

# REFUGEE ACCOMMODATION SITES

## Mapping & Monitoring | Update #2

December 2022  
SLOVAKIA

### Background & Methodology

- Site Mapping and Monitoring is an assessment exercise which aims to provide humanitarian actors with data concerning refugee accommodation sites<sup>1</sup> status and needs.

- The Site Monitoring assessment reviewed the **49** accommodation sites mapped in the regions of Trnava, Prešov, Košice, Bratislava, Žilina and Banská Bystrica, and provided updated information on the type, capacity and services used at these sites.

- The methodology was based on key informant interviews (KIIs) with Sites Managers. The first in-person round of interviews was conducted in August 2022, and the findings have been published in a [separate report](#).

- Subsequently additional follow-up interviews were conducted to update the data. This factsheet presents a new round of follow-up calls.

- In total, **49** follow-up calls have been conducted. Out of these 49 calls, **27** sites were open, **13** were closed, and **9** were non-responsive. Finally, out of the **27** sites open, **23** gave their consent to participate in this round of follow-up calls.

- The situation in the refugee accommodation sites may have changed since the data collection. For certain indicators, such as needed items and services, limited amount of information was available.

### Key information

- Approximately half (**48%**) of the assessed refugees accommodation sites have vacant places (**1,492**).

- 18 out of the 23** assessed sites were not accessible for persons with disabilities.

- Sleeping items were distributed to **18 out of the 23** assessed refugee accommodation sites, while kitchen items and cleaning items were provided to **15 of the 23** assessed sites.

- Volunteers were the largest providers of clothes for adults (**9 out of 11** sites which obtained the items), clothes for children (**9 out of 11**), supplies for seniors (**8 out of 10**), first aid kits (**7 out of 14**), supplies for children (**6 out of 12**), personal hygiene items (**5 out of 14**), supplies for infants (**4 out of 8**), and baby cots (**4 out of 8**).

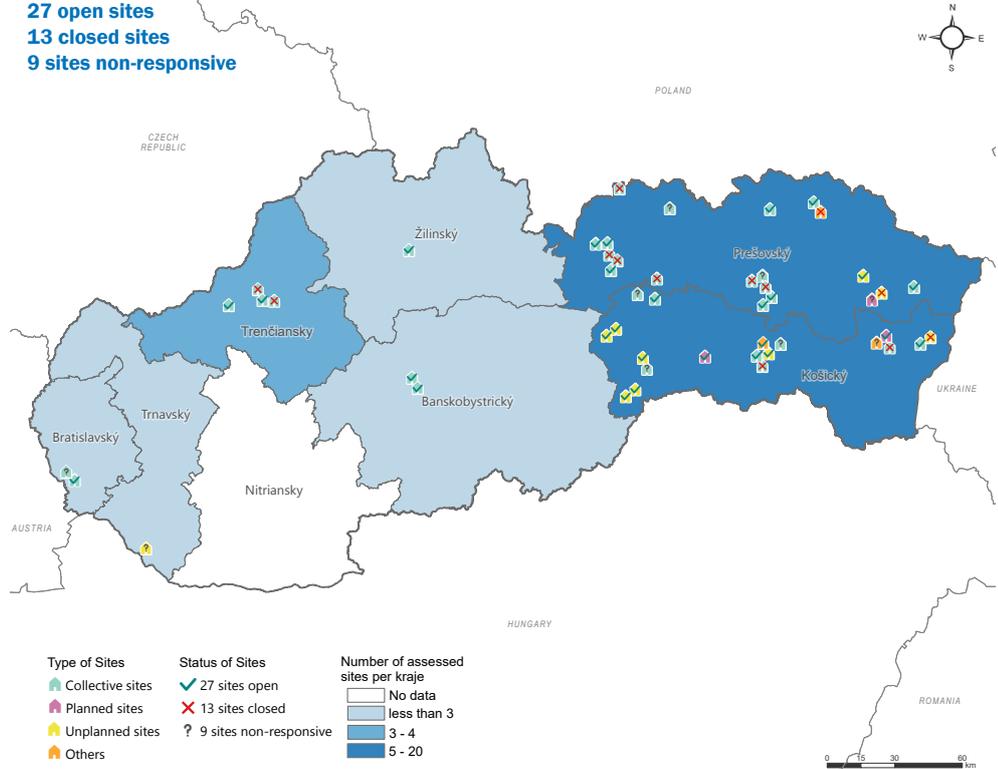

- Government programmes were the largest providers of sleeping items (**10 out of 18** sites which obtained the items), hot meals (**8 out of 13**), food for adults (**6 out of 11**), kitchen items (**5 out of 15**), and food for babies (**3 out of 7**).

- 19 out of the 23** assessed refugee accommodation sites had no basic medical services available at the site.

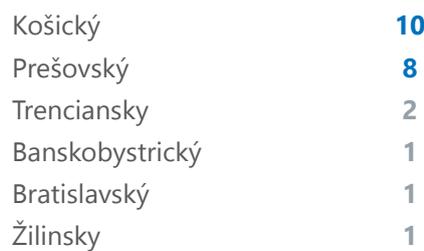

<sup>1</sup> These are existing building used as temporary accommodation for Ukrainian refugees. The type of buildings vary widely, including hostels, hotels, community centres, dormitories, privately owned buildings.

### Accommodation Sites Locations

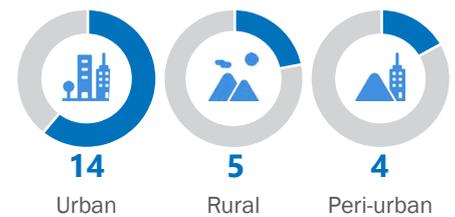

**49 total sites mapped**  
**27 open sites**  
**13 closed sites**  
**9 sites non-responsive**

### Distribution of sites by region

### Type of location

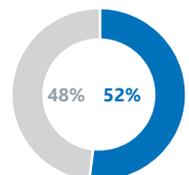

### Reported capacity of sites

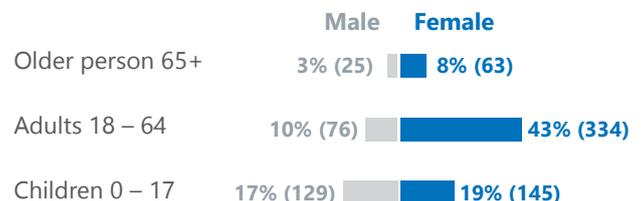

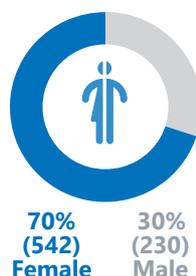

Total hosting capacity was **1,492** based on the assessment of the individual site capacity

**772 Occupied spaces**

**720 Unoccupied spaces**

### Profile of refugees hosted at these sites

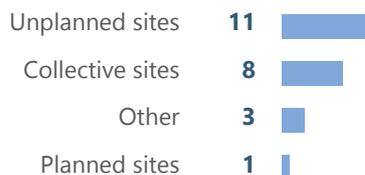

## Most pressing needs of refugees living at the accommodation sites

In total, 23 interviews were conducted on-site with key informants between 28 of November and 19 of December 2022. They enabled the assessment of the accommodation sites' needs and availability of resources and services. Below is an overview of types of supplies available at the assessed accommodation sites, and the providers of these items. For each item type, the table presents a specific number of sites (out of 23) which has obtained each of these items from a specific provider.

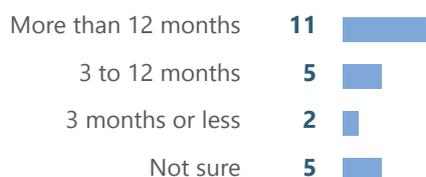

Type of item	Overall number of sites which has obtained the items	Type of provider							Overall number of sites which has not obtained the items
		Government programme	Private companies	Local authorities	Private individuals	NGO, UN Agency or Volunteer organization	Host community	Others	
 Food for adults	11	6	2	2	0	1	0	0	12
 Food for babies	7	3	2	1	0	1	0	0	16
 Hot meals	13	8	2	2	0	1	0	0	10
 Kitchen items	15	5	3	4	1	2	0	0	8
 Sleeping items	18	10	3	3	1	1	0	0	5
 Personal hygiene items	14	4	1	2	1	5	1	0	9
 Cleaning items	15	4	1	3	1	4	2	0	8
 Baby cots	8	0	1	1	0	6	0	0	15
 Supplies for infants	8	1	1	2	0	4	0	0	15
 Supplies for children	12	3	2	1	0	6	0	1	10
 Clothes for children	11	1	1	0	0	9	0	1	11
 Clothes for adults	11	0	1	1	0	9	0	1	11
 First aid kits	14	3	1	2	0	7	1	0	9
 Supplies for seniors	10	1	1	0	0	8	0	0	13

## Site management and facilities

### Types of sites

### Predicted duration of the use of the buildings as refugee accommodation sites

### Types of building

### Sites accessibility

### Staff profile at the sites (total of 38)

### Sites management

9  
Private

14  
Public government

### Services provided

10  
Access to legal aid and counseling

1  
Gender-based violence protection

1  
Access to child protection services

15  
Child-friendly spaces

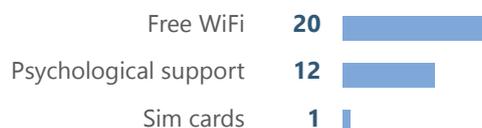

4  
Primary medical care service

6  
Access to translation

### Other types of services provided

### Average duration of stay
