# Joint Multi-Cluster Needs Assessment: Kismayo District Profile

Lower Juba Region, Somalia

August 2017

#### **Background**

The ongoing drought has contributed to a rapid deterioration of the humanitarian context in Somalia, with a predicted high risk of famine in 2017. In support of the humanitarian planning response, the Clusters and the Assessment Working Group developed the Joint Multi-Cluster Needs Assessment (JMCNA) with the support of REACH in order to assess needs and access to basic services in Somalia.

The Somalia population was sampled for statistical representativeness at the district level with a confidence level of 90% and a margin of error of +/- 10%, employing a cluster sampling approach using the Population Proportional to Size method with replacement. Data collection was conducted by AAHI, ACF, ACTED, ADESO, Aid Vision, CARE, DBG, DRC, Galmudug MoH, HINNA, INTERSOS, IOM, NRC, PAH, REACH, SADO, SCI, SHARDO and SI.

This factsheet presents an analysis of data collected in Kismayo District between 6 and 12 August 2017 as part of the JMCNA. In total, 130 households were surveyed across Kismayo District.

# **Demographics**

Household composition, by gender and age:

33% of households reported that they are not from the community they currently reside in.

# Food Security

Food Consumption Scores (FCS) of households:

Coping Strategies Index (CSI) scores of households<sup>3</sup>:

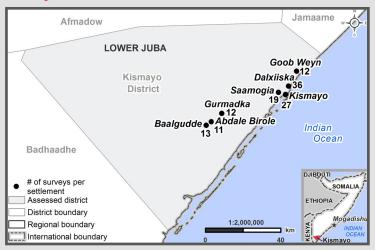

1	Minimum score
10	Average score
43	Maximum score

Reported challenges experienced by households when attempting to access food over the past three months<sup>2</sup>:

o accessor recar ever the past three months.		
Lack of resources to buy food	56%	
Lack of food items available to purchase	8%	
Lack of cooking utensils	62%	
Lack of cooking fuel	41%	
None of the above	12%	

2.4 days on average that households' food stocks will reportedly last

### **Survey Locations:**

# **Vulnerabilities**

% of households reporting the following members:

<b>55%</b>	Pregnant or lactating woman
<b>15%</b>	Sick child
20%	Disabled or chronically ill person
