

Informal Site and Settlement Profiles

Ar-Raqqa Governorate, Syria

February 2021

Background | Methodology

In October 2019, increased military activity in Ar-Raqqa and Al-Hasakeh Governorates led to mass displacement (including the closure of two camps for internally displaced persons (IDPs)) and a disruption of the strategic M4 highway.¹ Toward the end of 2020, clashes have resumed and north and east Syria face continued internal security threats. In Ar-Raqqa there are continued clashes in Ein Issa around highway M4^{2,3}.

Meanwhile, economic conditions have deteriorated across Syria, and the prices of basic goods are increasing. This is partly due to the instability and decline of the Syrian Pound (SYP) against the US Dollar (USD) as well as the escalation of conflict in northwest Syria in early 2020.⁴ Additionally, a fuel crisis is affecting the wider region⁵.

From March 2020, measures to restrict the spread of COVID-19 have been in place in northeast Syria (NES), including a curfew, movement restrictions, closure of schools and non-essential businesses, and a ban on public gatherings. Those living in collective shelters are highlighted as a particular concern by the United Nations (UN) due to a limited ability to observe social distancing.⁴ At the time of data collection in late February, 8,537 confirmed COVID-19 cases and 419 deaths had been registered in NES⁶. For key findings on COVID-19, please see page 4.

For an updated list of active sites please see the NES Sites and Settlements Working Group (SSWG) sites list.⁷

REACH's informal settlement profiling in NES consists of key informant (KI) interviews with community members who have knowledge of settlements. A minimum of two KIs were sought for each of the settlements, focusing on each KI's sector-specific knowledge. The settlements were selected from the SSWG sites list and an attempt was made to assess all sites on the list, however due to security and phone network issues it was not possible to assess all sites on the list.

The settlements are a mix of tented site and collective centres⁸ and a comprehensive list can be obtained from the SSWG.⁷

Data collection took place between 17-28 February 2021 through remote (phone) interviews. In total, 94 settlements were assessed in Ar-Raqqa governorate. The assessment was carried out at the settlement level. Due to the KI methodology used, findings are not statistically representative and should therefore only be considered indicative of the situation in assessed settlements and not the communities they are in or near. Percentages express percentages of assessed settlements unless mentioned otherwise. When percentage of households is indicated it is based on estimates by the KI.

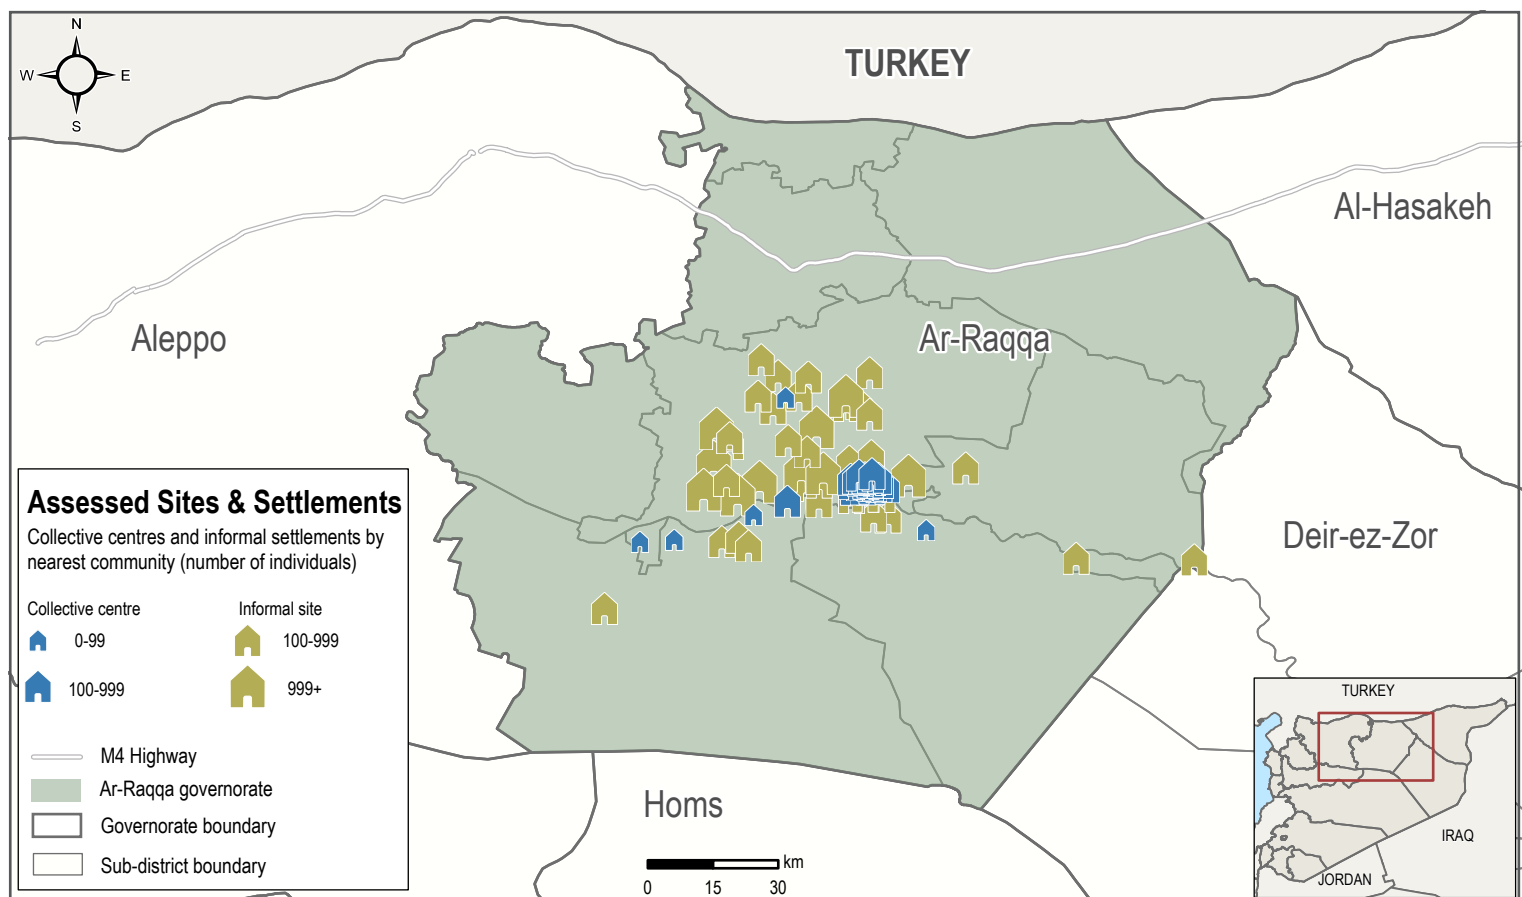

This Ar-Raqqa assessment follows previous assessments of informal settlements in NES in [November 2020](#), [June 2020](#) and [February 2020](#). A corresponding assessment was carried out in Al-Hasakeh, Deir-ez-Zor and Aleppo governorates in February 2021. These sets of profiles can be found [here](#).

7. Contact SSWG Coordinator: sitesandsettlementsnes@gmail.com
8. Informal settlements are defined as "a spontaneous grouping of tents or other housing units (5+ HHs). Settlements are usually without the presence of a dedicated Camp Administration and do not have static Camp Management, though mobile camp management activities may cover the settlement". Collective centres (CCs) are defined as "a settlement (5+ HHs) hosted in existing public infrastructure not originally designed as a shelter such as a school or community center. CCs do not have a static Camp Management or Camp Administration, though mobile Camp Management or local civil councils may be present." ([SSWG January 2021 Update](#))

Assessment Overview

Coverage	Settlement Typology
Assessed settlements: 94	School building: 22
Population in assessed settlements: 65,880	Other building: 5
Collective centres: 27	Tented: 67

Locations of Assessed Settlements

Informal Site and Settlement Profiles

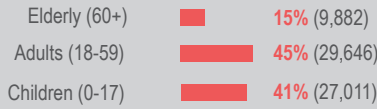

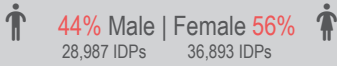

Ar-Raqqa Governorate, Syria

February 2021

Overall Key Findings per Sector

Assessed Settlements Overview:*

Estimated IDPs (Individuals)*:

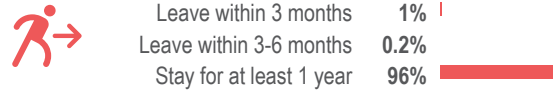

*based on KI estimates

MOVEMENT

Main area of origin by percentage of households* across assessed sites:

Country	Governorate	Sub-district	Percentage
Syria	Homs	Tadmor	22%
Syria	Deir-ez-Zor	Deir-ez-Zor	14%
Syria	Hama	As-Salamiyeh	12%
Syria	Ar-Raqqa	Ath-Thawrah	8%
Syria	Deir-ez-Zor	Al Mayadin	8%

Movement intentions by percentage of households* across assessed settlements:

KIs reported that the main factors influencing the intention to leave were cost of living (8% of assessed settlements), access to income and employment opportunities (7%) and wanting to return to area of origin (5%).

WATER, SANITATION AND HYGIENE (WASH)

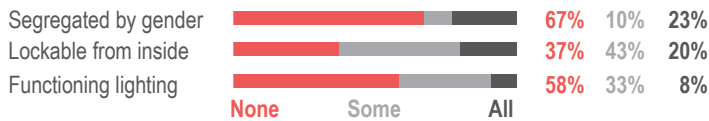

Sanitation

Types of latrines available:⁹ Communal¹⁰ 63% | Household¹⁰ 35%

In 16% of assessed settlements, KIs reported that no latrines were available in the settlement. In 61% of assessed settlements, KIs reported that some households were practicing **open defecation** within or outside their settlement as an alternative to latrines.

Communal latrine characteristics, by % of assessed settlements:

Bathing facilities:⁹ Available: | Mostly used:

Bathing inside shelter:	99%	100%
Communal: ¹⁰	7%	0%
Household: ¹⁰	1%	0%

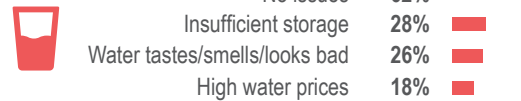

In 57% of assessed settlements with communal showers, KIs reported showers being **gender-segregated**, in 71% KIs reported showers having **locks** and in 0% KIs reported showers having **lighting**.

Water

Tanker truck from private vendor was the primary source of water in the assessed settlements at the time of data collection.

Drinking water issues, by % of assessed settlements:⁹

In 25% of assessed settlements, KIs reported that at least one resident in the settlement suffered from diarrhoea in the two weeks prior to data collection. In 62% of assessed settlements, KIs reported that everyone in their settlement had sufficient water to meet their daily needs in the two weeks prior to data collection.

Waste disposal

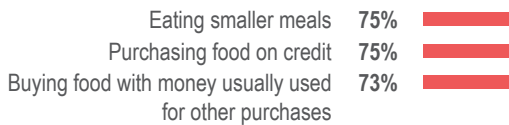

Primary waste disposal system: burning garbage (63% of assessed settlements) and garbage collection (36%)⁹
Primary waste disposal problem: complete lack of garbage removal (57% of assessed settlements)⁹

FOOD SECURITY

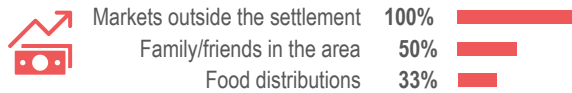

Food security

Top three reported food-related coping strategies used by residents in the 2 weeks prior to data collection by % of assessed settlements:⁹

Food distributions

Most commonly reported sources of food by % of assessed settlements:⁹

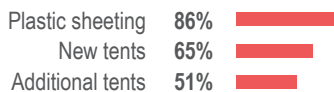

KIs reported that **bread (27% of assessed settlements)** and **sugar (2%)** were the main food items needed by residents that are currently not available through assistance or markets.⁹

SHELTER AND NON-FOOD ITEMS (NFIs)

Shelter adequacy

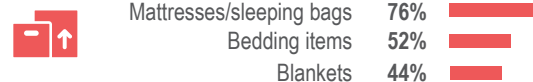

KIs estimated that a **lack of insulation from the cold (79% of assessed settlements)** and a **lack of privacy inside shelters (66%)** were the main shelter adequacy issues in their settlement.⁹

Top three most commonly reported shelter item needs by % of assessed settlements:⁹

NFI needs

Top three reported anticipated NFI needs by % of assessed settlements for the three months following data collection:⁹

9. Questions where KIs had multiple answer options (total may be >100%).

10. Communal latrines and showers are shared by more than one household. Household latrines and showers are used only by one household. This may be an informal designation that is not officially enforced.

Informal Site and Settlement Profiles

Ar-Raqqa Governorate, Syria

February 2021

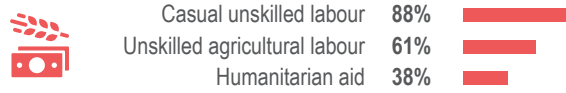

LIVELIHOODS

Household income and expenses

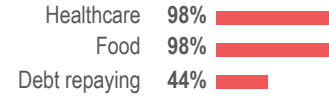

KIs estimated that **70%** of households had access to income sources. However, in **0%** of assessed settlements, KIs reported that **most residents** in the settlement **have a stable income**.

Top three reported primary income sources in the 30 days prior to data collection by % of assessed settlements:⁸

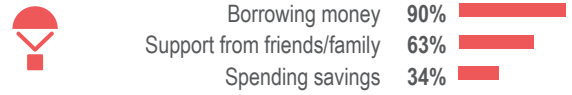

Cash/voucher distributions were reported by KIs in **11%**, and food distributions in **30%** of assessed settlements over the last 30 days prior to data collection.

Top three reported expense types by % of assessed settlements:⁹

Coping strategies

Top three reported livelihoods-related coping strategies over the last 30 days prior to assessment by % of assessed settlements:⁹

PROTECTION

Freedom of movement

In **100%** of assessed settlements, KIs reported that all residents were able to **leave the assessed settlement for an emergency** at the time of data collection. In **100%** of assessed settlements, KIs reported that all residents could leave **without disclosing the medical reason** and could leave for non-emergency reasons.

Proportion of assessed settlements with KIs reporting on whether residents experienced barriers when leaving the assessed settlement in the two weeks prior to data collection:

Most commonly reported barriers in these assessed settlements:⁹

- Transportation too expensive (65%)
- Insufficient transportation (34%)
- Lack of documentation (26%)

Elderly and persons with disabilities

At the time of data collection, in **0%** of assessed settlements, KIs reported interventions targeting **elderly populations** and in **0%** KIs reported interventions for **persons with disabilities** in their settlements.

Protection issues

In **32%** of assessed settlements, KIs reported safety and security issues in the camp over the 30 days prior to data collection.

Most commonly reported security issues in assessed settlements:⁹

- Serious threat from scorpions, snakes or similar (19%)
- Theft (17%)

Documentation

In **5%** of assessed settlements, KIs reported that **everyone in their settlement is without** their national identification, passport, family booklet and/or individual/family civil record.

In **71%** of assessed settlements, KIs reported that **births are registered** in their settlement.

KIs reported that boys (**80%** of assessed settlements) and girls (**77%**) face particular challenges in accessing documentation.

Child protection

Proportion of assessed settlements with KIs reporting the presence of child protection issues over the 30 days prior to data collection:

Most commonly reported child protection concerns in these assessed settlements:⁹

- Child labour (100%)
- Early marriage (below age 18) (55%)

In assessed settlements with child labour reported, most commonly reported types of child labour by gender were:⁹

Boys (100%)	Girls (99%)
Selling goods (59%)	Domestic labour (100%)
Domestic labour (49%)	Factory work (14%)
Transporting people/goods (38%)	Transporting people/goods (1%)

In **26%** of assessed settlements, KIs reported that they were aware of **child labour** occurring among **children under the age of 11**, most commonly reporting domestic labour (99% of these assessed settlements) and factory work (15%).

In **3%** of assessed settlements, KIs reported that their settlement had an accessible **child-friendly space**.

Gender-based violence

In **0%** of assessed settlements, KIs reported that their settlement had an accessible designated space for women and girls.

Proportion of settlements with KIs reporting the presence of gender-based concerns within the settlement in the two weeks prior to data collection:

Most commonly reported gender-based concerns in these assessed settlements:⁹

- Early marriage (girls below age 18) (24%)
- Denial of resources, opportunities or services (17%)

Social cohesion

In **97%** of assessed settlements, KIs reported that the social relationship between different community groups in their area was neutral or positive.

EDUCATION

In **78%** of assessed settlements, KIs reported that children in their settlement have access to education, while in **99%** of settlements, KIs reported **barriers to education**. In settlements where barriers to education were reported, the most commonly reported barriers were:⁹

- No education for children at a certain age (51%)
- School is too far / no transport available (37%)

In **52%** of assessed settlements, KIs reported that families in their settlement have been impacted by the **closures of schools due to COVID-19**, most commonly reporting:⁹

- Decrease in children's interest in learning (59%)
- Increase in child labour (50%)
- Decrease in children's ability to learn (37%)

HEALTH

In **86%** of assessed settlements, KIs reported that residents in their settlement can access at least one health facility. In **100%** of the remaining settlements, residents had access to a pharmacy/dispensary.

In **1%** of assessed settlements, KIs reported that sufficient medicine was available for free for people with chronic disease. In **98%** of assessed settlements, KIs reported that sufficient medicine was available to buy for people with chronic disease.

Key Findings - COVID-19 Vulnerability

The findings on this page highlight settlements' vulnerability to COVID-19. The elderly are much more vulnerable to COVID-19, with a significantly higher fatality rate among over-60s, while access to health facilities indicates the availability of professional care for those infected.¹⁰

Information provided by KIs suggests that IDP populations in assessed settlements are generally aware of the virus and are receiving information about the pandemic. In 2% of assessed settlements, residents reportedly had difficulties in understanding the information that was provided.

Many KIs reported that local authorities and settlement residents are taking steps to limit possible exposure to the disease, and that social distancing has been promoted as a prevention measure. The data suggests that, in practice, social distancing is difficult to implement; use of communal latrines and bathing facilities indicates potentially crowded living conditions. In 38% of assessed settlements, it was reported that only a few residents were engaging in social distancing.

Handwashing with soap is an effective way to kill the virus and limit its spread,¹¹ but in 49% of assessed settlements, people reportedly did not have access to handwashing facilities, while in 97% KIs cited available soap was too expensive.

11. European Centre for Disease Prevention and Control (December 2020). Prevention and control of COVID-19. Accessed on <https://ecdc.europa.eu>

Notes on figures: Percentages represent the % of assessed settlements in which KIs reported a given behaviour or issue.

Reported proportion of residents who are aware of COVID-19

Reported proportion of residents who consider COVID-19 an important issue

Estimated number of over-60s in assessed settlements

9,882 (15% of population)

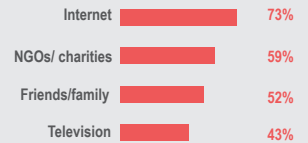

Reported health facility access

In **86%** of assessed settlements, there was reportedly access to health facilities

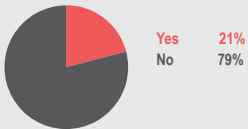

Reported proportion of residents who have received information on COVID-19

Reported modalities by which information was received⁹

Reported difficulties in understanding information about COVID-19

Reported reasons for difficulties in understanding COVID-19 information

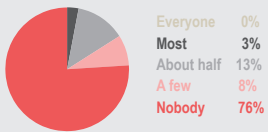

Not enough materials 100%

Information is not clear 90%

Reported proportion of residents aware of social distancing

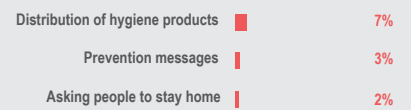

Reported proportion of residents engaging in social distancing

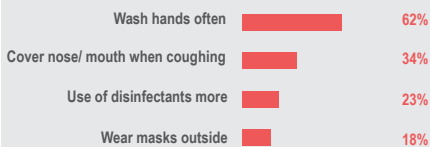

Reported issues related to social distancing⁹

Living conditions do not allow for it 100%

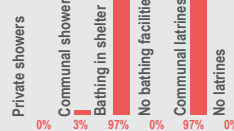

Measures reportedly implemented by local authorities to protect from COVID-19⁹

Measures reportedly implemented by residents to protect against COVID-19⁹

Reported types of bathing facilities and latrines used within the assessed settlements⁹

Reported proportion of residents with access to handwashing facilities in assessed settlements

Reported proportion of residents with access to soap within the assessed settlements

Reported issues with soap for residents within assessed settlements⁹

Reported issues with handwashing facilities for residents within assessed settlements⁹

Ar-Raqqa sub-district: East Royan 2

- Alternatives to latrines in use: Open defecation outside the site (e.g. nearby fields or bushes); Digging private pits
- Bathing facilities: Bathing inside shelter
- Main issues with bathing: There are no showers
- Garbage disposal method: Burning garbage
- Garbage disposal issues: Complete lack of garbage removal; Dumping site(s) within camp or close to site

Healthcare

- No. of health facilities accessible to IDPs: 2 (Pharmacy/dispensary; Private hospital/clinic)
- Sufficient access to medical supplies for chronic illness: Yes

Shelter/NFI

- Adequacy issues with shelter(s): Insufficient number of shelters for the population; Structures are not sturdy and break/fall over easily; Lack of insulation from cold; Leaking during rain
- Shelter needs: New tents; Additional tents; Plastic sheeting
- Household needs per KIs: Mattresses/sleeping mats; Winter blankets; Heating fuel

Food/Livelihoods

- Main food source: From local markets outside the camp/site; From family and friends in the area
- Access to food market(s): Yes
- Access to income: No
- Top expenses for residents: Food; Healthcare; Transportation; NFIs
- Reported livelihood coping strategies: Spending savings; Support from friends / relatives; Borrowing money

Education/Protection

- Access to education: Primary school
- Child labour reported: No
- Early marriage reported: No
- % of population without personal documentation: A few (around 25%)

Informal Site and Settlement Profiles

Ar-Raqqa Governorate, Syria

February 2021

Ar-Raqqa sub-district: Western salhabiya 1

SSWG code: SS06_4654

SITE OVERVIEW

Site Typology: Tents
 Estimated IDP population: **2150**
 Population breakdown:
 40% male and 60% female
 40% children (under 18)
 50% adult (18-59)
 10% elderly (60+)

COVID-19

% of population aware of COVID-19: Everyone (around 100%)
 % of population that think it is an important issue: Most (around 75%)
 Reported issues understanding the information: No
 Community protection measures: Nothing
 Local authority protection measures: No measures
 % of population aware of social distancing: About half (around 50%)
 % of population engaging in social distancing: Nobody (around 0%)
 Social distancing issues: Living conditions do not allow for social distancing
 % of population who have received information on COVID-19 & protection measures: Everyone (around 100%)
 Common means to receive information about COVID-19: NGOs or charities; Internet
 % of population with access to handwashing facilities: Nobody (around 0%)
 % of population with enough soap: Most (around 75%) (Soap is too expensive)
 Main issues with handwashing facilities: There are no handwashing facilities

Movement

- Primary area of origin: Oqerbat, Hama
- Population intending to move in 6 months: 0%
- Top intended destination: NA

CCCM

- Distributions in the month before data collection: No
- Overall priority needs: Employment; Food; Medical Care; Shelter Support
- Information needs: How to access assistance; How to find job opportunities; How to access health facilities

WASH

- Primary drinking water source for IDPs: Tanker truck - private vendor
- Water access: More than half of the population has enough water for their needs
- Water issues: No issues
- Latrines: Household latrine
- Main Issues with latrines: There are not enough latrines; There is no separation between men/women; There are no lights; There are no locks; Latrines are not clean; There is no water to flush
- Alternatives to latrines in use: Open defecation outside the site (e.g. nearby fields or bushes)
- Bathing facilities: Bathing inside shelter
- Main issues with bathing: There are no showers
- Garbage disposal method: Garbage collection (Local authorities); Burning garbage
- Garbage disposal issues: Infrequent garbage collection and removal

Healthcare

- No. of health facilities accessible to IDPs: 2 (Pharmacy/dispensary; Private hospital/clinic)
- Sufficient access to medical supplies for chronic illness: Yes

Shelter/ NFI

- Adequacy issues with shelter(s): Shelters are too small/not enough space for entire household; Structures are not sturdy and break/fall over easily; Many are heavily damaged/ unusable; Leaking during rain; Lack of privacy inside shelter (no partitions, no doors); Unable to lock home securely; Lack of electricity; Lack of lighting; Lack of heating
- Shelter needs: New tents; Additional tents; Plastic sheeting
- Household needs per KIs: Bedding items (sheets, pillows); Mattresses/sleeping mats; Water containers

Food/ Livelihoods

- Main food source: From local markets outside the camp/site
- Access to food market(s): Yes
- Access to income: Yes (Casual unskilled labour (construction))
- Top expenses for residents: Food; Healthcare; Transportation
- Reported livelihood coping strategies: Support from friends / relatives; Reducing spending on non-food expenditures such as health or education

Education/ Protection

- Access to education: Primary school
- Child labour reported: No
- Early marriage reported: No
- % of population without personal documentation: A few (around 25%)

COVID-19

% of population aware of COVID-19: Everyone (around 100%)
 % of population that think it is an important issue: A few (around 25%)
 Reported issues understanding the information: No
 Community protection measures: Wash hands more regularly
 Local authority protection measures: No measures
 % of population aware of social distancing: A few (around 25%)
 % of population engaging in social distancing: Nobody (around 0%)
 Social distancing issues: Living conditions do not allow for social distancing
 % of population who have received information on COVID-19 & protection measures: Everyone (around 100%)
 Common means to receive information about COVID-19: NGOs or charities; Posters/flyers in the street
 % of population with access to handwashing facilities: About half (around 50%)
 % of population with enough soap: Everyone (around 100%) (No problems accessing soap; Soap is too expensive)
 Main issues with handwashing facilities: There are not enough handwashing facilities; Soap too expensive

Movement

- Primary area of origin: Ashara, Deir-ez-Zor
- Population intending to move in 6 months: 0%
- Top intended destination: NA

CCCM

- Distributions in the month before data collection: Yes (Food; Drinking water)
- Overall priority needs: Education for children; Employment; Medical Care; Electricity
- Information needs: How to access assistance; How to find job opportunities; How to access health facilities; How to get new documents for newborns, marriage certificates etc

WASH

- Primary drinking water source for IDPs: Tanker truck (NGO)
- Water access: Everyone/nearly everyone has enough water for their needs
- Water issues: No issues
- Latrines: Household latrine; Communal latrine
- Main Issues with latrines: There are not enough latrines; Pits get full
- Alternatives to latrines in use: None
- Bathing facilities: Communal shower / bathing place; Bathing inside shelter
- Main issues with bathing: Not enough showers; There is no separation between men/women; There are no lights; Showers are too small (not enough space)
- Garbage disposal method: Burning garbage; Disposing at another location
- Garbage disposal issues: Complete lack of garbage removal; Dumping site(s) within camp or close to site

Healthcare

- No. of health facilities accessible to IDPs: 2 (Pharmacy/dispensary; Pharmacy/dispensary)
- Sufficient access to medical supplies for chronic illness: Yes

Shelter/ NFI

- Adequacy issues with shelter(s): Structures are not sturdy and break/fall over easily; Many are heavily damaged/ unusable; Leaking during rain; Lack of privacy inside shelter (no partitions, no doors); Lack of electricity; Lack of heating
- Shelter needs: New tents; Additional tents; Tarpaulins; Plastic sheeting
- Household needs per KIs: Bedding items (sheets, pillows); Mattresses/sleeping mats; Winter blankets; Winter clothes; Heating fuel

Food/ Livelihoods

- Main food source: Food distributions; From local markets outside the camp/site
- Access to food market(s): Yes
- Access to income: Yes (Unskilled agricultural labour; Humanitarian aid)
- Top expenses for residents: Food; Healthcare; NFIs; Communication (e.g. phone, internet)
- Reported livelihood coping strategies: Borrowing money

Education/ Protection

- Access to education: No education facility available
- Child labour reported: No
- Early marriage reported: No
- % of population without personal documentation: Most (around 75%)

Informal Site and Settlement Profiles

Ar-Raqqa Governorate, Syria

February 2021

Ar-Raqqa sub-district: Alrjem Aladeab

SSWG code: SS06_4693

SITE OVERVIEW

Site Typology: Tents
 Estimated IDP population: 750
 Population breakdown:
 37% male and 63% female
 43% children (under 18)
 35% adult (18-59)
 23% elderly (60+)

COVID-19

% of population aware of COVID-19: Most (around 75%)
 % of population that think it is an important issue: Most (around 75%)
 Reported issues understanding the information: Yes (Information is not clear (comprehensible); There are not enough materials)
 Community protection measures: Nothing
 Local authority protection measures: No measures
 % of population aware of social distancing: Most (around 75%)
 % of population engaging in social distancing: Nobody (around 0%)

- Access to education: Primary school
- Child labour reported: No
- Early marriage reported: No
- % of population without personal documentation: A few (around 25%)

Informal Site and Settlement Profiles

Ar-Raqqa Governorate, Syria

February 2021

Ar-Raqqa sub-district: Kubash Wasti2

SSWG code: SS06_4796

SITE OVERVIEW

Site Typology: Tents
 Estimated IDP population: 400
 Population breakdown:
 37% male and 63% female
 35% children (under 18)
 40% adult (18-59)
 25% elderly (60+)

COVID-19

% of population aware of COVID-19: Most (around 75%)
 % of population that think it is an important issue: Most (around 75%)
 Reported issues understanding the information: Yes (There are not enough materials)
 Community protection measures: Nothing
 Local authority protection measures: No measures
 % of population aware of social distancing: Most (around 75%)
 % of population engaging in social distancing: Nobody (around 0%)
 Social distancing issues: Living conditions do not allow for social distancing
 % of population who have received information on COVID-19 & protection measures: Most (around 75%)
 Common means to receive information about COVID-19: Posters/flyers in the street; Television; Friends/family; Internet
 % of population with access to handwashing facilities: Nobody (around 0%)
 % of population with enough soap: Most (around 75%) (No problems accessing soap; Soap is too expensive)
 Main issues with handwashing facilities: There are no handwashing facilities

Movement

- Primary area of origin: Abu Kamal, Deir-ez-Zor
- Population intending to move in 6 months: 0%
- Top intended destination: NA

CCCM

- Distributions in the month before data collection: No
- Overall priority needs: Employment; Food; Shelter Support; Winterization Kits
- Information needs: How to find job opportunities

WASH

- Primary drinking water source for IDPs: Tanker truck - private vendor
- Water access: More than half of the population has enough water for their needs
- Water issues: Water tastes bad; Water smells bad; Water has a bad colour; People got sick after drinking the water; High water prices; Insufficient storage capacity
- Latrines: Communal latrine
- Main Issues with latrines: There are no latrines
- Alternatives to latrines in use: Open defecation outside the site (e.g. nearby fields or bushes); Digging private pits
- Bathing facilities: Bathing inside shelter
- Main issues with bathing: There are no showers
- Garbage disposal method: Garbage collection (Local authorities); Burning garbage; Disposing at another location
- Garbage disposal issues: Infrequent garbage collection and removal

Healthcare

- No. of health facilities accessible to IDPs: 2 (Private hospital/clinic; Pharmacy/dispensary)
- Sufficient access to medical supplies for chronic illness: Yes

Shelter/ NFIs

- Adequacy issues with shelter(s): Structures are not sturdy and break/fall over easily; Many are heavily damaged/ unusable; Lack of insulation from cold; Leaking during rain; Limited ventilation
- Shelter needs: New tents; Additional tents; Plastic sheeting
- Household needs per KIs: Water containers; Sources of light; Winter clothes; Heating fuel; Washing powder (for clothes)

Food/ Livelihoods

- Main food source: From local markets outside the camp/site; From family and friends in the area
- Access to food market(s): Yes
- Access to income: Yes (Unskilled agricultural labour; Casual unskilled labour (construction); Public security official (military, police, etc.))
- Top expenses for residents: Food; Healthcare; Transportation
- Reported livelihood coping strategies: Borrowing money

Education/ Protection

- Access to education: Primary school
- Child labour reported: No
- Early marriage reported: No
- % of population without personal documentation: A few (around 25%)

Ar-Raqqa sub-district: West Kubash1

SSWG code: SS06_4797

SITE OVERVIEW

Site Typology: Tents
 Estimated IDP population: 373
 Population breakdown:
 45% male and 55% female
 30% children (under 18)
 45% adult (18-59)
 25% elderly (60+)

COVID-19

% of population aware of COVID-19: Everyone (around 100%)
 % of population that think it is an important issue: Most (around 75%)
 Reported issues understanding the information: Yes (Information is not clear (comprehensible); There are not enough materials)

- Main food source: From local markets outside the camp/site
- Access to food market(s): Yes
- Access to income: Yes (Unskilled agricultural labour; Casual unskilled labour (construction); Humanitarian aid)
- Top expenses for residents: Food; Healthcare; NFIs
- Reported livelihood coping strategies: Borrowing money; Reducing spending on non-food expenditures such as health or education

Education/ Protection

- Access to education: Primary school
- Child labour reported: No
- Early marriage reported: No
- % of population without personal documentation: Most (around 75%)

Ar-Raqqa sub-district: Hawyjet Al-Sawafi

SSWG code: SS06_4840

SITE OVERVIEW

Site Typology: Tents
 Estimated IDP population: 650
 Population breakdown:
 47% male and 53% female
 38% children (under 18)
 43% adult (18-59)
 20% elderly (60+)

COVID-19

% of population aware of COVID-19: Most (around 75%)
 % of population that think it is an important issue: Most (around 75%)
 Reported issues understanding the information: Yes (Information is not clear (comprehensible); There are not enough materials)
 Community protection measures: Nothing
 Local authority protection measures: No measures
 % of population aware of social distancing: Most (around 75%)
 % of population engaging in social distancing: Nobody (around 0%)
 Social distancing issues: Living conditions do not allow for social distancing
 % of population who have received information on COVID-19 & protection measures: Most (around 75%)
 Common means to receive information about COVID-19: Posters/ flyers in the street; Television; Friends/family; Internet
 % of population with access to handwashing facilities: Nobody (around 0%)
 % of population with enough soap: Most (around 75%) (Soap is too expensive)
 Main issues with handwashing facilities: There are no handwashing facilities

Movement

- Primary area of origin: Tabni, Deir-ez-Zor
- Population intending to move in 6 months: 0%
- Top intended destination: NA

CCCM

- Distributions in the month before data collection: No
- Overall priority needs: Employment; Food; Winterization Kits
- Information needs: Information about returning to AoO; How to find job opportunities

WASH

- Primary drinking water source for IDPs: Tanker truck - private vendor
- Water access: About half of the population has enough water for their needs
- Water issues: Water tastes bad; Water smells bad; High water prices; Insufficient storage capacity
- Latrines: Communal latrine
- Main Issues with latrines: There are no latrines
- Alternatives to latrines in use: Open defecation outside the site (e.g. nearby fields or bushes); Digging private pits
- Bathing facilities: Bathing inside shelter
- Main issues with bathing: There are no showers
- Garbage disposal method: Burning garbage; Disposing at another location
- Garbage disposal issues: Complete lack of garbage removal

Healthcare

- No. of health facilities accessible to IDPs: 1 (Pharmacy/dispensary)
- Sufficient access to medical supplies for chronic illness: Yes

Shelter/ NFI

- Adequacy issues with shelter(s): Insufficient number of shelters for the population; Structures are not sturdy and break/fall over easily; Many are heavily damaged/ unusable; Lack of insulation from cold; Leaking during rain; Limited ventilation; Lack of privacy inside shelter (no partitions, no doors); Lack of electricity; Lack of lighting; Lack of heating
- Shelter needs: New tents; Additional tents; Plastic sheeting
- Household needs per KIs: Bedding items (sheets, pillows); Winter blankets; Winter clothes; Heating fuel

Food/ Livelihoods

- Main food source: From local markets outside the camp/site; From family and friends in the area
- Access to food market(s): Yes
- Access to income: No
- Top expenses for residents: Food; Healthcare; Transportation; Debt
- Reported livelihood coping strategies: Support from friends / relatives; Borrowing money

Education/ Protection

- Access to education: No education facility available
- Child labour reported: No
- Early marriage reported: No
- % of population without personal documentation: A few (around 25%)

- Household needs per KIs: Mattresses/sleeping mats; Cooking fuel; Water containers

Food/ Livelihoods

- Main food source: Food distributions; From local markets outside the camp/site
- Access to food market(s): No
- Access to income: Yes (Smallholder agriculture/livestock; Subsistence agriculture/livestock; Unskilled agricultural labour)
- Top expenses for residents: Food; Healthcare; NFIs
- Reported livelihood coping strategies: Borrowing money; Reducing spending on non-food expenditures such as health or education

Education/ Protection

- Access to education: No education facility available
- Child labour reported: No
- Early marriage reported: No
- % of population without personal documentation: A few (around 25%)

SITE OVERVIEW

Site Typology: Tents
 Estimated IDP population: **880**
 Population breakdown:
 40% male and 60% female
 40% children (under 18)
 50% adult (18-59)
 10% elderly (60+)

COVID-19

% of population aware of COVID-19: Most (around 75%)
 % of population that think it is an important issue: Most (around 75%)
 Reported issues understanding the information: No
 Community protection measures: Stay at home as much as possible; Wash hands more regularly; Nothing
 Local authority protection measures: No measures
 % of population aware of social distancing: About half (around 50%)
 % of population engaging in social distancing: Nobody (around 0%)
 Social distancing issues: Living conditions do not allow for social distancing
 % of population who have received information on COVID-19 & protection measures: Most (around 75%)
 Common means to receive information about COVID-19: NGOs or charities; Television; Internet
 % of population with access to handwashing facilities: Nobody (around 0%)
 % of population with enough soap: Everyone (around 100%) (Soap is too expensive)
 Main issues with handwashing facilities: There are no handwashing facilities

Movement

- Primary area of origin: Abul Thohur, Idleb
- Population intending to move in 6 months: 0%
- Top intended destination: NA

CCCM

- Distributions in the month before data collection: No
- Overall priority needs: Employment; Food; Medical Care; Shelter Support
- Information needs: How to access assistance; How to find job opportunities; How to access health facilities

WASH

- Primary drinking water source for IDPs: Public or private water tanks; Public tap/standpipe
- Water access: Only a few/almost no one has enough water for their needs
- Water issues: No issues
- Latrines: Communal latrine
- Main Issues with latrines: There are not enough latrines; There is no separation between men/women; There are no lights; There are no private latrines
- Alternatives to latrines in use: None; Open defecation outside the site (e.g. nearby fields or bushes)
- Bathing facilities: Bathing inside shelter
- Main issues with bathing: There are no showers
- Garbage disposal method: Garbage collection (Local authorities)
- Garbage disposal issues: No challenges

Healthcare

- No. of health facilities accessible to IDPs: 3 (Private hospital/clinic; Pharmacy/dispensary; NGO clinic)
- Sufficient access to medical supplies for chronic illness: Yes

Shelter/ NFI

- Adequacy issues with shelter(s): Insufficient number of shelters for the population; Shelters are too small/ not enough space for entire household; Structures are not sturdy and break/fall over easily; Many are heavily damaged/ unusable; Lack of privacy inside shelter (no partitions, no doors); Unable to lock home securely; Lack of heating
- Shelter needs: New tents; Tarpaulins; Plastic sheeting
- Household needs per KIs: Bedding items (sheets, pillows); Mattresses/sleeping mats; Cooking fuel; Water containers

Food/ Livelihoods

- Main food source: From local markets outside the camp/site
- Access to food market(s): Yes
- Access to income: Yes (Casual unskilled labour (construction))
- Top expenses for residents: Food; Healthcare; Transportation
- Reported livelihood coping strategies: Reducing spending on non-food expenditures such as health or education

Education/ Protection

- Access to education: Primary school
- Child labour reported: No
- Early marriage reported: No
- % of population without personal documentation: A few (around 25%)

SITE OVERVIEW

Site Typology: Unfinished residential building
 Estimated IDP population: **2951**
 Population breakdown:
 40% male and 60% female
 50% children (under 18)
 40% adult (18-59)
 10% elderly (60+)

COVID-19

% of population aware of COVID-19: Everyone (around 100%)
 % of population that think it is an important issue: Nobody (around 0%)

 Social distancing issues: Living conditions do not allow for social distancing
 % of population who have received information on COVID-19 & protection measures: Everyone (around 100%)
 Common means to receive information about COVID-19: NGOs or charities; Internet
 % of population with access to handwashing facilities: Nobody (around 0%)
 % of population with enough soap: Everyone (around 100%) (Soap is too expensive)
 Main issues with handwashing facilities: There are no handwashing facilities

Movement

- Primary area of origin: Sokhneh, Homs
- Population intending to move in 6 months: 0%
- Top intended destination: NA

CCCM

- Distributions in the month before data collection: Yes (Drinking water)
- Overall priority needs: Employment; Food; Medical Care
- Information needs: How to access assistance; How to find job opportunities; How to access health facilities

WASH

- Primary drinking water source for IDPs: Tanker truck (NGO)
- Water access: Everyone/nearly everyone has enough water for their needs
- Water issues: No issues
- Latrines: Household latrine
- Main Issues with latrines: There are not enough latrines; There is no separation between men/women; There are no lights
- Alternatives to latrines in use: Open defecation outside the site (e.g. nearby fields or bushes)
- Bathing facilities: Bathing inside shelter
- Main issues with bathing: There are no showers
- Garbage disposal method: Burning garbage
- Garbage disposal issues: Complete lack of garbage removal

Healthcare

- No. of health facilities accessible to IDPs: 3 (Mobile clinic; Pharmacy/dispensary; Private hospital/clinic; NGO clinic)
- Sufficient access to medical supplies for chronic illness: Yes

Shelter/ NFIs

- Adequacy issues with shelter(s): Shelters are too small/not enough space for entire household; Unable to lock home securely; Lack of electricity; Lack of lighting; Lack of heating
- Shelter needs: New tents; Additional tents; Plastic sheeting
- Household needs per KIs: Bedding items (sheets, pillows); Mattresses/sleeping mats; Cooking fuel; Sources of light

Food/ Livelihoods

- Main food source: From local markets outside the camp/site
- Access to food market(s): Yes
- Access to income: Yes (Casual unskilled labour (construction))
- Top expenses for residents: Food; Healthcare; Transportation
- Reported livelihood coping strategies: Support from friends / relatives

Education/ Protection

- Access to education: Primary school
- Child labour reported: No
- Early marriage reported: No
- % of population without personal documentation: A few (around 25%)

- Primary area of origin: Mansura, Ar-Raqqa
- Population intending to move in 6 months: 0%
- Top intended destination: NA

CCCM

- Distributions in the month before data collection: Yes (Food)
- Overall priority needs: Employment; Food; Shelter Support; Sanitation
- Information needs: Sponsorship programs; How to find job opportunities; How to access health facilities

WASH

- Primary drinking water source for IDPs: Public tap/standpipe
- Water access: Everyone/nearly everyone has enough water for their needs
- Water issues: No issues
- Latrines: Household latrine; Communal latrine
- Main Issues with latrines: There are not enough latrines
- Alternatives to latrines in use: None
- Bathing facilities: Bathing inside shelter
- Main issues with bathing: There are no showers
- Garbage disposal method: Garbage collection (Local authorities)
- Garbage disposal issues: No challenges

Healthcare

- No. of health facilities accessible to IDPs: 2 (Public hospital/clinic; Pharmacy/dispensary)
- Sufficient access to medical supplies for chronic illness: Yes

Shelter/ NFI

- Adequacy issues with shelter(s): Insufficient number of shelters for the population; Shelters are too small/ not enough space for entire household; Lack of insulation from cold; Limited ventilation; Lack of privacy inside shelter (no partitions, no doors); Unable to lock home securely; Issues with household sanitation facilities/latrines
- Shelter needs: Tarpaulins; Plastic sheeting; Tools; Windows/doors
- Household needs per KIs: Bedding items (sheets, pillows); Mattresses/sleeping mats; Clothing; Winter blankets

Food/ Livelihoods

- Main food source: Food distributions; From local markets outside the camp/site; From family and friends in the area
- Access to food market(s): Yes
- Access to income: Yes (Casual unskilled labour (construction); Public security official (military, police, etc.); Gifts/in-kind assistance from household/friends; Humanitarian aid)
- Top expenses for residents: Food; Healthcare; NFIs; Debt
- Reported livelihood coping strategies: Spending savings; Support from friends / relatives; Selling assets; Borrowing money; Selling assistance items received

Education/ Protection

- Access to education: Primary school; Secondary school
- Child labour reported: No
- Early marriage reported: No
- % of population without personal documentation: Most (around 75%)

SITE OVERVIEW

Site Typology: School building
 Estimated IDP population: **224**

 % of population aware of social distancing: About half (around 50%)
 % of population engaging in social distancing: Nobody (around 0%)
 Social distancing issues: Living conditions do not allow for social distancing
 % of population who have received information on COVID-19 & protection measures: Everyone (around 100%)
 Common means to receive information about COVID-19: NGOs or charities; Posters/flyers in the street; Radio; Television; Friends/family; Internet
 % of population with access to handwashing facilities: Nobody (around 0%)
 % of population with enough soap: Most (around 75%) (Soap is too expensive)
 Main issues with handwashing facilities: There are no handwashing facilities; Soap too expensive

Movement

- Primary area of origin: Abu Kamal, Deir-ez-Zor
- Population intending to move in 6 months: 0%
- Top intended destination: NA

CCCM

- Distributions in the month before data collection: Yes (Winter blankets)
- Overall priority needs: Employment; Food; Shelter Support
- Information needs: How to access assistance; Information about returning to AoO; How to find job opportunities

WASH

- Primary drinking water source for IDPs: Piped connection to house (or neighbour's)
- Water access: Everyone/nearly everyone has enough water for their needs
- Water issues: No issues
- Latrines: Household latrine
- Main Issues with latrines: There are not enough latrines; There is no separation between men/women; There are no lights; There are no locks; Pits get full
- Alternatives to latrines in use: Open defecation outside the site (e.g. nearby fields or bushes)
- Bathing facilities: Bathing inside shelter
- Main issues with bathing: There are no showers
- Garbage disposal method: Burning garbage
- Garbage disposal issues: Complete lack of garbage removal

Healthcare

- No. of health facilities accessible to IDPs: 1 (Pharmacy/dispensary)
- Sufficient access to medical supplies for chronic illness: Yes

Shelter/ NFIs

- Adequacy issues with shelter(s): Insufficient number of shelters for the population; Shelters are too small/ not enough space for entire household; Structures are not sturdy and break/fall over easily; Many are heavily damaged/ unusable; Lack of insulation from cold; Leaking during rain; Lack of privacy inside shelter (no partitions, no doors); Unable to lock home securely; Issues with household sanitation facilities/latrines; Lack of electricity; Lack of lighting; Lack of heating
- Shelter needs: New tents; Additional tents; Plastic sheeting; Timber
- Household needs per KIs: Cooking utensils; Cooking fuel; Water containers; Heating fuel; Washing powder (for clothes)

Food/ Livelihoods

- Main food source: Food distributions; From local markets outside the camp/site
- Access to food market(s): Yes
- Access to income: Yes (Unskilled agricultural labour; Casual unskilled labour (construction); Humanitarian aid)
- Top expenses for residents: Food; Healthcare; NFIs
- Reported livelihood coping strategies: Borrowing money; Reducing spending on non-food expenditures such as health or education

Education/ Protection

- Access to education: Primary school
- Child labour reported: No
- Early marriage reported: No
- % of population without personal documentation: A few (around 25%)

Sabka sub-district: Akeirshi High School

SSWG code: SS27_4821

SITE OVERVIEW

Site Typology: School building
 Estimated IDP population: **23**
 Population breakdown:
 47% male and 53% female
 38% children (under 18)
 43% adult (18-59)
 20% elderly (60+)

COVID-19

% of population aware of COVID-19: Most (around 75%)
 % of population that think it is an important issue: Most (around 75%)
 Reported issues understanding the information: Yes (Information is not clear (comprehensible); There are not enough materials)
 Community protection measures: Nothing
 Local authority protection measures: No measures
 % of population aware of social distancing: Most (around 75%)
 % of population engaging in social distancing: Nobody (around 0%)

About REACH's COVID-19 response

As an initiative deployed in many vulnerable and crisis-affected countries, REACH is deeply concerned by the devastating impact the COVID-19 pandemic may have on the millions of affected people we seek to serve. REACH is currently working with Cash Working Groups and partners to scale up its programming in response to this pandemic, with the goal of identifying practical ways to inform humanitarian responses in the countries where we operate. Updates regarding REACH's response to COVID-19 can be found in [a devoted thread](#) on the REACH website. Contact geneva@impact-initiatives.org for further information.

About REACH Initiative

REACH Initiative facilitates the development of information tools and products that enhance the capacity of aid actors to make evidence-based decisions in emergency, recovery and development contexts. The methodologies used by REACH include primary data collection and in-depth analysis, and all activities are conducted through inter-agency aid coordination mechanisms. REACH is a joint initiative of IMPACT Initiatives, ACTED and the United Nations Institute for Training and Research - Operational Satellite Applications Programme (UNITAR-UNOSAT).
