family has settled in AoD and prefers to stay	5 Kls
Medical treatment is not available in AoO	1 KI

All KIs reported that further returns will impact family reunification, and 52% reported that it will result in increased job opportunities and assistance. However, one KI considered that additional returns might lead to increased disputes and less assistance for the current population.

Expected host community displacement

families are expected to be displaced to Al Falluja and 50-100 Ramadi sub-districts looking for job opportunities.

₹→ Expected IDP movements

One KI reported that some IDP families might be arriving in the six months following data collection, due to the sense of increased security in Al Rummaneh, following the arrival of other family members, and looking for jobs. No expected IDP displacement from Al Rummaneh in the six months following data collection was reported.

Primary Community Needs

Primary community needs in Al Rummaneh 10, 11

	First Need	Second Need	Third Need
House rehabilitation	15 Kls	4 Kls	5 Kls
Security	14 Kls	0	1 KI
Livelihoods	6 Kls	23	4 KIs
Healthcare	4 Kls	5 Kls	4 KIs
Electricity and water	0	4 KIs	13 Kls
Waste disposal	0	0	8 KIs
Education	0	3 Kls	2 Kls
Unexploded ordnance (UXO) clearance	1 KI	0	0
Food	0	1 KI	1 KI
Documentation	0	0	1 KI
Road rehabilitation	0	0	1 KI

Kls reported that the primary needs for the community are: support to rehabilitate housing, taking into consideration that most of the houses were destroyed or partially damaged during the military operations by ISIL and that there is limited compensation from the government for rehabilitation; and, safety and security.

"Security is a basic requirement to start a decent life" - male IDP from Rummaneh displaced in Erbil

The second main community needs most commonly reported were: access to livelihoods due to reported lack of jobs in the area, including the need of livelihoods projects for women heads of households as reported by 11 Kls; and, healthcare due to lack of specialities, the high cost of health services, and damaged facilities.

"Complex treatments are only available in Baghdad or Erbil" remainee male

Electricity, water and waste management were considered as the third need considering the limitations to access those services, the operational hours, reduced capacity of Municipalities to respond and the high cost for private related services.

Perceptions on access to services and assistance

Access to housing and rehabilitation

All KIs (15 KIs) reported that the majority of families in the area reside in houses.

Owned	9 Kls	
Verbal rental agreement	3 Kls	
Hosted	3 Kls	

of KIs (12 KIs) reported that the proportion of destroyed or damaged houses in Al Rummaneh is between 20 and 50 percent.

KIs reported that most of the population resides in damaged houses. Reportedly returnees, IDPs and some remainees are more likely to reside in damaged or unfinished buildings or houses. In all groups, female heads of household and families of members with alleged links to ISIL are the most affected.

of KIs (11 KIs) reported unequal opportunities to receive support for damaged housing.

Reportedly, returnees, female heads of household, people with disabilities and people with fewer connections (wasta¹⁴) have less opportunities to receive housing support.

Reported barriers to access assistance for rehabilitation 10, 11

Criteria of selection for support is too specific	11 Kls
Lack of financial means for rehabilitation	9 KIs
Less connections (wasta)	3 KIs
Rehabilitation targets specific neighbourhoods	1 KI

"Home rehabilitation preserves the sense of having a family and encourages displaced population to return" - returnee male

Risk of Eviction

of KIs (3 KIs) reported risk of eviction for IDPs, some remainees and families of members with alleged links to ISIL.

The main reasons for families to be at risk of eviction are reportedly related to: the landlord's decision to use or rehabilitate the property or unwillingness to host the family any longer; reports of security incidents; and, concerns about hosting family of members with alleged links to ISIL.

Access to basic services ·····

of KIs (4 KIs) reported unequal access to basic services such as water, sanitation, and food for returnees, IDPs, female heads of household and people with less connections.

Reported barriers to access basic services 10, 11

The second secon	
Vulnerability criteria is too specific	3 Kls
Assistance targets specific neighbourhoods	3 Kls
Less connections (wasta)	2 Kls
Lack of financial means to access services	1 KI

M Access to public services

of KIs (13 KIs) reported equal access to public services such as education and healthcare. In addition, all KIs reported that boys and girls (between 5 and 15 years old) can access public education.

However, population groups residing in remote areas had reportedly less access to public services, namely schools and health. The main reasons were equally highlighted as long distance from the residency to the nearest public facility, the lack of financial means to cover the costs of services and the specificity of the selection criteria for the provision of some services.

Access to livelihoods

of KIs (5 KIs) reported unequal access to livelihoods services.

Population groups with less access to livelihoods 10, 11

1 3 1	
People with less connections (wasta)	4 KIs
Returnees	2 KIs
Female heads of household	2 KIs
IDPs	1 KI
Elderly	1 KI
Unaccompanied/separated children	1 KI
People with disabilities or special needs	1 KI

Reported barriers to access livelihoods 10, 11

Less connections (wasta)	4 Kls
Lack of financial means to provide assets	3 Kls
Criteria of selection for support is too specific	2 Kls
Tribal discrimination	1 KI
Services target specific neighbourhoods	1 KI
No job opportunities available in the area	1 KI

Access to justice

All KIs (15 KIs) reported that access to justice is equal for all population groups and there are no closed offices in Al Rummaneh. Only one KI reported that for IDPs in Al Rummaneh it is difficult to obtain a passport as they often cannot afford the cost for the process or the transportation due to limited access to resources.

Access to humanitarian aid ·····

Most needed activities or projects according to KIs:

KIs (3 KIs) reported presence of NGOs in

"If job opportunities are available, many families can meet their specific and basic needs, and many displaced families can return to the area" - remainee male

Al Rummaneh Sub-district

Perceptions on Family Reunification, Governance and Safety

*** Family Reunification

All KIs (10 KIs) reported that some families in the community still have members in displacement.

Family members remaining displaced 10, 11

Main reasons for remaining displaced 10, 11

Perceptions on Governance, Safety and Security

Governance and influencing bodies

KIs (15 community leaders) reported that mukhtars¹⁵ and local authorities are the most influential bodies with regards to governance, followed by tribal leaders. No changes in the levels of influence of groups were reported in the six months prior to data collection.

of KIs (10 KIs) reported that there has been no appointment of any new local authorities in the six months prior to data collection.

Safety and security

of KIs (14 KIs) reported that their community members feel safe in the area, and 87% of KIs (13 KIs) mentioned that they do not avoid any areas or neighbourhoods in Al Rummaneh.

However, a remainee KI reported feeling unsafe due to the presence of specific armed groups in the area and the fear that ISIL could return to Al Rummaneh.

Freedom of movement

of KIs (14 KIs) reported that females and males in the community can freely move during day and night.

However, a returnee KI reported that some females and males do not freely move during the night or day due to the presence of checkpoints or control spots for specific political parties in the area.

† Community disputes

One KI reported that disputes took place in the area due to the return of some families in the six months prior to data collection. No disputes were reported between villages or towns in Al Rummaneh.

Retaliation incidents reported

All KIs (15 KIs) reported that the presence of security forces such as the police and the Iraqi armed forces contributed positively to a feeling of safety. In addition, it was generally recognized that security forces are effective in resolving disputes within the community and between different villages.

Scommunity relations and co-existence

of KIs (12 KIs) reported that community members trust each other, but only eight KIs (the majority were IDPs from other areas displaced in Al Rummaneh) reported interacting with other groups in the community.

All KIs (15 KIs) reported that there are no specific population groups which are not welcome by the majority of the community in the area.¹⁶

Contamination of housing, land and property

No contaminated land was reported in the area, though one KI reported an incident with mines without casualties.

End Notes

- 1. IOM DTM: http://iraqdtm.iom.int/IdpMovements February 2020 and April 2020
- 2. IOM DTM: http://iraqdtm.iom.int/MasterList#Datasets February 2020 and April 2020
- 3. Based on the 2016 Iraq Humanitarian Response Plan (HRP) Strategic Objective to ensure 'principled' returns, meaning voluntary, safe, dignified, and durable returns of IDPs to their AoO
- 4. Al Rummaneh settlements may or may not be populated after the events in 2014.
- 5. IOM DTM: http://iraqdtm.iom.int/MasterList#Datasets February 2020 and April 2020
- 6. IOM DTM: http://iraqdtm.iom.int/ReturnIndex February 2020 and April 2020
 7. Returnees are commonly categorized as an IDP returning to their AoO, where AoO is defined as the stated original sub-district of origin for the IDP.
- 8. As clarified by the Iraq Inter-Cluster Coordination Group (ICCG) in 2018, secondary displacement covers multiple scenarios: 1) IDPs who are voluntarily or forcibly displaced to another displacement location; 2) and 3) IDPs who voluntarily or forcibly, return to their AoO, but are unable to achieve sustainable solutions and are consequently re-displaced to their first place of displacement or to a new location of displacement; and 4) IDPs who voluntarily or forcibly, return to their AoO, but are unable to resume habitation in their former habitual residence and cannot achieve sustainable solutions and are consequently re-displaced to a new location within their AoO.
- 9. IOM DTM: http://iraqdtm.iom.int/ReturnIndex refer to methodology, to compute the severity index different parameters are combined.
- 10. Sum of answers may exceed the 100% due to KIs being able to select multiple response options, including other topics.
- 11. Percentages are represented by the number of KIs who answered the questions.
- 12. Failed returns refer to the movement of those populations from Al Rummaneh who tried to return to Al Rummaneh but did not succeed and subsequently ended up back in their original location of displacement or were secondarily displaced to a new location.
- 13. Secondary displacements of original Al Rummaneh residents.
- 14. Wasta can be defined as the advantages a person might have due to using one's social connections and influence.
- 15 Mukhtar can be defined as the head of a village or neighbourhood in some Arab countries.
- 16. As per IOM DTM, in Al Rummaneh the severity of social cohesion is medium http://iraqdtm.iom.int/ReturnIndex
