

# South Sudan | Joint Market Monitoring Initiative (JMMI)

1 - 7 November 2025

## INTRODUCTION

With the aim of informing cash-based interventions and to better understand market dynamics in South Sudan, the **Joint Market Monitoring Initiative (JMMI)** was initiated by the South Sudan Cash Working Group (CWG) in August 2019. The initiative is guided by the JMMI Technical Working Group, led by REACH, and supported by the CWG members. The initiative is funded by the Foreign, Commonwealth & Development Office (FCDO). Marketplaces across South Sudan are assessed on a monthly basis. In each location, field teams record prices and other market indicators through trader interviews. This factsheet presents an overview of prices for key foods and non-food items (NFIs) in the assessed areas, as well as the costs associated with key elements of the **Multi-Sector Survival Minimum Expenditure Basket (MSSMEB)**.

### Market Functionality Score (MFS)

The Market Functionality Score (MFS) is a method of classifying markets based on their level of functionality. The MFS is divided into five dimensions:

- **Accessibility (25%):** physical and social access to markets
- **Availability (30%):** ability of markets to consistently supply core commodities
- **Affordability (15%):** financial access to markets and price volatility
- **Resilience (20%):** vulnerability of supply chains and ease of restocking
- **Infrastructure (10%):** state of markets' physical and financial infrastructure

- 57 Assessed locations
- 1194 Trader key informants surveyed
- 52 Partner key informants surveyed
- 1246 Total key informant interviews (KIs)
- 67 Assessed marketplaces
- 34 Assessed commodities
- 19 Participating agencies<sup>5</sup>

## KEY INDICATORS

## MARKET FUNCTIONALITY SCORE (MFS), BY LOCATION

\* The Abyei Region and Ilemi are shaded to acknowledge their status as disputed territories.

\*\* The data in Kapoeta South was collected remotely; therefore, comparisons with other locations should be made with caution

## Market Overview

## KEY FINDINGS

- Between October and November 2025, the median cost of the Multi-Sector Survival Minimum Expenditure Basket (MSSMEB) decreased by 2%, while the food basket cost decreased by 3%. These reductions in both food basket and MSSMEB costs were primarily driven by price drops in sorghum grain (5%), cooking oil (14%), and salt (3%). However, some items recorded price increases—such as maize grain (12%), charcoal (21%), and milling costs (13%)—which placed upward pressure on both baskets, though not enough to offset the overall decline
- The highest MSSMEB prices were recorded in **Baliet** (Baliet County), **Ayod town** (Ayod County), **Ganyiel** (Panyijiar County), **Pibor Town** (Pibor County), **Bunj** (Maban County), **Melut town** (Melut County), **Wau town** (Wau County), and **Renk town** (Renk County).
- Between October and November 2025, Luonyaker recorded the highest monthly change, with the MSSMEB increasing by 36%, while the food basket decreased by 6%. In Nimule (Magwi County), the MSSMEB rose by 22% and the food basket by 24%. Torit (Torit County) experienced a 15% increase in the MSSMEB and an 18% rise in the food basket. Tonj Town (Tonj South County) recorded a 13% increase in the MSSMEB and an 18% increase in the food basket.
- Traders in the assessed locations reported that the roads from Tishwin to Rubkona (Rubkona County) and from Gumuruk to Mangalla were closed due to poor road conditions.
- Traders in South Sudan continue to face persistent challenges that may prevent further price reductions. According to the November JMMI data, 31% of traders reported depreciation of the South Sudanese Pound (SSP), 29% cited poor road conditions, 17% mentioned high taxation, and 16% reported insecurity as key constraints to price reductions. These challenges continue to undermine market stability.

## MULTI-SECTOR SURVIVAL MINIMUM EXPENDITURE BASKET (MSSMEB)

The Multi-Sector Survival Minimum Expenditure Basket (MSSMEB) represents the minimum culturally adjusted group of items required to support a six-person South Sudanese household for one month. The cost of the MSSMEB can be used as a proxy for the financial burdens faced by households in different locations. The MSSMEB's contents were defined by the CWG in consultation with relevant sector leads.

### MSSMEB Items

#### Food basket component of the MSSMEB

Cereals	90 kg	Pulses	9 kg
Vegetable Oil	6 Liters	Salt	1 kg

#### Other components of the MSSMEB

Soap bar (1800g)	3 pcs	Charcoal	50 kg
Education	5%	Milling cost	30 kg

### Median Cost of MSSMEB<sup>1</sup>

The Minimum Expenditure Basket (MEB) is defined as an average cost of what a typical household requires to meet basic needs that could be covered entirely or partly through the market. The needs are defined as the critical goods and commodities, utilities and services required by households and recommended by the clusters to ensure survival and minimum living standard.

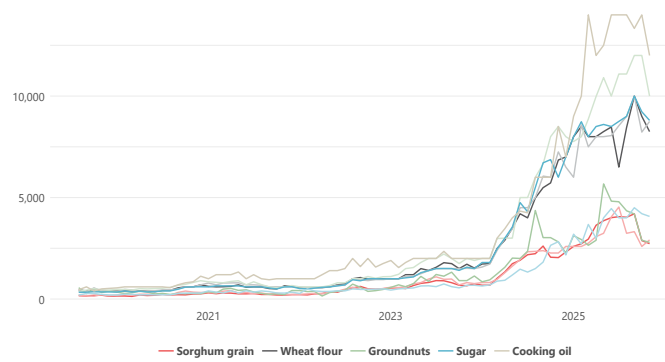

Each sectoral MEB is covered up to a certain percentage: **Food (50%)** except priority<sup>8</sup> counties of Aweil East, Duk, Nyirrol, Pibor and Rubkona where it is 70%), **WASH (20%), Shelter (20%), NFI (20%), Protection/GBV (50%), Health (50%), Energy (30%), Education (30%), Communication (100%), Milling Cost (50%) and Transport allowance (20%)**. These are all calculated using the official USD-SSP rate. All calculated Sectoral MEBs are combined to create the full Survival Minimum Expenditure Basket (**SMEB**). The value for the Multipurpose Cash (**MPC**) is the calculated **SMEB** with an additional **30%** buffer for inflation.

## PRICES OF MONITORED ITEMS

Item	Unit	Median price in SSP	Change since Oct 2025	Change since Nov 2024	Median price in USD
<b>Food Items</b>

## MEDIAN FOOD PRICES OVER TIME

August 2019 - November 2025 in SSP

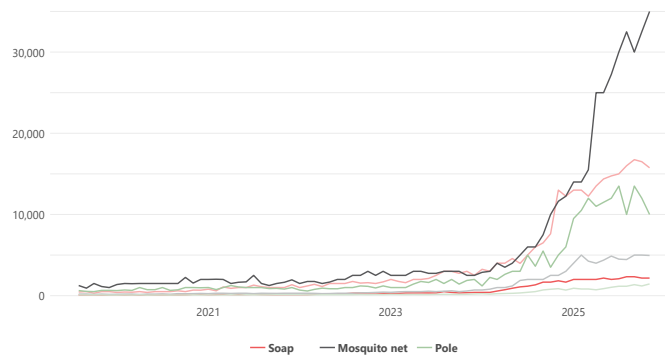

## MEDIAN NFI PRICES OVER TIME

August 2019 - November 2025 in SSP

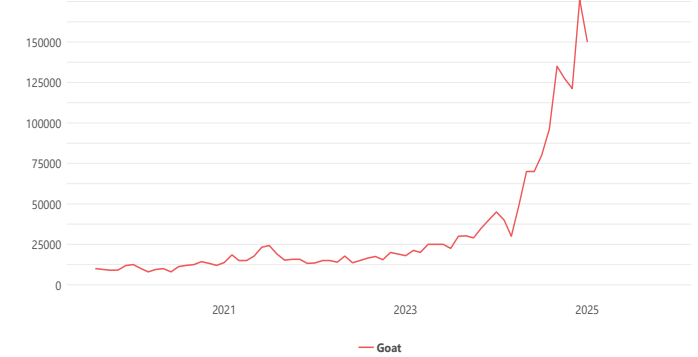

## MEDIAN NFI PRICES OVER TIME

August 2019 - November 2025 in SSP

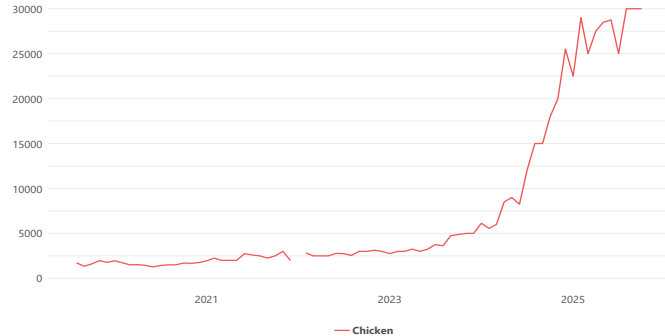

## MEDIAN GOAT PRICES OVER TIME

August 2019 - November 2025 in SSP

## MEDIAN CHICKEN PRICES OVER TIME

August 2019 - November 2025 in SSP

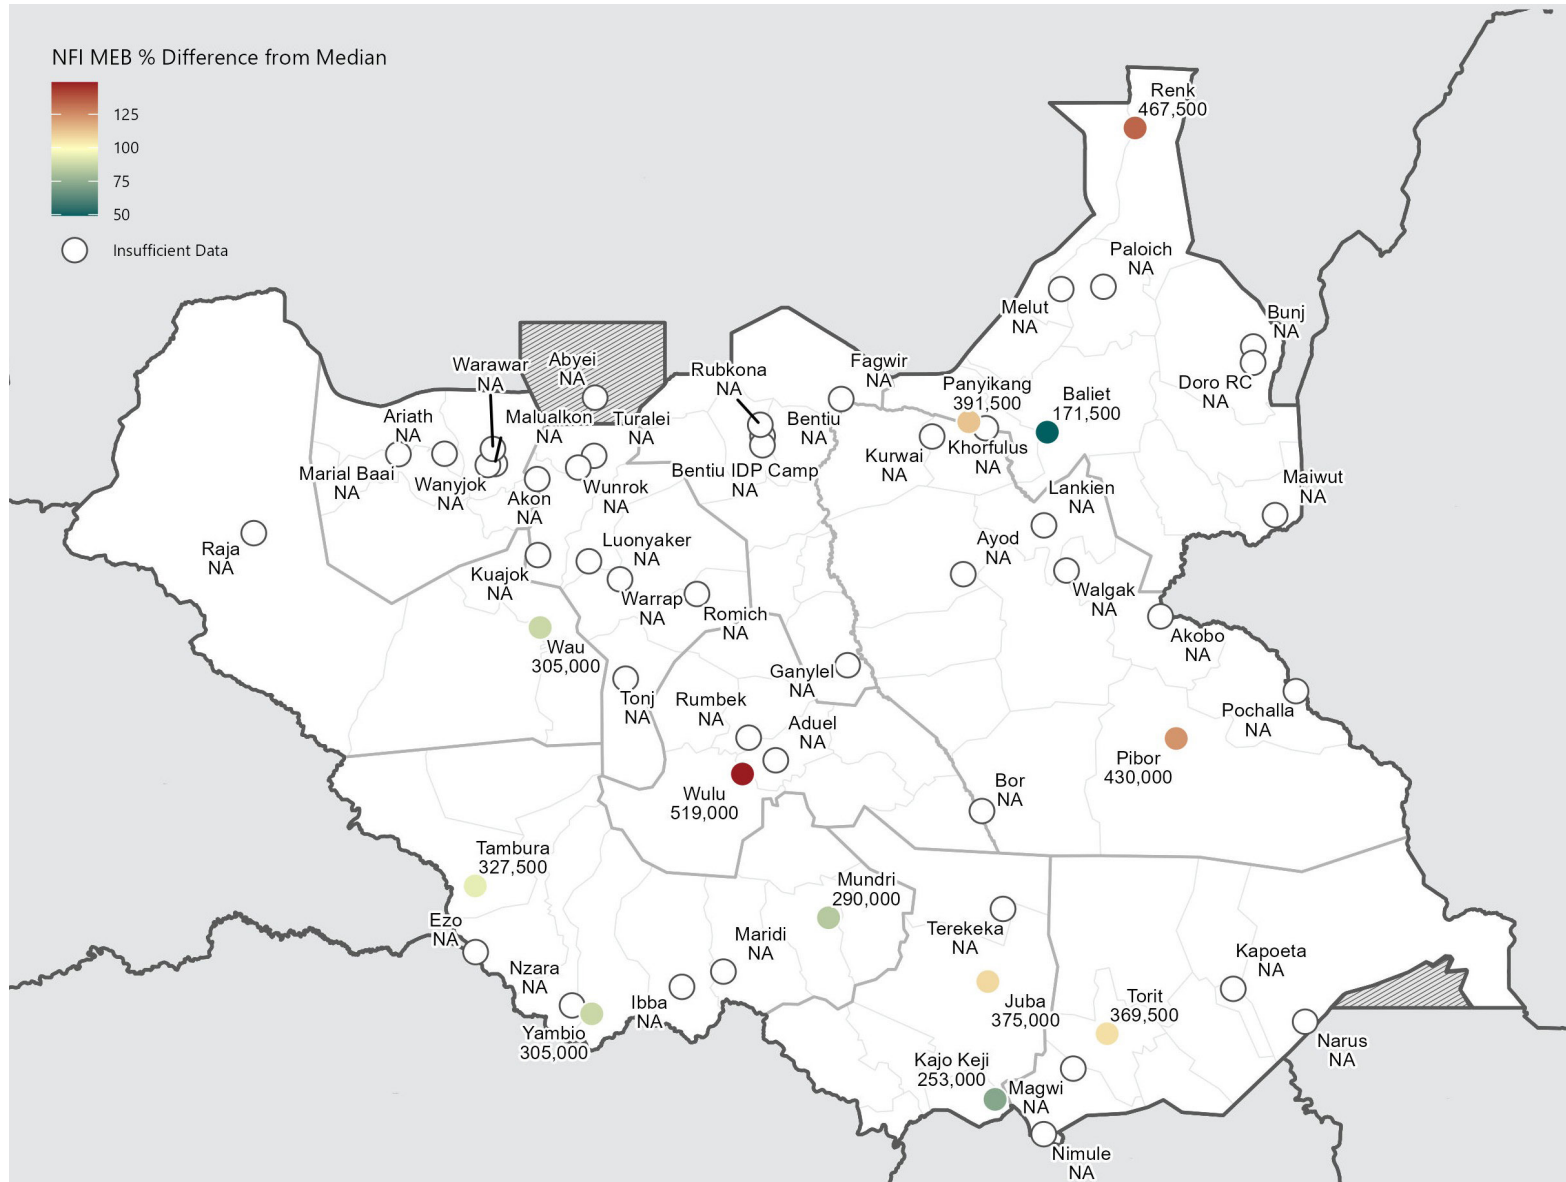

There is a gap in July 2022 because prices for chicken were not collected.

## USD EXCHANGE RATE OVER TIME

August 2019 - November 2025 in SSP

## NFI COMPONENT COST OF THE MEB

NA: no sufficient price data is available for calculating the NFI component cost of the MEB.

### Median Cost of NFIs MEB<sup>1</sup>

348,500 SSP

76 USD<sup>3</sup>

Monthly change since Oct 2025<sup>4</sup>

▼ 34,500 SSP 9%

### NFI components of the MEB

Blanket	2 Pcs	Kanga	1 Pc
Mosquito net	2 Pcs	Solar lamp	1 Pc
Cooking pot	1 Pc	Sleeping mat	2 Pcs

### Expectations for NFI prices over the next three months

64% of non-food traders expected increase in prices

22% of non-food traders did not expect any price change

10% of non-food traders expected decrease in prices

4% of non-food traders did not have any price change expectations

### NFIs restocking from wholesaler

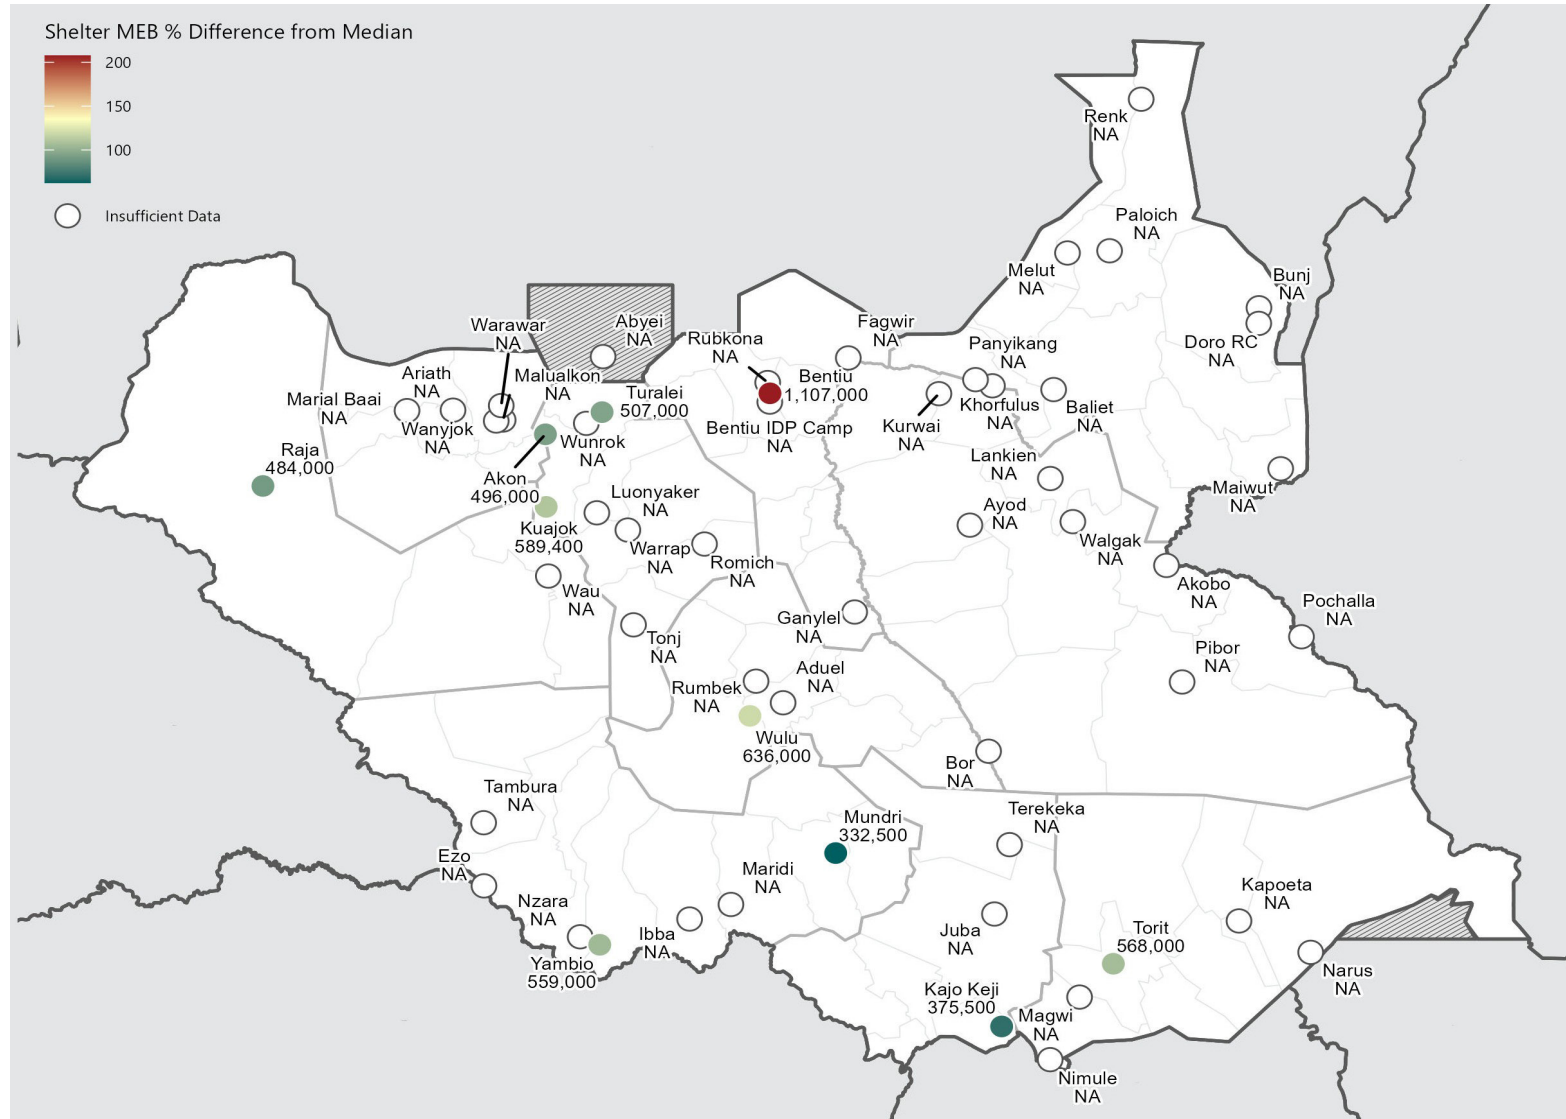

36% of traders reported restocking NFIs from a wholesaler in town

8 days

Median number of days reported by traders to restock NFIs from out of town

## SHELTER COMPONENT COST OF THE MEB

### Median Cost of Shelter MEB<sup>1</sup>

533,000 SSP

116 USD<sup>3</sup>

Monthly change since Oct 2025<sup>4</sup>

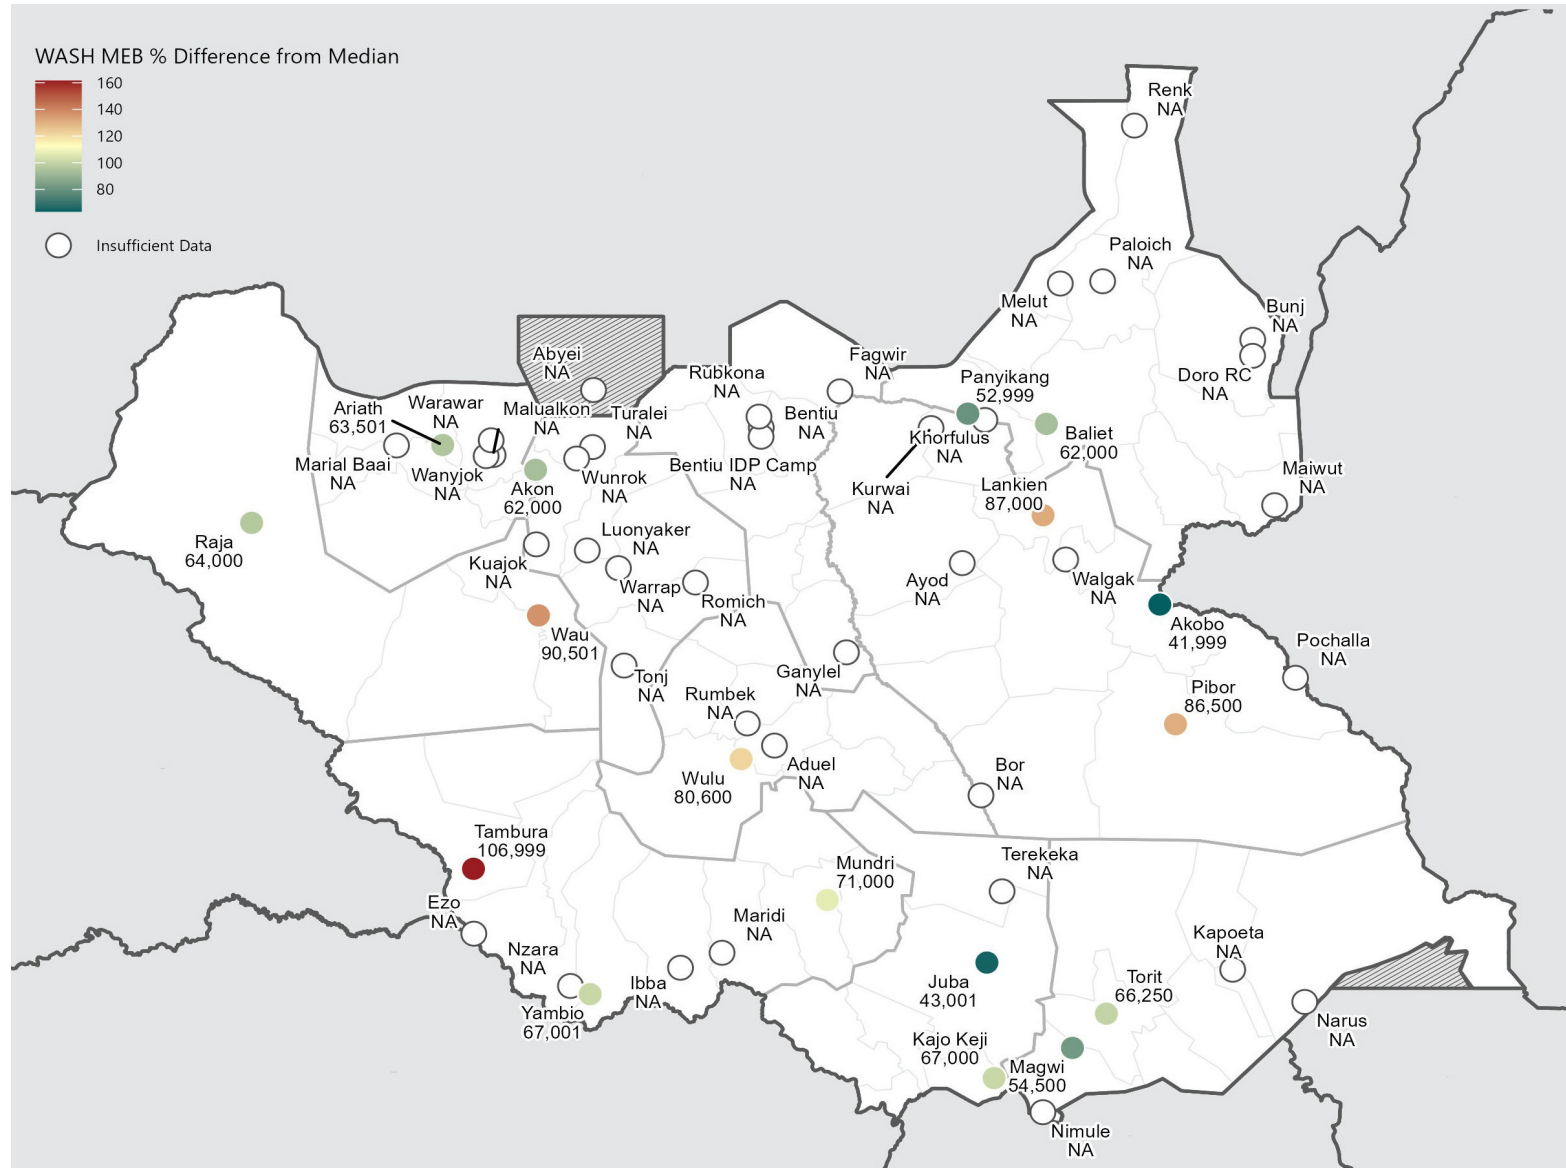

▲ 36,250 SSP 7%

### Shelter components of the MEB

Grass 20 Bundles Bamboo 2 Bundles  
 Plastic sheet 2 Pcs Poles 6 Pcs  
 Rubber rope 2 Pcs

NA: no sufficient price data is available for calculating the Shelter component cost of the MEB.

## WASH COMPONENT COST OF THE MEB

NA: no sufficient price data is available for calculating the WASH component cost of the MEB.

### Median Cost of WASH MEB<sup>1</sup>

66,250 SSP

14 USD<sup>3</sup>

Monthly change since Oct 2025<sup>4</sup>

▲ 5,250 SSP 9%

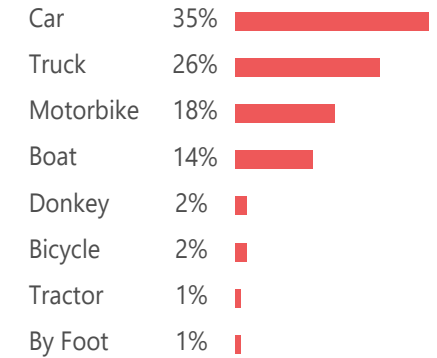

### WASH components of the MEB

Soap bar (1800 g)	3 Pcs	Jerrycan	1 Pc
Sanitary pads	2 Pcs		
Plastic bucket	1 Pc		

## MAIN NFI SUPPLY ROUTES

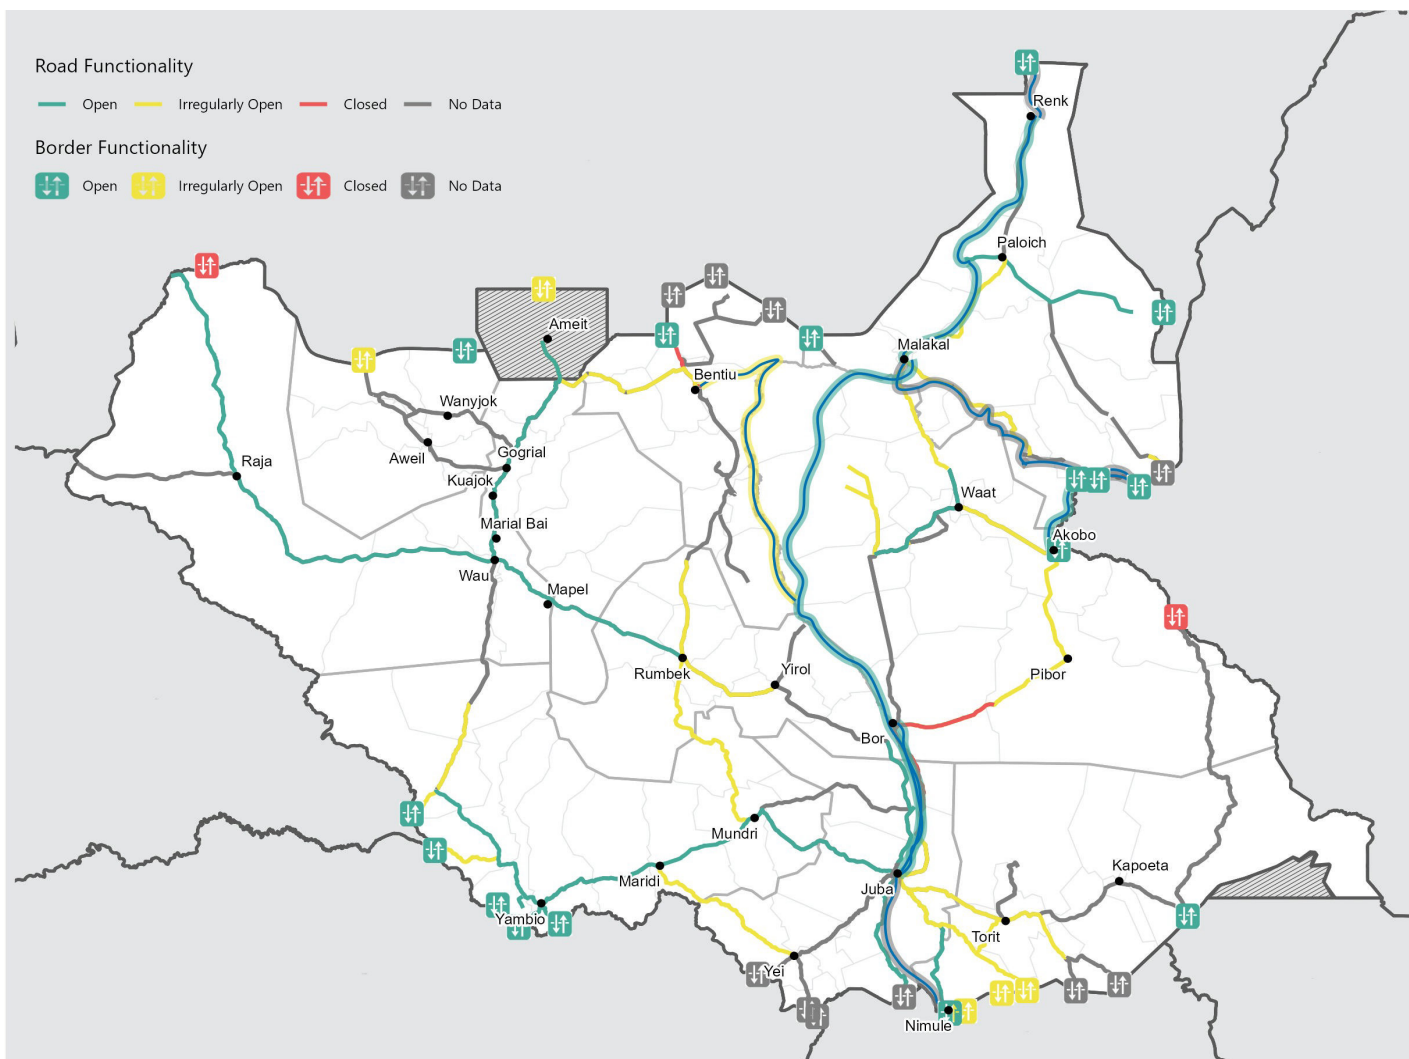

### Primary transportation methods used by traders to restock local cereals

This map illustrates the reported sources of NFI supplies, as indicated by vendors. For each location, only the most frequently reported non-food supply market connection is shown. Additional linkages and supply routes may exist.

## ROADS, RIVER ROUTES AND BORDER CONDITIONS

The map illustrates the reported road, river route and border crossing conditions at the time of data collection. The results are indicative of trade activity only.

### Restocking constraints reported by traders\*

### Accepted payment modalities\*

\* Values add up to more than 100% as traders were allowed to select multiple options.

NFIs 2

How to read a boxplot

\* The 'location median' is calculated by first finding the median price of a given item in each assessed location, then taking the median of the resulting set of median prices.

## Methodology

The JMMI aims to inform market-based programming in South Sudan. Coverage depends on the interest of the partner organisations and their field teams' capacities to regularly collect market data. Locations are added once partners willing to cover them are identified, and their field teams are trained. As the initiative continues to scale up, coverage will likely be expanded in future data collection rounds.

In each assessed location, at least four prices per food, non-food, and livestock items need to be collected from different traders to ensure the quality and consistency of the data. Two prices are collected for both currencies and milling costs. In line with the purpose of the JMMI, only the prices of the cheapest available types are recorded for each item.

Partner field teams identify traders to assess based on the following criteria:

- Traders are retailers selling directly to consumers.
- Traders with weight scales are prioritised when recording prices of dry food items.
- Traders need to be representative of the local price level.
- To the extent possible, the same traders are revisited in every data collection round.

The data is collected by field staff familiar with the local market conditions. They are trained on methodology and tools by REACH. Data collection is conducted through the ODK Collect mobile application. The data collection tool is published alongside the dataset every month and disseminated to the humanitarian community. Following data collection, REACH compiles and cleans all partner data, normalizing prices, cross-checking outliers, and calculating the median cost of an MSSMEB in each assessed location.

The median item prices reported in this factsheet are 'location medians', designed to minimise the effects of outliers and differing amounts of data among assessed locations. First, the median prices of all assessed items are calculated within each assessed location; then, REACH calculates the median of this list of medians. All MSSMEB and price index calculations are created using this method.

### MSSMEB Calculation

- The cost of the MSSMEB is calculated by multiplying the median price of each item in the respective location by the quantity listed in the table on page 3.
- Sorghum grain prices are used for the calculation of the cereal component, and maize grain prices for

areas where maize is more commonly consumed. In areas where both cereals are consumed equally, the price of the cheaper item is used.

- Bean prices are used for the pulse component.
  - Rather than the prices of vegetable oil, the prices of the cheapest locally available cooking oil is used.
  - For airtime, a monthly cost of 1 USD is assumed, based on the rates of local telecom providers.
  - All USD amounts are converted to SSP using the official rates of Central Bank of South Sudan.
  - If a component of the MSSMEB is unavailable in a location, the overall median price is used for the calculation of the index.
- In addition to data collected from traders, partners are required to complete a feedback form on market conditions, which is used to triangulate the trader data. More details on the methodology can be found in the [JMMI terms of reference \(ToR\)](#).

### Challenges and Limitations

- Price data is only indicative for the time frame within which it was collected. Prices may vary between data collection rounds.
- The JMMI data collection tool requests the cheapest available type of each item to be recorded, as availability varies across regions. Therefore, price comparisons across regions may be based on slightly varying products.
- Standardising unit sizes of dry food items is inherently difficult in South Sudan, as many traders sell commodities by volume rather than weight. This may create a measurement error.
- With current coverage, data is mostly collected from main markets, which may not be representative of rural areas.
- As the JMMI continues to expand and is extended to additional locations, the reported changes in the overall median prices may be driven by shifts in coverage rather than actual price changes.

## Participating agencies in October

- Action Against Hunger (ACF)
- Adventist Development and Relief (ADRA)
- Coalition for Humanity (CH)
- Concern WorldWide
- Dan Church Aid (DCA)

- Impact AID South Sudan
- IOM
- International Rescue Committee (IRC)
- Islamic Relief Worldwide (IRW)
- Medicaire
- Nile Hope (NH)
- OPRD
- Norwegian People's Aid (NPA)
- Relief International (RI)
- Support for Peace and Education Development (SPEDP)
- Star Trust Organization (STO)
- Welthungerhilfe (WHH)
- Youth Affairs Centre for Africa (YACA)

locations.

<sup>8</sup> The SMEB and MPC calculate that 70% of the food basket is to be covered in the priority counties while 50% will be covered in other counties.

We would love your feedback!

Please take a moment to fill out our short feedback form by scanning the QR code below.

Your input helps us improve the quality and relevance of our reports. Thank you!

## Endnotes

<sup>1</sup> The MSSMEB is calculated in each assessed location as described in the methodology box on the left and only includes key items. The overall MSSMEB is the median across all assessed locations.

<sup>2</sup> The food basket is composed of only the food items in the MSSMEB. The overall cost of the food basket is the median across all assessed locations.

<sup>3</sup> Source: Central Bank of South Sudan (2020, November 1). Retrieved from <https://www.boss.gov.ss>. The rates from 11<sup>th</sup> November 2025 were used for the calculation of the monthly change and conversion to USD.

<sup>4</sup> Reported changes are month-over-month and may be impacted by changes in coverage.

<sup>5</sup> The number of participating agencies indicates the total number of partner organisations that collected data in November 2025.

<sup>6</sup> The prices were normalised by setting August 2019 as the baseline and dividing each month's price by the price in August 2019.

<sup>7</sup> The Multipurpose Cash (MPC) is a cash transfer guide that has been designed to address multiple needs, with the transfer value calculated accordingly in the assessed

### About REACH

REACH is a leading humanitarian initiative that collects primary data and produces in-depth analysis to help aid actors make evidence-based decisions in support of crisis-affected people. With this in mind, our flagship research programmes aim to inform the prioritisation of aid according to levels of need - both crisis-level planning and targeted rapid response - as well as decisions around appropriate modalities of aid.

Through our team of assessment, data, geospatial, and thematic specialists, we promote the design of people-centred research and set standards for collecting and analysing rigorous, high quality data in complex environments. Visit us at [www.reach-initiative.org](http://www.reach-initiative.org)

### About the CWG

Established in 2019, the South Sudan Cash Working Group (CWG) is a community of humanitarian actors that support and coordinate cash-based interventions in South Sudan. Currently, CWG is co-led by OCHA, IOM, CRS, and ADA who provide technical support and leadership to the CWG hosted by IOM.
