KANSANGA NEIGHBORHOOD PROFILE

Urban community assessment Kampala, Uganda - July 2018

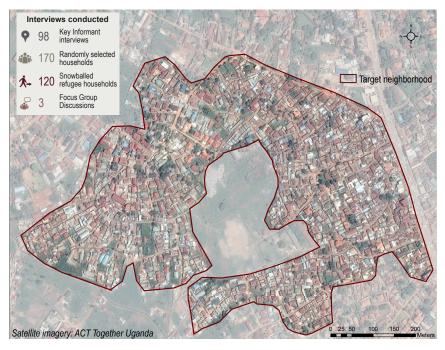

Surrounded by countries facing political instability, Uganda is the primary destination for refugees from South Sudan, the Democratic Republic of the Congo, Somalia, among others. In face of this influx, Uganda has introduced a progressive refugee-hosting policy,¹allowing freedom of movement and the right to work to over 1.4 million refugees² settled within its boundaries. Large numbers of refugees seek opportunities in urban centres, and many make their way to Kampala, the capital city and political, social and economic centre of Uganda. Home to 1.5 million inhabitants,³ including approximately 100,000 refugees,⁴ the city of Kampala keeps attracting rural migrants and refugees. While vulnerable refugees, who have the right to access the same basic services as Ugandans, tend to settle in substandard neighborhoods across the city, the continuous influx of vulnerable urban dwellers is putting pressure on already overburdened basic services.

To support the Kampala Capital City Authority (KCCA) and aid organisations to better localise and understand the needs and conditions of access to services for refugees and other vulnerable populations living in vulnerable urban neighborhoods, IMPACT Initiatives, together with ACTED, in the framework of their AGORA initiative, in partnership with the Norwegian Refugee Council and ACTogether Uganda, have undertaken an area-based multisector needs assessment in Kansanga, along with eight other neighborhoods in Kampala, between February and June 2018.

Map 1: Overview of the neighborhood of Kansanga and of the survey methodology used

Overview of Kansanga neighborhood

Kansanga is a vulnerable urban neighborhood in Kampala. It lies in Makindye Division, and is named after the parish it lies into. It is also referred to as Kansanga-Nabutiti. The assessed neighborhood covers some of the most vulnerable areas of this parish. This neighborhood comprises 7 cells, the lowest administrative unit for urban settings in Uganda. It is home to vulnerable socio-economic population groups, including refugees.

In the neighborhood of Kansanga, 22% of households reported that the quality of basic services available to them was poor. Poor sanitation is a major concern reported by residents and community leaders. 7 in 10 households do not have a access to private toilets, while poor waste management, blocking the drainage channels is reported by community leaders as a key public concern, which contributed to increase the risks of floods in Kansanga.

In Kansanga, refugees and nationals have access to the same basic services, although refugees report greater barriers to access them. For example, the research indicates that school-aged children who are part of refugee-headed households were reportedly more likely not to attend schools than others, which is mainly attributed to financial difficulties in paying school fees.

The lack of income is indeed a key concern reported by both refugees and nationals residing in Kansanga. It appears that refugee-headed households earn slightly less than Ugandan-headed households, while female-headed households are less wealthy compared to their male counterparts, regardless of their status. In face of financial difficulties, households residing in Kansanga tend to use similar coping strategies, although refugee-headed households tend to rely more heavily on help from relatives than others. The vast majority of refugees feel well integrated within their host community, and even tend to feel safer than nationals.

Both nationals and refugees tend to report similar answers when it comes to challenges affecting the whole community, namely insecurity and lack of economic opportunities.

¹ Grandi praises Uganda's 'model' treatment of refugees, urges regional leaders to make peace J.Clayton for United Nations High Commissioner for Refugees (UNHCR), January 2018

² While this report was being edited, a verification process of the refugee registration figures undertaken by the Office of the Prime Minister and the UNHCR was on-going.

³ Uganda National Bureau of Statistics, National Census, 2014

METHODOLOGY

To measure the dynamics of access to and delivery of basic services in the neighborhood of Kansanga, the assessment comprised several phases.

Phase 1: Key Informant Interviews with service providers

The first phase of data collection aimed at mapping the supply of basic services commonly used by residents of Kansanga, located both inside and outside the neighborhood. On 9th February 2018, 98 Key Informants interviews were conducted with service providers, including education and health care facilities, as well as shared and public water sources and sanitation facilities. Key informants were people who were especially knowledgeable on the services targeted by this survey.

Phases 2 and 3: Household surveys with host communities and refugees

The second and third phases of data collection aimed at assessing access to services and socio-economic characteristics of refugees and host communities residing in Kansanga. During Phase 2 undertaken on 7th March 2018, 170 household interviews¹ were administered to randomly selected households (HHs), including all population groups residing in Kansanga. This random household sample captured 13 refugee households, 59 female-headed households and 109 female respondents. In order to collect more information about refugees specifically, the same survey was administered to 120 refugee households residing in the target neighborhood, and identified through a snowballing technique during Phase 3, on 29th March 2018. In total, 133 refugee households were interviewed in Kansanga, either during phase 2 or phase 3.

Phases 4 and 5: Focus Group Discussions

Findings from phases 2 and 3 provided information about where specific nationalities of refugees are most likely to be located among the neighborhoods covered by the assessment. Focus Group Discussions (FGDs) with Eritreans were organised in Kansanga, this community of refugees being well represented in this neighborhood. 2 FGDs were conducted during phase 4, on 5th May 2018, with men and women separately. Each FGD gathered 8 participants who have been identified among refugees residing in Kansanga with the support of community leaders and facilitators. During the 5th phase of the assessment, the research presented and validated the key findings with community leaders of the target neighborhood during one FGD, conducted on 14th June 2018. During this exercise, community leaders shared their vision to prioritize needs and future interventions in Kansanga.

Limitations

Findings from the household surveys are meant to illustrate the specific situation of various population groups residing in Kansanga, including refugees. The use of a snowballing sampling technique to identify refugee households during phase 3 implies that results from this sample should be considered as indicative whereas findings from the random household survey conducted during phase 2 are representative of the whole population of the neighborhood, with a 90% confidence level and 10% margin of error.

¹ The survey questionnaire has been contextualised from the Urban Multi sector Vulnerability Assessment Tool (UMVAT), introduced in 2017 by the Stronger Cities Consortium.

M DEMOGRAPHICS

15,000

Estimated number of inhabitants in Kansanga²

Average number of people per household

35%

Of households are headed by a female.

Proportion of households by reported status:

88% National residents

8% Refugees

4% Foreigners and migrants³

31% of refugees residing in Kansanga come from Somalia and

28% come from the Democratic Republic of the Congo.⁴

Most common reasons reported by households for choosing to settle in Kansanga:⁶

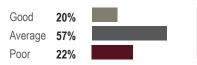

Access to services 44%

Cost of accomodation 41%

Access to jobs 25%

ACCESS TO SERVICES

Perception of quality and accessibility of services⁵:

11%

Of all households reported difficulties to access services.

Most common barriers to service accessibility reported by households who reported access is difficult:⁵⁻⁶

PRIORITY NEEDS

Based on the research findings, community leaders from Kansanga identified key priorities to improve living conditions in the community:

- Improvement and expansion of the drainage and sewing system
- Improvement of the routine garbage collection system
- Grant public health centres with medical supplies and staff
- increase the number of teachers in public schools
- Construction of more classrooms for existing schools
- Construction of vocational centres

⁶ Respondents could give multiple answers to this questions, therefore the total exceeds 100%.

² Uganda National Bureau of Statistics, National Census, 2014

³ Foreigners are respondents who define themselves as non-nationals without the refugee status. Migrants are respondents who define themselves as nationals who have been long-term displaced from other locations in the country.

⁴ These findings are drawn from the snowballed refugee household survey. The use of this sampling methodology implies that findings are indicative only.

Due to a small sample size, results for this indicator are indicative.

EDUCATION

Existing education facilities accessed by residents of Kansanga:

7 Nursery schools

Primary schools

3 Secondary schools

Key Informants for education facilities reported that lack of school materials was the main challenge for schools, followed by overcrowded classrooms.

School attendance:

8% of school-aged children (7-17 years old) residing in Kansanga were not attending school, as revealed by the random household survey. Refugee-headed households reported that **14%** of children of the same age group were not attending school. Diseases was the most common reason given by both households and Key Informants for education facilities to explain school non-attendance and drop-out.

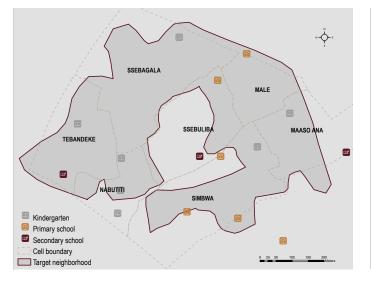

Share of education expenses in households' budget:

29% 24%

Of households reported education as their largest expense.

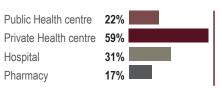

Of households were willing to spend more on education costs.²

Map 2: Location of education facilities used by residents of Kansanga:

HEALTH

Most commonly used health care providers by households:4

Of health centres had no professional doctor among their staff according to Key Informants.

Most commonly reported issues in accessing health care for households:⁴

Cost	67%	
Distance	39%	
Lack of medication	32%	

Eritrean refugees who participated in FGDs reported cost of health care as a major barrier to access health services. Host community participants indicate that a majority of residents go to private clinics, cheaper than public centres.

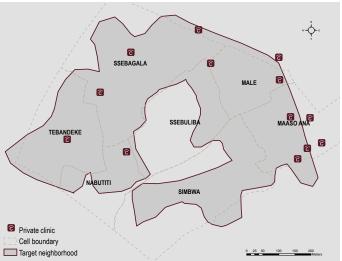

Importance of health expenses in households' budget:

107,000 UGX

Average household expenditure for medical care in the last 90 \mbox{days}^3

8% Of households were willing to spend more on health care.²

Map 3: Location of health facilities used by residents of Kansanga:

⁴ 1 USD = 3,688 UGX and 1 EUR = 4,328 UGX, xe.com as per 16nd July 2018

¹ These findings are drawn from the snowballed refugee household survey. The use of this sampling methodology implies that findings are indicative only.

² Households declaring they would prioritise education or health expenses if they benefited from an additionnal amount of 200,000 UGX. It is equivalent to 54 USD. www.xe.com, as of 16th July 2018.

³ Respondents could give multiple answers to this questions, therefore the total exceeds 100%.

WATER AND SANITATION

Primary drinking water sources used by households¹:

Shared private tap Communal tap 28% 16% Own private tap 11% Protected spring

10% of households reported that the quality of these water sources was not good enough to drink. 40% of communal taps were constructed directly by the community, according to water points Key Informants.

Access to sanitation reported by households:

70% Of households reported having no private access to sanitation.

Average number of households sharing one toilet

Of households reported being dissatisfied with the quality of 26%

Most common issues with sanitation reported by households¹:

Latrines are dirty Many people 50% Lack of latrines 41% Doors do not lock 15%

HOUSING LAND AND PROPERTY

Housing conditions reported by households:

2.2 Average number of rooms per housing unit

68% Of households are tenants.

Of national tenants reported spending over 150,000 UGX 50% monthly for rent.

50% Of refugee tenants reported spending over 300,000 UGX monthly² for rent.

25% Of households reported housing is their largest expense.

6% Of households were willing to spend more for housing.³

Of households considered that their accommodation or location 41% in the area put them at risk of disasters (like floods).

Perception of housing safety reported by households:

Very safe	47%	Insecurity and threat
Somewhat safe	37%	natural disasters wer ,ost common reasons
Quite unsafe	7%	respondents feel unsa
Very unsafe	9%	their accommodation.

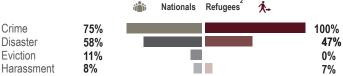

15% of households considered that forced evictions are common in Kansanga. 12% reported they have been directly threatened of eviction in the year prior to the assessment. Eritrean refugees staying in Kansanga reported in FGDs that they pay higher rent than Ugandans.

PROTECTION & SOCIAL COHESION

Proportion of respondents who declared they feel safe:4

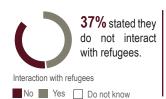

Most common reasons why respondents reported feeling unsafe:14-5

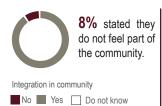

↑ Refugees²

Nationals

The language barrier was the most commonly reported reason for lack of interaction. Secondly, nationals reported that refugees are not friendly. Those who reported they interact with refugees stated they greet them and are friends with them.

Discrimination against refugees was the most commonly reported reason for lack of integration. Friendship with locals was commonly reported as a factor of integration, as well as the presence of refugees from the same community of origin in the neighborhood.

LEGAL ASSISTANCE

Challenges to access legal entitlement reported by respondents:4

44% of national respondents reported that obtaining official documents is difficult, while 46%² of refugee respondents shared this opinion.

Among respondents who reported that obtaining official documents is difficult,5 81% mentioned Lengthy procedures as a major barrier, and 55% reported that the process is costly.

Challenges to access justice reported by respondents:4

33% of respondents reported that accessing justice is difficult, while 38%² of refugee respondents shared this opinion.

Among respondents who reported that access to justice is difficult.⁵ 47% mentioned fear of going to court as a major barrier, and the same proportion reported cost.

³ Households declaring they would prioritise expenses for accommodation if they benefited from an additionnal amount of 200,000 UGX. It is equivalent to 54 USD. www.xe.com, as of 16th July 2018. ⁴ These indicators reflect the respondents' perception rather than this of the household they belong to. For this reason, these indicators relate to the gender or status of respondents, rather than this of the head of the household. Women and refugees include respectively 109 and 133 respondents. ⁵ As the sample sizes for this indicator are small, results are indicative.

¹ Respondents could give multiple answers to this questions, therefore the total exceeds 100%.

² These findings are drawn from the snowballed refugee household survey. The use of this sampling methodology implies that findings are indicative only.

1070 Education	10 /0 110111	1170 Eddodion

Specific considerations regarding refugee households:

FGDs with Eritrean refugees revealed that language is a major barrier to integration into the job market. Host community participants reported that refugees enjoy a better standard of living than nationals in general, according to the general belief that they are wealthier. However, economic challenges reported by both host comunity and refugees in FGDs are relatively similar, both emphasizing that lack of capital is a barrier to launching a business.

ASSISTANCE

Proportion of households reporting a need for assistance:

National-headed HHs

Female-headed HHs²

Refugee-headed HHs3

Most common challenges faced by the community in Kansanga reported by households:

National-headed HHs		↑ Refugee-headed HHs³	
17%	Insecurity Lack of income Lack of food	12%	Lack of income Insecurity Lack of housing

Preferred modes of assistance reported by households:

Direct cash assistance and a combination of in-kind and cash assistance are the modes of support that were reported the most by households residing in Kansanga. Respectively 49% and 56% of households mentioned these types of assistance among their preferred modes of assistance.4

Challenges for access to assistance reported by refugees:

Some Eritrean refugees who took part in FGDs reported receiving support from relatives and from their embassy, while mentioning that the most needed types of assistance were provision of accommodation, support to access healthcare, and financial support to cover education costs for children.

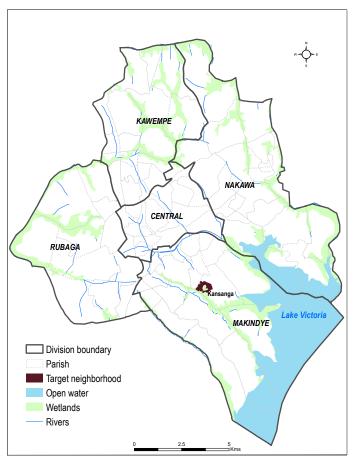

⁴ The total percentage exceeds 100% as respondents could give multiple answers to the question.

² Female-headed households represent 32% of the total random sample in Kansanga, with 59 cases. Due to small sample size, these findings are indicative only.

³ These findings are drawn from the snowballed refugee household survey. The use of this sampling methodology implies that findings are indicative only

Map 4: Location of the vulnerable neighborhood of Kansanga in Kampala:

Leveraging local capacities Promoting settlement approaches Enabling integrated reponse

AGORA is a joint initiative of ACTED and IMPACT Initiatives, founded in 2016. AGORA promotes efficient, inclusive and integrated local planning, aid response and service delivery in contexts of crisis through applying settlement-based processes and tools.

AGORA enables more efficient and tailored aid responses to support the recovery and stabilization of crisis-affected communities, contributing to meet their humanitarian needs, whilst promoting the re-establishment of local services and supporting local governance actors. AGORA promotes multi-sectoral, settlement-based aid planning and implementation, structured around partnerships between local, national and international stakeholders.

AGORA's core activities include community mapping, multisector and areabased assessments, needs prioritisation and planning, as well as support to area-based coordination mechanisms and institutional cooperation.

This area profile represents a key product within a global AGORA program supported by the European Civil Protection and Humanitarian Aid Operations (ECHO), targeting cities in crisis to inform area-based response and recovery plans, and provide support to information management and coordination efforts.

Kampala Capital City Authority, (KCCA) is the body that is charged with administration of Kampala on behalf of the Central Government. It was established by an act of the Ugandan Parliament in 2011 (KCC Act, 2010), giving Kampala a special political and administrative status.

The Executive Director oversees the regulation and/or delivery of basic services in the community. Currently, KCCA oversees 79 free public schools with an enrolment of more than 65,000 pupils and students and 11 free public Health Centres and Hospitals attending to 65% of its 1,500,000 residents. In addition, the Authority manages Development Control, Revenue Collection, Waste management and Sanitation among other services. Effectively, Kampala now has a dedicated Cabinet Minister, and KCCA has the licence and responsibility to oversee the provision of all public services in its jurisdiction.

With a growth rate of 3.6%, Kampala is the 13th fastest growing city in the World, projected to be a mega-city of more than 10 million inhabitants in the next 20 years. The refugee population in Kampala has significantly increased in the last few years, and KCCA is currently drafting a comprehensive plan to deal with the challenges and exploit the opportunities presented with this changing demographic reality.

The Norwegian Refugee Council (NRC) works in both new and protracted crises across 31 countries. Our 6,000 employees provide life-saving and long-term assistance to millions of people every year. NRC specialises in six areas: livelihoods and food security, education, shelter, legal assistance, camp management, and water, sanitation and hygiene. NRC is a determined advocate for displaced people. We promote and defend their rights and dignity in local communities, with national governments and in the international arena. NRC has been implementing projects for internally displaced persons and refugees in Northern Uganda, West Nile and South West since 1997, helping to create a safer and more dignified life for refugees and internally displaced people. NRC advocates for the rights of displaced populations and offers assistance within the shelter, education, emergency food security and livelihoods, legal assistance, and water, sanitation and hygiene sectors.

ACTOGETHER

ACTogether is the national support NGO charged with providing technical and financial assistance to the National Slum Dwellers Federation of Uganda (NSDFU). ACTogether, established in 2006, facilitates processes that develop organizational capacity at the local level and promote pro-poor policy and practice in Uganda's urban development arena. ACTogether strives to create inclusive cities with united and empowered communities of the urban poor who have the capacity to voice, promote, and negotiate for their collective interests.
