

South Sudan - Shelter and Non-Food Items (NFIs)

Assessment of Hard-to-Reach Areas in South Sudan

Overview

The continuation of conflict since December 2013 has created a complex humanitarian crisis in the country, restricting humanitarian access and hindering the flow of information required by aid partners to deliver humanitarian assistance to populations in need. To address information gaps facing the humanitarian response in South Sudan, REACH employs its Area of Knowledge (AoK) methodology to collect relevant information in hard-to-reach areas to inform humanitarian planning and interventions outside formal settlement sites.

Using the AoK methodology, REACH remotely monitors needs and access to services in the Greater

Upper Nile, Greater Equatoria and Greater Bahr el Ghazal regions. AoK data is collected monthly and through multi-sector interviews with the following typology of Key Informants (KIs):

- KIs who are newly arrived internally displaced persons (IDPs) who have left a hard-to-reach settlement in the last month
- KIs who have had contact with someone living or have been in a hard-to-reach settlement in the last month (traders, migrants, family members, etc.)
- KIs who are remaining in hard-to-reach settlements, contacted through phone

Selected KIs are purposively sampled and have knowledge from within the last month about a specific settlement in South Sudan, with data collected at the settlement level. About half of settlements assessed have more than one KI reporting on the settlement. In these cases, data presented at the settlement level is the modal (most frequent) response for KIs reporting on that settlement. If there is an even number of 'yes/no' responses, data is aggregated as 'no consensus'.

All percentages presented in this factsheet, unless otherwise specified, represent the proportion of settlements assessed with that specific response.

The findings presented in this factsheet are indicative of the broad shelter and non-food item trends in assessed settlements in May 2018, and are not statistically generalisable.

Assessment Coverage

1,488 Key Informants interviewed

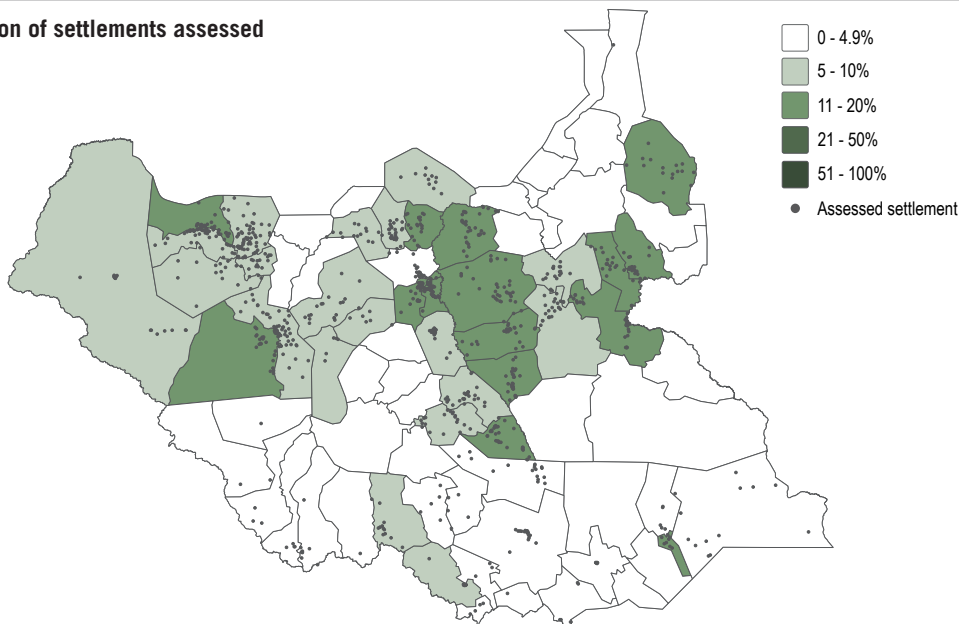

993 Settlements assessed

54 Counties assessed

34 Counties with 5% or more coverage¹

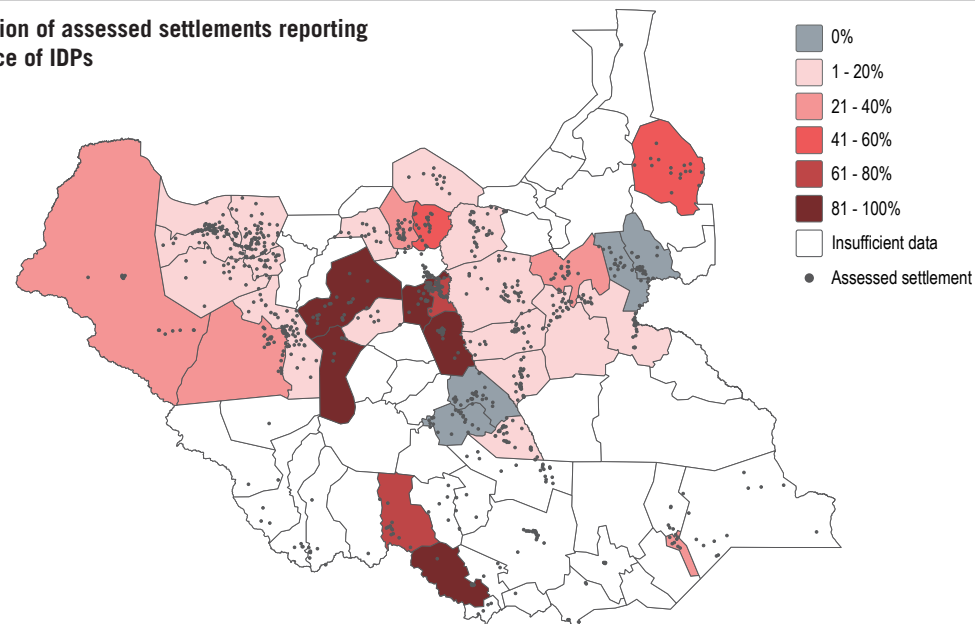

Assessment coverage

Proportion of settlements assessed

IDP Presence

Proportion of assessed settlements reporting presence of IDPs

¹ Data is only represented for counties in which at least 5% of settlements have been assessed. The most recent OCHA Common Operational Dataset (COD) released in February 2016 has been used as the reference for settlement names and locations.
