

South Sudan - Jonglei State

Assessment of Hard to Reach Areas in South Sudan

South Sudan Displacement Crisis

May 2016

Overview

Conflict in Jonglei State first broke out in late December 2013, only days after fighting began in Juba. Since then, the state has been one of the worst affected by the conflict, and currently hosts the second highest reported numbers of internally displaced persons in the country after Unity State. Many areas in Jonglei are largely inaccessible to humanitarian actors due to insecurity and logistical constraints. As a result only limited information is available on the humanitarian situation outside major displacement sites.

In order to fill such information gaps and facilitate humanitarian planning, in late 2015 REACH piloted its Area of Origin (AoO) approach to collect data in hard-to-reach areas of Unity State. The pilot was expanded to Jonglei State in March 2016. Through AoO, REACH collects data from a network of Key Informants (KIs) who have sector specific knowledge of an area, from regularly travelling to and from the area, direct or indirect contact with

people in the area, or recent displacement from the area. Although current AoO coverage is still limited and its findings not statistically significant, they provide a good indication of the needs and current humanitarian situation in assessed areas of Jonglei State.

Findings presented in this document are drawn from primary data collected from KIs in May 2016 covering 41 communities across 6 of Jonglei's 11 counties. Data was collected from 527 KIs about 41 locations that they have received up-to-date information about in the month prior to data collection. The study focuses on the situation in villages or local communities from which many individuals have already fled, but where some families still remain. Information has not been collected about conditions in Bor Protection of Civilian site (PoC). Note that when reporting on a change in access to services this refers to the proportion of KIs responding 'yes' with regards to a decrease in access since December 2013. Health, shelter, food security, wash, education and protection sectors are covered.

Demographics

Primary demographic composition of remaining local community (LC) population

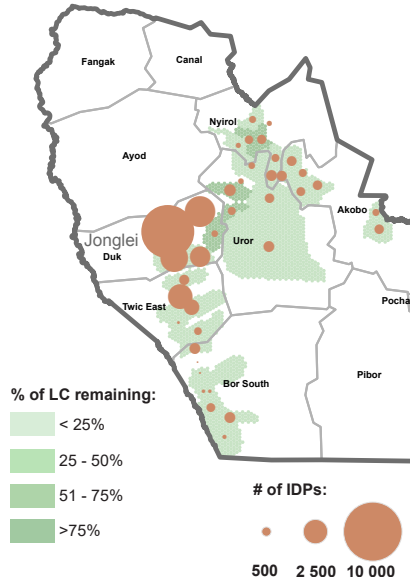

Primary demographic composition of internally displaced persons (IDPs) population

Demographic composition
 mostly men
 mostly women
 equal

Population

Estimated population of IDPs and proportion of local community remaining

% of LC remaining:
 < 25%
 25 - 50%
 51 - 75%
 >75%

of IDPs:
 500
 2 500
 10 000

Top three reported reasons for leaving their last location, by IDPs

- 1 Insecurity 89%
- 2 Lack of food 78%
- 3 Lack of health services 57%

Top three reported reasons for coming to their current location, by IDPs

- 1 Security 82%
- 2 Food distribution 80%
- 3 Access to health services 62%

Top three reported reasons for not leaving location, by local community

- 1 It is their home 73%
- 2 The area is secure 12%
- 3 Access to food 5%

South Sudan - Jonglei State

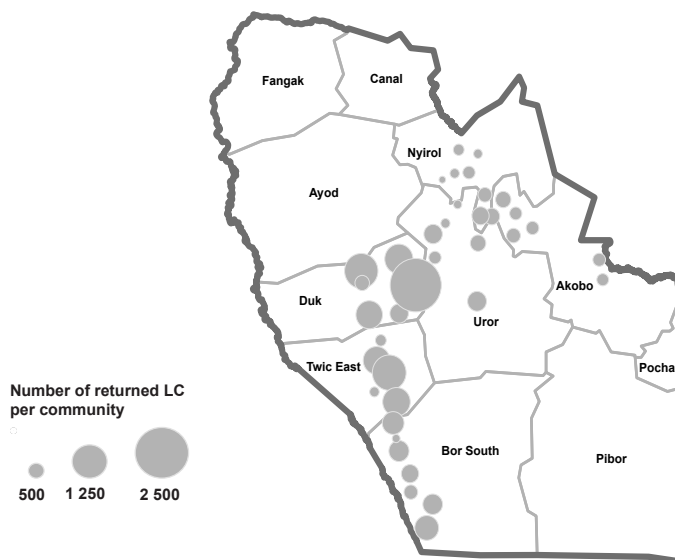

Assessment of Hard to Reach Areas in South Sudan

South Sudan Displacement Crisis

May 2016

Population

Communities reporting returned local community

Living situation and short-term displacement

Reported living locations of IDPs

Relatives	83%
With the local community	13%
Don't know	4%

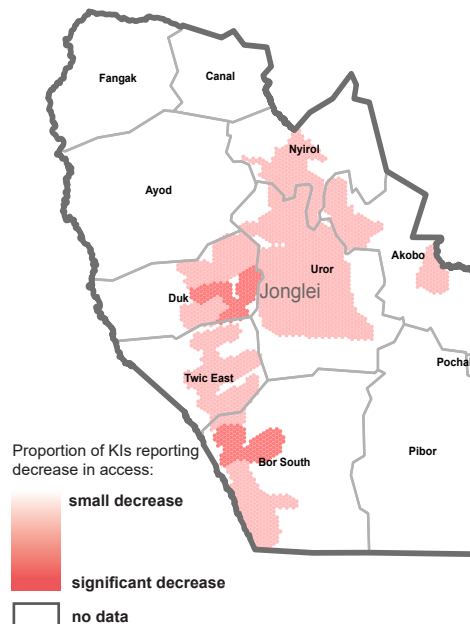

Reported living locations for local community¹

Own home	83%
Another home, in the village	10%
In another settlement	7%

Health

Reported decrease in access to healthcare²

Reported reasons why health services are not available

Health concerns

Top three reported health concerns³

Top three reported most needed items in health care centers

¹ The current location of LCs was asked in order to assess persons who were displaced within their local community

² Decrease in access from pre-crisis to May 2016, for each sectoral map

³ Key informants could choose more than one answer

South Sudan - Jonglei State

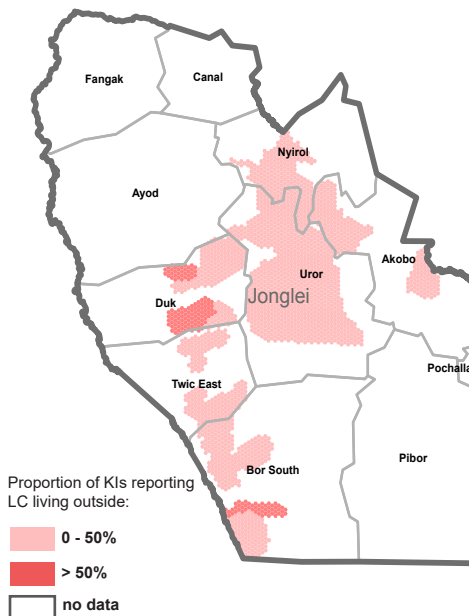

Assessment of Hard to Reach Areas in South Sudan

South Sudan Displacement Crisis

May 2016

Shelter/NFI

Reported proportion of local community sleeping outside

Reported shelter types¹

	LC	IDP	Returned LC ²
Rakooba/Tukul	100%	88%	89%
Tent	37%	30%	36%
Improvised	34%	77%	57%
Abandoned	5%	0%	3%
Community	10%	4%	12%

NFIs

Reported proportion of people with mosquito nets

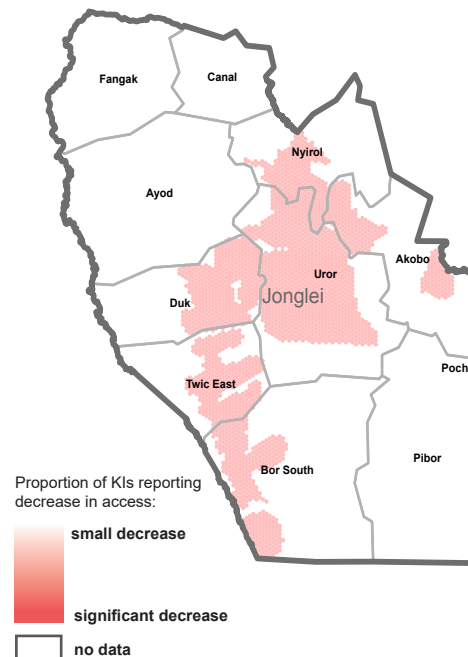

Of those with mosquito nets the average number of people sharing one mosquito net

WASH

Reported decrease in access to safe drinking water

Reported primary sources of those with access to safe drinking water

Borehole 100%

For those with access to safe drinking water, reported distance to water point

For those with access to safe drinking water, reported waiting time at the water point

Water availability and sanitation

Reported proportion of partially damaged boreholes

Reported primary sanitation facilities

¹ Key informants could choose more than one answer; responses refer to percentage of communities having a reported shelter type, not the percentage of the population living in them

² Local community displaced and returned home

Food Security

Reported decrease in access to food

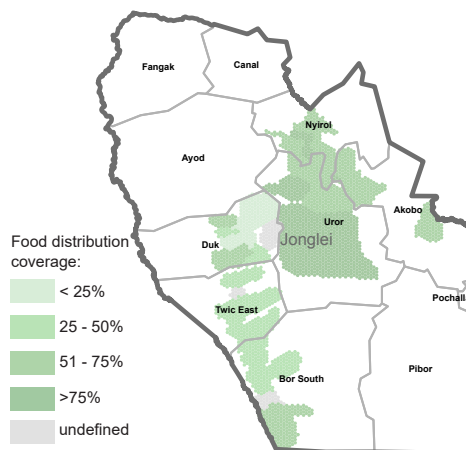

Top three reported primary sources of food

Average number of days that selected coping strategies are used per week¹

Food distribution coverage

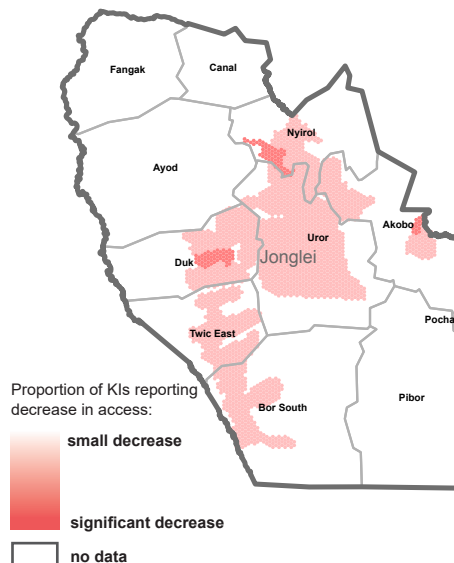

Current access to market

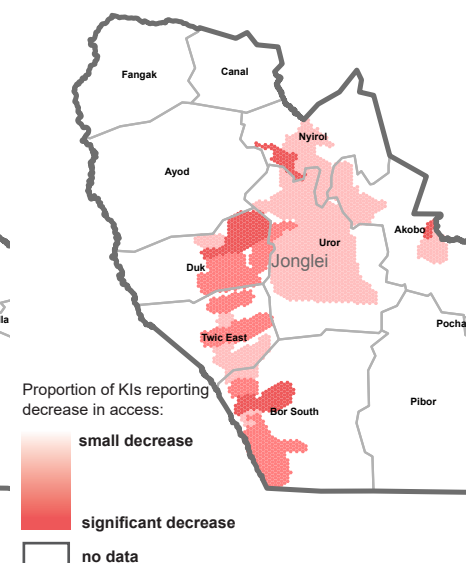

Livelihoods

Reported decrease in access to land for cultivation

Reported decrease in access to agricultural inputs

Reported current location of the assets of fishermen, drivers, and labourers²

Looked after by immediate family	48%
Looked after by community	18%
Hidden	20%
Stolen/looted	12%
Don't know	2%

Reported current location of the communities' cattle¹

Looked after by immediate family	43%
Moved to a safe location	40%
Looked after by community	15%
Stolen/looted	2%

¹ Key informants could choose more than one answer

² Assets included things such as cars, cooking tools, boats, building tools etc. 426 KIs reported on this indicator for May 2016

May 2016

Education

Reported decrease in access to education services

Overall reported level of available education in assessed communities¹

In 40 communities where education is reportedly available, it is provided by the following¹

Reported proportion of men and women aged 6-11 attending school

Protection

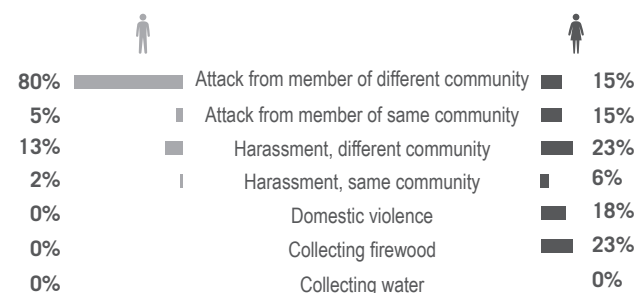

Community

Reported relationship between local communities and IDPs

Protection concerns

Primary reported protection concerns for men and women

About REACH

REACH facilitates the development of information tools and products that enhance the capacity of aid actors to make evidence-based decisions in emergency, recovery and development contexts. All REACH activities are conducted through inter-agency aid coordination mechanisms. For more information, you can write to our in-country office: south.sudan@reach-initiative.org or to our global office: geneva@reach-initiative.org.

Visit www.reach-initiative.org and follow us @REACH_info.
