

HUMANITARIAN SITUATION OVERVIEW OF SYRIA (HSOS)

March 2024 | Northeast Syria

SITUATION OVERVIEW

INTRODUCTION

HSOS is a monitoring key informant (KI) assessment that provides comprehensive, multi-sectoral information about the humanitarian conditions and priority needs inside Syria. This Situation Overview presents a thematic review based on the HSOS assessment of the priority needs and humanitarian assistance, access to basic services and infrastructure, economic conditions, public health, as well as the security and protection situation in Northeast Syria (NES). HSOS focuses on host community and internally displaced persons (IDP) households residing in communities. **This assessment does not provide information on camps and informal settlements.**

This Situation Overview presents information gathered in **1,351 communities** across Aleppo¹, Ar-Raqqa, Al-Hasakeh, and Deir-ez-Zor. Data was collected **between 3-14 March 2024** from **4,678 KIs** (19% female).

The complete HSOS dataset and analysis can be downloaded as an [excel file](#).

INTERPRETATION

Findings are indicative rather than representative and should not be generalised across the population and region. **All results in this output should be interpreted as referring to a percentage of assessed community where KIs reported an information.** All indicators refer to the situation in the 30 days prior to data collection.

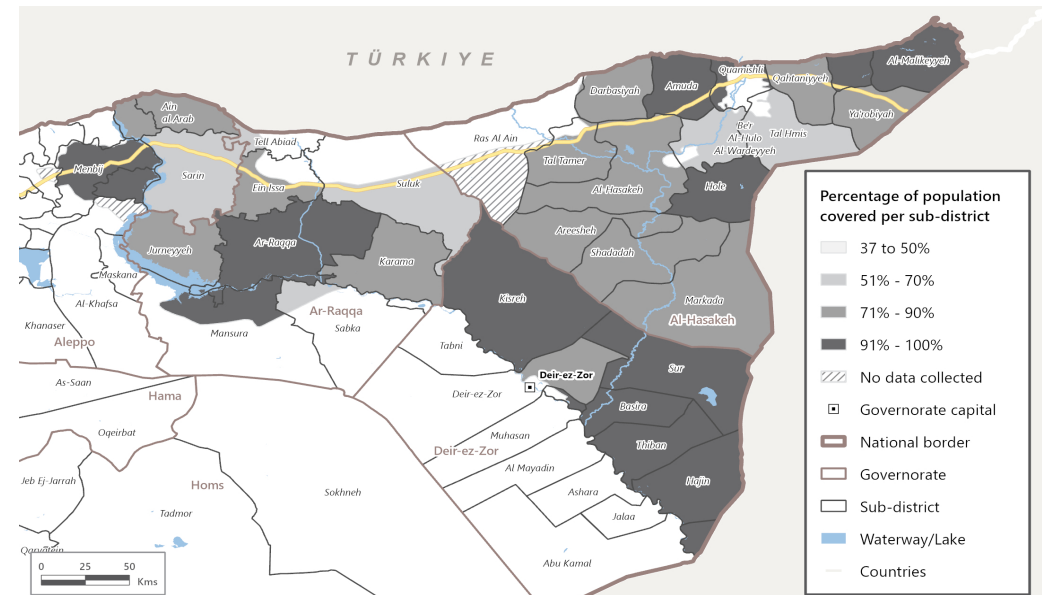

The symbol ▲ indicates that KIs could select multiple answers, thus findings might exceed 100%.

HSOS Dashboards

- **Sectoral dashboard:** This interactive dashboard presents a sectoral review of key indicators from HSOS. Users can easily navigate through their sector of interest and visualise data from the community level to the region level.
- **Trend analysis dashboard:** This dashboard allows users to quickly see how the humanitarian situation in northern Syria has been changing over time.
- **Water and electricity dashboard:** This dashboard shows trends of access to water, access to electricity and problems with drinking water indicators in NES. Trends are displayed in graphs and maps showing findings at various administrative levels.

KEY MESSAGES

- While most of communities in NES rely on crop agriculture for livelihoods, **farmers faced issues related to decreased soil quality and damage to agricultural lands due to pollution.** Reports of land pollution were the highest in communities located along the Euphrates River in Deir-ez-Zor governorate. Crop lands pollution may have resulted from [recent oil leaks](#) in several NES rivers.
- **More than half of the assessed communities in Deir-ez-Zor and Hasakeh governorate reportedly faced problems with drinking water.** Problems include water having a bad colour, bad taste, water being calcareous or more severe issues such as making people sick. In March, Deir-ez-Zor was the governorate recording the greatest reports of water making people sick.
- NES faced increased fuel shortages, especially in **Hasakeh governorate where the unavailability of fuel reportedly affected the access to electricity in 50% of assessed communities**, compared to 36% in the same period last year. The growing unavailability of fuel is one of the [consequences of the damage to civilian infrastructure](#) caused by repeated airstrikes in NES.

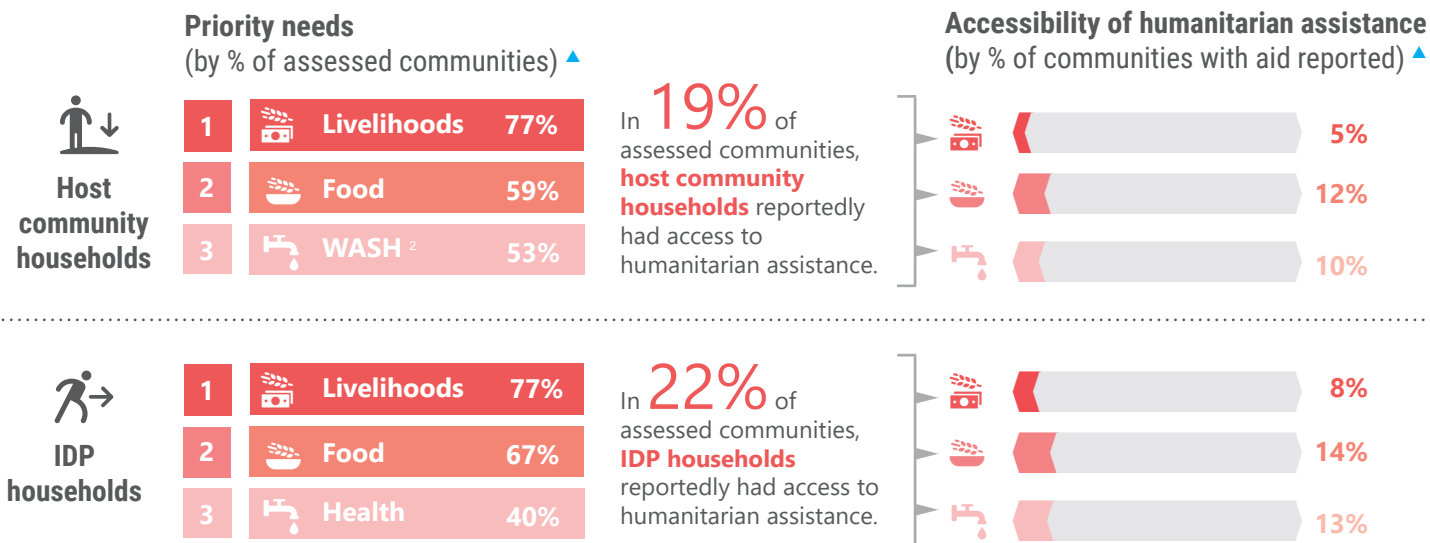

¹ Aleppo governorate includes Menbij and Ain Al Arab districts

▲ KIs could select multiple answers, thus findings might exceed 100%.

PRIORITY NEEDS AND HUMANITARIAN ASSISTANCE

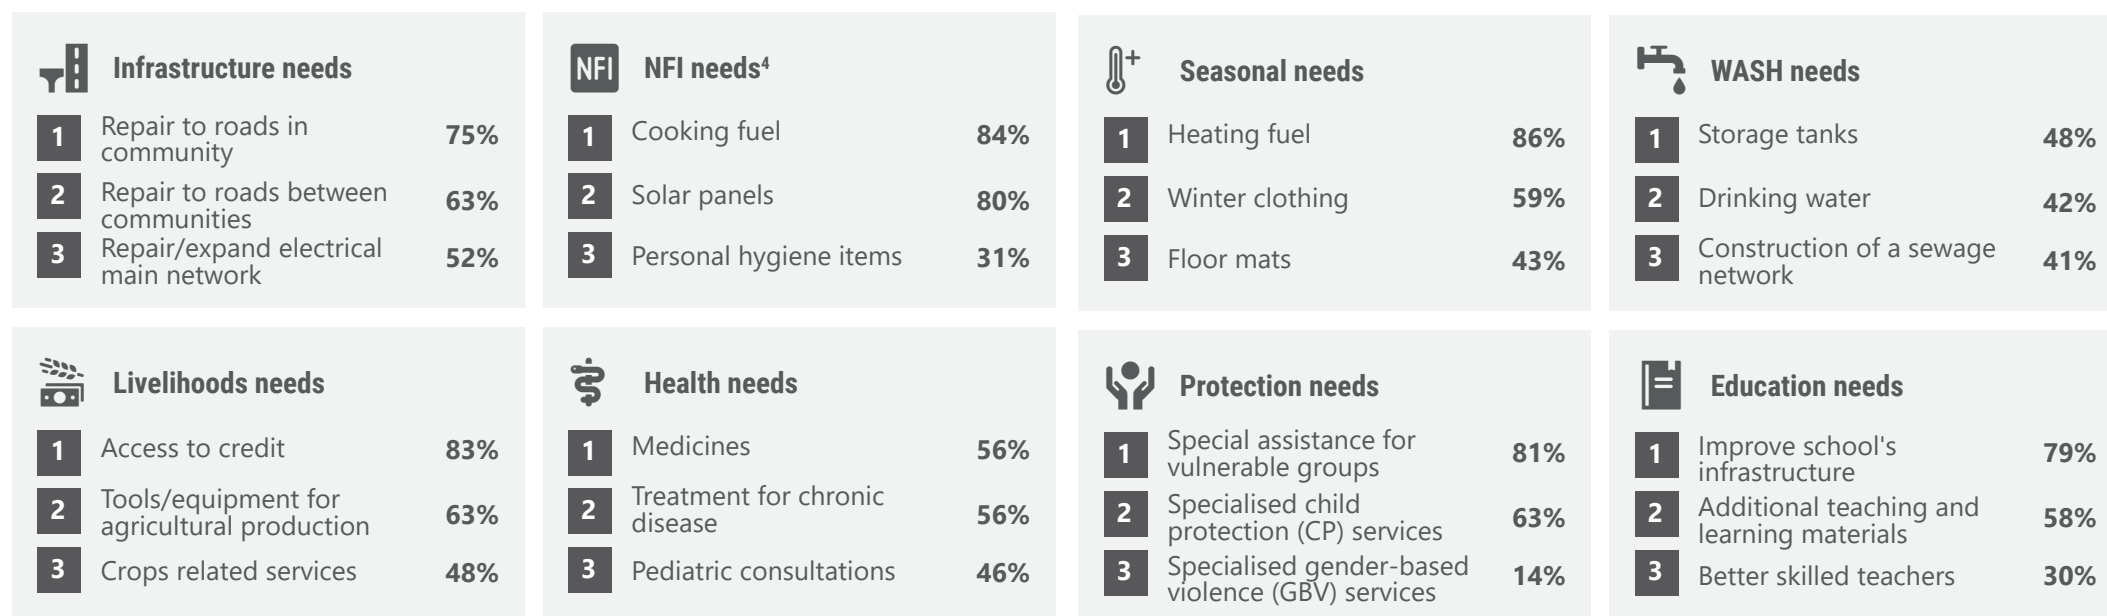

Most commonly reported priority needs and reported accessibility of associated humanitarian assistance

Most commonly reported difficulties faced when accessing humanitarian aid (by % of communities where access to aid was reported) ▲

- | | | |
|----------|--|------------|
| 1 | Assistance provided was not enough to cover all people in need | 60% |
| 2 | Types of assistance provided were not relevant to all needs | 55% |
| 3 | Distribution points were too far/routes were hardly accessible | 34% |
-
- | | | |
|----------|--|------------|
| 1 | Types of assistance provided were not relevant to all needs | 60% |
| 2 | Assistance provided was not enough to cover all people in need | 57% |
| 3 | Distribution points were too far/routes were hardly accessible | 30% |

Top reported needs by sector (by % of assessed communities) ▲, ³

² Water, Sanitation and Hygiene (WASH)

³ All the findings on priority needs by sector correspond to the needs of the general population living in assessed communities. Hence, they cover both host community and IDP households.

⁴ Non-food items (NFI)

ACCESS TO BASIC SERVICES AND INFRASTRUCTURE

Access to Markets

% of assessed communities where **markets were not functioning every day**

Hasakeh	25%
Deir-ez-Zor	4%
Raqqa	33%
Aleppo	34%

Most commonly reported barriers to food-market functioning (by % of assessed communities) ▲

1	People do not have the financial means to open a shop- market	24%
2	Limited demand to support markets in the community	5%
3	Lack of sufficient electricity-other power sources	5%

Most commonly reported NFI unavailable in markets (by % of assessed communities) ▲

1	Bedding items	6%
2	Solar panels	6%
3	Mattresses, sleeping mats	6%

Access to Healthcare

% of assessed communities where **no health services were provided**

Hasakeh	89%
Deir-ez-Zor	54%
Raqqa	76%
Aleppo	91%

97% Assessed communities where KIs reported that **households accessed health services in other/nearby** communities.

Most commonly reported challenges to access healthcare (by % of assessed communities) ▲

1	High costs of health services	96%
2	High cost of transportation to health facilities	82%
3	Lack of transportation to health facilities	68%

Access to Electricity

% of assessed communities where households had **access to less than 6 hours of electricity per day** in average

Hasakeh	49%
Deir-ez-Zor	61%
Raqqa	34%
Aleppo	37%

% of assessed communities connected to the main electricity network (either functioning or not)

Connected **99%**
Not connected **1%**

In **32%** of assessed communities connected to the main electricity network, KIs reported that **the electricity network was partially or completely not functioning**

Access to Water

% of assessed communities where **not all households had access to sufficient water**

Hasakeh	69%
Deir-ez-Zor	100%
Raqqa	39%
Aleppo	59%

% of assessed communities connected to the main water network (either functioning or not)

Connected **65%**
Not connected **35%**

In **16%** of assessed communities connected to the main water network, KIs reported that **the water network was partially or completely not functioning**

Access to Education services

% of assessed communities where **no education services were provided** over the past 30 days

Hasakeh	13%
Deir-ez-Zor	1%
Raqqa	12%
Aleppo	5%

Frequency of education services (by % of assessed communities with operational education services [89%])

All days **99%**
Most days **1%**

Most commonly reported difficulties when accessing education (by % of assessed communities) ▲

1	Unsuitable environment	91%
2	Not enough teaching or learning supplies	77%
3	Overcrowding	57%

ECONOMIC CONDITIONS

Evolution of the average daily wage for casual or irregular labour reported over the past six HSOS rounds in NES ⁴

Governorate	Median estimated monthly rent price for a two-bedroom apartment ⁴
Aleppo	150,000 SYP
Al-Hasakeh	300,000 SYP
Ar-Raqqa	217,125 SYP
Deir-ez-Zor	200,000 SYP
Northeast Syria	200,000 SYP

Most commonly reported non-income generating sources of livelihoods (by % of assessed communities) ⁴

	Host community households	IDP households
Borrowing/loans	64%	64%
Remittances (from outside Syria)	34%	28%
Financial support from family or friends (inside Syria)	4%	8%
Cash or in-kind humanitarian assistance	1%	1%

In **92%** of assessed communities, KIs reported that **agriculture was a common source of livelihoods** for households.

Most common challenges to access livelihoods related to agriculture (by % of communities relying on agriculture) ⁴

1	High operational costs	90%
2	Lack of sufficient quantity and quality of resources for agriculture	77%
3	Seasonality or instability of income	60%

Intersectoral findings on **unaffordability** hindering access to goods and services

In **90%** of assessed communities with people renting, KIs indicated that **rent was unaffordable for the majority of people**

KIs in **78%** of assessed communities reported that the **high cost of solar panels or batteries to store solar power** was a common challenge to access power

KIs in **60%** of assessed communities reported that the **high cost of fuel for generators** was a common challenge to access power

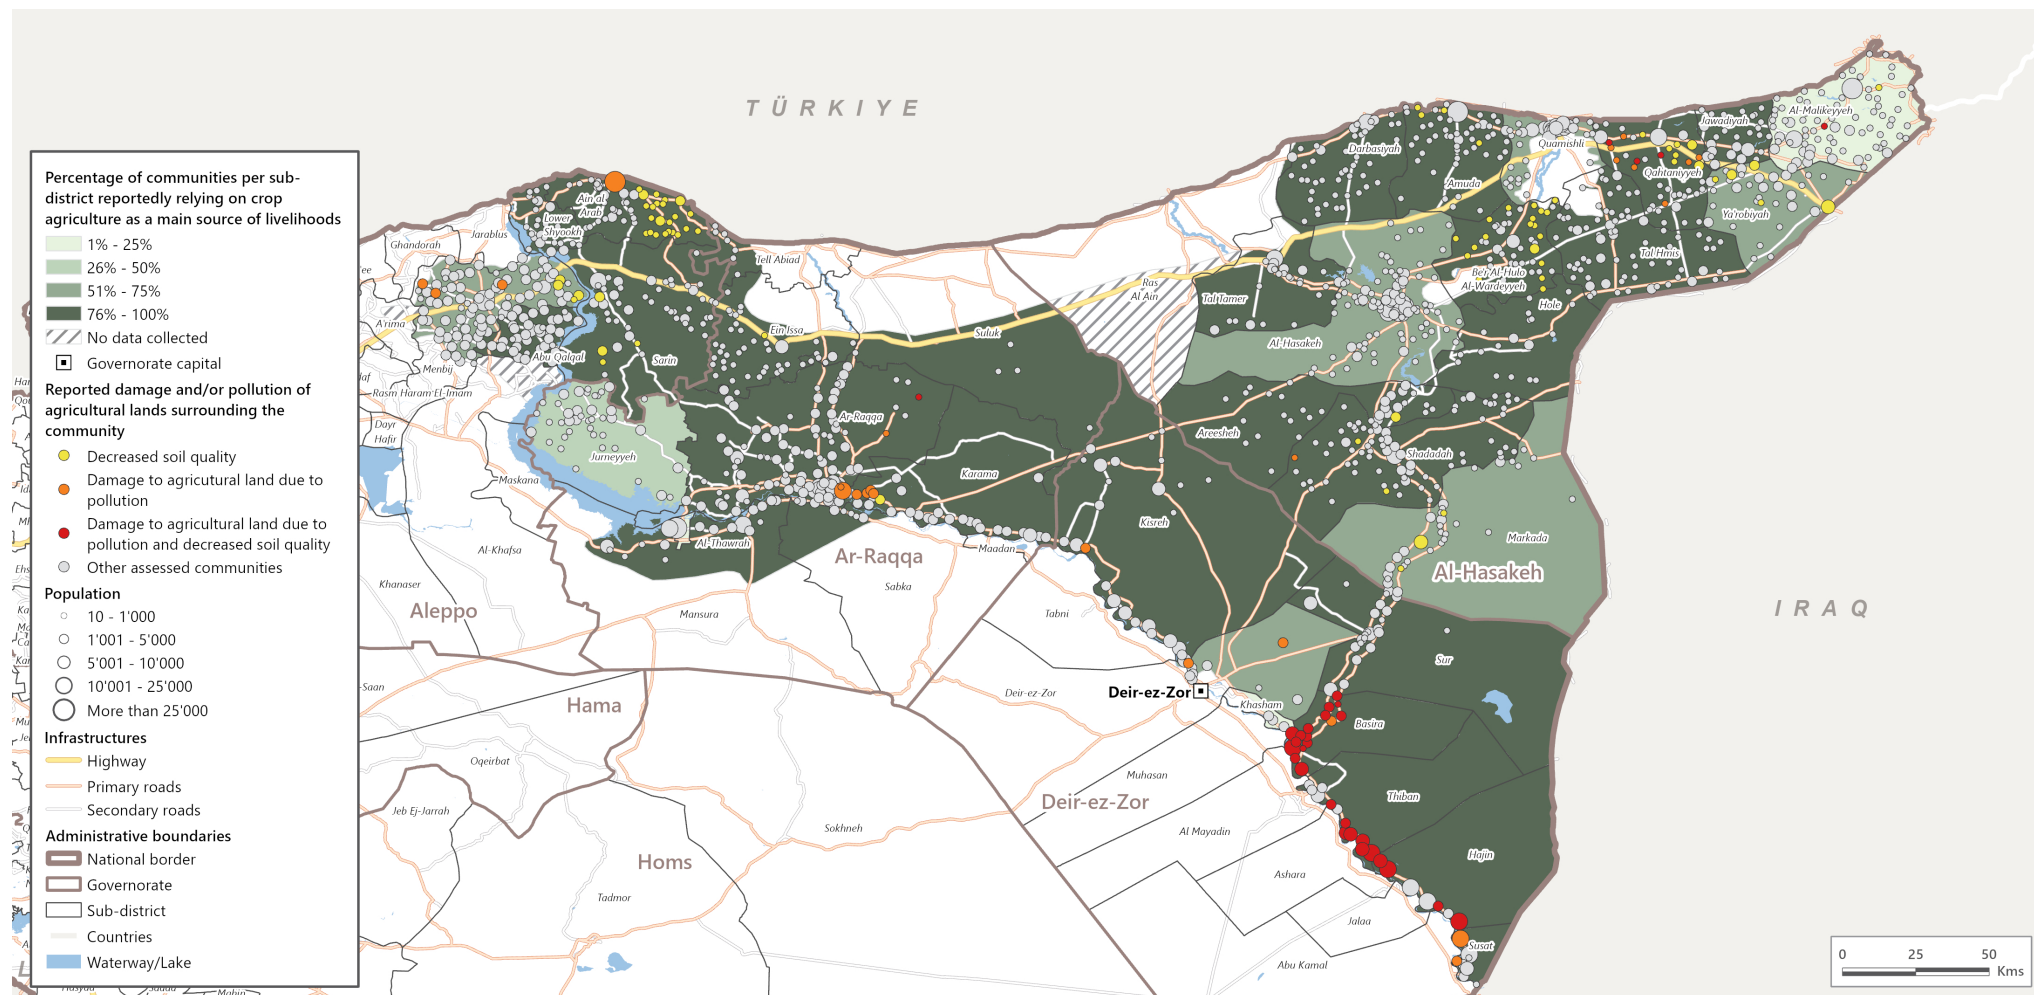

KIs in **34%** of assessed communities indicated that the **high cost of water** prevented households to access sufficient water

KIs in **92%** of assessed communities cited the unaffordability of **unaffordability of food** as a common challenge

KIs in **96%** of assessed communities cited the **high cost of health services** as a common challenge

KIs in **78%** of assessed communities reported that households **lacked money or resources** to cover the cost of attending **school**

⁴ KIs had the option to select the price in United States Dollars (USD) or Syrian Pounds (SYP). The values displayed here were all harmonised in SYP and USD, based on the exchange rate from the NES Joint Market Monitoring Initiative (JMMI). According to the REACH Market Monitoring February 2024, 1 USD = 15,150 SYP.

Damage and/or pollution of agricultural lands

Note on the map

This map shows the reported reliance of assessed communities on crop agriculture per sub-district with different shades of green. Darker sub-districts account with the highest percentages of communities where crop agriculture was a common source of livelihoods. Coloured dots correspond to communities where KIs reported decreased soil quality, damage to agricultural lands or both. Communities located along the Euphrates River in Deir-ez-Zor governorates are particularly affected by the presence of damaged and polluted lands.

PUBLIC HEALTH

Essential health services available in the assessed community
(by % of assessed communities where households could access health services [16%]) ⁵

■ Service available
■ Service not available

Source of drinking water used by most households (by % of assessed communities)

Piped water network	38%
Private water trucking conducted by citizens	31%
Private well	24%
Water trucking conducted by authorities or an NGO	3%
Other	4%

In **49%** of assessed communities, KIs reported that households **faced problems with drinking water**

Problems with drinking water
(by % of assessed communities) ⁶

1	Water tastes or smells bad	29%
2	Water has bad colour	13%
3	Water perceived to be making people sick	3%

In **31%** of assessed communities, KIs reported that households **did not treat their water despite needing to**.

Methods used by households to make water safer to drink (by % of assessed communities) [▲]

1	Sedimentation	22%
2	Household water filters	5%
3	Chlorine	4%

Most commonly reported sanitation issues (by % of assessed communities) [▲]

1	Garbage in the streets	35%
2	Stagnant water in the streets	31%
3	Sewage system pollutes public areas	26%
4	Could not afford desludging services	23%
5	Desludging services are not available	21%

In **34%** of assessed communities, **leaving garbage in public areas** was among the most commonly reported ways people disposed of solid waste.

In **18%** of assessed communities, **releasing wastewater and human feces over land surface** was among the most commonly reported ways people disposed of wastewater.

⁵ The displayed services were not selected based on how commonly they were reported.

⁶ These problems were not selected based on how commonly they were reported, but rather on their potential negative impact on health.

SECURITY AND PROTECTION

Most commonly reported protection risks (by % of assessed communities) ▲

Perception of the social cohesion (by % of assessed communities)

Intersectoral findings on security

-  **Security restrictions** reportedly prevented the access to livelihood activities in 137 assessed communities
-  **General safety and security concerns at markets or while travelling to markets** was a reported barrier to market access in 61 assessed communities
-  In 71 assessed communities, KIs reported that households could not access sufficient water due to **disruption caused by conflict activity**
-  **Lack of safety while travelling to or from school** was reported as a barrier preventing access to education in 222 assessed communities

METHODOLOGY

The assessment is conducted using a key informant (KI) methodology at the community level. In each community, REACH enumerators interview a minimum of three KIs selected based on their knowledge of the community and areas of expertise. Enumerators submit one single form per community and only one KI should answer each section of the survey. Interviews are usually done in person unless security and access restrictions prevent enumerators to reach the community.

More information about HSOS KI methodology can be found on [HSOS KI terms of reference \(ToR\)](#).

This Situation Overview only presents a selection of collected indicators. The complete HSOS dataset and analysis can be downloaded as an [excel file](#).

Number of communities per subset:	Subset
Host community households	1,342
IDP households	629
Communities where assistance was reported (host community)	260
Communities where assistance was reported (IDP)	135
Communities connected to a main electricity network	1,342
Communities connected to a main water network	874
Communities with operational education services	1,206
Communities with agriculture as a common source of livelihoods	1,242
Communities with access to health services	215

ABOUT REACH

REACH Initiative facilitates the development of information tools and products that enhance the capacity of aid actors to make evidence-based decisions in emergency, recovery and development contexts. The methodologies used by REACH include primary data collection and in-depth analysis, and all activities are conducted through inter-agency aid coordination mechanisms. REACH is a joint initiative of IMPACT Initiatives, ACTED and the United Nations Institute for Training and Research - Operational Satellite Applications Programme (UNITAR-UNOSAT).
