Bulo Bartire IDP Settlement Profile

Kismayo, Lower Juba, Somalia

Summary

Situated on the outskirts of Kismayo town, Bulo Bartire was a space of open land owned by the government. The site has formed into an informal settlement by IDPs, returnees and landless households. A majority of all returnees have arrived from Dadaab in the past 11 months.

This factsheet presents an overview of Bulo Bartire IDP settlement located in Kismavo district. The objective of the assessment is to support multi-sectoral and areabased approaches to intervention in IDP settlements, through needs assessments and facility mapping, development of community information and coordination structures, and qualitative information on community needs, communication and demographics.

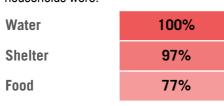

Findings are based on primary data collection through household surveys conducted on 31st October 2016. Data is stastically representative of the site population with a confidence of 90% and a margin of error of +/- 5%. Additional data from a facility mapping in Kismayo conducted by REACH has been used to complement data from the household survey.

Assessment Overview

Estimated Population:	344
Settlements Households:	54
Average Household size:	6

Priority Concerns Top 3 priority needs reported by

households were:*

* Households could choose multiple answers

Settlement perimeter

Note Maps: Shelters were mapped across settlements in Kismayo town by UNOSAT satellite image analysis. The shelter count used a satellite image acquired on 08/09/2016. The shelter density presented in this map was then calculated from the shelter count and population density has been calculated with an average of 6.3

200

100

persons per shelter. Latrines were mapped during a REACH assessment in September 2016. The number of shelters within and outside a 50 m buffer of the latrines was calculated using spatial analysis. The shelters were mapped by UNOSAT using satellite image analysis. The analysis represents the shelter locations as of 08/09/2016.

Water & Sanitation

58% 26% 11% 5% No water points were captured in Bulo Bartire. The 3 most commonly accessed water sources as reported by households are:

- Trucking Distribution (35%) Kiosk (26%) 1
- 2
- 3 Piped System (19%)

% of reported latrine types by households:

Communal **Private No Latrines** 90% 6%

4% Average number of people per latrine: 12
