Methodology Note

There is currently no single consolidated list of officially designated cyclone shelters in Ukhaia Upazila. In order to create as comprehensive a picture as possible, REACH have worked to synthesise data from the following sources: i) the list of cyclone shelters outlined in the 2015 District Disaster Management Plan, ii) a list of cyclone shelter obtained from the Ukhaia UNO office, and iii) lists of buildings scheduled for rehabilitation or upgrading to cyclone shelters by IOM, UNHCR. Efforts have been made to cross-check and remove duplicates across different lists wherever possible. Where shelters have different names in different lists but occupy the same location, names from the government District Disaster Management Plan and Ukhaia UNO office were prioritised. When planned rehab shelter sites did not exist in either the District Disaster Management Plan or Ukhaia UNO office, the names given by the agency planning the rehabilitation work was utilized.

GPS coordinates for the majority of shelters have been taken from an April 2018 mapping exercise conducted by UNDP and by rehab agency where UNDP coordinates were missing or inaccurate.

An additional 23 shelters from the Ukhaia UNO office and 2 shelters from the 2015 District Disaster Management have not yet been mapped. These will be added to a subsequent iteration of this product following field verification by REACH.

Note: Maps are for navigation and orientation purposes only. Data, designations and boundaries are not warranted to be error-free and do not imply acceptance by REACH or ECHO.
