

Background and methodology

The aim of the Emergency Needs Tracking (ENT) System is to track the key priority needs of internally displaced persons (IDPs) in northwest Syria, as well as identifying communities with households in direct need of humanitarian assistance. The ENT assesses communities that have experienced any of the following in the three days prior to data collection: more than 40 IDP arrivals, natural hazards (including storms, fires, and flooding), conflict escalation, or any other event which impacts humanitarian needs. This information should serve to better inform immediate humanitarian operations, as well as provide a wider contextual understanding of the ongoing situation. As the humanitarian situation remains complex, it is critical to fill information gaps across sectors to ensure a well-coordinated humanitarian response.

Data was collected on a daily basis between 14 June and 20 July (excluding Saturday and Sunday). Information was collected via a Key Informant (KI) methodology with one KI interview conducted per community. Findings should be considered indicative only. 91 communities including 5 camps were assessed overall across northern Aleppo and Idlib governorates. **The full dashboard can be accessed [here](#) and the full catalogue of datasets can be accessed [here](#).**

Protection

Percentage of assessed communities in which KIs reported the presence of newly-arrived IDPs with the following vulnerability types:¹

	%
Elderly headed households	70%
Women headed households	50%
Elderly travelling alone	13%
Women travelling alone	10%
Orphans	9%
Disabled headed households	6%

Food security

Most commonly reported food sources for newly-arrived IDPs in assessed communities:¹

- 1 Stores/markets in this community 98%
- 2 Stores/markets in other communities 48%
- 3 Assistance from local councils/NGOs 46%

100%

of newly-arrived IDP households were reportedly eating one meal or more per day.

Shelter

Number and percentage of newly-arrived IDP households by shelter type:²

	#	%
Solid/finished buildings	1233	50%
Functioning tents	757	31%
Unfinished/ damaged buildings	362	15%
Designated collective centres	106	4%

NFI Non-Food Items (NFIs)

Number and percentage of newly-arrived IDP households without the following NFIs:²

	#	%
Households without heating fuel	1637	66%
Households without cooking utensils	619	25%
Households without bedding	490	20%
Households without mattresses	463	19%

Health

100%

of newly-arrived IDP households reportedly could access healthcare facilities.

Water, Sanitation and Hygiene (WASH)

Most commonly reported drinking water sources for newly-arrived IDPs in assessed communities:²

- 1 Informal water trucking conducted by private citizens 46%
- 2 Combination of water network and private water trucking 25%
- 3 Formal water trucking conducted by authorities or an NGO 19%

9%

of newly-arrived IDP households (228) reportedly did not have access to a sufficient quantity of drinking water

66%

In 63 communities, KIs reported that soap and other hygiene items are too expensive for some newly-arrived IDPs.
