

COMMUNITY RESPONSE PLAN

PD8, Jalalabad, Nangarhar Province, Afghanistan

June 2022

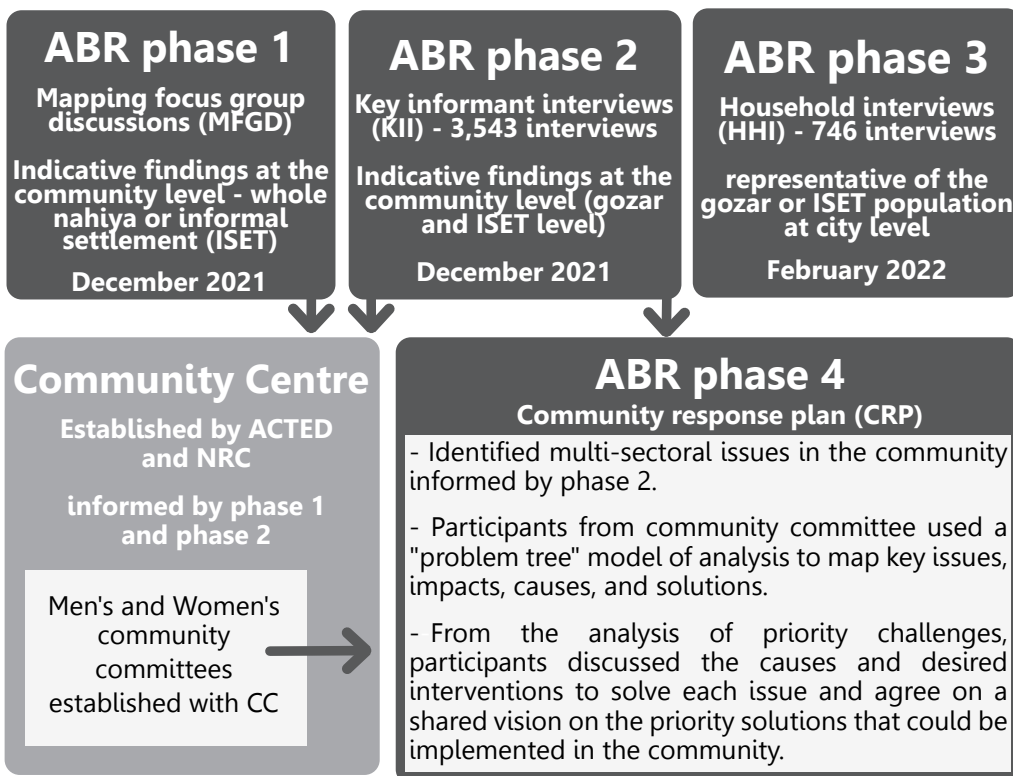

Area Based
Response
AFGHANISTAN

Introduction and Background

Developed through community planning workshops with local community representatives following the completion of REACH Area Based Response (ABR) assessment from November 2021 to February 2022, Community Response Plans (CRPs) are reports that outline a shared local vision for community wide interventions.

Facilitated by a consortium of ACTED, NRC and IMPACT, CRPs take an evidence based approach to planning, effectively translating response gaps identified through REACH ABR into actionable intervention strategies, formulated as specific projects. Using a community-led planning approach, CRPs act as a road map for multi-sectoral interventions.¹

CRP Process Overview

Demographics and composition

Composition of Jalalabad (Phase 1)

Number of Nahiya	Number of gozars	Number of ISETs

KEY ISSUES & RECOMMENDATIONS

Education

% of KIs reporting **most school age children are able to attend primary school**:

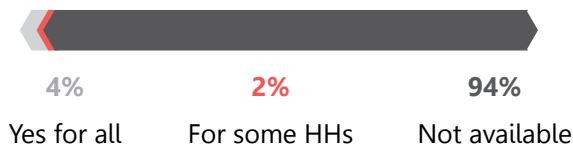

The most reported barrier for primary school aged girls by KIs was the lack of female teachers (50%).

Stakeholder recommendations:

Short term courses, awareness sessions and capacity building trainings for teachers, developing youth monitoring committee to protect women, pre-school classes, adult literacy classes, student capacity building, community based classes for children.

Electricity

% of KIs who reported the **availability of electricity**:

Stakeholder recommendations:

No projects were proposed during the workshop

Environment

% of KIs reporting the **main environmental concern** in the ISET/gozar:

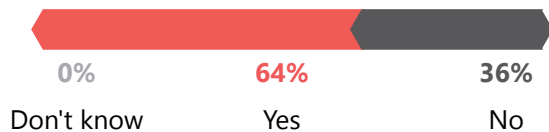

Stakeholder recommendations:

Construction of road, restoration of drainage ditches and construction of canals, planting trees.

Food security/markets

% of KIs reporting **ability of most households to access enough food** to meet daily needs in the past 30 days:

% of KIs reporting the **level of hunger** faced by most HHs in the settlement:

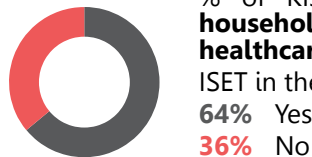

Hunger Level	Percentage
Hunger is worst it can be	3%
Hunger is bad	91%
Hunger is small	5%
Almost no hunger	1%

Stakeholder recommendations:

Construction of general stores, price control committee, emergency cash assistance, nutrition projects for children.

Healthcare

% of KIs who reported that **most households had access to an active healthcare centre** close to their gozar/ISET in the past 3 months:

All KIs reported that households facing access barriers could not afford to access services (92%), could not access due to lack of transport (66%) or due to insufficient female medical staff (24%).

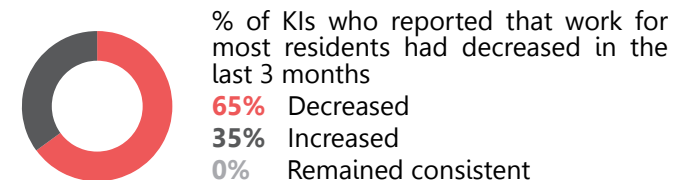

Stakeholder recommendations:

Construction of clinics, provision of mobile health teams, capacity building training for female medical staff.

Livelihoods

The **most common form of income** in the settlement reported by KIs:

57% Daily labour, no contract

Stakeholder recommendations:

Creation of job opportunities in various sectors, provision of livestock and poultry, small/medium enterprise's development (creating space for skilled workers), TVET courses with graduate entrepreneurial grant, handicrafts production with market linkages, provision of seeds.

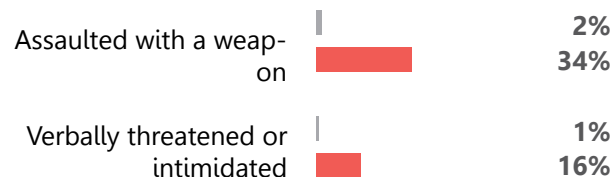

Q KEY ISSUES & RECOMMENDATIONS

Protection

% of KIs who reported being aware of **protection incidents** in the past 3 months (most reported):

Women
Men

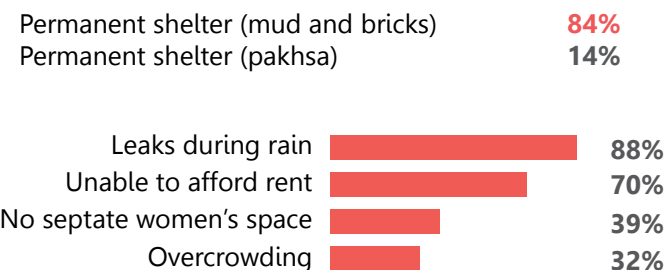

Stakeholder recommendations:

Establishment of protection committee for regular awareness sessions and involvement of local leadership, human rights awareness sessions.

Shelter/NFI

% of KIs reporting the **main shelter concerns** in the ISET/gozar:

Stakeholder recommendations:

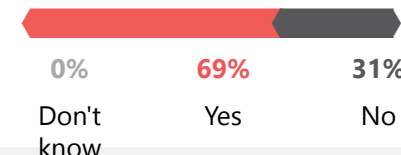

Construction of shelters, construction of blocks and tent provision, provision of NFI.

WASH

30%

of KIs reported that most people are unable to access sufficient quantity of water to meet daily needs (drinking, cooking, domestic use and hygiene)

% of KIs reporting there are **publicly available water points** in their gozar/ISET:

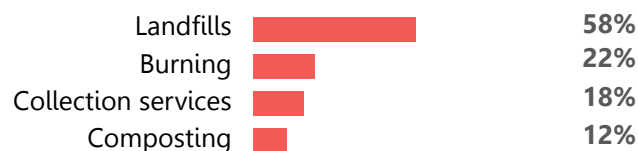

Stakeholder recommendations:

Taps or pipe scheme (construction and rehabilitation), provision of solar system for water access, construction of reservoir and hand pump wells, access to water testing facility/laboratory, hygiene awareness sessions, clean water project.

Waste management

% of KIs reporting the **most common method of waste management**:

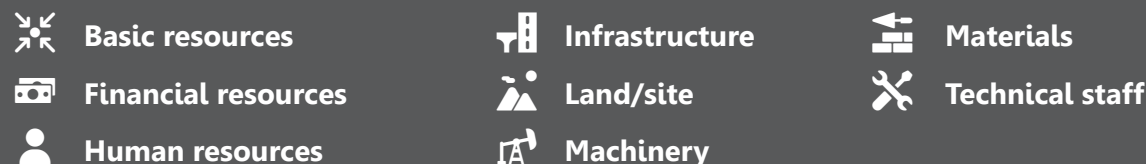

Stakeholder recommendations:

awareness session on waste management, provision of garbage bins.
