

## Background and methodology

The aim of the Emergency Needs Tracking (ENT) System is to track the key priority needs of internally displaced persons (IDPs) in northwest Syria, as well as identifying communities with households in direct need of humanitarian assistance. The ENT assesses communities that have experienced any of the following in the three days prior to data collection: more than 40 IDP arrivals, natural hazards (including storms, fires, and flooding), conflict escalation, or any other event which impacts humanitarian needs. This information should serve to better inform immediate humanitarian operations, as well as provide a wider contextual understanding of the ongoing situation. As the humanitarian situation remains complex, it is critical to fill information gaps across sectors to ensure a well-coordinated humanitarian response.

Data was collected between 5 October and 11 October (excluding Friday and Saturday). Information was collected via a Key Informant (KI) methodology with one KI interview conducted per community. Findings should be considered indicative only. 140 communities including 9 camps were assessed overall across northern Aleppo and Idlib governorates. **The full dashboard can be accessed [here](#) and the full catalogue of datasets can be accessed [here](#).**

## Protection

Percentage of assessed communities in which KIs reported the presence of newly-arrived IDPs with the following vulnerability types:<sup>1</sup>

	%
Women headed households	42%
Elderly headed households	30%
Orphans	13%
Women travelling alone	5%
Child headed households/children travelling alone	5%
Individuals with disabilities travelling alone	3%

## Food security

Most commonly reported food sources for newly-arrived IDPs in assessed communities:<sup>1</sup>

- 1 Stores/markets in this community 89%
- 2 Stores/markets in other communities 66%
- 3 Assistance from local councils/NGOs 17%

**98%**

of newly-arrived IDP households were reportedly eating one meal or more per day.

## Shelter

Number and percentage of newly-arrived IDP households by shelter type:<sup>2</sup>

	#	%
Solid/finished buildings	814	47%
Functioning tents	569	33%
Unfinished/ damaged buildings	299	17%

## NFI Non-Food Items (NFIs)

Number and percentage of newly-arrived IDP households without the following NFIs:<sup>2</sup>

	#	%
Households without heating fuel	1495	87%
Households without cooking utensils	292	17%
Households without bedding	247	14%
Households without mattresses	235	14%

## Health

**6%**

of newly-arrived IDP households reportedly could not access healthcare facilities.

## Water, Sanitation and Hygiene (WASH)

Most commonly reported drinking water sources for newly-arrived IDPs in assessed communities:<sup>2</sup>

- 1 Combination of water network and private water trucking 42%
- 2 Informal water trucking conducted by private citizens 23%
- 3 Formal water trucking conducted by authorities or an NGO 17%

**4%**

of newly-arrived IDP households (64) reportedly did not have access to a sufficient quantity of drinking water

**56%**

In 84 communities, KIs reported that soap and other hygiene items are too expensive for some newly-arrived IDPs.
